PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, FIRST SESSION

SENATE—*Friday, November 20, 1981*

(Legislative day of Monday, November 2, 1981)

The Senate met at 6 p.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Lord God of Abraham, Isaac, Jacob, and Jesus, may we remember the spiritual roots from which our Republic springs; the Judeo-Christian tradition with its majestic ethical principles and precepts found in the Bible. We thank Thee for that which we hold in common with Islam; the one Holy Lord God of the Old Testament; father Abraham of whom we all are children: Israel through Isaac, Islam through Ishmael, Christianity through Jesus Christ; and Mt. Sinai with its Ten Commandments of Moses, the basis of all moral order.

Forgive us, Lord, when we are blind or indifferent to the much we have in common and magnify that which divides and destroys to the great delight of that consummate deceiver of all mankind, Satan. Deliver us, gracious God, from the attitude that makes enemies of those with whom we disagree. Help us to be faithful to our distinctive convictions without compromise; to respect that which is distinctive about others; and to obey the supreme law of love for all. We ask this in the name of Him who is the supreme and sovereign Lord of the universe. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SCHEDULE—SECOND CONTINUING RESOLUTION

Mr. BAKER. Mr. President, I am advised by Representative MICHEL, the Republican leader in the House of Representatives, that in colloquy with the majority leader in the House and the Speaker, it is the intention of the House to examine the progress of the conference on the continuing resolution at 9:30 p.m. and to make a determination then on whether the House will remain in session during the night to receive the conference report, or whether it will go out until the morning.

Shortly, I will ask the Senate to recess subject to the call of the Chair, with the intention to ask the Senate to reconvene shortly after 9:30 p.m.

Since the House must act first on the conference report, we must necessarily have some insight about their plans before we can intelligently plan the schedule of the Senate.

Mr. President, there is no other business that I care to transact this evening. It is my hope that the conferees will succeed in producing a document which can be adopted by the House of Representatives and transmitted to the Senate yet this evening.

I am prepared to ask the Senate, and I must apologize for saying so, to remain in session and to act on it tonight, if the House of Representatives does as well.

Mr. President, I have no need for the remainder of my time under the standing order; and before I ask the Senate to recess, I will yield in order that the distinguished acting minority leader may claim his time.

Mr. CRANSTON. I thank the majority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I inquire of the minority leader if he is in a position to consider two nominations on today's Executive Calendar on page 2, under Department of State—to wit, Milan D. Bish, of Nebraska, and Elliott Abrams, of the District of Columbia.

Mr. CRANSTON. Yes. They are cleared on this side.

Mr. BAKER. I thank the acting minority leader.

Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the two nominations just identified.

There being no objection, the Senate proceeded to consider executive business.

The PRESIDING OFFICER (Mr. PERCY). The nominations will be stated.

DEPARTMENT OF STATE

The legislative clerk read the nomination of Milan D. Bish, of Nebraska, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Barbados, and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to Saint Lucia and Ambassador Extraordinary and Plenipotentiary of the United States of America to Saint Vincent and the Grenadines.

The PRESIDING OFFICER. The nomination is considered and confirmed.

The legislative clerk read the nomination of Elliott Abrams, of the District of Columbia, to be Assistant Secretary of State for Human Rights and Humanitarian Affairs.

Mr. CRANSTON. Mr. President, I should like to say a word about Elliott Abrams. I am delighted that he has been appointed to be Assistant Secretary of State for Human Rights and Humanitarian Affairs. He is a fine nominee for that post.

Mr. Abrams has had experience on the Hill working with Senators and has displayed great skill and understanding of the sort of problems he will be confronting in his new post.

I also wish to pay tribute to the administration for proceeding to make a very, very fine nomination for this post. We had a very controversial nomination earlier. I am delighted that the outcome of that process has been a man who I think will do much for the cause of human rights and much for the United States in terms of its position in the world, in pursuit of better human rights for all people everywhere.

The PRESIDING OFFICER. The nomination is considered and confirmed.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

There being no objection, the Senate resumed the consideration of legislative business.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Mr. BAKER. Mr. President, I now yield to the Senator from Kansas.

Mrs. KASSEBAUM. I thank the majority leader.

(The remarks of Mrs. KASSEBAUM in connection with the introduction of legislation are printed under Statements on Introduced Bills and Joint Resolutions.)

Mr. BAKER. Mr. President, I have two unanimous-consent requests that I should like to put and I ask if the minority leader may be in a position to approve them.

Mr. CRANSTON. I am pleased to agree to those requests, Mr. President.

BILL HELD AT DESK—H.R. 4845

Mr. BAKER. Mr. President, I ask unanimous consent that H.R. 4845, an act to designate the Robert V. Denney Federal Building and Courthouse, be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RETURN OF BILL TO SENATE—H.R. 3210

Mr. BAKER. Mr. President, I ask unanimous consent that the Secretary of the Senate be directed to ask the House of Representatives to return to the Senate H.R. 3210, the Federal-aid Highway Act of 1981, together with accompanying papers.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I know of no further business that can be transacted at this time.

Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 6:30 p.m., in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

THE QUESTION OF F-16'S TO PAKISTAN

Mr. PERCY. Madam President, while the distinguished majority leader, the chairman of the Committee on Appropriations, the assistant minority leader, and the ranking member of the Committee on Foreign Relations are on the floor, I wonder if I may have their attention for just a moment.

We have discussed the question of F-16's, which is extremely important to all of us. I do not know whether it is possible to get clarification of what we can and will do, but I should like to indicate to all my colleagues that, having spoken with Secretary Haig about this important matter, he has expressed an understanding of the committee's responsible action in voting decisively to defeat the resolution of disapproval. He has expressed the understanding that the House Foreign Affairs Committee, after voting down a similar resolution, has decided not to bring it to the House floor. Thus, even if this matter were to pass the Senate, the resolution only would pointlessly embarrass our Pakistan friends.

Given the importance of Pakistan to our long-term strategy for bringing security in that area and to our global efforts to contain Soviet expansionism, I believe the Senate would uphold the decision of the Committee on Foreign Relations.

Is it the thinking now of the distinguished chairman of the Committee on Appropriations that we shall try to bring this up formally, or will it just be brought up in such a way that Senators can discuss their feelings on it, but acceding to the suggestion of the administration that bringing up the resolution formally would serve no purpose whatsoever?

Mr. HATFIELD. Madam President, I say to the Senator in response to his question that he has stated the situation correctly when he says that the House has acted on this in terms of a formal resolution of disapproval. I would say that there could be very positive purposes served by bringing it up in the Senate, where Senators would realize that there was not the political importance that could be attached to this in terms of embarrassing the administration or whatever it might be.

There is no attempt to embarrass the administration as far as I am concerned, but I think we might get a vote of conscience, of true conviction, on the substantive issue. That is why I have pursued it up to this point and why I want to continue to pursue it. In fact, I may offer a sense of the Senate resolution that would supersede, in a sense, not the legal aspects of a resolution of disapproval but a sense of the Senate.

I have talked with the Assistant Secretary of the Department of State this afternoon, late. In that personal conversation, we had some very good understanding about two of my major problems. One is what would happen if there were some detonation of nuclear weapon as far as future deliveries are concerned. The other issue is human rights.

I had very excellent response from the Assistant Secretary. I assured the Assistant Secretary that if, somehow, this could be put in a communication that would assure me that this conversation was more than coffee-cup conversation and that it did represent policy that may not be ready for public discussion or public announcement because it is in a formulative stage or whatever it may be, that would satisfy me and that I would not raise or I would withdraw from pursuing this subject. I was assured that that would be taken up immediately with the Secretary of State. I indicated the urgency of the time factor and so forth.

I am awaiting a response to that discussion and if it should follow that I was given certain assurances in some documentation that I would receive on any basis they selected—confidential or otherwise—it could cause me to reassess my strategy of pursuing this.

I say to my good friend, the chairman of the Senate Committee on Foreign Relations, I think we have something far more here than the legal problem in a resolution of disapproval. We have the substantive question of whether we want to continue to expand our military and arms-peddling role to the tune of $4 billion to a country that has not yet developed an infrastructure that is significant enough to be called an infrastructure or a sufficient agriculture base to feed their own people; where, 2 years ago, that same Government stood by and watched our Embassy burn; and where two-thirds of that army is on the Indian border. Not on the Afghanistan border, not as a symbol of anti-Sovietism, but on the Indian border.

There are political, social, economic, and military consequences in this that I think have a far greater impact on the future of this Nation and its relationship to that part of the world and the entire world than merely an administration policy that is evolving or an administration foreign policy that may not yet be fully defined.

I wish to have input in that formulation because, I say to the Senator, we have followed a bankrupt policy too many times and it has ended up with the bloody cost of lives and money. I think we should be at the point of the starting gate where we raise our voices rather than wringing our hands at the fact about a policy we may disagree with because we did not stand up at the time it was beginning and make some statement.

I have heard people say we are helping them economically. We have a $100 million economic aid. What kind of economic aid is it? It is security economic aid. It is not developmental economic aid.

So there are a lot of refinements of these issues. I want a full decision of this body, if I am not able to acquire the kind of commitment in documentation that I believe really is on the same side of the issue that I am on. I do not consider myself at this point, I say to the Senator from Illinois, that I am an antagonist of the administration's foreign policy on Pakistan.

I just want to get the kind of affirmation of what I discussed today on the telephone in some kind of documentation so it is more than just casual chat.

Mr. PERCY. I will certainly see that the administration is made aware of the colloquies heard on the floor tonight.

I do know the deep sense of conviction with which my distinguished colleague has spoken on this issue and the sense of victory we had on other issues that imperiled this Nation in the past. We joined together so many times on the Vietnam war. We do not want a recurrence. We do not want to stumble into another situation like that.

But having spent many, many months on this issue and knowing well the Near East and South Asia, I must conclude the majority of the committee is correct in supporting the administration.

But certainly I will work with the Senator from Oregon, the Chairman of the Appropriations Committee, in receiving assurances from the administration that we are proceeding cautiously, that we have set goals, objectives, and benchmarks by which we can gage our policy. This is in essence in the tradition of the Senate.

I assure my distinguished colleague I will be available all weekend to return once we dispose of the urgent matter before us for which the distinguished chair-

man of the Appropriations Committee is directly responsible. I stand ready to back him in that effort and to take up this issue of Pakistan at the appropriate time.

Mr. HATFIELD. Madam President, if the Senator will yield, I wish to say I received nothing but the warmest, finest cooperation from the Senator from Illinois, and I am very grateful to him for that kind of cooperation on not only this issue but on every issue about which I expressed a concern.

Let me give the Senator one example. Does the Senator, the chairman of the Foreign Relations Committee, have a defined position on the question that if there should be some detonation of a nuclear weapon by the country of Pakistan at some future time what would be the response of this Nation in the delivery of F–16's that are part of this package and of the country that has indicated that it wants to join in the building of an Islamic bomb, of a country that is led by a dictator who has indicated his great affection and his close association with Colonel Qadhafi of Libya? What kind of a real assurance or what kind of a position does this country have in that relationship in that context?

Mr. PERCY. My position is the same, I am happy to say, as every other Senator in the Senate. If any country detonated a nuclear device, they would be immediately suspended from economic and military assistance. That means Pakistan. That means any other country.

Mr. HATFIELD. What is the administration's position?

Mr. PERCY. The administration's position will have to be determined when we adopt this law both in the Senate and the House of Representatives and send that bill to the President for signature. I will certainly transmit to the administration the strong feelings expressed by the Senate. They are already on notice. We will transmit the strong feelings of the chairman of the Appropriations Committee.

But the reason I think we should at this time enter into a closer relationship with Pakistan is they feel isolated, they feel alone, and without friends. They see billions and billions of dollars of sophisticated weaponry going to India from the Soviet Union on the most lenient terms. The Pakistanis have seen Prime Minister Ghandi arrange the purchase of several hundred of the most sophisticated fighter aircraft in the world today, the Mig-23, the Mig-25 and the Jaguars of Great Britain. Yet, Pakistan has much less sophisticated and older equipment.

There is only one option for the Pakistan military to follow if they are cut off from conventional forces. But if we have an arrangement and are working with them to shore up their conventional forces, they would have something significant to lose if they detonate a nuclear device. Discouraging the detonation of a nuclear device is the hope and I believe the intention of the administration.

But I will try to determine more clearly the administration's position on these issues.

Mr. HATFIELD. Madam President, will the Senator yield for just one moment before I have to go to the conference committee on the continuing resolution?

Mr. PERCY. I yield.

Mr. HATFIELD. The Senator has stated my case really more eloquently than I have stated it for the simple reason that I asked the question what is the administration's position. If I understood the Senator correctly he said, in effect, there is no position at the moment on that question, that it will be resolved.

Mr. PERCY. I do not know their position, but they may well have one.

Mr. HATFIELD. All right. He does not know of a position at this time.

It seems to me rather than waiting for Congress to establish a foreign policy position, we should know the position of the administration which after all is constitutionally the major responsibility of the Executive. The President has publicly derided and condemned the Senate and Congress for trying to play foreign policy rolemaker.

Why would we engage in the commitment of the sale of arms and the kind of arms like the F–16 until we knew the position of the administration and the policy of the administration?

It seems like we are putting the cart, and in this case the F–16's, before the horse.

Mr. PERCY. The answer can be provided now on reflection.

Mr. HATFIELD. It can be.

Mr. PERCY. The thought process is a little slower after no sleep for how many hours, but I do now recall that when the amendment, banning all assistance to any country that detonates a nuclear devise, was put forward the administration found a policy which applied to all nations preferable to one which discriminates between states.

Mr. HATFIELD. I thank the Senator.

Mr. PERCY. Again let me pay tribute to my distinguished colleagues on the minority side of the aisle for the deep feelings they have about this. We have arrived at different judgments and opinions but certainly we want to respect the rights of the minority in this regard. We will certainly take this into account when at the proper time this issue is raised, whether it is this weekend or sometime in the future. We will exhaust this subject with the administration and then clearly formulate what our position would be.

Mr. PELL. Madam President, I strongly agree with the thoughts expressed by the Senator from Oregon. To set the record straight, I note that the cutoff in the event of a nuclear detonation does not apply to cash sales.

Mr. HATFIELD. I thank the Senator.

Mr. PERCY. Madam President, I believe I have the floor. I did want to do that.

Mr. CRANSTON. Madam President, may I say one word before the Senator leaves?

Mr. PERCY. I yield 30 seconds to the Senator from California.

Mr. CRANSTON. Madam President, I just want to rise to express my total agreement with every word, thought, and concern expressed by the Senator from Oregon. I seldom find a Senator saying exactly what I would like to say, but he did in this case.

I totally agree with his very deep apprehensions about the situation developing in Pakistan, and I look forward to working with him intimately on this matter.

I thank the chairman of the committee for his concern and his attention, and I also thank Senator PELL for his.

RECESS UNTIL 9:30 P.M.

Mr. BAKER. Madam President, I know of no further business to be transacted at this moment, and in keeping with the announcement I made earlier in the evening I intend to consult with the Speaker and with the minority leader in the House about 9:30 p.m. in order to be in a position to schedule the activities of the Senate and to make a further announcement on that subject without undue delay.

Madam President, I ask unanimous consent now that the Senate stand in recess until the hour of 9:30 p.m.

There being no objection, the Senate, at 6:31 p.m., recessed until 9:30 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. BOSCHWITZ).

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 9:45 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

SECOND CONTINUING APPROPRIATIONS, 1982

Mr. BAKER. Mr. President, the conference on the disagreeing votes of the two Houses on the continuing resolution making appropriations for the agencies and departments of Government is still in progress, and no doubt will continue for much of the night. I hope they are making progress, I think they are making progress, and I urge them to make progress so we can complete this matter as soon as possible.

I have been advised, however, that the House of Representatives is now in recess until the hour of 10 a.m. tomorrow. The Senate cannot act on the conference report in any event until the House acts. Under the procedures of the Congress the House must act first in this case.

Shortly I will ask that the Senate recess over until tomorrow.

ORDER FOR RECESS UNTIL SATURDAY, NOVEMBER 21, 1981

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand

in recess until the hour of 12 noon tomorrow.

Mr. MATHIAS. What hour?

Mr. BAKER. Twelve noon, and no further negotiations will be entertained.

[Laughter.]

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, there are a few matters that must yet be dealt with or Members agree that we will deal with them later, and I have not yet been able to reach those involved in those matters. So for the moment while I try to reach them I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONTINUING RESOLUTION, HOUSE JOINT RESOLUTION 357

Mr. MITCHELL. Mr. President, my vote against the continuing resolution reflects my judgment of three major issues associated with the form and intent of this resolution.

First, the passage of a long-term resolution to finance the activities of the entire Federal Government is an unprecedented dereliction of congressional responsibility. Such resolutions are often needed to continue the operations of some Government agencies over a short period between the end of a fiscal year until the regular appropriations are enacted. That is the proper use of this mechanism. The resolution the Senate approved, however, would finance not one or two departments or agencies for a month, but every single agency and operation of the entire Federal Government for a minimum of 6 full months. This has never been done before.

Not only is it a new departure, it is unnecessary. Contrary to the President's assertions, at least five appropriations measures have been considered by both Houses and are being delayed by the Senate leadership—one, the HUD bill, since September. A stopgap bill of this scope and duration would not, in fact, be needed if the Senate had been permitted to act on those nearly concluded bills. It is evident that the purpose of this major continuing resolution goes beyond the housekeeping chore of maintaining Federal operations to the question of policy. But the proper place to set policy in this Nation is in the Congress.

I do not believe it is a responsible discharge of Congress obligations to abandon our responsibility to appropriate funds in this fashion.

Second, Majority Leader BAKER'S across-the-board cut of $5.3 billion in nondefense, discretionary spending is harsh and irresponsible. It is not based on decisions about specific programs, on priorities established by Congress, or on any analysis of the differential impact of such cuts. It is, purely and simply, a number plucked from the air by the executive branch to meet an unsubstantiated demand for further cuts. It represents neither care, nor caution, nor consideration of its further effects on the Government agencies that must administer the programs, on the States which must adjust their operations, nor on the people to whom services are provided through these programs.

At the end of a year of careful—and massive—budget-cutting, where individual programs were judged on their merits, where priorities were argued and finally established, where the comparative importance of different Government and public goals were weighed against each other, to impose a further sweeping, unconsidered across-the-board cut is a form of budgetary demagoguery that I could not endorse.

And last, but most important, the sweeping authority given to the President to cut individual programs in accordance with his own priorities is a massive abdication of the constitutional responsibility of the Congress to appropriate the public funds. It substitutes the judgment of one individual for the joint decisions of 535 Members of the legislature. It effectively negates the process of hearings, committee consideration of agency requests and congressional consensus that is embodied in the regular appropriations bills. It makes a mockery of the entire budget process in which Congress attempts to define national priorities, to adjudicate differences and to establish fiscal policy for the Nation.

Each of these issues has implications which I believe are important to the institutional role of the Congress and equally important to the Nation.

A long-term "temporary" spending resolution such as this one provides neither an adequate forum nor the time to debate each significant item thoroughly. It commits the Government to operate at figures which are the "lower of" 1981 figures, or a House-passed bill which the Senate may or may not endorse, or, in this case, a figure the President imposes. There are issues on which the Senate and the House of Representatives have different spending preferences. Those differences should be reconciled in Senate-House conferences so that the institutional biases or predelictions of one or another body do not rule unchecked. Stopgap spending resolutions do not permit such a rational outcome.

A stopgap spending resolution of this nature demonstrates a lack of will and initiative on the part of the Senate majority leadership to let the Senate make the choices it must make.

Since March of this year, the administration has presented so many budget preferences, has agreed to so many modifications of its demands, has reneged on so many of those agreements, and has asked for "cuts" based on so many questionable assumptions that it is very unclear what exactly the President is now demanding of the Congress.

We have cut spending by $2 billion more than he asked in March. We changed his spending preferences—changes he and Budget Director Stockman said were acceptable as long as the overall spending ceiling was not breached. It has not been breached. The individual appropriation bills making their way through the House and this body are below the budget resolution that was adopted by the Congress. That resolution was endorsed by the President as a major victory in July.

In September it was not enough. The President asked for $13 billion in further cuts and tax increases. He has since sent to the Congress neither the specific cuts he mentioned nor the tax increases. He simply indicated he wants all domestic spending cut by 12 percent, regardless of what level it now is at, regardless of what cuts have already been made. And he has asked that this 12 percent cut be made, not from the agreed-upon budget—a budget that had the agreement of the entire Congress and the executive branch in July—but from his March budget, a budget whose basis was unclear then and has since had serious doubt cast on it by Mr. Stockman himself.

The Senate leadership has not endorsed this spending cut. The House of Representatives has chosen to make other, more selective reductions in spending. And the President himself announced that he would not, in fact, be asking for specific cuts until January, nor for tax increases, either. He has asked Congress to find $13 billion to move toward a 1984 balanced budget goal that he has himself abandoned. He has rejected the option of making the components of that $13 billion clear now, near the beginning of the fiscal year. Yes, as I understand it, we are still expected to find the money within fiscal 1982.

At the same time, the President has repeatedly threatened to veto any bill that busts the budget. He has refused to make clear just which budget it is that Congress ought not bust.

My concern about this kind of budgetary confusion goes beyond the concern that programs I value are being sacrificed for inadequate reasons. It goes, instead, to the heart of the relationship between the Government in our domestic system and our people.

Americans must trust their Government if it is to work. Without public trust, no fiscal policy can be written that will represent any kind of consensus. No national priorities can be set that reflect public perceptions. And no foundation exists on which Government can ask its people to accept hardships and sacrifices in the pursuit of a common goal.

We risk undermining that trust when we treat the programs which affect millions of Americans' lives with the cavalier disregard which characterizes the administration's approach to the budget. A stopgap spending resolution, whose only purpose is to protect the illusion of budgetary restraint when the reality is otherwise, simply undermines the public confidence in the Government and the Congress.

Americans are well aware that the major cause moderating inflation and interest rates is the recession which has increased to 8.5 million the number of their fellow citizens out of work. They are equally well aware that the wild surge in interest rates and the fall in the bond

market this summer reflected concern about misleading budgetary claims by the administration.

There is absolutely no justification for this massive stopgap funding bill except the need to preserve a veneer of agreement on the part of the Senate majority where no agreement, in fact, exists.

I am willing to remain in session, to stay late at night and to work on the individual appropriations bills in an orderly and expeditious fashion. I am willing to meet earlier in January to make certain the appropriations process—now well under way—is properly concluded. But I am unwilling to give my assent to a stopgap resolution that simply reflects the majority's desire to avoid hard choices and to subject those decisions to the judgment of the full Senate.

Earlier this year, in the summer, when it became evident that the fiscally expansionary Reagan economic plan was on a collision course with its own tight monetary policy, I expressed the hope that spending cuts would be considered regardless of which side of the aisle they emanated from.

During debate on this resolution, Senator SASSER offered an amendment that would have cut between $4 and $6 billion in spending by making reductions in Federal employee travel, by reducing the political appointees' payroll as well as the career civil service, by making real cuts in agencies' film-making programs, publications programs, in public relations offices, and in consultants' contracts.

A lengthy and persuasive legislative record has established that spending on such secondary items consumes enormous amounts of tax dollars. During the election campaign of 1980, in fact, Candidate Reagan cited these facts and claimed that the entire Federal budget could be balanced by cutting just this kind of waste. It has been calculated that travel allowances alone would keep 20,000 individuals aloft 365 days a year. This kind of spending is precisely the kind of spending that it makes sense to cut. It takes nothing from essential defense needs. It takes nothing from the social safety net. It cuts nothing from real services. It cuts agency self-aggrandizement and agency self-promotion.

The amendment was rejected on a party-line vote, not because it lacked logic, or because it could not have been done, or because it would have seriously undermined the ability of government to function. It was rejected solely because it was offered by a Democrat.

Yet, the very same evening, we were faced with a 4-percent across-the-board cut in nondefense, discretionary spending; a cut so massive, so vaguely defined, so uncircumscribed by any deference to commonsense or budgetary responsibility, that it simply exposes the Congress to ridicule. This massive cut would come from all programs, whether they had been protected from earlier cuts, such as the Clinch River Breeder Reactor program, or whether they had already been cut to the bone, such as low-income fuel assistance, which was cut by $200 million from last year's funding level.

This is not a carefully circumscribed cut that would take from waste or focus on secondary activities; it would take as much from the programs that finance education for disadvantaged children and handicapped as it would from the costs of the tobacco subsidy or the peanut allotment program.

By what logic or consistency or compassion or commonsense can we treat the cost of subsidizing major energy companies in their search for alternative fuels the same as we treat programs which extend medical care to rural communities. This cut treats them identically.

The Congress spent the better part of this year making judgments and weighing competing claims on government to achieve a budget resolution and a spending guide that meets the need for fiscal restraint and rationally reflects the needs of our society and the priority concerns of our people. To negate that effort, to ignore that work in a futile chase after arbitrary and arguable dollar savings is to make a mockery of the entire process by which the Congress makes spending decisions and accepts or rejects programs.

The Senate leadership could not accept a cut of $4 to $6 billion that was limited to demonstrably second-priority activities. But it could and did insist on the right to make a purported savings of $5.3 billion across the board, exempting every single activity of the Department of Defense, from the putting greens on military bases to the film-making efforts of the Pentagon. The Senate leadership could not accept a reduction in political appointees, but it could and did accept a cut that takes as much from elderly programs as it does from the owners of tobacco allotments.

I refuse to be party to such an abdication of the Congress' responsibilities to the Constitution and to the people.

The fact of the matter is that the additional savings the President demanded in September are not warranted by inaction on the part of the Congress—as he has charged. They are not warranted to reach a 1984 balanced budget, a goal he has abandoned.

When Congress made its spending cuts earlier this year, it recognized that the administration's figures for the economy were optimistic. That was made even more clear when the social security cuts were advanced on the basis of pessimistic assumptions. Yet, we are now asked to make drastic cuts in real programs in a vain attempt to make the real world conform to an unreal series of economic projections whose only justification was to sell the American public on the need for cutting the budget.

I did not need those phony budget projections to vote for spending restraint. I have voted to reduce needless spending since last year, and I expect to keep on doing so. But I will not be party to a heedless and harmful cut designed to bolster patently false economic assumptions and projects.

The forces that are bringing the budget further out of balance than either the Congress or the administration want to see would be better addressed by efforts to bring interest rates down than by making cuts in programs which have, for the greatest part, already been substantially reduced.

Most importantly, I could not support this across-the-board slashing because it contained as well a pernicious provision which totally abandons the congressional responsibility for setting spending levels, abandons any pretense of Congressional responsibility for program review or oversight, and awards to the executive branch unfettered authority to cut any individual program by a full 5 percent in accordance with its own dictates of need and its own perceptions of priority.

An administration which believes that energy conservation is a low priority item, which believes that environmental protection can well stand further reductions, and which support a nuclear power program that has lost the backing of the private nuclear industry—all in the face of substantial public opinion to the contrary—ought not be given carte blanche to cut further into domestic programs simply because the Senate lacks the will and the courage to decide whether and where any further cuts should be made.

There is simply no basis for Congress to abdicate its constitutional responsibilities in this fashion. The stopgap funding resolution ought to be a stopgap. Instead, the Senate majority has transformed it into a blank check in a vain effort to shed its shared responsibility and to evade public disapproval of more spending cuts. That is not only political expediency at its worst, it is constitutionally questionable.

Congress has erected and has attempted to make operate a budget process which is designed to help it make decisions about national priorities, in consultation with the executive branch. That entire process might as well not exist if we are simply going to give the executive a modified line-item veto over individual programs in the manner of the Baker amendment.

Twelve years ago, the Nixon administration misused the impoundment authority of the executive in an effort to create a de facto line-item veto. Congress, after a lengthy and difficult process of court decisions and legislative action, finally developed the budget process which gives both branches of Government adequate input into spending priorities and decisions. The process has been subjected to intense strains this year to accommodate the administration's speeded-up timetable of budgetary adjustments. Indeed, it has been stretched to accomplish legislative goals for which it was never designed.

But this amendment takes an important further step and brings into serious question the entire budget process which has been so laboriously developed and nurtured by the Congress. Its loss would be a severe setback for the cause of congressional fiscal responsibility in the long term. And its weakening, by this provision of the Baker amendment, represents a lack of confidence in the Congress ability to exercise its proper functions that can only help further undermine the consensus for any kind of fiscal restraint or responsible fiscal policymaking in the future.

I very much regret this outcome. It is not an outcome in which I take any pride. And in the long term, it is an outcome that may well cloud the positive achievements of this Congress.

DEATH OF WILLIAM H. BLACKWELL

Mr. THURMOND. Mr. President, this past Sunday, South Carolina and particularly the Pee Dee area of the State, lost one of its finest citizens with the death of William H. Blackwell of Florence.

Bill Blackwell was a native South Carolinian and practiced law in Florence for the past 32 years as a partner in the law firm of Wright, Scott, Blackwell, and Powers. A person of considerable intellectual ability, Mr. Blackwell was a Phi Beta Kappa graduate of Wofford College and an honor graduate of the University of South Carolina School of Law.

During World War II, he served his country as an officer in the 86th Fighter Group in North Africa and Europe. Later he retired from the U.S. Air Force Reserve with the rank of lieutenant colonel.

Mr. Blackwell is survived by his wife, Mrs. Helene Carpenter Blackwell of Florence, and by two lovely daughters, Mrs. Daniel E. Ervin of Charleston and Miss Hayden Blackwell of Mt. Pleasant. To these ladies, I extend my deepest sympathy.

For more than three decades, as husband and father, as a practicing attorney, and as an active and concerned citizen, Bill Blackwell made countless contributions toward enhancing the quality of life for the citizens of Florence and the greater Pee Dee area.

Additionally, his diligence and great personal integrity in the discharge of his everyday responsibilities won him the esteem not only of his colleagues but all those who were privileged to come into contact with him.

Persevering through a long illness, Bill Blackwell demonstrated in sickness and in death the great faith and courage which he consistently displayed throughout his life.

Mr. President, I request unanimous consent that an article on Mr. Blackwell from the November 16 edition of the Florence Morning News be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FLORENCE ATTORNEY DIES AT 65

Florence attorney William Hayden Blackwell died Sunday in a local hospital after a long illness. He was 65.

Funeral will be at 11 a.m. Tuesday in Central United Methodist Church. Burial will be in Mount Hope Cemetery, directed by Waters Funeral Home.

Mr. Blackwell was a partner in the law firm of Wright, Scott, Blackwell and Powers and was a practicing attorney for 32 years, specializing in contract, insurance, corporation, real estate, wills, trusts and estates.

He retired as a lieutenant colonel in the U.S. Air Force Reserve and served on active duty as an air combat intelligence officer in the 86th Fighter Group in North Africa and Europe during World War II.

Born in Pacolet, he was a son of the late William Joseph and Eva Genoble Blackwell. He received his undergraduate degree from Wofford College and his law degree from the University of South Carolina.

Blackwell was the Florence Young Man of the Year in 1950 and president of the Florence Chamber of Commerce in 1952. President of the Florence Kiwanis Club in 1958, he was a member of The Judicial Council of South Carolina, the American Bar Association and member and past president of the Florence County Bar Association. He was also a past chairman of the Central United Methodist Church Board of Stewards, past president of The Friends of Francis Marion College, past chairman of The Francis Marion College Foundation and chairman of the Board of Directors of Security Savings and Loan Association.

Blackwell was a member of the Advisory Board of Directors at Peoples Bank of South Carolina and a member of the board of directors of both the Florence Museum and Bruce Hospital.

On Dec. 21, 1978, Blackwell received the Distinguished Service Award from Francis Marion College.

Surviving are his wife, Mrs. Helene Carpenter Blackwell of Florence; two daughters, Mrs. Daniel E. (Anne) Ervin of Charleston and Miss Hayden Blackwell of Mt. Pleasant; two sisters, Mrs. W. Judson Sloan of Lyman and Mrs. Rod Berry of Pacolet.

Memorials may be made to the Building Fund at Central United Methodist Church, The Blackwell Fund at St. Mary's College in Raleigh, N.C., or The Blackwell Scholarship Fund at Francis Marion College.

CONFIRMATION HEARING STATEMENT OF ELLIOT ABRAMS POINTS OUT NEED FOR GENOCIDE RATIFICATION

Mr. PROXMIRE. Mr. President, on Tuesday of this week, the Foreign Relations Committee heard testimony from Elliot Abrams, President Reagan's nominee for the position of Assistant Secretary of State for Human Rights and Humanitarian Affairs. The committee subsequently approved Mr. Abrams' nomination by a vote of 13 to zero.

Mr. Abrams' opening statement presented several important issues. Emphasizing the long tradition of support for human rights in this country, Mr. Abrams said:

But the role of human rights in our foreign policy dates not from 1977, but from 1776. The United States was found to secure the blessings of liberty, and as the President recently said, "The promotion of liberty has always been a central element of our nation's foreign policy."

Mr. Abrams perceived the difficulties of dealing with human rights issues in a complex world where the degree to which governments respect political freedoms varies greatly. Again, he cited the President, this time describing the duty of the United States in today's world:

We will speak up against the enemies of freedom and we will try to help its friends. We will encourage those who seek freedom, not least by telling the simple truth of their efforts and the efforts of those who seek to oppress them.

Finally, Mr. Abrams stated the two rules upon which he aims to base his efforts to promote and protect human rights in American foreign policy: the need for truth and the need for effective action. In his statement, he stressed the moral obligation to be truthful in dealing with human rights affairs.

Most importantly, Mr. Abrams referred to the need to choose a course of action with a "practical goal in mind: How can we help?"

Mr. President, ratification of the Genocide Convention would address all of the issues raised by Mr. Abrams. As an affirmation of the value of human life and human rights, the treaty certainly continues the tradition of promoting human rights and liberty which has its source, as Mr. Abrams pointed out, "not from 1977, but from 1776."

Through its ratification of the Genocide Treaty, the United States would make a decisive movement toward speaking up against the enemies of freedom.

Finally, ratification of the treaty provides an obvious answer to Mr. Abrams' question, "How can we help?" How much more practical an act is there than the ratification of a convention which would join the United States with over 80 other nations in an international agreement which legally asserts the value of human life.

In closing, Mr. Abrams stated:

How can we help to expand the frontiers of liberty by an inch or by a mile? Our aim must never be simply to make us feel good or others feel bad; it must be to defend and to promote the cause of liberty.

The Genocide Treaty is consistent with all of the principles which underlie our Nation. Ratification of the treaty would expand the frontiers of liberty not by an inch or a mile, but incalculably.

MESSAGE FROM THE HOUSE RECEIVED DURING THE RECESS

Under the authority of the order of the Senate of November 20, 1981, the Secretary of the Senate, on November 20, 1981, received a message from the House of Representatives announcing that the House insists upon its amendments to the bill (S. 1211) to extend the Toxic Substances Control Act for 1 year, disagreed to by the Senate, agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. DINGELL, Mr. FLORIO, Mr. SCHEUER, Mr. BROYHILL, and Mr. LENT as managers of the conference on the part of the House.

The message also announced that the House has passed the following joint resolution, with amendments:

S.J. Res. 100. Joint resolution to authorize the participation of the United States in a multinational force and observers to implement the treaty of peace between Egypt and Israel.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 21, 24, 29, 40, 59, 60, 61, and 66 to the bill, and has agreed thereto; it recedes from its disagreement to the amendments of the Senate numbered 14, 17, 18, 33, 47, 52, 57, and 64 to the bill, and has agreed thereto, each with an amendment, in which it requests the concurrence of the Senate; and that it insists upon its disagreement to the amendment of the Senate numbered 23 to the bill.

The message also announced that the House disagrees to the amendments of the Senate to the joint resolution (H.J. Res. 357) making further continuing ap-

propriations for the fiscal year 1982, and for other purposes; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. WHITTEN, Mr. BOLAND, Mr. NATCHER, Mr. SMITH of Iowa, Mr. ADDABBO, Mr. LONG of Maryland, Mr. YATES, Mr. ROYBAL, Mr. BEVILL, Mr. GINN, Mr. BENJAMIN, Mr. DIXON, Mr. FAZIO, Mr. CONTE, Mr. MCDADE, Mr. EDWARDS of Alabama, Mr. MYERS, Mr. ROBINSON, Mr. MILLER of Ohio, Mr. COUGHLIN, and Mr. YOUNG of Florida as managers of the conference on the part of the House.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 3663. An act to amend subtitle IV of title 49, United States Code, to provide for more effective regulation of motor carriers of passengers;

H.R. 4845. An act to designate the building known as the Lincoln Federal Building and Courthouse in Lincoln, Nebraska, as the "Robert V. Denney Federal Building and Courthouse"; and

H.R. 4879. An act to clarify the treatment of international banking facility deposits for purposes of deposit insurance assessments and to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association.

The message also announced that pursuant to section 451(a) of Public Law 96-374, the Speaker appoints Mr. FORD of Michigan as a member of the National Commission on Student Financial Assistance on the part of the House, vice Mr. OBEY, resigned.

ENROLLED BILLS SIGNED

The message further announced that the Speaker has signed the following enrolled bills:

H.R. 3413. An act to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes; and

H.R. 4522. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

MESSAGE FROM THE HOUSE

At 6:30 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House disagrees to the amendment of the Senate on the bill (H.R. 3567) to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes; asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. ZABLOCKI, Mr. BINGHAM, Mr. ECKART, Mr. BONKER, Mr. WOLPE, Mr. SHAMANSKY, Mr. BROOMFIELD, Mr. LAGOMARSINO, Mr. ERDAHL, Mr. GILMAN, and Mrs. HOLT as managers of the conference on the part of the House.

HOUSE BILLS REFERRED

The following bills were read twice by unanimous consent, and referred as indicated:

H.R. 3663. An act to amend subtitle IV of title 49, United States Code, to provide for more effective regulation of motor carriers of passengers; to the Committee on Commerce, Science, and Transportation.

H.R. 4879. An act to clarify the treatment of international banking facility deposits for purposes of deposit insurance assessments and to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association; to the Committee on Banking, Housing, and Urban Affairs.

HOUSE BILL HELD AT THE DESK

Tho following bill was ordered held at the desk by unanimous consent:

H.R. 4845. An act to designate the building known as the Lincoln Federal Building and Courthouse in Lincoln Nebr., as the "Robert V. Denny Federal Building and Courthouse."

ENROLLED BILL SIGNED

The PRESIDENT pro tempore (Mr. THURMOND) announced that on today, November 20, he signed the following enrolled bill, which had previously been signed by the Speaker of the House of Representatives:

H.R. 3454. An Act to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the United States Government, for the Intelligence Community Staff, and for the Central Intelligence Agency Retirement and Disability System, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the United States Government, and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, without amendment:

H.R. 3484. A bill to provide for the minting of half dollars with a design emblematic of the two hundred and fiftieth anniversary of the birth of George Washington (Rept. No. 97-277).

Mr. GARN. Mr. President, while reporting H.R. 3484, as unanimously agreed to by the Banking, Housing, and Urban Affairs Committee, I would just like to take a minute and note the contribution made by Senator MCCLURE on behalf of this legislation. Senator MCCLURE introduced S. 1228, the companion bill in the Senate which contains virtually identical provisions to H.R. 3484, to encourage efforts to mint precious metal legal tender coins whose sales would benefit the taxpayer. I appreciate and want to commend the Senator from Idaho for his efforts on this legislation.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. STAFFORD, from the Committee on Environment and Public Works:

Rickey Dale James, of Missouri, to be a member of the Mississippi River Commission for a term of 9 years;

Maj. Gen. William Edgar Read, [redacted], U.S. Army, to be a member and president of the Mississippi River Commission; and Maj. Gen. Hugh Granville Robinson, [redacted], U.S. Army, and Brig. Gen. Richard Samuel Kem, [redacted], U.S. Army, to be members of the Mississippi River Commission, under the provisions of section 2 of an act of Congress, approved 28 June 1879 (21 Stat. 37) (33 U.S.C. 642).

Brig. Gen. Homer Johnstone, Jr., [redacted], Col. Paul Bazilwich, Jr., [redacted], and Col. Paul Frederick Kavanaugh, [redacted], all of the Corps of Engineers, to be members of the California Debris Commission, under the provisions of section I of an act of Congress approved 1 March 1893 (27 Stat. 507) (33 U.S.C. 661).

By Mr. PERCY, from the Committee on Foreign Relations:

Treaty Doc. No. 97-7. Treaty of Extradition Between the United States and the Kingdom of the Netherlands, signed at The Hague on June 24, 1980 (Ex. Rept. No. 97-33);

Treaty Doc. No. 97-8. Treaty of Extradition Between the United States and the Republic of Colombia, signed at Washington on September 14, 1979 (Ex. Rept. 97-34);

Treaty Doc. No. 97-11. Treaty on Mutual Legal Assistance Between the United States and the Republic of Colombia, signed at Washington on August 20, 1980 (Ex. Rept. 97-35); and

Treaty Doc. No. 97-16. Treaty on Mutual Legal Assistance Between the United States and the Kingdom of the Netherlands, together with a related exchange of notes, signed at The Hague on June 12, 1981 (Ex. Rept. 97-36).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mrs. KASSEBAUM (for herself, Mr. DOLE, Mr. DURENBERGER, Mr. GRASSLEY, Mr. BUMPERS, Mr. EXON and Mr. PACKWOOD):

S. 1879. A bill to amend the Milwaukee Railroad Restructuring Act and the Rock Island Transition and Employee Assistance Act to facilitate the purchase of lines of bankrupt carriers to provide for continued rail and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. THURMOND (for himself, Mr. SPECTER and Mr. LAXALT):

S. 1880. A bill to amend the manufacturing clause of the copyright law; to the Committee on the Judiciary.

By Mr. SASSER (for himself, Mr. ABDNOR, Mr. BRADLEY, Mr. CHAFEE, Mr. BURDICK, Mr. CHILES, Mr. DECONCINI, Mr. DOMENICI, Mr. DIXON, Mr. EAGLETON, Mr. HART, Mr. JACKSON, Mr. KASTEN, Mr. LEVIN, Mr. NUNN, Mr. PERCY, Mr. PRYOR, Mr. STAFFORD, Mr. STENNIS, Mr. DURENBERGER, Mr. PRESSLER, Mr. SCHMITT and Mr. RIEGLE):

S. 1881. A bill to provide for the issuance of a commemorative stamp to honor the dedication of the Vietnam Veterans Memorial; to the Committee on Governmental Affairs.

By Mr. BAKER (for Mr. WARNER (for himself, Mr. HARRY F. BYRD, JR., Mr. RANDOLPH, Mr. TSONGAS, Mr. GOLDWATER, Mr. HUMPHREY, Mr. CRANSTON, Mr. CANNON and Mr. CHAFEE)):

S.J. Res. 130. A joint resolution designating February 22, 1982, the 250th anniversary of

the birth of George Washington, a "Day of National Celebration."; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mrs. KASSEBAUM (for herself, Mr. DOLE, Mr. DURENBERGER, Mr. GRASSLEY, Mr. BUMPERS, Mr. EXON, and Mr. PACKWOOD):

S. 1879. A bill to amend the Milwaukee Railroad Restructuring Act and the Rock Island Transition and Employee Assistance Act to facilitate the purchase of lines of bankrupt carriers to provide for continued rail services and for other purposes; to the Committee on Commerce, Science, and Transportation.

MILWAUKEE RAILROAD AND ROCK ISLAND RAILROAD AMENDMENTS ACT

Mrs. KASSEBAUM. Mr. President, service over the Rock Island rail system continues to be an economic lifeline to the Midwest, providing an essential, energy-efficient means of transporting huge volumes of agricultural and industrial products.

Mr. President, almost 2 years ago, the Rock Island Railroad system was confronting the imminent expiration of an Interstate Commerce Commission directed service order covering thousands of miles of essential rail lines. Over 5,000 railroad employees were faced with the loss of their jobs. Recognizing the crucial need for continued rail operations and the threatening nature of these conditions, Congress passed the Rock Island Transition Act. This legislation was intended to expedite the transfer of essential rail lines to interested carriers and shippers.

Since enactment of the Rock Island Transition Act, our hopes have been dashed by a series of court challenges. Although the Supreme Court will soon deal with the labor protection question which is currently pending before it, numerous obstacles impede the process of selling portions of the line to bona fide purchasers. Efforts to negotiate with the estate have been constantly thwarted to the detriment of shippers, jobless rail employees, and Rock Island creditors.

Without rail service, grain, fertilizer and other products will move slowly and more expensively. For example, the per bushel cash price offered to farmers if grain must be trucked is 5 cents to 17 cents below the rail rate. An indicator of the importance of the Rock Island comes from the Kansas City board of trade which has estimated the dollar value of the grain that passes through elevators served by the Rock at over $950 million. In Kansas, nearly 40 percent of the total commercial grain storage capacity is served by the Rock.

In order to provide a means for overcoming the roadblocks in the current process, I am, today, introducing legislation which would vest new authority in the ICC to insure that the public interest is served. As matters now stand, if a prospective purchaser offers a price there is no mechanism for determining a reasonable price and thereby facilitating the sale of the line.

Certainly, the constitutional rights of the creditors must be accounted for. However, their rights can be met without negatively infringing on the public interest. Ideally, good faith negotiations between the trustee and prospective purchasers would result in continued service. Recent events suggest that this may never occur.

Under my bill, if the Commission finds that a financially responsible person has made a bona fide offer for a reasonable price which has been rejected by the trustee, and if subsequent negotiations fail to reach agreement within 60 days on the amount of the sale, the Commission may determine a reasonable purchase price.

This shall not be less than net liquidation value of the line and this decision shall be binding on both parties unless the purchaser withdraws his offer within 10 days of the ICC decision. The bill directs the courts to approve the sale as long as the purchase price is not less than required as a constitutional minimum. In order to insure a smooth transition of service in the interim, the bill clarifies the ICC's authority to issue service orders until a plan of reorganization or liquidation is approved by the ICC and the court.

Mr. President, the public interest demands a binding, expedited transfer process—one where the tender of bona fide offers for purchase will result in a sale and one that will serve the essential transportation needs of the public while remaining cognizant of constitutional considerations. This legislation addresses these concerns by promoting the continuation of service which is so vital to shippers and to the communities that depend on an efficient and profitable farm economy.

I am confident this legislation will accommodate the competing concerns of those parties involved in negotiations for purchase of lines of bankrupt carriers and that it is the best way to insure that public interest is served.

I am pleased to be joined in this effort by Senator DOLE, who has worked very hard to protect economic interests throughout the Midwest, and by Senators DURENBERGER, BUMPERS, PACKWOOD, and GRASSLEY.

I ask unanimous consent that the bill and a section-by-section analysis be included in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 1879

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Milwaukee Railroad and Rock Island Railroad Amendments Act."

PURPOSE OF THE ACT

SEC. 2. This Act is part of the continuing effort by Congress to assure service over the lines of bankrupt carriers in instances where rail carriers are willing to provide service over such lines and financially responsible persons are willing to purchase the lines for continued rail operations.

CONGRESSIONAL FINDINGS

SEC. 3. The Congress hereby finds that it is in the public interest (1) to clarify the Commission's existing authority to consider purchase applications and to issue orders involving temporary authority; (2) to establish procedures to facilitate and expedite the sale of lines of bankrupt carriers to financially responsible persons in instances where the line has been abandoned by the bankrupt carrier or service is not being provided by such carrier, and the prospective purchaser seeks to provide rail service over such line or lines; and (3) that procedures set forth herein will provide a practicable means for preserving rail service, thus benefiting shippers, employees, and the economies of the States in which such bankrupt railroad or railroads operate, while at the same time providing safeguards to protect the interest of the estate of the bankrupt by requiring payment of a reasonable purchase price.

MILWAUKEE RAILROAD RESTRUCTURING ACT AMENDMENTS

SEC. 4. The Milwaukee Railroad Restructuring Act (49 U.S.C. 901) is amended as follows:

(1) Insert at the end of Section 3, the following new subparagraph:

"(7) For the purpose of section 17, a 'financially responsible person' means a person who is capable of paying the purchase price of the line proposed to be acquired and is able to cover expenses associated with providing service over the line for a period of not less than two years.

(2) Insert the following new subsection as Section 17(b)(3) and renumber section 17(b)(3) as section 17(b)(4):

(A) Any financially responsible person seeking to purchase (1) a line or lines of a bankrupt railroad no longer operating as a common carrier or (2) a line or lines of a bankrupt carrier over which no service is being provided by such carrier, may submit an application for purchase of such line or lines with the Commission if it intends to provide rail operations over the line and has made a bona fide offer to purchase at a price asserted to be reasonable which has been rejected by the trustee. A copy of any application filed pursuant to this subparagraph shall be simultaneously filed with the court.

(B) If the Commission finds, within 30 days after filing of an application under subparagraph (A) that a financially responsible person has made a bona fide offer to purchase a line or lines of a bankrupt railroad, as described in subparagraph (A), for a reasonable price, and that such offer has been rejected by the trustee, the parties shall have 60 days to agree on the amount of compensation for sale or transfer of the considered line or lines. If agreement is reached, a request for approval of the sale shall be filed with the Commission and the court.

(C) If the parties are unable to agree on the amount of compensation within the period specified in subparagraph (B), either party may, after at least 60 days but within 90 days, request the Commission to determine a reasonable purchase price for the considered line or lines. For the purposes of this subparagraph, a reasonable price shall be not less than net liquidation value of such line or lines as determined by the Commission. The Commission shall render its decision within 60 days. The decision of the Commission shall be binding upon both parties, subject to court review as provided in subparagraph (E), except that the person who has offered to purchase the line may withdraw the offer within 10 days of the Commission's decision.

(D) The Commission shall require, to the maximum extent practicable, the use of the employees who would normally have performed work in connection with a railroad line subject to a sale under this section.

(E) The Commission shall, within 15 days of decision, transmit to the court any order or decision under this subsection, unless the offer is withdrawn as provided in subsection (C) Notwithstanding any other provision of law, the court shall approve the sale so long as the purchase price is not less than required as a constitutional minimum for the line or lines.

(F) No purchaser of a line sold under this subsection may transfer or discontinue service on such line prior to the end of the second after consummation of the purchase.

(G) The Commission shall, within 45 days of the effective date of this subsection, prescribe any regulations and procedures which may be necessary to carry out the provisions of the subsection.

ROCK ISLAND TRANSITION AND EMPLOYEE ASSISTANCE ACT AMENDMENTS

SEC. 5. The Rock Island Transition and Employee Assistance Act (45 USC 1001) is amended as follows:

Insert at the end of Section 122(a) the following new sentence:

"The Commission's authority to issue orders under this section shall continue until a plan of reorganization or liquidation is approved by the Commission and the court."

SECTION-BY-SECTION ANALYSIS—S. 1879

SHORT TITLE

The short title of the Act is the "Milwaukee Railroad and Rock Island Railroad Amendments Act."

SECTION 2. PURPOSE OF THE ACT

The Act is designed to address the problems involved in arranging for continued rail service over the lines of bankrupt carriers. The purpose of the Act is to assure such continued service in instances where financially responsible persons are willing to purchase the lines for continued rail operations.

SECTION 3. CONGRESSIONAL FINDINGS

This section highlights the actions needed to assure that procedures exist which will facilitate the continuance of rail service over the lines of bankrupt carriers. In order to accomplish this goal, it is necessary to clarify the Commission's existing authority to consider applications to purchase portions of the rail system of a bankrupt carrier and to issue orders involving temporary authority over such lines. When a prospective purchaser is interested in providing service over lines which have been abandoned or service is not being provided by the bankrupt carrier, it is necessary to establish procedures to facilitate and expedite the sale of such lines. The procedures established by this Act will provide a practicable means for preserving rail service, thus benefitting shippers, employees, and the economies of the States in which such bankrupt railroad or railroads operate. At the same time providing safeguards to protect the interest of the estate of the bankrupt by requiring payment of a reasonable purchase price.

SECTION 4. THE MILWAUKEE RAILROAD RESTRUCTURING ACT AMENDMENTS

This section amends section 17 of the Milwaukee Railroad Restructuring Act in several respects. The purpose of the section is to clarify the Commission's existing authority to consider purchase applications.

Subparagraph (1) defines "financially responsible person" for the purpose of the section as a person who is capable of paying the purchase price of the line and one who is able to cover expenses associated with providing service over the line for a period of not less than two years.

Subparagraph (2) adds a new subsection 17(b)(3) and renumbers the existing section 17(b)(3) as section 17(b)(4). The new subsection (b)(3) establishes procedures to facilitate and expedite the sale of lines of bankrupt carriers to financially responsible persons in instances where the line has been abandoned by the bankrupt carrier or service is not being provided by such carrier, and the prospective purchaser seeks to provide rail service over such line or lines.

A financially responsible person seeking to purchase a line or lines under this provision may submit a application to the Commission if it has made a bona fide offer to purchase at a price asserted to be reasonable which has been rejected by the trustee. A copy of any such application must be simultaneously filed with the court.

The Commission has 30 days to make a finding that a bona fide offer has been made to purchase the line at a reasonable price, and that such offer has been rejected by the trustee. If the Commission makes such a finding, the parties have 60 days to agree on the amount of compensation for sale or transfer of the line.

Should the parties be unable to reach agreement on the purchase price within the 60-day period specified in this subsection, either party may request the Commission to determine a reasonable purchase price for the line, which shall not be less than net liquidation value of the property. The Commission is required to render a decision within 60 days; the decision shall be binding on both parties, subject to court review as provided in the subsection, unless the offeror withdraws its offer within 10 days of the decision.

Within 15 days of decision, the Commission must transmit its decision to the court, which shall approve the sale if the purchase price established by the Commission is not less than required as a constitutional minimum price.

The subsection further provides that any purchaser of a line under section 17(b)(3) may not transfer or discontinue service on the line prior to the end of the second year after consummation of the sale.

Finally, the Commission is authorized to prescribe any regulations and procedures which may be necessary. A 45-day period is specified for adoption of such implementing regulations and procedures.

SECTION 5. ROCK ISLAND TRANSITION AND EMPLOYEE ASSISTANCE ACT AMENDMENTS

Section 5 amends section 122(a) of the Rock Island Transition and Employee Assistance Act to clarify the authority of the Commission to authorize temporary operations under this section until a plan of reorganization or liquidation is filed and approved by the Commission and the court.

Mr. PERCY subsequently said: Madam President, while the distinguished Senator from Kansas was speaking on the floor of the Senate and I was in the chair presiding over the Senate, I could not immediately respond.

I would just like to make a matter of record the conversations that the Senator from Kansas and the Senator from Illinois have had. They were on the floor earlier this evening.

It is my understanding that the Senator from Kansas will not be offering an amendment involving the Rock Island on the reconciliation bill, but the Senator from Kansas will be offering a bill at an appropriate time involving the Rock Island, which will then give us an opportunity for hearings and discussion of that particular issue.

We may see this issue from a different vantage point, and we probably do, but I would want to pledge to the distinguished Senator my cooperation in working with her to resolve whatever differences we can. But it is my understanding that this will not be a part of the reconciliation process.

I thank my distinguished colleague for the insurance that she gave to me on this earlier this evening.

Madam President, I yield the floor.

Mr. DOLE. Mr. President, I am delighted to join my distinguished colleague from Kansas, Senator KASSEBAUM, in introducing this amendment to the Milwaukee Railroad Restructuring Act and the Rock Island Transition and Employee Assistance Act. As Senator KASSEBAUM has indicated, timely passage of this bill will help alleviate the numerous problems stemming from the bankruptcy of the Rock Island Railroad which have adversely affected the economy of all Midwestern States. It is the fervent hope of both Senators from Kansas that purchase of lines from bankrupt carriers can be swiftly effected so that rail service throughout the Midwest can be continued and, in some cases, restored.

The Rock Island Railroad has been in bankruptcy proceedings since 1975 in a Chicago Federal district court. The presiding judge has ordered that the bankruptcy estate be liquidated. There are some who would not be disturbed to see the eventual abandonment of most or all of the old Rock Island line. The trustee in bankruptcy himself was quoted in an October edition of Farmland News as saying that he would sell part of the line to other railroads and dismantle the rest.

Mr. President, the dismantling of these lines, some of which have been in existence for over a century, would be a clear repudiation of the public interest. Continued rail service over the old Rock Island lines in the "breadbasket of the world" is a must, not only to the shippers and communities along those routes but to the Nation at large, which depends so heavily upon the goods and commodities produced in this region. At present, many of the communities desperately in need of rail service have none; in other areas, rail service has been provided to date, but embargoes and the eventual shutdown of operations appear likely, unless legislative action is taken now.

Under the present statutory scheme, the purchase of segments of line from a bankruptcy estate does not occur unless an agreement can be reached between the purchaser and the trustee. Experience has taught us that the interests of prospective purchasers and of the trustee have historically conflicted, and have acted to prevent meaningful agreements from being reached. As each side has charged the other with a lack of good faith during negotiations, the resistance to compromise has deepened and the public interest has suffered greatly. Interim service along the routes in question depends on periodic assessments by the Interstate Commerce Commission that there is a reasonable prospect that an ultimate purchase contract can be successfully negotiated. The Senator from Kansas applauds the past willingness of the ICC to grant such temporary service orders. The fact that the validity of such orders has recently been negated by one Federal court, however, underscores the need for a legislative remedy.

Mr. President, the Senators from Kansas are confident that the legislation we introduce today will make it possible for long-term rail service to be provided. This legislation provides that a much necessary third party, the Interstate Commerce Commission, can assume the authority to review purchase applications when good faith purchase offers have been made and, in turn, rejected by the trustee. In short, the establishment of a procedure for review will break the impasse that inevitably develops in the bar-

gaining process. The Commission is empowered to determine a reasonable purchase price for the lines, with provisions for judicial review. There are a number of provisions which protect the bankruptcy estate, most notably a due process guarantee that the purchase price not be less than the constitutional minimum.

The Senator from Kansas urges this body to act swiftly on this matter to establish an effective procedure for arriving at final and equitable purchase prices for bankrupt rail lines.

By Mr. THURMOND (for himself, Mr. SPECTER, and Mr. LAXALT):

S. 1880. A bill to amend the manufacturing clause of the copyright law; to the Committee on the Judiciary.

MANUFACTURING COPYRIGHT

Mr. THURMOND. Mr. President, today, I am introducing legislation along with a number of cosponsors that would retain language in the copyright law of 1976 that requires nondramatic literary works copyrighted in the United States to be printed in the United States.

In 1976, the Congress approved a series of amendments to the U.S. copyright law. One of these amendments was the phaseout of the manufacturing clause which may result in the demise of the Nation's seventh largest manufacturing industry, the printing industry. The manufacturing clause, section 601 (a) of title 17 of the United States Code, provides that in exchange for full and unqualified U.S. copyright protection on "preponderantly non-dramatic literary works" by a U.S. author, the work must be manufactured—printed—in the United States or Canada. This clause has been part of the U.S. copyright law for 91 years. Its expiration may have a disastrous and unintended effect on the American printing industry.

Mr. President, although Congress approved the phaseout of the manufacturing clause in 1976, it did so only after House and Senate conferees agreed to delay the expiration until July 1, 1982, so studies could be made on its economic impact on the printing industry and the U.S. economy. This action was taken at the insistence of Senators Scott and McClellan after the Senate had voted 87 to 0 to retain the manufacturing clause.

In response to the request by the Congress, the U.S. Copyright Office conducted a study which was completed in July 1981. In addition, the Department of Labor conducted a study on the impact of the U.S. labor force as a result of the expiration of the manufacturing clause. The results of these studies do provide data that seems to indicate the manufacturing clause should not be allowed to expire next year.

The Copyright Office concluded that up to 19 percent of the U.S. book printing industry alone could be lost. It also concluded that it did not believe the retention of the manufacturing clause was necessary in order to preserve U.S. copyright protection. The Labor Department, however, reported that the expiration of the clause could result in the loss of between 78,000 and 172,000 jobs in the printing and publishing industry and up to 367,000 in the U.S. economy at large. Private economic studies have substantiated the Labor Department's forecasts.

Based on these projections, it seems reasonable to extend section 601. The loss to the U.S. printing industry would be a gain to foreign printers, but unlike traditional trade agreements, the U.S. economy realizes no reciprocal gain. Further, the United States has left itself in a particularly vulnerable situation by agreeing with over 80 other nations that it will not impose tariffs or duties on books or other educational or cultural materials. This agreement, known as the Florence agreement, was signed in 1966 and was in part possibly due to the existence of the manufacturing clause in the copyright law.

There is currently an effort underway in the House of Representatives to retain the manufacturing clause. Congressmen JOHN ASHBROOK and AUGUSTUS HAWKINS are leading a growing list of cosponsors in support of H.R. 3940. Thev believe that the U.S. economy is not strong enough at this point to begin the exportation of any appreciable amount of printing work to foreign printers. I am sympathetic to their position and, therefore, I am introducing legislation to strike provisions in chapter 17 that would repeal the manufacturing clause on July 1, 1982.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1880

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 601(a) of chapter 6 of title 17 of the United States Code is amended by striking out "Prior to July, 1982, and except" and inserting in lieu thereof "Except".

By Mr. SASSER (for himself and Mr. ABDNOR, Mr. BRADLEY, Mr. CHAFEE, Mr. BURDICK, Mr. CHILES, Mr. DECONCINI, Mr. DOMENICI, Mr. DIXON, Mr. EAGLETON, Mr. HART, Mr. JACKSON, Mr. KASTEN, Mr. LEVIN, Mr. NUNN, Mr. PERCY, Mr. PRYOR, Mr. STAFFORD, Mr. STENNIS, Mr. DURENBERGER, Mr. PRESSLER, Mr. SCHMITT, and Mr. RIEGLE):

S. 1881. A bill to provide for the issuance of a commemorative stamp to honor the dedication of the Vietnam Veterans Memorial; to the Committee on Governmental Affairs.

VIETNAM VETERANS MEMORIAL COMMEMORATIVE STAMP ACT OF 1981

Mr. SASSER. Mr. President, Americans will have a unique opportunity next Veterans Day to complete some unfinished business: the proper remembrance of those millions of Americans who served their country in the Vietnam war and in particular to the more than 57,000 men and women who gave their lives in that effort.

On that day, the Vietnam Veterans Memorial will be dedicated. In order to mark that dedication and to heighten American awareness of its significance, I am today introducing the Vietnam Veterans Memorial Commemorative Stamp Act of 1982, calling upon the U.S. Postal Service to issue a stamp honoring the dedication of the Vietnam Veterans Memorial. The stamp would be ready for issue on Veterans Day, 1982.

No matter how Americans think back on the Vietnam war today, the fact remains that nothing can erase the personal trials nor contributions of the millions who served there, nor will anything ever bring back those who lost their lives there.

Several years ago, one Vietnam veteran who came to Washington to work, Jan Scruggs, realized that officialdom in our Nation's Capital had overlooked the role of the Vietnam veteran. Along with some fellow veterans and others who shared his concern, he organized the Vietnam Veterans Memorial Fund. He and his colleagues began to talk to the Congress about the need for a fitting memorial.

The response came quickly. Last year the Congress enacted legislation setting aside a memorial site situated in Constitution Gardens near the Lincoln Memorial.

After a design competition in which over 1,400 people submitted proposals, the Vietnam Veterans Memorial Fund last May selected a plan. It is unlike so many other memorials in Washington. It is quiet and unobtrusive—a simple, v-shaped wall which will have the names of all those Americans who died in Vietnam written upon it.

Its design is not the only thing that makes this memorial unique. Not a penny of public money will pay for its construction. Even though the completed memorial is estimated to cost over $7 million, the project is being funded entirely through private contributions.

Leaders from every sector of American society—the business community, sports figures, minority leaders, the American Legion, the Veterans of Foreign Wars and AmVets—have lined up in support of the Vietnam Veterans Memorial Fund.

The target for groundbreaking ceremonies to begin the actual construction of the memorial is Memorial Day 1982.

As the construction of the memorial nears completion, it is my hope that Americans will join together in a better understanding and recognition of those who fought for, and gave their lives for, their country in Vietnam.

One small way in which the Federal Government can underscore this better understanding and recognition is through the issuance of a stamp commemorating the dedication of the Vietnam Veterans Memorial.

I would like to thank my distinguished colleagues Mr. ABDNOR, Mr. BRADLEY, Mr. CHAFEE, Mr. BURDICK, Mr. CHILES, Mr. DECONCINI, Mr. DIXON, Mr. DOMENICI, Mr. DURENBERGER, Mr. EAGLETON, Mr. HART, Mr. JACKSON, Mr. KASTEN, Mr. LEVIN, Mr. NUNN, Mr. PERCY, Mr. PRYOR, Mr. PRESSLER, Mr. RIEGLE, Mr. SCHMITT, Mr. STAFFORD, and Mr. STENNIS for joining with me in this legislation. I deeply appreciate the bipartisan support that this measure has received, and I hope that the Senate will move expeditiously to pass this legislation.

By Mr. BAKER (for Mr. WARNER) (for himself, Mr. HARRY F. BYRD, JR., Mr. RANDOLPH, Mr. TSONGAS, Mr. GOLDWATER, Mr. HUMPHREY, Mr. CRANSTON, Mr. CANNON, and Mr. CHAFEE):

S.J. Res. 130. Joint resolution designating February 22, 1982, the 250th anniversary of the birth of George Washington, a "Day of National Celebration;" to the Committee on the Judiciary.

DAY OF NATIONAL CELEBRATION

Mr. WARNER. Mr. President, I am introducing today along with Senator HARRY F. BYRD, JR., Mr. RANDOLPH, Mr. TSONGAS, Mr. GOLDWATER, Mr. HUMPHREY, Mr. CRANSTON, Mr. CANNON, Mr. CHAFEE, and Mr. EAST, a joint resolution commemorating the 250th anniversary of the birth of George Washington. This joint resolution is being introduced in the House this morning by Congressman PARRIS and cosponsored by Congressmen ROBINSON and TRIBLE.

One of our Nation's greatest leaders, Washington possessed considerable wisdom, unflagging energy, profound faith in God, and clear vision.

Frequently Washington is referred to as the "Father of our Country." This title, while perhaps a little exaggerated, is nonetheless appropriate when one considers Washington's leadership in America's quest for independence from the British and his inspiring leadership as both the President of the Constitutional Convention and the first President of the United States. He set the course for this Nation—a course charted in political stability unrivaled in the history of civilization.

George Washington was a great American and a great Virginian. He was a man who lived by his word, who professed virtue, conscience, good character, honesty, justice, and equality.

As important as his expression was in his day, the words of Washington hold meaning for all of us today. Who among us can quarrel with Washington that arbitrary power is most easily established on the ruins of liberty abused to licentiousness. Certainly his belief that to be prepared for war is the most effectual means of preserving peace has rung true through the ages and stands as a cornerstone to America's modern defense and foreign policy.

Mr. President, how fitting it is that just last month in Yorktown, Va., representatives from the United States, France, and Great Britain gathered to pay tribute to the last great victory of the American Revolution—a victory led by George Washington at the age of 49. And on February 22 of next year, 250 years will be marked since his birth. The joint resolution I introduce today is but a small tribute for the enormous contribution George Washington made to our Nation.

Let this day be observed with ceremonies and activities appropriate for this national leader. I urge the passage of the joint resolution.

ADDITIONAL COSPONSORS

S. 398

At the request of Mr. ARMSTRONG, the Senator from California (Mr. HAYAKAWA) was added as a cosponsor of S. 398, a bill to amend the Walsh-Healey Act and the Contract Work Hours Standards Act to permit certain employees to work a 10-hour day in the case of a 4-day workweek, and for other purposes.

S. 1215

At the request of Mr. KASTEN, the Senator from Wyoming (Mr. WALLOP) was added as a cosponsor of S. 1215, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1625

At the request of Mr. BENTSEN, the Senator from Tennessee (Mr. BAKER), the Senator from Michigan (Mr. RIEGLE), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Missouri (Mr. EAGLETON), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Virginia (Mr. WARNER), the Senator from New York (Mr. D'AMATO), and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of S. 1625, a bill to authorize the President of the United States to present on behalf of Congress a specially struck gold medal to the widow of Roy Wilkins.

At the request of Mr. MOYNIHAN, the Senator from Minnesota (Mr. DURENBERGER), the Senator from Massachusetts (Mr. TSONGAS), the Senator from New Mexico (Mr. SCHMITT), the Senator from Missouri (Mr. DANFORTH), the Senator from South Carolina (Mr. HOLLINGS), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Wisconsin (Mr. KASTEN), the Senator from Massachusetts (Mr. KENNEDY), the Senator from New Jersey (Mr. BRADLEY), the Senator from Wisconsin (Mr. PROXMIRE), the Senator from Michigan (Mr. LEVIN), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Hawaii (Mr. INOUYE), the Senator from Rhode Island (Mr. PELL), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Washington (Mr. JACKSON), and the Senator from Maryland (Mr. SARBANES) were added as cosponsors of S. 1625, supra.

SENATE JOINT RESOLUTION 118

At the request of Mr. BENTSEN, the Senator from North Dakota (Mr. BURDICK), the Senator from Georgia (Mr. NUNN), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Arkansas (Mr. BUMPERS), the Senator from Massachusetts (Mr. KENNEDY), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Nebraska (Mr. EXON), the Senator from Illinois (Mr. DIXON), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Kentucky (Mr. FORD), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Indiana (Mr. LUGAR), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Texas (Mr. TOWER), the Senator from New York (Mr. D'AMATO), the Senator from Pennsylvania (Mr. HEINZ), the Senator from New Hampshire (Mr. HUMPHREY), and the Senator from Maryland (Mr. SARBANES) were added as cosponsors of Senate Joint Resolution 118, a joint resolution to authorize and request the President to designate the month of January 1982 as "National Cerebral Palsy Month."

UP AMENDMENT NO. 680

At the request of Mr. CRANSTON, his name was added as a cosponsor of UP Amendment No. 680 proposed to House Joint Resolution 357, a joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

NOTICES OF HEARINGS

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Public Lands and Reserved Water of the Senate Energy and Natural Resources Committee to hear testimony on the protection of geothermal resources in Yellowstone National Park and in other units of the National Park System in consideration of S. 1516 and S. 669. The hearing will be held on Saturday, December 12, beginning at 1 p.m. at the Ramada Inn at I–25 and Center Street in Casper, Wyo.

Those persons and groups wishing to testify should contact Tony Bevinetto, Subcommittee on Public Lands and Reserved Water, room 3104, Dirksen Senate Office Building, Washington, D.C 20510 or Carol Poe, c/o Senator WALLOP, 2201 Federal Building, Casper, Wyo. 82601 (307–266–3240) no later than December 9, 1981.

Witnesses should supply the subcommittee with 50 copies of their written statements 24 hours in advance of the hearing at the Casper office.

Witnesses are requested to summarize their written statement to a maximum of 10 minutes of oral testimony.

For further information regarding this hearing you may wish to contact Mr. Tony Bevinetto of the subcommittee staff at 202–224–5161.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. GARN. Mr. President, the next vacancy on the Board of Governors of the Federal Reserve System will occur on January 31, 1982. Therefore I am scheduling hearings on various resolutions and bills dealing with the structure and membership of the Federal Reserve Board. The hearings will commence at 2:30 p.m. on November 30, 1981 and testimony will be given on Senate Resolution 209, S. 1859, Senate Concurrent Resolution 40, S. 971, S. 1609, and S. 1691.

ADDITIONAL STATEMENTS

ACID RAIN LEGISLATION

● Mr. WEICKER. Mr. President, acid precipitation, be it wet or dry in nature, is one of the major environmental problems facing us today and it looms as an ever worsening problem for the 1980's. With the conversion of many powerplants from petroleum and natural gas to coal, emissions loadings of pollutants such as sulfur and nitrogen oxides (SO_2NO_2) will increase and add to acid precipitation. The prospect of across-

the-board relaxation of auto emissions standards as proposed by H.R. 4400, the Mobile Source Clean Air Act Amendments of 1981, could further compound the problem of not only acid precipitation but general pollution loading of carbon monoxide (CO) and hydrocarbons as well.

This is not only a regional problem but also a global one. In fact the problem has placed a strain on our relations with our neighbor to the north, Canada. Many lakes in Canada and the United States are now devoid of most higher forms of animal life due to acidic precipitation and more are in imminent danger. The dollar value of the damage caused by this plight is already quite high. Unless we take action now to reduce our emission rates of SO_2 and NO_2 the problem will only become worse.

Acid rain causes numerous problems. Acid rains leach valuable minerals as well as mobilize toxic metals in the soil such as aluminum, copper, and lead. Through bioaccumulation toxic metals can become highly concentrated in our food chain and can pose a serious health hazard. In addition, acidic waters transported through metal pipes can corrode those pipes, causing toxic metals to go into solution and come out of the tap into our drinking water.

Acidic influx into bodies of water can increase the levels of methyl mercury in fish which in turn can be quite harmful to man. Also, acid mists may even be implicated in lung problems such as emphysema as well as certain heart ailments. In addition acid rain corrodes many manmade structures, such as monuments, buildings, and or finishes.

The scientific evidence amassed shows a direct correlation between SO_2 and NO_x emissions, coming mainly from powerplants and automobiles respectively, and acid precipitation. The National Academy of Sciences, in October 1981, issued a report entitled: "Atmosphere-Biosphere Interactions: Toward a Better Understanding of the Ecological Consequences of Fossil Fuel Combustion," in which it states that the "increased emissions of sulfur and nitrogen compounds from anthropogenic sources is the only plausible explanation for acid deposition" and that evidence of a close relationship is "overwhelming." Considering what we already know to be true, the time has come to take legislative action to alleviate the problem.

Industry representatives, as well as the EPA, feel that more studies are needed to prove a direct correlation between acid rain and SO_2 and NO_x emissions before any legislative action is taken. Industry is also rightfully concerned about the cost of emissions reductions as well as possible work force dislocation. In my opinion the correlative evidence is more than sufficient to warrant legislative action. The economic costs may be substantial but the costs of failing to act now will be immeasurably greater for ourselves and future generations.

Another major factor in dealing with acid rain is the interboundary transport of acid precipitation between the United States and Canada. Acid rain is going over the border in both directions, but most of it is coming from America. We owe it to our neighbors, as stated in the "Memorandum of Intent between the Government of Canada and the Government of the United States of America Concerning Transboundary Air Pollution," to recognize this as an important and urgent bilateral problem. Legislative action would effectively demonstrate a common determination to combat transboundary air pollution.

The legislation before the Environment and Public Works Committee, the Acid Deposition Control Act (S. 1706), which I have cosponsored, is a good beginning because it reduces emissions substantially and therefore addresses the problem at its source. In addition, S. 1718 is a needed mechanism whereby the States can have an easier time proving and redressing interstate interference with pollution level compliance. I might add that since Connecticut has one of the most stringent sulfur dioxide standards of any State, the problems associated with interstate transportation of pollution are of even greater concern to us than they might be to a highly polluting State.

The Connecticut State Department of Environmental Protection estimates that emissions from the North Port and Port Jefferson powerplants, located in Long Island, N.Y., are greater than emissions of all Connecticut fuel burning sources even after Connecticut sulfur-in-fuel requirements were raised to 1 percent. Canada, although not taking an official position on any particular bill, is wholeheartedly behind the intent of these proposals.

The environmental implications of continued increased acid rain are not good. Possible health hazards associated with acid precipitation cause reason for even greater alarm. The economic payoffs for addressing this dilemma, both tangible and intangible, are great. A Harris poll taken on September 1981 shows that a convincing majority, 80 percent of the public, is opposed to any relaxation of current air pollution laws. As Louis Harris states:

This message on the deep desire on the part of the American people to battle pollution is one of the most overwhelming and clearest we have ever recorded in our 25 years of surveying public opinion.

This keen interest on the part of the American public in keeping the air clean should give us ample reason not only to keep the status quo, but continue to decrease air pollution in as many ways as technologically, economically, and rationally possible.

The United States and Canada have agreed to jointly combat this problem. This agreement will be more forcibly carried out if legislation setting forth this country's method of dealing with acid precipitation is passed. We must act now and initiate these reforms.●

INDEXES THAT MONITOR THE ECONOMY

● Mr. BAUCUS. Mr. President, I would like to submit for the RECORD a primer on some of the economic indicators that the Government produces—and that many policy makers constantly review—to provide a picture of our economy. As we all know, economics is an exceedingly complex and inexact science that has preoccupied all of us in recent years. This brief article that I am recommending to everyone's attention outlines well the uses and flaws of the many economic indicators that are looked at to judge the economy.

The article follows:

[From the New York Times, Nov. 8, 1981]

HOW TO READ THE ECONOMY

(By Jonathan Fuerbringer)

WASHINGTON.—People might feel it in their paychecks and the supermarket. But there's only one way most folks really know how the economy is doing, and that's by watching the reports that the Government's statisticians keep cranking out, month by month, quarter by quarter. These indicators produce more than a picture of the economy. They also form the basis for economic policy decisions and signal whether policies then in effect are working.

These major indicators, and the many others that receive less public attention, have their own peculiarities and problems. Some are better than others. Some are being changed. And some could be changed, but the improvement might not make a major difference. In addition, there are complaints that the Reagan Administration's budget cuts could eventually hurt the quality of the statistics. Here is a primer on some of the economic indicators.

GROWTH

The gross national product is the broadest measure of the nation's economy. The G.N.P., which is reported quarterly, can have a strong effect on government policy—because it shows whether the economy is in a recession and whether inflation is out of line.

The gross national product measures the output of all the nation's goods and services, divided into four categories: personal consumption expenditures, which is essentially consumer spending; gross private domestic investment, which includes business investment in equipment and structures and housing; net exports of goods and services, which is the balance of exports and imports, and government purchases, which is the net purchase of goods and services by the Federal, state and local governments.

The G.N.P. measures only sales of final products. This means that the value of flour in bread or the steel in a car is assumed to be counted in the sale of the final product.

The Bureau of Economic Analysis in the Department of Commerce assembles the G.N.P. The first report of the G.N.P., about two weeks after the end of the quarter, is based on incomplete data for the quarter and is revised as later information is gathered.

The G.N.P. is reported in two forms: nominal G.N.P., which is the total for the quarter and real G.N.P., which is the G.N.P. for the quarter after the effects of inflation are removed.

Key criticisms center on the revisions, some of the data-gathering techniques and the reliability of the data. Any quarterly G.N.P. figure is eventually subject to seven revisions, the first two coming in the two months after the first release.

In 1965, mid-year G.N.P. figures showed an annual growth rate of 5.5 percent. But the number was later revised to 8 percent. The late Arthur Okun, a member of the Council of Economic Advisers in the Johnson Administration, later complained that if the first number had been more accurate, the Administration would have foreseen the inflationary impact of the defense buildup for the Vietnam War.

Prof. Geoffrey H. Moore of Rutgers University contends that the current method for deflating net exports should be changed. His alternative would produce a major change in the G.N.P. picture this year. For example, instead of a decline of six-tenths of a percent in real G.N.P. in the third quarter—the second quarterly decline in a row—his revised figure would show a small increase, which might have affected the current talk of a recession.

INFLATION

The Consumer Price Index measures changes in prices based on a fixed market basket of goods and services, including food,

housing, fuel, transportation, medical care, entertainment, apparel, personal care and other goods and services. Most of the prices of some 385 major items are collected by agents in 85 urban areas either in interviews or from secondary sources. Rental data comes from 18,000 rent payers, and property-tax data covers 18,000 housing units. Other prices are collected from 24,000 grocery stores, department stores, hospitals, gas stations and other establishments.

The C.P.I. has set weights for the items in the index, establishing the relative importance of each. Based on 1980 figures, housing is the heaviest weighted component at 45.5 percent. Transportation is 19 percent and food and beverages 18.3 percent.

Actually, there are two Consumer Price Indexes. The one most often discussed is the Consumer Price Index for All Urban Consumers (the C.P.I.-U.), which was introduced in 1978 in an effort to broaden the population covered by the index. The Bureau of Labor Statistics added people on welfare, those with high incomes, the unemployed, the retired and professionals. The other index is the Consumer Price Index for Urban Wage Earners and Clerical Workers (the C.P.I.-W.), which tracks the C.P.I.-U. fairly closely.

The C.P.I.-W. records only the prices paid by wage and salary workers. It now covers about 40 percent of the population, while the C.P.I.-U. covers about 80 percent, based on the 1970 Census.

The C.P.I.-W. is significant because it is the basis for automatic cost-of-living increases for approximately 90 million Americans, including those on Social Security, Federal pensions and workers whose labor contracts allow for such raises.

Although it is often referred to as a cost-of-living index, the C.P.I. does not accurately measure how much people actually spend. In addition, the market basket represents the average quantities bought by people and does not necessarily reflect what any one family or individual consumer would purchase.

The key problem with the Consumer Price Index, however, is the housing component. In tracking mortgage interest rates and house prices, it has tended to overstate the rate of inflation when interest rates are rising—and understate it when rates are falling. Furthermore, the weight given housing magnifies these trends.

The weighting of the other components in the market basket is also a problem. The weights are now based on the 1972–74 Consumer Expenditure Survey, and habits have changed and people are not consuming the same items they did then. Some analysts contend, for example, that the weighting for energy, which makes up 10.8 percent of the index, should be a much lower portion now because of moves toward conservation.

The Bureau of Labor Statistics plans to shift the emphasis on housing in the C.P.I.-U. from the cost of ownership to a rental equivalent—but not until 1983.

The Producer Price Index includes many of the components of the old Wholesale Price Index. It gets more complex from there. When people talk about the Producer Price Index they usually mean the Producer Price Index for Finished Goods. That measures price changes of goods that are completely processed and ready for sale to the ultimate user, either individuals or a business concern. These goods include trucks, farm equipment and machinery that would be sold to businesses, and consumer goods like food, clothing, appliances and autos that would be purchased by retailers for eventual sale to consumers.

There is an index for intermediate goods, which, for example, include the flour used for bread, auto parts, steel mill products, paperboxes and cotton yarns—generally things that are one processing step removed from finished goods. And a third index shows price changes in crude materials, including wheat, iron and steel scrap, livestock, raw cotton and crude petroleum.

The indexes are compiled in much the same way as the C.P.I., but the information on some 2,800 commodities comes in by mail. Forms go to about 7,000 businesses, which provide the price information. The indexes are also weighted.

The index for finished goods is not comparable directly to the C.P.I. because it does not include services, housing or used cars. The increases or decreases for finished goods also don't always translate directly into rises in consumer prices, especially over the short term, because retailers can vary the markups they charge on what they buy. This means the index is not a good short-term measure of future increases in the C.P.I.

Many economists, however, find the index a good measure of inflation trends, especially when the C.P.I. is being distorted by rising or falling interest rates and housing prices.

Critics of the C.P.I. and P.P.I. often look instead at two other gauges of inflation—the G.N.P deflator and the G.N.P. fixed-weight price index. Both are derived from the special indexes used to adjust the gross national product for inflation.

The deflator is not directly comparable to the C.P.I. or the P.P.I., however, because it measures both changes in prices and changes in consumption. This means the deflator can decline as consumers shift from high-priced items whose prices are still increasing to items with relatively lower prices and slower increases. This also means that the deflator, at times, can understate inflation.

The fixed-weight index is based on a market basket. One component of the fixed-weight index—personal consumption expenditures—is very close to the C.P.I., except that it uses a measure for housing costs that is like the rental equivalent the C.P.I. will eventually use. Economists generally agree that both these quarterly numbers—which have tended to be lower than the C.P.I.—are better measures of inflation.

JOBS

The unemployment rate, which usually is issued the first Friday of the month, is compiled in a Household Survey, which reports the size of the civilian labor force, plus the numbers of people who are working and not working. The Household Survey canvasses 60,000 households, with interviewers trying to determine the employment status of all people in the household 16 years old and over. The survey is conducted during the calendar week that contains the 12th day of the month.

The unemployed are those who did not work during the survey week but made efforts during the prior four weeks to find a job by registering with unemployment agencies or writing job applications. People are also counted as unemployed if they are temporarily laid off or are waiting to report to a job within 30 days. They are employed if they performed work as paid civilians for one or more hours during the survey week. Those employed 35 or more hours a week are recorded as full-time workers, and those employed 1 to 34 hours, part-timers. Unpaid workers are counted if they worked 15 or more hours in a family business. Also counted are people with jobs who were temporarily absent for various reasons, including a strike. Discouraged workers, who are not seeking jobs because they feel they aren't available, are not counted among the unemployed.

The employment and unemployment numbers have undergone two major outside reviews in the last 20 years. The last was completed in 1979 and Labor Secretary Raymond Donovan made final recommendations on the last review at the end of October.

The unemployment rate is important because it cuts across the entire economy. It is criticized, however, for overstating or understating actual joblessness. Some people work part time only because they can't find full-time work. If all discouraged workers plus those part-timers were included among the unemployed, the unemployment rate for the third quarter of this year would have been 10.2 percent instead of 7.2 percent, according to an experimental measure published by the Bureau of Labor Statistics.

PRODUCTION

The Index of Industrial Production measures changes in output of the nation's factories, mines and electric and gas utilities. The index, issued monthly by the Federal Reserve Board, reflects what is happening to the production of durable goods, such as cars and appliances, nondurables, such as food or clothing, and construction supplies, business equipment and the production of the parts used in the manufacturing of these products. It also gives a detailed reading of production by a particular industry, such as transportation equipment, chemicals or lumber.

Like most other gauges of this type, be industrial production index is seasonally adjusted to smooth out regular fluctuations in production during the year. The index is also subject to revision.

The index is well respected. Because it covers manufacturing, which is especially sensitive to downturns in the economy, it is a key indicator. It was the report in October of decline of eight-tenths of a percent in output that confirmed for many economists that the economy had finally fallen into a recession.

But because the index covers sensitive industries that are usually the hardest hit in a recession, downturns in the index can overstate what the decline in the economy over all will be in a recession. In the first six recessions since World War II, the average decline in industrial production was about five times larger than the overall drop in the gross national product.

HOUSING

Housing starts, reported monthly, measure the annual rate of starts of privately owned housing units. The monthly figures are broken down into an annual rate for single-family housing starts, starts for buildings with two units, three and four units and five or more units. Housing starts do not include mobile homes. A start is counted when the ground is broken for the unit or units; the completion of the project can take months or years.

In addition to housing-start figures, the monthly report, prepared by the Bureau of the Census, also gives figures for new building permits.

The housing industry is a key leading indicator because it usually is the first sector to decline as the economy slows. Economists in the housing industry sometimes complain that the housing-start figures overstate the pace in the industry. There are times, when the economy is in a decline, that a project can be recorded as having started. But construction can then stop.

THE FORECAST

The Government's index of leading economic indicators is designed to forecast swings in the economy—whether the nation is growing or falling into a recession. Its 12 components have been chosen because they historically tend to move either downward or upward before the economy swings in those directions.

The 12 components are the average manufacturing work week, the layoff rate for manufacturing workers, inflation-adjusted new orders for consumer goods and materials, the speed of delivery of new goods, the rate of net business formation; contracts for plants and equipment, change in inventories on hand, change in crude material prices, stock prices, change in total liquid assets and changes in the M–2 money supply figure, which includes funds in checking accounts,

currency in circulation and assets of money market funds.

The index is probably the most often misinterpreted of the monthly indexes. One problem is that it isn't always right. Since World War II, it has declined significantly (3 percent or more) nine times. But only six times did recessions follow. And in 1973—before the onset of the worst recession since World War II—the index fell only 1.7 percent. Only after the recession was under way did the index take a big dip.

In addition, the index has a timing problem and is subject to monthly revisions. There is no set period of months of decline that means a recession is on the way. Sometimes, as is the case this year, the steep drops in the index—like the 2.7 percent decline for September—were not reported until after the Administration and many other economists had already declared that a recession had begun.●

LAW ENFORCEMENT SHOULD NOT BE HAMPERED BY BUDGET CUTS

● Mr. CHILES. Mr. President, last night I offered an amendment to exempt Federal law enforcement programs and activities from any funding cuts that might come as a result of the Senate's adoption of the Baker amendment to the continuing resolution. As we all know, the Baker amendment will allow for 4-percent funding cuts in the programs and activities of almost all Federal departments and agencies.

This gives the President considerable discretionary power over these cuts; more discretionary power than I would choose to allow. I did not speak at length last night on my amendment due to the press of time. I would like to take the opportunity now to explain in more detail the purpose of my amendment.

As I stated, my amendment will exempt from funding cuts the law enforcement responsibilities of a number of Federal agencies. First, there will be no cuts for any of the law enforcement activities or programs of the Justice Department. At a time when we are experiencing a dramatic increase in crime nationwide, we should not be looking to cut the programs of the Department most responsible for dealing with this problem.

My amendment is clearly meant to exempt the operations of the FBI, DEA, and INS. However, I want to make sure that it is understood that the amendment is also meant to stop any cuts in the U.S. attorneys and marshals office and other important divisions of the Justice Department that contribute to our law enforcement activities. Such programs as the juvenile justice and delinquency and treatment alternatives to street crime are other examples of the types of programs of which I am speaking.

We all recognize that law enforcement activities are carried out by other Federal departments. My amendment specifically takes this into consideration by also exempting from the 4-percent funding cuts the programs and activities within the IRS and the Treasury Department's Customs Service which help us combat crime.

The IRS can perform a very useful function in law enforcement by allowing us to track down criminals through their financial activities. I think it is time we look to use the IRS in this capacity. This type of cooperative assistance in law enforcement efforts is also performed by the Customs Service. The Customs Service plays an extremely important role in monitoring our borders, but it has also used its resources to aid in major busts of smuggling operations.

Probably the best example is operation greenback, one of the most successful crackdowns on a smuggling operation we have seen to date. This operation could not have been pulled off without the assistance of the customs Service, and I want to be sure that they are in a position to continue this type of work.

Finally, my amendment specifies that there will be no cuts in the law enforcement activities of the Coast Guard. We all realize the important job the Coast Guard performs in making our waterways safe. However, the Coast Guard also functions in a law enforcement capacity when, for example, it is called upon to interdict drug smuggling vessels.

My amendment prohibits cuts for these kinds of Coast Guard law enforcement activities. Needless to say, modern up-to-date equipment is essential to the Coast Guard if it is to carry out its law enforcement activities. Congress earmarked $200 million for the Coast Guard for its capital investments.

These funds are crucial to insuring that the Coast Guard has the equipment it needs to carry out its law enforcement activities. These funds are part of the Coast Guard's law enforcement activities.

This is not a complete list of all the programs that are included in law enforcement efforts and that should be exempt from funding cuts. It does give an idea, however, of the law enforcement functions I intended to exempt through my amendment. Last night when Congress adopted my amendment, it was stating that our law enforcement efforts should not be hampered by further budget cuts. I hope this message will be heeded.●

TITLE III OF THE HIGHER EDUCATION ACT

● Mr. BAUCUS. Mr. President, I would like to bring my colleagues up to date on what is happening with the title III program of the Higher Education Act of 1965. As many of my colleagues may remember, after extensive hearings in both the House and Senate, Congress rewrote the authorizing legislation for title III during the 96th Congress.

The Department of Education published on July 20, 1981, draft regulations designed to implement title III. Unfortunately, those proposed regulations had a disastrous effect on over 40 percent of the institutions that had previously been eligible to apply for title III assistance; the regulations denied them eligibility.

As many of my colleagues know, once the effect of the regulations were understood by the institutions so abruptly cut off, the roar of disapproval was deafening. Since it was never the intent of this body to deny so many institutions the chance to compete for title III assistance, I gave serious consideration to adding a "grandfathering" clause to the continuing resolution just passed by this body. Such an amendment, while not the perfect solution, would have at least assured eligibility for those institutions that had been eligible in past years.

However, after extensive meetings with the Department of Education and some fine work by Senators STAFFORD, PELL, and DENTON, I was assured that the regulations could be rewritten in such a way as to carry out the intent of Congress by allowing most of the institutions eligible in the past a chance to compete for funds in the future.

Hopefully, this entire matter will be brought to a successful conclusion in the next 30 to 45 days. The Department of Education is obviously under the gun to produce equitable regulations quickly. If the problems of past years that had finally begun to be eliminated are to be avoided, the funding cycle for title III must begin soon.

I plan to continue to work with the Department of Education and my distinguished colleagues on the Education Subcommittee to assure that the intent of Congress is carried out in an efficient and equitable manner.●

PROPOSED MEMORIAL TO CAPT. FRANK W. OLSON

● Mr. PACKWOOD. Mr. President, Saturday, November 14, three men left the U.S. Coast Guard station in North Bend, Oreg., to assist the *Cristina J.* fishing out of Coos Bay. In 60-knot winds and 30-foot seas, in rain at night, their helicopter went down.

Two crewmen, Lt. Glenn Gunn and PO 3d Class Lt. Kenneth Ziegler, drifted in their wet suits nearly 40 minutes before they washed ashore. Fortunately, both are in good health today.

Tragically, Capt. Frang W. Olson, the pilot of the helicopter, a 22-year Coast Guard veteran, and the chief of the North Bend station, did not survive. Many will deeply feel his loss.

Captain Olson was a fine example of what the Coast Guard means to Oregon and to this country. This past August, Captain Olson, along with six other officers at the North Bend station, received congressional citations for their role in saving the lives of fishermen earlier in 1981. Actions such as these repeated often during his career demonstrating just how much we in Oregon, as well as in all other regions of the country, depend on the Coast Guard. It was in trying to save another life that Captain Olson gave his. What he did, Glenn Gunn and Kenneth Ziegler and 39,760 other Coast Guard men and women on active duty were prepared to do.

In August, Captain Olson and I spoke about how we could obtain medical equipment for the North Bend station. We spoke about the need to revitalize the physical plant of the Coast Guard. I told him then, and I repeat today, that I will continue, in this time of general Federal spending cutbacks, to push for more support for the Coast Guard, for new and better equipment, for pay raises, and proper maintenance of equipment and facilities. In Oregon, this means replacement of the two helicopters lost during recent life-saving efforts, and the deployment of a helicopter in Newport to reduce flight time to fishing boats in trouble.

The search and rescue mission of the Coast Guard will continue to be its most important and most dangerous duty. Many along the Oregon coast owe their lives to the men and women serving in the Coast Guard in Newport, Astoria, Tillamook, and Brookings. The rest of us owe our gratitude and support.

I should like to suggest that there be a memorial recognizing the supreme sacrifice of Capt. Frank Olson in carrying out his duties as a Coast Guard officer, as follows:

MEMORIAL

Whereas, the United States Coast Guard continues to perform a vital service to this country in its search and rescue mission;

Whereas, the people of Oregon owe a great sense of gratitude to the Coast Guard men and women stationed along its Coast;

Whereas, Captain Frank W. Olson, accompanied by crewmen Glen Gunn and Kenneth Ziegler, braved 30-foot seas and 60 knot winds on a dark and rainy night of November 14, 1981, in order to carry out this search and rescue mission;

Whereas, Captain Frank W. Olson, an exemplary officer during a long career in the Coast Guard, gave his life in attempting to rescue three fishermen in distress;

Resolved, That the United States Senate during the 97th Congress in the year 1981, memorialize Captain Frank W. Olson.

Mr. PACKWOOD. I urge each and every Senator to consider the heroic efforts of Captain Olson and his crew as representative of the service the Coast Guard provides to all citizens of the United States.●

REAGAN ECONOMICS

● Mr. BAUCUS. Mr. President, I would like to submit for the RECORD a recent article that appeared in the New York Review of Books by Prof. James Tobin, who recently received the Nobel Prize for Economics. Initially given as an address on October 16, the article is a timely and thoughtful piece on our past and current economic climate.

Mr. President, I ask that the article be printed in the RECORD.

The article follows:

REAGANOMICS AND ECONOMICS

(By James Tobin)

The economic program of the Reagan administration, like that of the Thatcher government in Britain, manifests a conservative counterrevolution in the theory, ideology, and practice of economic policy. The aim of the counterrevolution is to shrink the economic influence of government, especially central government, relative to that of private enterprise and free markets. Three kinds of policies are at stake, concerning respectively (1) macroeconomic stabilization—the use of fiscal, monetary, and other policies affecting national production, employment, prices, and other variables of economy-wide significance; (2) economic inequality—the use of the public fisc to redistribute income and wealth; (3) resource allocation—national priorities among various public and private goods; (4) regulation of economic activities and markets. I shall speak principally about the first two categories.

I have referred to a counterrevolution, so I should remind you of the revolution to which it is the counter. That took place some thirty-five to forty-five years ago, just before and after the Second World War, in this country and in other Western capitalist democracies. Radical changes occurred in the practice of economic policy and in the theory of political economy. Live memory of the Great Depression created a broad consensus that the state must assume responsibility for maintaining prosperity, as well as for protecting individual citizens against the inevitable insecurities of life in a market economy. The New Deal in the United States and social democratic movements in Europe were the agencies of these changes. They also expanded government investment in schools, housing, transportation, and other public goods, and augmented the market power of workers, trade unions, and farmers vis-a-vis business. Over three postwar decades these changes were largely accepted by all mainstream political parties and extended by governments of various political colors. Though rumblings of discontent have been heard in increasing volume over the past fifteen years, only recently have the counterrevolutionaries gained political power.

I shall confine myself to the United States and the first two issues on the agenda of the revolution and counterrevolution—macroeconomic stabilization, and redistribution of income and wealth. Two acts of Congress symbolize the revolution. The Employment Act of 1946 dedicated federal power to the achievement of "maximum employment, production, and purchasing power." Ten years earlier, under the Social Security Act, the federal government recognized an obligation to protect individual citizens from personal economic misfortunes—workers without jobs, aged without funds, children without fathers. The New Deal had already put the federal government in the business of welfare and work relief, insurance of bank deposits and mortgages, and other "safety nets." By 1947, then, the federal government had assumed responsibilities both to maintain general prosperity and to insure and indemnify the worst individual casualties of depression and economic change.

These really were new responsibilities. Fiscal and monetary policies were not significantly dedicated to macroeconomic stabilization before the late 1930s. In 1929–1934 both Hoover and Roosevelt raised taxes and sought vainly to balance the federal budget; they were worried about the Depression's effect on the budget, not the budget impact on the economy. Throughout the precipitous decline of 1929–1932 monetary policy gave second priority to the American economy, and primary emphasis to defending US gold reserves and the gold value of the dollar—until the disasters of the winter of 1932–1933 forced Roosevelt to suspend gold convertibility and devalue the dollar. As for relief of the victims of the Depression, Hoover—a Quaker who had earned worldwide fame as a humanitarian in directing relief efforts in devastated parts of Europe after the First World War—regarded it in principle as the responsibility of private charity and local government, not the federal treasury. Roosevelt, fortunately, was a pragmatist.

Similar redefinitions of the economic responsibilities of central government occurred in other advanced democracies in the 1930s and 1940s. In Britain two wartime reports by Lord Beveridge, one on social insurance and one on full employment, set the stage for postwar macroeconomic strategy and "welfare state" legislation.

To these political developments there were important intellectual counterparts and foundations. A revolution in macroeconomics and in the theory of monetary and fiscal policy began with J. M. Keynes's General Theory of Employment, Interest, and Money in 1936 and spread through the English-speaking world and after the war to continental Europe and Japan. This provided the rationale for the full-employment commitments of the several countries, along with guidance on how to implement them. The business cycle was no longer to be seen, as both orthodox and Marxist economists saw it, as an inevitable and functional characteristic of capitalism. According to Keynesian theory, economy-wide fluctuations in economic activity are wasteful; they can be avoided by active fiscal and monetary intervention, so-called stabilization policies.

Keynesian macroeconomics does not logically lead to any position for or against welfare-state measures. But, again in contrast to both right and left, it certainly does not say that redistribution of income and wealth by taxation and transfer is fatal to capitalism, or even damaging. In Keynes's personal view, "The outstanding faults of the economic society in which we live are its failure to provide for full employment and its arbitrary and inequitable distribution of wealth and incomes." He was confident that both flaws could be corrected without sacrificing the efficiency and progressiveness of market capitalism, for which he had the same respect as his classical forbears and colleagues. Twenty years later Paul Samuelson, the principal architect of the synthesis of Keynesian and neoclassical theories that became the orthodox main current of American economics, expressed this optimistic view very clearly:

A community can have full employment, can at the same time have the rate of capital formation it wants, and can accomplish all this compatibly with the degree of income-redistributing taxation it ethically desires.

The postwar era, especially its first twenty-five years, appeared to justify the optimism of Keynes and Samuelson. In no other period of similar length have productivity per worker and living standards grown so fast, or aggregate production and employment advanced so steadily, or world trade expanded so greatly. The last ten years have been disappointing compared to the 1950s and 1960s. But we should not lose perspective.

The main source of disappointment and disillusionment with the revolution was the stagflation of the 1970s—the combination of high inflation and high unemployment. Even during the era of their apparent success, Keynesian policies for full employment and countercyclical stabilization aroused chronic anxieties about inflation. Indeed the principal advocates themselves, beginning in the 1940s, warned that full employment, removing the wage discipline exerted by unemployment and the threat of layoffs, might not be compatible with price stability. Some of them foresaw the need for direct restraints on wages and prices to reconcile the two goals. The economy would have a "secular" or long-term bias toward inflation, they observed, if wages and prices rose freely in expanding industries, and during economy-wide booms, but fell slowly if at all in declining sectors and during short recessions.

Moreover, inflationary bias was exacerbated by social welfare legislation, extended and expanded as it was by postwar administrations and Congresses of both parties, most dramatically beginning with the Great Society programs of the late 1960s. Social insurance dulls to some degree the incentive to seek and accept employment, especially the less remunerative or attractive jobs.

Probably more important were developments that fall under the fourth of my initial classifications. The Rooseveltian political coalition opened old-fashioned interest-group politics to large groups that previously had been excluded. Like all governments, our federal government has always catered *ad hoc* to private business interests with political clout, as our history of tariffs, "internal improvements," land grants, bank charters, and subsidies amply illustrates. Beginning in the 1930s trade unions gained federal protection for organizing and bargaining. Wages, hours, and conditions of work became subject to federal standards. Farmers were not only subsidized but organized into federally administered cartels. The promotion of mo-

nopolistic powers for unions of workers and farmers was justified by J. K. Galbraith and others as "countervailing" the monopolistic powers of big business, to the benefit of the society as a whole.

This dubious proposition was never congenial to liberal Keynesians devoted principally to full employment and diminished inequality. In any event, these countervailing powers increased inflationary bias. Workers, unionized or not, had more power to gain wage increases in booms but resist cuts in downturns. Agricultural price supports diminished the downward trends and cyclical declines of food and materials prices that contributed so much to price stability in the 1920s and earlier.

Nevertheless, the inflation record of the United States was very good until the late 1960s. That deficit financing of the Vietnam War then overheated an economy already operating at capacity was no surprise to any economist, Keynesian, monetarist, or classical. That inflation accelerated during the 1970s, in spite of monetary policies that triggered three recessions, in spite of unemployment higher than in the two previous decades, is the great disappointment to theory and policy that set the stage for the counterrevolution. Many observers would explain the stagflation by the series of external shocks, unprecedented in their severity, that hammered the world economy during the 1970s; the depreciation of the dollar after Nixon proclaimed it inconvertible into gold in 1971, the worldwide commodity shortages and speculative booms in 1973, the two big OPEC shocks, 1973–1974 and 1979. Others blame over-stimulative monetary and fiscal policies in 1972–1973 and 1977–1978. The controversy is far from being resolved, but the Reagan administration is sure of its diagnosis: the disappointments of the 1970s were the inevitable outcome of mistaken policies followed throughout the postwar decades.

To the revolution that took place some thirty-five to forty-five years ago, Reaganomics is, like Thatcherism in the UK, the political and ideological counterrevolution. Just as Keynesian theory inspired the revolution, so a wave of professional reaction to the synthesis of Keynesian and neoclassical doctrines that became orthodoxy in the 1960s sustains the counterrevolution. In both instances, of course, there are many divergences among economic theory, popular ideology, and actual policy. Nonetheless, in both cases, a common tide of opinion floods academic journals, popular media, political rhetoric, Congress or Parliament, and the guiding philosophies of president or prime minister. Rightly or wrongly, the revolution is blamed for the "stagflationary" disappointments of the 1970s, the high rates of unemployment, inflation, and interest, the depressed stock market, the slowdowns of productivity growth and capital formation. The old doctrines and policies, new forty years ago, are discredited, replaced by new doctrines and policies, old forty years ago.

Respecting stabilization, the new doctrine is that active fiscal and monetary intervention—characterized or caricatured as "fine-tuning"—is the problem, not the solution. The government should forswear countercyclical policies and let the market economy stabilize itself, as it will, given confidence that government policies will be stable. Thus the central bank should tie itself, or be tied to, a fixed-rate rule of monetary growth, independent of the state of the economy. Likewise federal tax and expenditure legislation should not be responsive to business conditions. Various proposals to make macroeconomic policies blind to cyclical fluctuations, including constitutional amendments to require annual budget balancing and to restrict government expenditure and monetary growth, are currently before the country and the Congress and are viewed benignly by the Reagan administration.

One of the arguments against the countercyclical policies of the past is that they fostered inflation by removing from business firms and workers the incentive to lower prices and wages during recessions in order to protect sales and jobs—why not just wait until the government pumps up demand again? In Britain Margaret Thatcher has put her country men and women on notice that the only way they can restore the jobs and prosperity lost in the current slump is to disinflate. Her Majesty's government will do nothing about it.

The same warning has been repeatedly issued in America by Chairman Paul Volcker of the Federal Reserve, who unfortunately for the effectiveness of the warnings, does not quite command the same audience as a head of government. President Reagan has not made Volcker's threat credible to those who determine wages and prices; instead he has undermined it by promising disinflation without tears, an instant spurt of rapid growth, falling unemployment, and declining inflation. Recently, it is true, his Treasury secretary has lapsed into old Keynesian "error," urging the Fed to loosen up a bit to forestall incipient recession. On the other hand, the administration is not fine-tuning fiscal policy in an anti-recessionary direction. Instead, its current fine-tuning is aimed in the other direction—it is trying like Hoover and Roosevelt in the early 1930s to offset the effects of the recession on the budget deficit by cutting the budget further. (However, recent statements by OMB director Stockman show awareness of the futility of aiming at specific budget deficits in a weakening economy.)

The renunciation of stabilization policy implies, if actually carried through, that the government no longer has meaningful goals for real economic variables—e.g., for employment and unemployment, national production and its growth. Of course, any political administration will publish its projections, scenarios, and hopes. But these will mean nothing if the government eschews measures to make them come true. The Thatcher and Reagan governments both say that they are providing a stable monetary and fiscal framework within which private enterprise and free markets will restore prosperity and non-inflationary growth. Another way to put it is that whatever economic outcomes private agents generate within the framework are by definition optimal. This is how the current chairman of the Council of Economic Advisers, Murray Weidenbaum, puts the case, even if his client doesn't yet quite understand it that way.

Clearly this is a 180-degree reversal of the commitment of the Employment Act of 1946, not to mention the Full Employment and Balanced Growth Act of 1978 (the "Humphrey-Hawkins Bill"). To be sure, employment goals have been slipping for a long time. The unemployment rate was 3 percent at the end of the Korean War, 4 percent at the peak of the boom in the mid-1950s when the Fed applied the brakes by raising interest rates, and 5 percent at the next cyclical peak in 1960. The Kennedy-Johnson administration officially adopted a full-employment goal of 4 percent unemployment, achieved it in 1965, and overachieved it during the Vietnam War. During the 1970s operational unemployment targets were not made explicit, but policy moves revealed implicit targets of 5 percent, then 6 percent, now probably 7 percent or more.

The slippage of course reflects the primacy given to the frustrating battle against inflation. But if and when the battle is won, I doubt that the Federal Reserve and the administration would risk reigniting inflation by relaxing the monetary screws enough to permit much reduction of unemployment from the 7 to 8 percent range. More likely they would settle for a resumption of normal sustainable real growth at prevailing rates of capital utilization, and would not provide financing for temporarily higher growth to absorb the slack created during the anti-inflationary fight. This scenario is, by the way, explicit in the projections of the UK Treasury.

In the U.S. today macroeconomic policy and prospect are dominated by Federal Reserve monetary policy. The Reagan administration assigned disinflation to the Fed, chided the governors for past mistakes, and urged them to be tough. The Fed is being tough, and as Chairman Volcker has repeatedly made clear, proposes to be gradually but resolutely tougher every year until inflation rates are insignificantly different from zero. As Volcker and his colleagues appreciate much better than President Reagan and his associates, Federal Reserve money-supply policies will not allow room for real economic growth unless wage and price inflation melts by a point or two a year. Given the stubbornness of built-in wage and cost inflation, there is likely to be considerable economic pain and damage during a transition of several years.

The administration rejects on principle any direct wage and price policies, formal or informal, even diffuse persuasive appeals by the president. In their absence, the only mechanism by which monetary deceleration produces disinflation is by creating sufficient economic distress that workers and employees, desperate to protect jobs and solvency, settle for lower wage and price increases than those currently prevailing. We can see this process at work across the Atlantic, where midway in Mrs. Thatcher's five-year term the record unemployment rates are in double digits while inflation rates are still in double digits but slowly declining.

A Thatcher scenario was not quite what the Reagan administration had in mind. The "supply-side" tax cuts were intended to unleash a surge of investment, enterprise, and protective effort. Supply-siders were impatient with traditional conservative orthodoxies that tax stimuli must wait for budget balance and disinflation. Exploiting the eager competition of both parties in Congress, they succeeded in promoting tax cuts that outdistanced the budget cuts of the redoubtable Mr. Stockman. But the tax bill only solidified the firm resolve of Mr. Volcker, and he is bound to win a fiscal-monetary tug-of-war. As the securities markets perceived, the situation is a Catch-22. Interest rates cannot be low enough to sustain expansion unless the economy is in recession.

I turn now to a second dimension of the counterrevolution, the distribution of income and wealth as affected by federal taxes and transfers.

Equality of opportunity has been an American ideal and an American excuse. The ideal of capitalism in a democracy is a fair race from an even start. Big prizes go to the swift, but all participants are rewarded—the more rewarded the faster everybody runs. True, economic and social outcomes are highly unequal. The excuses are that the racers all have the same opporunities and that differential prices generate even larger rewards for all participants.

Opportunities are actually far from equal. We Americans escaped the feudal castes of the Old World, but erected our own racial, religious, and ethnic barriers. Even as these are overcome, the hard fact remains that the children of parents of high economic and social status gain a head start—better education at home and school, better nutrition

and medical care, as well as more gifts and bequests of worldly goods. To give children these advantages has indeed been traditionally a strong motivation for work, saving, and enterprise.

Wealth breeds wealth and poverty breeds poverty. Despite legendary examples of spectacular social mobility, the unequal outcomes of one generation are generally the unequal opportunities of the next. Here as in other democracies, governments have sought to arrest the momentum of inequality by free public education, social insurance, "war on poverty" measures, and progressive taxation.

The U.S. budget and tax legislation of 1981 is a historic reversal of direction and purpose. Existing institutions, commitments, and "safety nets" can't be rapidly dismantled, but the message is clear enough; inequality of opportunity is no longer a concern of the Federal Government.

The Government has virtually abandoned all pretense of taxing transfers of wealth between generations. Capital gains on assets so transferred are excused from income tax, and now most of them will be free of estate and gift taxes as well. In the hasty competition of both parties for the favor of wealthy constituents, Congress casually liberalized these taxes without concern for unchecked dynastic wealth and inequality of opportunity.

Capital income, in contrast to wage income, is increasingly free of Federal tax. Even before the 1981 tax law, the Treasury calculated that only one-third of capital income showed up as taxable personal income. Taxable capital gains are seldom realized; when they are the top tax rate will now be only 20 percent. Deferment of tax on income saved for retirement, easily accessible via employer or do-it-yourself plans, effectively frees the returns of such saving from tax and generally moves the principal into a lower bracket. The new tax-exempt All Savers' certificates carry no risk and beat the current inflation rate by several points.

The monetary-fiscal policies of the administration are, in fact, a recipe for high interest rates; the tax bill eases the pain for upper-bracket taxpayers, who can escape tax on interest receipts while claiming deductions for interest paid on mortgages, consumer debt, and other loans. The sophisticated rich know how, or know lawyers who know how, to combine depreciation and interest deductions with preferential capital gains rates to shelter salaries and self-employment incomes from taxation. Though many tears were shed in the successful effort to reduce those high-bracket taxes alleged to deter saving and investment, especially the 70 percent rate now abruptly lowered to 50 percent, few inhabitants of those brackets paid such taxes or will pay them now.

The government is a partner in business enterprise, and recent legislation impairs its equity—almost to the point where the Treasury's share in investment costs and risks exceeds its share in prospective earnings. This is the result of combining greatly accelerated depreciation, "15–10–5–3," with the investment tax credit—its value multiplied by lease-back arrangements—and interest deductions.

At the low end of the economic spectrum, federal efforts to bolster incomes and opportunities are being abandoned. As federal funds for welfare, food stamps, Medicaid, jobs and training, aid to education, and other residues of the war on poverty are reduced and combined into block grants, the beneficiaries will be at the mercy of local legislators and taxpayers. This process is just beginning. About $150 billion in 1984 tax revenues have been given away, and thanks to bracket indexing none will be recouped by inflation thereafter. The president has now donned his budget-balancing hat and presses Congress to redeem his promises by making budget cuts even greater than those enacted earlier this year. They won't be found in defense, public-debt interest, or even in social security. There will be further cuts in social programs, more doses of the "new federalism" that devolves these responsibilities and their funding on to states and localities.

The Reagan economic program is advertised to cure inflation and unemployment, to revive productivity, investment, hard work, and thrift. It probably cannot achieve those wonderful results. What it is sure to do is to redistribute wealth, power, and opportunity to the wealthy and powerful and their heirs. If that is its principal outcome, the public will become considerably disenchanted.

Despite its free-market ideology, the administration has done little to dismantle regulations and subsidies that are costly, inefficient, and inflationary. Agricultural programs still not only subsidize producers but do so in ways that raise prices to consumers. Taxpayers, consumers, and shippers pay for our high-cost, noncompetitive merchant marine. The Carter administration deregulated airlines, but analogous measures for surface transport are stalled. The current administration is ready enough to liberalize or discontinue regulations of business when the opposing values are consumer protection or environmental conservation. It is by no means so devoted to market freedom, competition, and consumer interest as to challenge important business, labor, and farm constituencies. These politically sacred cows have been around a long time, and no other administrations have mustered the will or the power to kill them either. But an administration that claims a popular mandate for counterrevolution should not leave unscathed the most objectionable features of the old order.

The outlook for the American economy in the 1980s contains some bright spots and some dark prospects. On the bright side, it seems unlikely that the US and the world will be hit by external shocks of the magnitude of those of the 1970s. Though the present oil glut may not continue, Americans are now much better adapted to high oil prices and much better prepared to cope with future increases. To the extent that productivity and capital formation were held back in the 1970s by energy shocks and uncertainty about how to adapt to them, they should rebound in the 1980s.

On the dark side, the purely monetary cure for inflation can hold down the economy for half the decade, with capital formation discouraged either by high real interest rates, or by gloomy profit expectations, or both. The "new federalism," as is only beginning to be realized, will have devastating effects on the finances of many state and local governments and on the services they render, especially to the poor. Meanwhile the tax cuts will be widening the gulf between the living standards of the rich and those of the poor, without the promised compensation in the conquest of stagflation. In the end, I think, a democratic polity will not tolerate in its government and central bank an economic strategy of indifference to the real state of the economy.●

MUCH ADO ABOUT A CONFERENCE ON AGING

● Mr. GRASSLEY. Mr. President, one of the most inappropriate attitudes toward older persons is treating them with condescending deference. They are, after all, the most experienced and knowing segment of our society and should be looked up to as such.

Yet there are some in Congress and among those purportedly representing the interests of older Americans who persist in figuratively patting seniors on the head in this perverse way. Some Members of this and the other body seem to fear the older American delegates to the upcoming White House Conference on Aging are being bamboozled, mislead, or politicized, a fear, I might add that the delegates themselves do not share.

Mr. President, I urge my fellow Members to read the following letter, which I submit for the RECORD, to the editor from Dick Ambrosius, a constituent of mine. It appeared in the New York Times on November 17, 1981.

The letter follows:

MUCH ADO ABOUT A CONFERENCE ON AGING

To the Editor:

As an Area Agency on Aging director and a member of the National Advisory Council to the 1981 White House Conference on Aging, I am confused by all the tempest surrounding the forthcoming gathering in Washington (letter Oct. 20). I fear it is a tempest in a teapot which is being perpetuated by special interests and national organizations up and down the political spectrum.

I'm also embarrassed that my counterparts in the aging network have demonstrated such little faith in the quality of the delegates and their ability to make their views heard.

"A blatant attempt by the Reagan Administration to manipulate the outcome of the conference," so "they" say. Well, I know many of the delegates, and one would have an easier time toilet training an alligator than trying so silence their views. Most of the delegates were selected because of their knowledge and commitment to the field of aging and older people, not because of party preference.

Others have charged that recent changes, surveys, etc., are being done to avoid embarrassing the President. If so, I could understand the concern, but what confuses me is the reaction. We are not going to Washington to comment on current proposals but to develop "a comprehensive coherent national policy on aging together with recommendations to implement the policy . . ."—at least that is what the enabling legislation said. I further believe that is exactly what most delegates still plan on doing, in spite of attempts to compromise their objectives and disrupt the proceedings.

Still others would have us believe that the whole problem was caused by an Advisory Council vote not to have debate during the closing session. This is the fourth such White House conference and probably the most demanding, and there has never been debate at preceding conferences.

Why? Because of time. We have only two and a half days to develop a "comprehensive coherent national policy on aging" and two and a half hours to present the recommendations to the entire conference. Quite an assignment. If 10 minutes are taken by each committee chairman, that leaves 40 minutes for debate—with no coffee break. Now let us be realistic!

I have faith in my fellow delegates and confidence that their central concern is the problems facing the aging population. To vote down the work of a committee would be the supreme insult to the commitment of our older delegates. Is not the major objec-

tion being made by a few self-important people who would like their own stamp on the proceedings for whatever reason?

Debate is allowed in committee, and the post-conference assessment will allow each delegate and observer an opportunity to respond or react to the recommendations of all 14 committees away from the "heat of the battle." Maybe it's that potential for a thorough and in-depth evaluation that scares the critics. (Incidentally, much of the criticism is being lodged by urban states with large delegations that may have hidden agendas of their own.)

I remain optimistic that the majority of my fellow delegates are coming to Washington to plan for the future—not to play petty politics with the lives of older people. The staff will not be developing the recommendations. That task is left to the delegates and observers, and I have confidence they are capable and willing to do just that.

G. RICHARD AMBROSIUS,
Executive Director.

SOCIAL SECURITY AND THE BUDGET

● Mr. BAUCUS. Mr. President, few programs have received more attention in recent months than social security. Several changes were made in the social security system as part of the budget bill adopted last August. Subsequently, I have received numerous requests, as I am sure many of my colleagues have, about these changes. Recently, two articles appeared in a special section of the Washington Post that described these changes very well.

Mr. President, I ask that these articles be printed in the RECORD for the benefit of my colleagues and my constituents.

The articles follow:

[From the Washington Post, Nov. 8, 1981]

SOCIAL SECURITY REVISIONS ALTER BENEFIT FIGURES

(By Spencer Rich)

Although President Reagan in September withdrew his proposals for major long-term cuts in Social Security, several earlier Reagan requests for smaller cuts had already been passed by then as part of the budget-bill process.

Those cuts will affect the amount of cash benefits received by millions of persons either already on the rolls or coming on them in the future. In addition, they will mean higher out-of-pocket medical outlays for all 29 million to 30 million people eligible for Medicare.

One of the cuts—elimination of the minimum benefit—is under review by Congress, which in all likelihood will restore the minimum guarantee for most of the 3 million people already receiving it, if not for people going on the rolls in the future. Also under review, as part of the bill that would restore the minimum, is an added cut that would limit the total amount of family benefits that may be received on the basis of one worker's earnings record.

Following is a description of all the provisions that were passed in the budget bill and those under active consideration by Congress; other cuts, so far unspecified, may soon be considered to help reduce trust fund outlays and keep the system solvent.

Lump-Sum Death Benefit: The $255 lump-sum death benefit, formerly paid to aid in burial costs whenever an eligible worker died, was eliminated for workers dying after August 1981, except where there is a surviving wife or husband living in the home or a minor dependent child, who is entitled to monthly survivor benefits. The cutoff thus would affect mainly the benefits in cases in which the worker dies and leaves no wife or dependent child. There are about 700,000 such cases a year.

Initial Entitlement Date: The budget bill provides that when a worker and his dependents retire at age 62 and the retirement comes in the middle of the month, benefits are not retroactive to the start of that month. Instead, benefits start only after the worker has been fully eligible for a calendar month. This provision was effective Sept. 1. In practice, it means that if the worker became 62 in the middle of October, for example, he would not have gotten a check Nov. 3 covering the entire month of October, instead, he would get his first check Dec. 3 covering the month of November.

Parents' Benefits. At present, a parent who is not otherwise eligible for a monthly Social Security benefit, can get one if he or she is caring for an eligible child under 18. The budget bill reduced that age to 16, effective in two years for about 190,000 persons already on the rolls and in September for newly eligible people. About 20,000 people will be affected by the provision involving the newly eligible in the first year. The child could still get the benefit until 18, but the added payment to the mother or father (the most common situation is a young widow with a child) would stop when the child reached 16, except if the child were disabled.

Earnings Limit: Under existing law, Social Security beneficiaries with jobs can earn anything they like without penalty if they are 72 or over. If they are younger than that, their benefits are reduced if wages exceed certain amounts (dividend and interest income isn't counted). The exemption age had been scheduled under existing law to drop to 70 in 1982. However, the switch to age 70 was delayed in the budget bill until 1983. The Social Security Administration said about 200,000 people would be be affected. The earnings cutoffs, incidentally, will be $4,440 in 1982 for people under 65, and $6,000 for people 65 through 71.

Rounding: Most people will barely notice it, but for benefits after August 1981, the Social Security Administration will round down benefit amounts for all to the nearest 10 cents at all stages of benefit calculations except the last, and then round the final benefit to the nearest dollar. These pennies add up and will save the government (and cost beneficiaries) $420 million a year by calendar 1986.

Worker's Compensation Offset: Under existing law, if a worker is disabled and as a result is receiving both Social Security disability payments and workmen's compensation payments, and the combined benefits exceed 80 percent of previous average earnings, then the Social Security disability benefit is reduced enough to bring the combined benefits total to the 80 percent figure.

The budget bill provided that not only worker's compensation would be included in this offset system but also certain other types of income. Henceforth, the Social Security disability payment will be reduced not only if it plus worker's compensation exceed the 80 percent figure, but also if the employee is receiving any disability payments based on federal, state or local employment, with some exceptions. This provision would apply only for those starting on the Social Security disability rolls in September 1981 or later. About 80,000 people would be affected in the first year.

Student Benefits: Under previous law, a child who was receiving a monthly benefit as the survivor or dependent of a worker would normally be cut off on reaching age 18, unless in school, in which case the monthly benefit continued until age 22. The budget bill phased out this entitlement and, in the future, the cutoff will be age 18.

In general, those who are already receiving the child's benefit by August 1981 and are enrolled in college by May 1982 will continue to get the benefit until they finish or reach 22. However, they will not receive cost-of-living increases, and beginning in September 1982 the amount of each person's benefit will be reduced by 25 percent each year. Also starting in 1982, no benefits will be paid in summer months (May through August). Under these provisions, all benefits for college students 18 or over will cease after July 1985. About 770,000 persons were on the student benefit rolls at the time this provision passed.

Minimum Benefit: Under previous law, if a person's basic benefit computed out to less than certain amounts, he or she started with a special minimum benefit, ranging in most cases from $122 a month to as high as $170, depending on a variety of factors, instead of the lower earned amount. The budget bill, at Reagan's insistence, wiped out the minimum benefit guarantee, effective in November 1981 for persons newly entitled to benefits and at the end of March 1982 for about 3 million persons already on the rolls. These persons were not to lose their entire benefit; they'd just get the lower earned amount instead of the minimum.

The public outcry against this retroactive reduction of benefits was so great that the House on July 31—the same day it passed the final version of the budget bill—passed an additional measure restoring the minimum benefit guarantee for both existing and future beneficiaries.

Subsequently, the president backed off his earlier position and the Senate also voted to restore the minimum benefit for most of the 3 million recipients already on the rolls. The exceptions were persons residing outside the United States (about 30,000 minimum beneficiaries were estimated to live outside the country), and up to 350,000 persons who were receiving federal, state or local government employee pensions. These 350,000 would have their minimum benefit cut to the extent that their federal, state or local pension exceeded $300 monthly. If it did, the "windfall" portion of their Social Security minimum benefit would be cut dollar for dollar to the extent the other pension exceeded the $300 figure.

The Senate version of the bill did not restore the minimum guarantee for future beneficiaries except for nuns going on the rolls in the next 10 years.

A final decision on whether to take the House or Senate restoration provision for the minimum benefit was awaiting congressional action.

Family Benefit Limit: Under existing law, when a worker retires or dies, one or more of his dependents may be entitled to dependents' benefits, but the extra benefits combined cannot exceed an additional 88 percent beyond what the worker gets. Thus, the family maximum (including the worker's benefit) is 188 percent of the worker's benefit. The Senate Finance Committee bill to restore minimum benefits reduces this family maximum. Under the bill, the family maximum would be 85 percent of the worker's earnings prior to death or retirement, or 150 percent of the worker's earned benefit. The fate of this provision awaits congressional action.

Medicare Cuts: The budget bill contained several Medicare provisions that will force beneficiaries to pay more. The initial deductible that the Medicare patient pays when he

goes into the hospital, which was about $204 and was scheduled to rise to $228 in 1982, will go to about $260 then instead and will rise to $328 by 1984. The coinsurance that the same patient pays for each day in a hospital more than 60 days or in a skilled nursing facility for each day beyond 20 days, will automatically also go up since it is set at a quarter of the deductible. The $60 deductible that patients must pay for out-of-hospital doctor costs before Medicare Part B benefits kick in was raised to $75. Other Medicare changes, reducing federal reimbursements to hospitals for nursing and room and board costs of Medicare patients could eventually end up shifting added costs onto the patient, though that isn't clear yet.

TO MOST ELDERLY, SOCIAL SECURITY PAY IS BASIC TO SURVIVAL

(By Spencer Rich)

In our more rhapsodic moments, we like to picture our older citizens getting by nicely, with a tidy savings nest egg, interest drawn at high T-Bill rates and a useful pension provided by a grateful employer, all supplemented by a bit of Social Security.

That's what we like to picture, but it isn't the reality for the majority if the nation's 26 million senior citizens.

The reality is that Social Security is overwhelmingly the basic source of income for the nation's elderly, with private pensions and savings falling far behind and perhaps in poor position to catch up.

Early this year, the President's Commission on Pension Policy reported that in 1950 Social Security accounted for only 28 percent of all retirement, survivor and disability payments in the nation.

But by 1980, it said, Social Security had doubled its share and, in combination with a few other Federal programs like railroad retirement and federal employe retirement, accounted for 78 percent of such benefits. Meanwhile, the share of private pension plans decreased to only 14 percent and state and local government plans to only 8 percent.

Whereas all but a handful of aged persons get Social Security, the commission said that in 1978 only 28 percent of the elderly population, or about 8 million people, received any employe pensions. Most who received such pensions were in the middle- and higher-income straits.

According to Social Security Administration studies, about three-fifths of the aged got at least half their income from Social Security in 1976; a quarter got 90 percent.

Figures in the commission report graphically illustrate the role of Social Security; for retirees with incomes of $4,000. Social Security provided 75 percent of income in 1978; for those with incomes of $6,000 it provided 63 percent of income; for those with incomes of $8,500 it provided over half of income, and for those with incomes of $12,000 it was still the largest single source of income at 36 percent. Only for the small number with incomes over $20,000, who got substantial earnings from employment, did it fall to second place.

Social Security thus predominates as a source of income for the elderly and there are reasons to believe that its role may not diminish.

One is that employe pension coverage is no longer growing much, according to the commission. About half the nation's private employes and most of the nation's federal, state and local government workers are covered by pension plans. But the private plans are generally in larger, more well-to-do firms. The uncovered half work mainly in smaller, poorer places that are going to be much less likely to add private pension systems. The rate of new coverage has slowed to a crawl.

There is another problem: inflation, which makes it hard for employers to keep benefits up to speed. Almost no private pension systems are indexed to the cost of living, though many make periodic increases. This means that the value of the benefits has shrunk substantially in this high-inflation era and, in effect, cannot be depended upon. Social Security and related benefits like railroad retirement, however, are by law increased annually to cover 100 percent of the increases in the cost of living as measured by the Consumer Price Index.

Vesting is a third problem for employe pensions. Social Security, which covers virtually every job, simply accumulates credits wherever one works, except in a relatively small number of government jobs. Employer pension systems do not normally provide "portable" credits except in multi-employer plans such as are common in the construction industry, and even there portability is limited to jobs within a single trade.

The absence of portability in employer pension systems makes it theoretically possible for an employe to work in four different jobs during his career, each for just under 10 years, and never vest in pension benefits because he hasn't worked the required 10 years in any one place.

Social Security thus stands alone as overwhelmingly the mainstay of the retired and disabled.

The system can be said to have fulfilled many of the hopes of its founders in providing income security to the aged in a systematic and guaranteed fashion, and it is enormous. Consider these statistics:

In 1981 it had 36 million beneficiaries, of which all but 4.6 million were retired workers and their dependents or the survivors of deceased workers. The 4.6 million exceptions were severely disabled workers and their dependents.

Total outlays in calendar 1981 were estimated as of Oct. 20 as $127 billion for retiree and survivor benefits, $18 billion for the disabled and $30.6 billion for the Medicare hospital insurance program. About $13 billion more was the estimated outlay for the Medicare out-of-hospital doctor-care program, which, unlike the rest of the Social Security, is not financed from the Social Security payroll tax but from general revenues and premiums charged to beneficiaries.

The maximum retiree benefit, paid to the worker retiring this month or next who has worked all his life at the highest wage subject to Social Security taxes, is $752.90. With a wife's extra "free" 50 percent benefit as well, such a worker would get $1,129 a month tax free. However, average benefits are much lower: $383 for a retired worker and $413 for a disabled worker, plus the wife's benefit where applicable.

The Social Security tax is 6.65 percent each for employers and employes, payable on the first $29,700 of income. On Jan. 1 it will rise to 6.70 percent, payable on the first $32,400. Although this means that the maximum tax will be substantial—$2,171 next year—and that for many workers Social Security is by far the biggest tax they pay, it should be noted that rates are even higher in many European countries, in some cases double.

With its huge size and essential social functions, the Social Security system is in serious financial difficulties, prompting disputes about whether it should be cut to keep costs down and thus ease the burden of future tax increases.

President Reagan, rejecting the alternatives of pumping in general revenues or raising the payroll tax beyond what is scheduled in existing law, last May 12 proposed a series of long-range cuts that, in effect, would have pared long-term benefits by over a fifth as compared with current law. Particularly big cuts would have been made in the basic benefit formula, disability benefits and benefits for those retiring at 62 instead of 65.

Unfavorable public reaction and attacks by Democrats forced Reagan to withdraw his proposals and ask for creation of a commission to seek a bipartisan solution.

The problems have three separate parts:

Because of rising inflation in hospital costs, Medicare, which together with its charity counterpart Medicaid pays for about 36 percent of all hospital bills in the country, is going broke rapidly and permanently although it has a nice balance temporarily. If the economy goes fairly well, Medicare will be broke by the end of the decade if its share of the revenue from the payroll tax isn't changed from existing law. If the economy performs poorly, the breaking point will come by 1988.

Congress is already moving to pare Medicare benefits and costs somewhat, but it must do much more, or find some way to curb hospital-cost inflation, or pump in general Treasury revenues to meet the problem.

The old-age and disability (OASDI) trust funds, taken as a unit, will run short of money in a year or so because the economy has performed very poorly over the past several years, thus producing higher cost-of-living benefits and lower revenues than projected. As new payroll taxes approved in 1977 kick in over the next decade, these funds will gradually recover and should have adequate balances until around the year 2020.

But then the huge baby boom of the post-World War II era will start hitting retirement age and big, continuing OASDI deficits will develop, according to most demographic and economic projections.

The question that Congress and the president must address is how to tune the system into better long-term balance and where to find the money to meet the immediate crisis in the old-age and disability funds.

For the long term, suggestions include raising the basic retirement age from 65 to 68, increasing the penalty for opting for retirement at 62, decreasing the basic old-age benfit formula by 10 percent or so and paring away some of the dependents' and survivor benefits. Many Democrats and system loyalists believe many of these proposals, at least as laid out by the president, are far in excess of what is needed, and some prefer to pay for the added costs through general revenues or tax increases.

For the short term, there have been proposals for some benefit cuts, particularly in the annual cost-of-living adjustment. Many believe it puts too much pressure on the system and on the nation as a whole to have to pay full inflation increases each year, even when the economy otherwise is stagnating and the workers who are footing the bill through payroll taxes are themselves not keeping up with the increased cost of living in their wage scales.

So far, the bulk of Democrats in Congress have taken the position that the short-term crisis may be manageable by temporary borrowing from the Medicare fund, as long as it is flush, or from the Treasury, with the expectation that things will right themselves when the new revenues start rolling in during the later part of this decade.

However, new reports suggest that the margin of safety in borrowing from Medicare may be so slender that it would not do the trick adequately beyond the next two or three years, and not even that long if the economy doesn't improve over its current performance. That is about where Congress is at this moment.

If the nation concludes that the income security provided by the system is so valuable that it should not be cut at all and that the cost is worth it—some polls suggest this may well be a majority view—then the eventual solution to most of the problems probably will be higher Social Security taxes or use of general revenues from the Treasury.

Under current projections, it would only take an increased payroll tax rate of about 1 percentage point each on employers and employees, beyond what is scheduled under current law, to keep the old-age and disability trust funds snug for another 75 years if the economy goes reasonably well. Medicare is another matter.

But if the added tax burden seems too great, an era of paring may be underway.●

STATE STUDENT INCENTIVE GRANTS

● Mr. RIEGLE. Mr. President, I would just like to take a moment to add my comments to the colloquy between Senators BRADLEY and SCHMITT that occurred last night on the subject of funding for the State student incentive grant (SSIG) program. I have been deeply concerned about the status of the funding for this program and was a cosponsor of the amendment proposed by Senator BRADLEY which the continuing resolution has made unnecessary.

As you know, the House bill allotted $76.7 million for fiscal year 1982 for the SSIG program—a figure that has remained constant since 1978. The Senate Appropriations Committee on the other hand regrettably recommended no funds for SSIG's for fiscal 1982—an action which would have jeopardized higher education opportunities for many low-income students.

Fortunately, under the continuing resolution passed by the Senate last night, funding for the SSIG program would be appropriate at the lower of the House or fiscal year 1981 levels. Since these figures are identical, there is no dispute that the program will be funded at $76.7 million for fiscal year 1982. It is my understanding that the chairman of the Labor-HHS-Education and Related Agencies Appropriation Subcommittee assured the Senator from New Jersey that the $76.7 million figure would prevail. I would like to thank both of the Senators involved for stating this point clearly.

The SSIG program has provided incentives to States to develop need and merit-based undergraduate scholarship and grant programs. Federal SSIG dollars generate State matching dollars that go to deserving students.

In this respect, Federal funds act as a catalyst to encourage States to responsibly meet the needs of low-income students seeking a brighter future through a college education.

In the context of massive cuts to Federal education aid and student loan programs, the loss of these funds could not be replaced by many State legislatures. A number of States have already indicated that they would be unable to continue their State student grant program. The elimination of this program would place college education out of the reach of many of our Nation's young people.

In my own State of Michigan, SSIG funds represent fully 21 percent of the total scholarship appropriation in the State. The serious financial circumstances of my State's economy offer little hope that the Michigan legislature could have replaced the loss of these vital education dollars. Zeroing appropriations for the SSIG program would have eliminated over 4,000 students from Michigan's scholarship program.

Mr. President, we have come a long way over the last decade toward making a college education a viable option for all members of our society. I was pleased to be a cosponsor of the amendment by Senator PELL to restore a portion of funds for Pell grants and supplemental educational opportunity grants (SEOG's). Unfortunately this amendment failed by a vote of 38 to 59. I fear that in the name of budgetary savings, the majority in this Senate are voting to exclude all but the affluent citizens of our country from the opportunity to gain further knowledge and skills and to make vital contributions to the future of our Nation.●

GOVERNMENT ADVERTISING

● Mr. BAUCUS. Mr. President, I would like to bring to the attention of my colleagues an article that appeared in the Washington Post on November 9, 1981, entitled, "Publications Come Down to Final Word."

The article indicates that some 900 Government publications have been targeted for elimination by the Office of Management and Budget. I am pleased that the administration has finally joined in the fight against excessive Government advertising with direct action.

I am convinced, as I have stated on this floor many times, that reducing public relations and publications budgets is the best way to stop the flood of wasteful brochures and film clips that have inundated us in the past few years.

As many of my colleagues may remember, last year I offered amendments to the appropriation bills of several Federal agencies that cut their advertising and public relations budgets by 10 percent. The efforts by OMB to cease publication of 900 newsletters and pamphlets goes a long way to implementing the extent of my amendments.

The efforts of OMB, if continued, will make our jobs in this body a little easier. This Government does not lack for examples of and reports on wasteful Government public relations. What we do need is more direct action to curb those abuses. I welcome the administration's efforts in this area and hope they continue.

I plan to continue to monitor agency efforts to eliminate this area of wasteful spending.

I ask unanimous consent that the Post article be printed in the RECORD so that my colleagues have an idea of the work being done.

The article follows:

PUBLICATIONS COME DOWN TO FINAL WORD

(By Myron Struck)

When the last copy of "Sprocketman," a comic-book parody of Spiderman, is handed out by the Consumer Product Safety Commission, the guide to bicycle safety will pass into history.

Along with it will go the Department of Energy's electric car handbook, "The Electric Adventure," the Small Business Administration's "Selecting Advertising Media: A Guide for Small Business" and the newsletter of the Jewish chapel at Kessler Air Force Base in Biloxy, Miss. (monthly press run, 250 copies; savings, $1,566).

These publications, and more than 900 others identified by a survey of agency and Office of Management and Budget officials, have become the victims of budget cuts and program managers responding to an OMB order that they eliminate "unnecessary federal spending on the development, printing and distribution of periodicals and recurring pamphlets."

The list is made up mostly of consumer publications and program guides, but it also includes federal employe newsletters, calendars, posters, historical guides, nature pamphlets and statistical brochures.

President Reagan ordered a moratorium April 20 on new periodicals, pamphlets and audio-visual products, and OMB followed that with a call for cutting wasteful spending on publications.

By next Sunday, all agencies are supposed to have sent OMB their plans for a control process to guide the development of new publications and audio-visual materials. The agencies' reports are supposed to give the name, frequency, average number of copies, costs and associated users' fees for every publication. That information has not been compiled before because it traditionally has been cloaked in sub-agency spending figures, according to OMB officials.

Many publications officials, not surprisingly, are bitter about the OMB order; some are quick to snipe at its paperwork demands. One Interior Department aide complained that the cuts "are fostering a lot of ill will between program officials who don't want to lose this prerogative to decide which publications are necessary and the OMB. And we're caught in the middle."

OMB public affairs aide Robin Raborn says it's all for a "good cause," because "there are just so many useless and unnecessary publications floating around."

OMB said that the government will spend a projected $302.2 million in fiscal 1982 on publications and films, down from the estimated fiscal 1981 total of $336.7 million.

OUT OF PRINT: THE HIT LIST, THE SAVINGS

Here is a partial list of the publications reported terminated in fiscal 1981. The list includes OMB's estimate, when available, of how much the agencies saved by eliminating publications and reducing publishing and film-making costs.

Agriculture Department ($900,000): Food Guide for Older Folks; Breads in the Family Meal (also cakes and pies, cheese, beef and veal); Food Cost Savings Plan; Food for Fitness; Making Cottage Cheese; How Fresh Tomatoes Are Marketed; Story of Cotton; Is the Water Safe?; How to Buy Fruits (also fresh fruits; fruits and vegetables, fresh fruits and vegetables, canned and frozen fruits, canned and frozen vegetables, lamb); Sources of Milk for Federal Order Markets by State and County; Wild Mushrooms; A Vote for Farmers of Your Choice; World Economic Conditions in Relation to Economic Trade in Agriculture; Agriculture in the Third Century; Agricultural Conservation Program Annual Report; Agriculture Charts; Farm Labor Data Series; USDA Grading Standards For Wheat;

Protein Technical; Marketing Honey and Beeswax; Marketing Iceberg Lettuce; State Guides for Assessing Forest Land and Timber.

Commerce Department ($1 million): Commerce Department Library Bulletin.

National Oceanic and Atmospheric Administration: NOAA News; EDIS (Environmental Data and Information Service) Magazine; Climatological Data National Summary; Storm Data; River Forecast Summary; WDC (World Data Center) Report; World Data; ERL (Environmental Research Laboratories) Collected Reprints.

Patent and Trademark Office: Patent Talk.

Census Bureau: Statistical reports on canned food, green coffee and department stores' sales.

Maritime Administration: MariTimes.

National Bureau of Standards: PMTE (precision measurement) Update; NBS Publications List.

Consumer Product Safety Commission (less than $20,000): Hazard analysis series (bunk beds, television sets, carbonated soft drink bottles, playground equipment, pressurized containers, cribs, space heaters); The Nine Lives of El Gato (the cat).

Defense Department ($2.3 million); Aviation Safety Bulletin of the U.S. Army; Campus; Direction, Combat Crew and Air Force Reservist; Naval Military Personnel Command; Family Action newsletter; Naval Supply Corps newsletter.

Education Department ($100,000): Inspector General's Office newsletter; Summary of Federal Publications Concerning the Handicapped; National Institute of Education newsletter; A Practical Guide for Quality Control Technicians; Quality Control newsletter; Evaluation Designs for Career Education Programs.

Energy Department ($1.3 million): Energy Consumer; Emergency Building Temperature Restrictions; Making Energy Regulations—How the Public Gets Involved; Try Solar; Conserving Energy; Winter Survival—What to Do if the Heat or Power Goes Off on a Freezing Winter Night; Put the Sun to Work Today; Organize Now for Energy; Electric Power Monthly; International Energy Annual; For Local Governments the Future Is Now in Electric Vehicles; Consumer Energy Atlas; Energy Excerpts (DOE speeches); Energy Planner; Fusion Energy; How to Understand Your Utility Bill; International Petroleum Annual; Passive Solar Heating; Solar-Powered Irrigation Pump; Saving Money With Energy Conservation (energy audit workbooks for apartment buildings, bakeries, fast food restaurants, grocery stores, hotels, light industry, office buildings, warehouses); Ocean Thermal Energy Conversion; Solar Electricity From Thermal Conversion.

Environmental Protection Agency: No publications were terminated in fiscal 1981, according to a spokesman. OMB says the agency saved $2.4 million by doing no printing after April.

Equal Employment Opportunity Commission: EEOC Annual Report; Handicapped Individuals' Employment; Age Discrimination.

Federal Trade Commission: Protection for the Elderly; Mail-Order Insurance; Unordered Merchandise; Risks in Raising Chinchillas; Franchise Business Risks; Freezer Money-Saving Offer—Truth-in-Lending Takes the Wraps off Credit; Vocational Schools; Which Job Training Will You Choose; Three Days to Cancel; Selecting a Vocational School; Fight Back—Don't Let the Gyp Artists Get Away With It; Guard Against Phony Ads; How to Use Truth-in-Lending; List of Common Deceptions; Teacher's Kit (on consumer protection); Availability of Advertised Items at Advertised Prices; Care Labeling Rule; Conserving Energy and Consumer Dollars; Do You Speak "Credit"? (cartoon/calendar).

General Services Administration ($200,000): GSA Journal; employee newsletters in all 11 regional offices.

Health and Human Services ($2.5 million):

Social Security Administration: A Guide to Social Security; Using Private Employment Agencies to Place Welfare Recipients in Jobs; The Privacy Act and Your Request for a Social Security Number; Social Security Survivor Benefits; Disability Benefits and Blind People; Disabled?—Find Out About Social Security and Disability Benefits; Social Security for People Disabled Before 22; Social Security Information for Young Families; Do You Know When You Should Contact Social Security; Check Your Social Security Record; Doing Business With Social Security—Use Teleservice; Women and Social Security; Basic Facts About Medicare; Payment Under Medicare Medical Insurance; How Medicare Helps During a Hospital Stay; Supplemental Security Income for Disabled and Blind Children; SSI for Retarded People; How SSI Can Help; Assets of Food Stamp Participants; Emergency Assistance and Special Needs Programs in Public Welfare; Four Decades of International Social Security Research; Employers Paying the Employe Portion of Social Security Taxes; Vocational Rehabilitation for the Blind and Disabled; Medicare Coverage in a Skilled Nursing Facility; Home Health Care Under Medicare; Medicare for People With Permanent Kidney Failure.

Public Health Service: Basic Concepts of Environmental Health; TB Control; Fluoridation—Community Must Help Get Adopted; Special Hazard Alert on Chlorinated Benzene; National Institute of Occupational Safety and Health Schedule of Classes; Guide for the Care and Use of Laboratory Animals; Bureau of Health Facilities Annual Report; The Consumer and Health Planning; Bureau of Health Planning Annual Report; Directory for Consumer Health Education Sources; Phasing Out Federal Participation in Health Planning; World Health Organization Report; Biological and Genetic Factors in Alcoholism; Adolescent Drinking Patterns; National Institute of Health Visitors Guide; Smoking and Health; Guidelines for Health Promotion; Nutrition '80; Family Safety Digest; Alcohol O&A; Exercise and Your Heart; Understanding Stress; Guidelines for Community Health; Promoting Health; Cerebral Palsy—Hope Through Research; Epilepsy—Hope Through Research; What are the Facts About Genetic Diseases?; Nutrition and Pregnancy; Facts about Snacks; Cancer and the Environment.

Human Development Service: Wise Drug Use and the Elderly; Energy Fact Sheet—Saving Energy in the Home; Children and Youth Accident Prevention; Long-Term Care; Immunization of Youth; Helping Youth and Families of Separation, Divorce and Remarriage; Alcohol, Drug Abuse and Youth Programs; National Toll-Free Communications; State Data Book on Older Persons; Nutrition Services Available to Older Indians; Education and Training Programs of the Administration on Aging; Sources of Grants and Loans for Fuel and Winterization; Technology and the Aging Network; Older Americans—The Arts and the Humanities; Employment in Human Development Service Programs; Citizen Participation in Social Service Programs; Impact Funds—Self-Sufficiency; Model Child Protection Act; Record Retention in Central Registers; Adoption Exchange Handbook; Foster Family Care Standards; Child Welfare Training Materials; Home-Based Services—The View From the Health Care Field; Head Start Fact Book; Handbook for Health Coordinators; Prenatal Care (Spanish edition); Findings from Evaluation of Youth Demonstrations; Youth Employment; Youth as Community Resources; Runaway Youth Switchboard (poster and brochure); Biography of Youth Employment; Operations Manual for Youth Employment; Analysis and Update of the Runaway and Homeless Youth Act; The Status of Children—1981; Head Start Program Performance Standards; Directory of Head Start Programs; National Analysis of Child Neglect and Reporting.

Health Care Financing Administration: Myths about Medicare/Medicaid.

Housing and Urban Development Department ($700,000): HUD Trends; 112 internal handbooks; Land Use and Marketability Studies for Urban Renewal Projects; HUD Policy on Noise Abatement and Control; Community Development Block Grant Monitoring Handbook; Reimbursement of Travel Expenses for HUD Employes.

Interior Department ($1.1 million): Departmental Yearbook.

National Park Service Campgrounds in . . . (various states); Recreation Sites in . . . (various states); All About Heritage Conservation and Recreation Service; Abraham Lincoln Home; Lyndon B. Johnson National Historic Site; White Sands National Park; Everglades National Park—National Environmental Study Area; Living History at Natchez Trace Parkway.

Bureau of Mines: Mineral Trade Notes; Minerals in the Economy of . . . (each state).

Bureau of Indian Affairs: BIA Profile—The Bureau of Indian Affairs and American Indians.

Bureau of Reclamation: Garrison Project (brochure and fact sheet).

Fish & Wildlife Service: Plymouth Redbellied Turtle; Bird-Banding; Agassiz (Minn.) National Wildlife Refuge; Mammals of the Agassiz National Wildlife Refuge; Minneapolis Regional Program; Birds of the Horicon (Wis.) National Wildlife Refuge; Birds of the Ottawa (Ohio) National Wildlife Refuge; Ottawa Wildlife Refuge Foot Trails; Real Foot Lakes (Ky.) National Wildlife Refuge; Kenai (Alaska) Moose Range; Kodiak (Alaska) National Wildlife Range; Nunivak (Alaska) National Wildlife Range; Steel-Shot (poster); Becharof (Alaska) National Wildlife Monument; Upper Quachita (Okla.) National Wildlife Refuge; Alaska Update; Birds of the Big Stone (Minn). National Wildlife Refuge; Necedah (Wis.) National Wildlife Refuge (calendar); Recreation Cabins of the Kodiak National Wildlife Refuge.

Justice Department ($300,000): No publications killed.

Labor Department ($800,000); Focus on the Future (Employment Issues of Asian/Pacific American Women); Displaced Homemaker Program; Women in Non-Traditional Jobs.

Occupational Safety and Health Administration: Office Safety; Secretary's Report on Occupational Safety and Health in the Federal Agencies; Writing Effective Industrial Hygiene Reports.

Bureau of Labor Statistics: State, County, Municipal Collective Bargaining Agreements: Escalation of the Producer Price Index; Special Labor Force Reports.

Mine Safety and Health Administration: New Coal Mine Dust Standards for the United States; Industry Workshop; Inspection and Investigation Manual for Metal and Non-Metal Mines; Underground Coal Haulage and Transportation Program Instruction Manual; Use of Aircraft Imagery in Evaluating Ground Stability at Open Pit Uranium Mines in Gas Hills, Wyo.; Compaction Characteristics of Coal Refuse; Suppression of Dust in Mining, Milling and Tunneling; Respirable Dust Control on Long Wall Mining Operaitons in the United States; Laboratory and Field Evaluation of Instantaneous

Reading Dust Instruments; Quality Assurance Program for Field Health Activities; Natural Drift—Its Measure and Modeling in Underground Mine Ventilation Systems; Selected Injury Experience and Worktime for the Mining Industry in the U.S. 1931–77; Coal Mine Injury Experience and Work Time by Occupation, 1976–78; Tethered Balloon Gas Sampling.

Employment and Training Administration: Career Opportunities in the Petroleum Industry; Career Opportunities in the Hotel-Restaurant Industry; After the Job Corps; Private Sector Initiative Program Spotlight; PSIP Photo Book; ETA Interchange newsletter; Index to ETA Publications; Dateline CETA; Manual for the U.S. Employment Service; Fiscal 1982 State Agency Programs and Budget Guidelines; Employment Service Program newsletter; Jobs Corps in Brief; National Occupational Information Coordinating Committee newsletter; Comparison of State Unemployment Insurance Laws.

Employment Standards Administration: ESA Digest; What's News.

Labor Management Services Administration: Instructive Guide for Reporting Under the Labor Management Reporting and Disclosure Act.

National Aeronautics and Space Administration (less than $40,000): Ion Engine Report.

Office of Personnel Management ($200,000): The First Line; Spotlight (affirmative action programs); LaMesa Redonda (Hispanic employment programs); Women in Action.

Small Business Administration ($400,000): Can You Afford Delivery Service?; Public Relations for Small Business; Quality Control in Defense Production; Photo Dealers and Studios; Manufacturers Sales Representatives; Strengthening Small Business Management; Small Business Goes to College; Personnel Management Guides for Small Business; Selecting Advertising Media; Management Assistance, Management Counseling Guide; Selling to the U.S. Government; Small Business and the Energy Challenge; Women and the U.S. Small Business Administration; Insight; Data Processing.

State Department ($100,000): Homes of the Department of State; Geographic Reports; Geographic Bulletins; Secretaries of State; Foreign Policy and the Department of State.

Transportation Department ($1.2 million): Introduction to the Office of Inspector General; Senior Executive Service Candidate Development Program; Transportation Fact Book; Impact of Demographic Trends on Future Travel in Metro Areas; Transportation Mode Choice in Rural Areas; Providing Transportation for Rural Americans; Transportation Profile of the '80s; Transportation Research Journal; Transportation Energy Activities of the Department of Transportation; Energy Primer (on transportation); Paratransit Resource Guide; Transportation and the Future; Transition Planning for Accessible Mass Transit Under Section 504 Regulations; Coordinating Transportation Services for the Elderly and Handicapped; Transportation and the Elderly and Handicapped—A Literature Capsule; Traffic in the Centers of Large Cities; Transportation Design Awards Examples; Transportation and Land Development; Impact of Transportation on Business Location; Transportation Productivity; Changes in Location, Behavior and Travel; Urban Transportation Demand Elasticities; Federal Urban Transit Investments; Integrating Urban Transportation; Nondiscrimination on the Basis of Age in DOT Programs; Information Package On Section 504 of the Rehabilitation Act of 1973; Aesthetics in Transportation; Proposed Policy Initiatives for Small Community and Rural Transportation; Trends in Federal Transportation Financial Activity; Trends in Federal Domestic Transportation Projects; Revenue and Expenses; Trends in Federal Transportation Financial Activity (fiscal 1970–79); Interstate Substitutions—Handbook for Mayors; Transportation Aspects of the President's Economic Program; Effects of Federal Transportation Funding Policies and Structures; Financing Public Urban Transportation; Problems of Truck Owner-Operators; Cargo Security Handbook; Physical Security of Cargo; Truck Top Markings for Visual Identifications; Study of Trucking Service in Small Communities; Effect of MCA (Motor Carrier Act) On ICC (Interstate Commerce Commission) Motor Carrier Entry Policy; Motor Carrier Insurance Study; Examples of Discrimination Under Collective Motor Carrier Ratemaking; Truck and Rail Reform Impact; Truck Size and Weight Study; Truck Size and Weight Limitations; Consumer Problems With Auto Repair; Common Sense in Buying a New Car; U.S. Auto Industry; Taxicabs as Public Transit; Use of School Buses for Public Transportation; Intercity Bus Operations; Intercity Bus, Rail and Air Systems in Rural Areas; Maritime Cargo Loss Prevention Handbook; Inland Waterway User Charge Study; Community Bicycle Program Guidance and Technical Assistance; Bicycle Forum.

Urban Mass Transportation Administration: Civil Rights.

Federal Railroad Administration: FRA newsletter; FRA Research Reporter; Rail System Investment Analysis (10 volumes).

Federal Aviation Administration: Airport Consolidation; The Control Tower; Pilots' Weather—How Is It Forecast; You and Your Radio; You and Your Transponder; A Glossary of Aeronautical Central Terms; Destiny Altitude; Radar Sees the Weather; Congratulations—You Just Passed Your (Pilots') Physical; Tip on How to Use the Flight Planner; Aviation Safety Bulletin No. 1; Flight Watch.

Federal Highway Administration: Your Guide to Programs of the Federal Highway Administration; Arterial Strategies; Safety Hazard Advance Warning System; Tests of Experimental No-Passing Zones; Speed Control on High-Speed Roadways; Estimating Safety Benefits for Alternative Improvements; Excessive Sign Usage; TRAFLO (traffic flow reports); Performance Data for Highway Bridge Coatings; Maintenance for Highway Structural Steel; Public Roads; Highways and Wetlands; America on the Move; Federal-Aid Highway Program; 1970–2000 Travel; Urban Transportation Indicators; Arterial Speed Profiles and Fuel Consumption; Computer Mapping Techniques; Changes to Joint Planning Regulations; Ozone Analysis; Air Quality Planning in Small Areas; Rural and Small Urban Public Transportation; Rural Public Transportation Conference; Nonurbanized Public Transportation; Rural Transportation Technology Study; Rural Driver Training Manual; Rural Transportation (three newsletters); Parking Management Booklet for State/Local Areas; Parking Workshop; Photographic Technique for Determining Auto Occupancy; Auto Use Management; Rock Slope Engineering; Construction and Rehabilitation of Pavement; High-Occupancy Vehicle Design and Enforcement; Traffic Signal; Barrier Design; Roadway Lighting; Safety Courses; Federal Highway Safety Program Effectiveness; Highway Safety Performance; Protecting the Environment in the Federal-Aid Highway Program; Environment Assessment Process; Environmental Action Plan Report Series.

National Highway Traffic Safety Administration: Common Sense in Buying a New Car; Common Sense in Buying a Safe Used Car; So You Really Want to Do Something About the Drunk Driver?; Alcohol Crash Story; Communications Strategies on Alcohol and Safety; Studded Tires; Car Care Safety; Passenger Car Brakes; Vehicle Exhaust Systems; Use of Headlights; Engine Stalling; Automotive Rust; Automobile Jacks; Teaching the Safety Belt Message; Getting the Safety Belt Message Across; Auto Safety Belt Fact Book; 65 mph vs. 55 mph—Who Is Right?; 17 Tricks to Save Fuel and Save Dollars; Safe Winter Driving; Loan a Seat; Auto Safety Hotline; Battery Hazard; Moped Safety.

Treasury Department ($600,000): No publications were terminated.

Veterans' Administration ($100,000): VA Careers for . . . (voluntary service workers, social workers, pharmacists, librarians, rehabilitation therapists, medical technicians, administrative staff).●

FEDERAL SPENDING IN FISCAL YEAR 1982

● Mr. BAUCUS. Mr. President, for the past 6 weeks one administration spokesman after another has appeared publicly to lay the blame for our Nation's fiscal difficulties on Congress.

At his latest press conference President Reagan led the Nation to believe that the Federal budget will not be balanced in 1984 because Congress did not approve his latest spending cut proposals.

These statements are just not true. Last March, the President asked Congress to cut $35 billion in domestic spending programs in fiscal year 1982, which began October 1. In August, Congress adopted a budget bill that did that and more—cutting $37 billion from the budget.

Yet inflation continued unchecked. Interest rates soared to even higher levels. Estimates of the Federal deficit for the 1982 fiscal year climbed from $42.5 billion to anywhere from $65 to $100 billion. The President's economic advisers threw their forecasts out the window.

President Reagan responded to the situation by asking for even more budget cuts on September 24. He proposed a 12-percent across-the-board cut, some $8.4 billion in 1982 spending. This request came just 1 week before the start of the new fiscal year.

Coupled with spending cuts, the President in March also outlined a program of tax cuts he said would spur new investment and savings and get America's economy moving again.

Now, how has Congress responded? The cuts adopted by Congress last summer and those being considered by the continuing resolution now before us match or exceed the total level of spending cuts President Reagan requested.

Congress also approved the President's tax cut package before the August recess.

The resolution to provide funding for Federal programs until March of next year includes spending cuts totaling $6.5 billion or 75 percent of the $8.4 billion the President requested in September.

President Reagan's March and September budget cut requests add up to $43.4 billion for fiscal year 1982. But Congress has already cut $37 billion and today is considering another $6.5 billion. Now that's a total of $43.5 billion.

In fact every Congress since 1943, except one, has spent less money than a President has requested. At this point, I ask that a table comparing Presidential funding requests with funds actually appropriated by Congress be included in the RECORD.

The table follows:

COMPARISON OF PRESIDENTIAL BUDGET REQUESTS AND CONGRESSIONAL APPROPRIATED AMOUNTS ENACTED IN REGULAR ANNUAL, SUPPLEMENTAL, AND DEFICIENCY APPROPRIATIONS BILLS
(In Dollars)

CALENDAR YEAR	PRESIDENTIAL BUDGET REQUESTS	CONGRESSIONALLY APPROPRIATED AMOUNTS	CONGRESSIONALLY APPROPRIATED AMOUNTS LESS (-) OR MORE (+) THAN PRESIDENTIAL REQUEST
1943	$115,041,366,395	$110,634,660,785	- $4,406,705,610
1944	$ 63,513,471,020	$ 61,257,906,152	- $2,255,564,868
1945	$ 62,453,310,868	$ 61,042,345,331	- $1,410,965,537
1946	$ 30,051,109,870	$ 28,459,502,172	- $1,591,607,698
1947	$ 33,367,507,923	$ 30,130,762,141	- $3,236,745,782
1948	$ 35,409,550,523	$ 32,699,846,731	- $2,709,703,792
1949	$ 39,545,529,108	$ 37,825,026,214	- $1,720,502,894
1950	$ 54,316,658,423	$ 52,427,926,629	- $1,888;731,794
1951	$ 96,340,781,110	$ 91,059,713,307	- $5,281,067,803
1952	$ 83,964,877,176	$ 75,355,434,201	- $8,609,442,975
1953	$ 66,568,694,353	$ 54,539,342,491	-$12,029,351,862
1954	$ 50,257,490,985	$ 47,642,131,205	- $2,615,359,780
1955	$ 55,044,333,729	$ 53,124,821,215	- $1,919,512,514
1956	$ 60,892,420,237	$ 60,647,917,590	- $ 244,502,647
1957	$ 64,638,110,610	$ 59,589,731,631	- $5,048,378,979
1958	$ 73,272,859,573	$ 72,653,476,248	- $ 619,383,325
1959	$ 74,859,472,045	$ 72,977,957,952	- $1,881,514,093
1960	$ 73,845,974,490	$ 73,634,335,992	- $ 211,638,498
1961	$ 91,597,448,053	$ 86,606,487,273	- $4,990,960,780
1962	$ 96,803,292,115	$ 92,260,154,659	- $4,543,137,456
1963	$ 98,904,155,136	$ 92,432,923,132	- $6,471,232,004
1964	$ 98,297,358,556	$ 94,162,918,996	- $4,134,439,560
1965	$109,448,074,896	$107,037,566,896	- $2,410,508,000
1966	$131,164,926,586	$130,281,568,480	- $ 883,358,106
1967	$147,804,557,929	$141,872,346,664	- $5,932,211,265
1968	$147,908,612,996	$133,339,868,734	-$14,568,744,262
1969	$142,701,346,215	$134,431,463,135	- $8,269,883,080
1970	$147,765,358,434	$144,273,528,504	- $3,491,829,930
1971	$167,874,624,937	$165,225,661,865	- $2,648,963,072
1972	$185,431,804,552	$178,960,106,864	- $6,471,697,688

1979	$397,653,765,836	$386,822,093,291	-$10,831,672,545
1980	$340,339,446,763	$333,695,164,197	- $6,644,282,566

DATA SOURCE: Committee on Appropriations, U.S. House of Representatives

Mr. BAUCUS. Mr. President, I think it is important to set the record straight. In no way can the President lay the blame for huge deficits and high unemployment, continued inflation and high interest rates on the doorstep of Congress.

The fact of the matter is that the administration's own economic program is the problem. The administration's economic numbers just do not add up. They have not added up from the beginning, and OMB Director David Stockman has admitted as much.

The reason they do not add up is that there is not enough in the budget that can be cut to make up for the administration's $750 billion tax cut. The administration now is asking Congress for $52 billion in unidentified budget cuts in fiscal year 1983.

But spending cuts alone will not balance the budget by 1984. To balance the budget by 1984 would require a minimum of $100 billion in addition to the $135 billion Congress already cut for the period 1981 to 1984. To cut $100 billion more would eliminate nearly every Government function except defense, social security, and a few other entitlement programs.

I would hope the White House would stop accusing Congress of causing the economic problems we face. It is time all of us worked together to find solutions.●

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, it is clear to me that there is no further business that can be transacted by the Senate this evening. I regret to say that it will be necessary, then, for the Senate to be in on tomorrow.

The Senate will convene under the order previously entered at 12 noon on tomorrow. Senators should be on notice, Mr. President, that there is a distinct possibility that the Senate will be in for much of the day tomorrow and late in the evening, if necessary, to wait on the committee on conference and on the action of the House of Representatives in respect to the conference.

There is even a possibility, Mr. President, and Senators should be on notice of the possibility, that the House will be in session and the Senate will be in session on Sunday. That is unusual and undesirable. But, Mr. President, if the con-

ferees cannot agree, if the House of Representatives cannot deal with the conference report, or if the Congress must deal with a veto message from the President, it is my intention to ask the Senate to convene on Sunday.

So, Senators should be on notice of that possibility, I regret to say.

RECESS

Mr. BAKER. Mr. President, if there is no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 12 noon tomorrow.

The motion was agreed to, and the Senate, at 9:41 p.m., recessed until Saturday, November 21, 1981, at 12 meridian.

CONFIRMATIONS

Executive nominations confirmed by the Senate November 20, 1981:

DEPARTMENT OF STATE

Milan D. Bish, of Nebraska, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Barbados, and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to Saint Lucia and Ambassador Extraordinary and Plenipotentiary of the United States of America to Saint Vincent and the Grenadines.

Elliott Abrams, of the District of Columbia, to be Assistant Secretary of State for Human Rights and Humanitarian Affairs, vice Patricia M. Derian, resigned.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Friday November 20, 1981*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Let us pray in the words of St. Francis of Assisi:

Lord, make me an instrument of Thy peace,
Where there is hatred, let me sow love;
Where there is injury, pardon;
Where there is doubt, faith;
Where there is despair, hope;
Where there is darkness, light; and
Where there is sadness, joy.
O Divine Master, grant that I may not so much seek to be consoled as to console;
To be understood, as to understand;
To be loved as to love;
For it is in giving that we receive;
It is in pardoning that we are pardoned;
And it is in dying that we are born to eternal life.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. LOEFFLER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. LOEFFLER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 323, nays 17, answered "present" 1, not voting 92, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 224. Concurrent resolution to express the support of the Congress for the President's initiatives for peace.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3413) entitled "An act to authorize appropriations for the Depart-

ment of Energy for national security programs for fiscal year 1982, and for other purposes."

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a joint resolution of the House of the following title:

H.J. Res. 357. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.J. Res. 357) entitled "An act making further continuing appropriations for the fiscal year 1982, and for other purposes, and requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Messrs. HATFIELD, STEVENS, WEICKER, MCCLURE, LAXALT, GARN, SCHMITT, COCHRAN, ANDREWS, ABDNOR, KASTEN, D'AMATO, MATTINGLY, RUDMAN, SPECTER, PROXMIRE, STENNIS, ROBERT C. BYRD, INOUYE, HOLLINGS, EAGLETON, CHILES, JOHNSTON, HUDDLESTON, BURDICK, SASSER, DECONCINI, AND BUMPERS to be the conferees on the part of the Senate.

APPOINTMENT OF CONFEREES ON HOUSE JOINT RESOLUTION 357, FURTHER CONTINUING APPROPRIATIONS, 1982

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the joint resolution (H.J. Res. 357) making further continuing appropriations for the fiscal year 1982, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore (Mr. WRIGHT). Is there objection to the request of the gentleman from Mississippi?

Mr. WALKER. Mr. Speaker, reserving the right to object, and I do not intend to object, but I take this time to ask the gentleman whether he could give us some idea of the scheduling of the conferences and whether he could give the Members some idea as to what the situation may look like at this point.

Mr. WHITTEN. Mr. Speaker, if the gentleman will yield, I would be glad to give him some idea, but a general idea is about all we have. The other body tells us they will not be ready until sometime in the afternoon. They added about 75 amendments. I do not think it is quite clear as to what the meaning may be in some of those instances. They have gotten together themselves, and we are hopeful that we can get together this afternoon. There is nothing to do but wait.

Mr. WALKER. Mr. Speaker, further reserving the right to object, is the gentleman saying that 75 amendments were added to our bill?

Mr. WHITTEN. It is my understanding that there are about 75 amendments.

Mr. WALKER. About 75 amendments. Can the gentleman give us some idea from the money figures that the other body adopted, compared to our money figures, as to whether the appropriations were increased or not?

Mr. WHITTEN. I think what they are trying to do is determine what effect this will have. They have given no information to me as yet.

Mr. WALKER. Further reserving the right to object, I will be glad to yield to the distinguished Speaker.

Mr. O'NEILL. From my understanding of the chairman of the committee, it is going to take 2 to 3 hours, and probably, as we assess it, the conferees should be ready to meet at about 2 o'clock. I have no idea as to how long the conferees would take.

The normal procedure, after the conferees come to an agreement, is that it takes approximately, at a minimum, looking over the past records, 3 hours for them to put it together.

I would think that by that particular time it would be late in the afternoon or probably early in the morning, and it is my intent, I will say to the minority leader, to give the Members of the House 3 hours' notice before the House takes up the conference report. So if Members happen to be home or wherever they are, we would be able to get them back in time for the vote. It is almost impossible to estimate when it is going to be. The House would be in recess. We do not intend to adjourn for the day.

The program will be that we have conference reports that we want to take up. We will take up the Older Americans Act, and then we will go into recess subject to the call of the Chair. I would just have to say that all the Members have to be alert, but we will give them ample notice. If the Members would chance to be home or chance to be downtown or in their offices, we would give them time to get back for the vote.

Mr. WALKER. I thank the distinguished Speaker, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi? The Chair hears none, and, without objection, appoints the following conferees: Messrs. WHITTEN, BOLAND, NATCHER, SMITH of Iowa, ADDABBO, LONG of Maryland, YATES, ROYBAL, BEVILL, GINN, BENJAMIN, DIXON, FAZIO, CONTE, MCDADE, EDWARDS of Alabama, MYERS, ROBINSON, MILLER of Ohio, COUGHLIN, and YOUNG of Florida.

There was no objection.

MAKING IN ORDER ON TODAY OR ANY DAY THEREAFTER CONSIDERATION OF HOUSE JOINT RESOLUTION 357, FURTHER CONTINUING APPROPRIATIONS, 1982

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that it may be in order at any time on today, November 20, 1981, or any day thereafter to consider the conference report and any amendments on disagreement on the joint resolution (H.J. Res. 357) making further continuing appropriations for the fiscal year 1982, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

LABOR DEPARTMENT DOCUMENT MAY HAVE TO BE SUBPENAED

(Mr. OBEY asked and was given permission to address the House for 1 minute.)

Mr. OBEY. Mr. Speaker, the Labor Department claimed in testimony before the Appropriations Committee that its budget recommendation to eliminate 8,000 jobs from the Employment Administration will save $120 million. It has come to my attention that the Labor Department has in its possession a document which estimates that that cut will result in a $1 billion overpayment to recipients or in payments to ineligible recipients.

The Labor Department agreed to supply that document to the committee, but it has now altered the transcript of its committee testimony to renege on that agreement and is trying to conceal that document.

Mr. Speaker, if the Department does not provide that document to the House by Friday, I will ask the Appropriations Committee to subpena it. The episode illustrates the stupidity of applying the cuts in the continuing resolution to a program such as the Employment Administration in a way that will produce massive waste and exploding deficits.

□ 1030

TRIBUTE TO Z. STEPHEN GRZEGOREK

(Mr. FOGLIETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOGLIETTA. Mr. Speaker, I wish to take this opportunity to pay tribute to Z. Stephen Grzegorek, Director of the Northeast Regional Office of the U.S. Bureau of Prisons, for his role in the peaceful resolution of the Graterford hostage crisis.

The crisis began on the evening of November 9, when a group of Grater-

ford inmates were thwarted in their attempt to escape over the prison wall, and took refuge in the prison kitchen, barricading themselves in with 38 hostages. The prisoners who held the hostages were armed and dangerous. Their leader, Joseph Bowen, is a convicted murder who had killed two prison wardens at Holmesburg Prison while he was serving a life sentence for slaying a police officer.

In the hope of reaching a peaceful resolution, Pennsylvania Governor Thornburgh called upon Mr. Grzegorek to head a team from the Federal Prison System in providing technical assistance to the State officials who were responsible for negotiating with the convicts. Later, Chuck Stone, a columnist and senior editor of the Philadelphia Daily News, along with Bowen's brother, were called in to mediate.

As it turned out, Mr. Grzegorek provided much more than technical assistance. Bowen and his accomplices were afraid that if they surrendered themselves they would be brutally mistreated, and possibly even killed, by the guards at Graterford. They were, however, willing to entrust their safety to the Federal authorities.

In discussions with Stone the convicts agreed to a list of conditions for their surrender, which provided that they would be transfered from the State prison system into the Federal system, as State boarders. These conditions were agreed upon by the State and Federal authorities. As a result, the convicts released their hostages unharmed, and surrendered.

In his account of the hostage drama, Chuck Stone recognized Grzegorek as one of the heroes of the Graterford settlement. I wish to add my voice to that of Mr. Stone, and others, in praising Mr. Grzegorek for his role in saving the lives of the hostages. We are indeed fortunate to have an individual of his caliber, judgment, and sensitivity serving in a leadership position in the U.S. Bureau of Prisons.

HOUSE SHOULD HOLD OUT FOR FAIRNESS IN CONTINUING RESOLUTION

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, as we have just learned, the conference on the continuing resolution is going to get underway today. I know that the majority of the Members in the House have great confidence in Chairman WHITTEN and the gentleman from Massachusetts (Mr. CONTE), the ranking member, and other members of the conference.

However, Mr. Speaker, it is certainly my hope that while a conference is an opportunity for compromise that in this instance it is not going to be an opportunity to surrender under the threat of veto. There are millions of Americans' lives who are hanging in the wind really based on what this continuing resolution is going to do.

I know the Members share with me that we do not care whether we are here Saturday, Sunday, or whenever as long as we come up with a fair solution on this continuing resolution and one that is aimed at helping the American people.

HUMAN FAIRNESS IN THE CONTINUING RESOLUTION

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, if the morning newscasts are correct, the other body completed action on the continuing resolution only a few hours ago. And if those reports are correct, I sure wish they had worked a little bit longer. Are we really going to inflict all the pain on people programs? Could not the other body at least look at the fraud, waste, and abuse the General Accounting Office finds every year in the defense appropriation? Are cost overruns on new weapons systems beyond scrutiny?

Are we really willing to continue a double standard for spending—one for weapons systems and one for people? Mr. Speaker, unless our conferees can work some human fairness into the continuing resolution, we should not support it.

MINIMUM BENEFIT CONFERENCE

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, the President, the House, and the Senate have all gone on record in favor of restoring the minimum social security benefit, at least to some degree.

But the fact is that this benefit has not been restored. The law is that this benefit be eliminated for new recipients rights now, and for current recipients next April.

Furthermore, as of today we have not made progress toward restoring this benefit. The Senate has been slow to call meetings of the conference committee and has insisted on replacing this one misbegotten benefit cut with another.

Meanwhile, the law stays in effect and the Conference agreement on reconciliation stipulates clearly that on December 3, 3 million current minimum beneficiaries are to receive notice that their benefits might be reduced next March. The notice, according to the agreement, is to read as follows:

This is inform you that as a result of the elimination of the minimum benefit; your benefit may be reduced to some degree beginning with your April check. To determine the extent of the reduction, if any, and your possible eligibility for SSI and other assistance programs you may contact your local social security office.

Now I am told Social Security Administration does not intend to send out these notices at all in December.

If we had some confidence of prompt action, that might be a humane and rational decision. But given the attitude of the Senate in this conference, I do not have that confidence.

Meanwhile, every old person receiving a small social security check who has heard a newscast, read a newspaper, or talked to a friend knows the minimum benefit was supposed to be eliminated by the Reconciliation Act.

Now they are left in limbo. They have no notice—and they have no action. How long will this go on?

Again and again I have said to this Congress, the worst thing we can do in social security is do nothing. Here is one more example of that fact. No civilization ought to subject its elderly and near elderly to the uncertainty that we have inflicted on ours by inaction in this vital area. What a thankless Thanksgiving and cheerless Christmas our elderly must look forward to because we do nothing.

SOCIAL SECURITY

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I rise in support of the position that has just been expressed by our distinguished colleague from Texas (Mr. PICKLE), who is chairman of the Ways and Means Subcommittee that deals with social security.

It is absolutely outrageous that the conferees appointed by the other body have dragged their feet so long before agreeing to restore the minimum benefits, the meager $122 a month which were taken away from the oldest and the poorest 3 million people in our society by the cruelty of the so-called Gramm-Latta reconciliation substitute.

Sometimes I seriously wonder how many Members of the House actually knew what they were doing when they voted to deny this House the privilege of choosing from among the innumerable changes that were made by that huge document known as Gramm-Latta II. In agreeing to that procedure and that reconciliation bill, what they did, knowingly or otherwise, was to take these benefits away from some of the poorest and the oldest of our citizens.

Subsequently, the House voted overwhelmingly to restore those needed

benefits. The Senate waited weeks before acting on our bill. Now Senate conferees are insisting that future benefits must be degraded as the price for restoring what was the rightful entitlement of many needy people. It is a calloused attitude which would hold these benefits hostage. Time is running out, and I believe the American people want this matter settled.

LET THE NUMBERS DO THE TALKING

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, it is time to let the numbers do the talking.

On Monday the House voted to appropriate about $700 million less than the President requested for fiscal 1982. Last night the other body (Senate) passed 75 amendments to the House spending bill.

The computers are now working to determine whether the action is over or under the House bill.

If the President can persuade the Republican majority in the other body (Senate) to follow the Democratic leadership in the House, the Government will spend less money in fiscal 1982 than the President has requested.

This would continue the tradition of the Congress of spending less money than requested by every President since 1943, save one, each of whom has proposed higher spending goals than the Congress consented to appropriate.

I submit the numbers compiled by the Appropriations Committee, to wit:

COMPARISON OF PRESIDENTIAL BUDGET REQUESTS AND CONGRESSIONAL APPROPRIATED AMOUNTS ENACTED IN REGULAR ANNUAL, SUPPLEMENTAL, AND DEFICIENCY APPROPRIATIONS BILLS

Calendar year	Presidential budget requests	Congressionally appropriated amounts	Congressionally appropriated amounts less (−) or more (+) than Presidential request
1943	$115,041,366,395	$110,634,660,785	−$4,406,705,610

EPA: AN ENDANGERED SPECIES?

(Mr. McHUGH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McHUGH. Mr. Speaker, yesterday's edition of the New York Times carried a story relating to the Reagan administration's plans for the Environmental Protection Agency, the effect of which would be to cripple that Agency.

According to the Times, EPA Administrator Anne Gorsuch is proposing to cut the Agency's operating budget by 18 percent in fiscal year 1983. However, as if these cuts were not enough, David Stockman's Office of Management and Budget is reportedly demanding a 36-percent reduction. These proposed reductions would come on top of cuts of at least 16 percent which have been imposed on EPA since the Reagan administration took office.

If those cuts were to be implemented, EPA could not meet some of its most important responsibilities. For example:

Mrs. Gorsuch would reduce funding for hazardous waste programs by 10 percent next year. OMB wants a 65-percent reduction.

Mrs. Gorsuch would reduce funding for EPA's pesticide programs by 25 percent. OMB is proposing a 42-percent reduction.

Mrs. Gorsuch would reduce funding for the Agency's science programs by 10 percent. OMB is demanding a 51-percent cut that would require closing at least four of the Agency's main testing laboratories.

Along with those drastic cuts in operating expenses, OMB is also planning a 26-percent reduction in EPA personnel next year. Thus, even if Congress rejects its budget proposals, OMB seems intent on hamstringing EPA by denying it the people it needs to administer its programs.

Mr. Speaker, in recent years Congress has assigned more responsibility to EPA, not less. Its new role in the monitoring and cleanup of toxic wastes is just one example. Even before the Reagan administration took office, it was having some difficulty meeting those expanding responsibilities.

Of course, the budget cuts imposed this year have made its job that much tougher. Indeed, as the Times pointed out, the Agency's enforcement activities have slowed dramatically. If the administration should now be successful in cutting an additional 36 percent, there is no way that EPA can carry out its critical mission. Even Mrs. Gorsuch admits as much.

It is clear that the Reagan administration's assault upon EPA is not just an effort to save money. It is an assault upon the Federal Government's role in assuring a healthy environment for our citizens. It is an effort to cripple and ultimately dismantle the one agency that has helped to give us a cleaner and safer environment, the one agency that can protect us from the negligence and greed that once threatened to destroy our fragile resources.

I call upon the administration to abandon its ideological assault on EPA and to meet its responsibility to the people of this country. Failing that, I urge my colleagues in this Congress to reject the administration's efforts to turn back the clock on environmental protection and on the progress we have made in recent years.

THE REPUBLICANS GOT WHAT THEY WANT BUT IT IS NOT WORKING

(Mr. COELHO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COELHO. Mr. Speaker, the President's men recently confirmed what we have known all along: Their program will not accomplish the miracles they have claimed for it. Well into this week we have heard our Republican colleagues worry publicly that they must begin to raise taxes, or cut into the muscle of essential Government functions, because things just are not moving their way.

Our Republican colleagues have gotten what they wanted. Let me call to your attention a request of our esteemed colleague BOB MICHEL, who said just 60 days ago, and I quote:

> I just want to see some movement here within the next 60 days. It's just got to come, in my judgment.

Mr. Speaker, the gentleman from Illinois and our former colleague, the Budget Director from Michigan, have both made successful predictions.

There has indeed been some movement in the economy.

Our gross national product is shrinking.

Housing starts are moving down through the basement.

Auto sales are moving in reverse, back to the levels of 23 years ago.

But I would be remiss in my duties if I left you with the impression that everything is moving down.

Unemployment is moving up—and by their own admission, it looks like it will continue going up to the record set by the last Republican administration.

Bankruptcies are up—nearly 14,000 businesses have gone under this year, an increase of 50 percent.

The Consumer Price Index is up.

Budget deficits are up—an administration official is privately admitting that they will be up to $145 billion by 1984.

And we may well find out that taxes are up, too, if our grand old friends have their way.

I suspect, as a result of this movement our esteemed Illinois colleague requested, that we will see the American voters move, too—to the Democratic column in 1982.

AMERICAN STEEL INDUSTRY COMPLAINTS ARE CRYING "WOLF"

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, a historic event of great magnitude is going on in the American economic community. That poor giant, bankrupt giant of American steel, United States Steel, found $6⅓ billion somewhere in their coffers and is buying one of the largest oil companies in America.

I have not been long in Congress, but ever since I have been here, and almost ever since the history books have been written, the American steel industry has been coming to the Congress begging for protection from competition. Unfair competition, certainly, they are entitled to protection from.

But they got from the Congress and from the administration a form of international price fixing about 10 years ago. They have been operating for 4 or 5 years now under international price protection arrangements known as trigger pricing.

United States Steel cries that they did not have the capital to modernize their plants, they could not compete, and yet the biggest of them is out now spreading its financial grasp over American industry. I think they can fool us once, but fool us twice, shame on us.

REAGANOMICS IS WORKING

(Mr. ROUSSELOT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROUSSELOT. Mr. Speaker, the American people have voted in October for Reaganomics. Savings are way up. All of my colleagues on the Democratic side said all the consumers would not save, the Democrate would spend irresponsibly. They did not. The consumers saved their money.

So Reaganomics is working. The movement for savings is on; my colleague from California (Mr. COELHO) just stated there was movement in the economy. He is right the move is on.

Reaganomics is working. You can all stand up now and say you were wrong about what the American public would do with their savings from tax reductions my Democrate colleagues.

□ 1045

THE ECONOMY

(Mr. BETHUNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BETHUNE. Mr. Speaker, most everyone has been following the rule of thumb for years that a recession is two consecutive quarters of negative growth. The media, the members of the administration, business leaders, people all around have been talking about recession. Even the President has said recession recently. And all of these proclamations and figures have been based on the utterings of the soothsayers and oracles who practice that mysterious art known as economics.

Well, as a matter of fact, the third quarter figures for this year do not show negative growth. In fact, they show six-tenths of 1 percent growth. So we have not had two consecutive quarters of negative growth. Now, all of this was buried in the newspaper this morning. But the point of this is that we may have negative growth in the fourth quarter and even into the first quarter; but it just shows the lunacy of trying to follow the latest economic indicator out of the Department of Commerce.

What we need to do is keep our eye on the ball, and we need to do the things we know are right, and that is: Hold down the runaway growth of Federal spending, hold down the tax burden and hold down the regulatory burden that stifles this free enterprise system. If we will do those things and quit trying to chase the latest economic indicator in the country, we will do much better.

CAP ON EXECUTIVE SALARIES SHOULD BE REMOVED

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, on Monday I addressed the House about the need for Congress to remove the pay cap on the salaries of senior Government workers. At that time, I also mentioned that it was my hope and understanding that Senator STEVENS would be offering an amendment to the continuing resolution on appropriations which would remove the pay cap and that the Senate would approve it. I am delighted to report that late yesterday afternoon, that is exactly what happened. Senator STEVENS offered two amendments. His first amendment would have removed the pay Gap for Members of Congress and Federal executives. That amendment was defeated by an overwhelming majority. His second amendment was approved by the other body and would give senior executive in levels three, four, and five an increase in salary. There is no need for me to again elaborate on the reasons why we must remove the pay cap. I would, however, like to again urge the House conferees on the continuing resolution to accede to the Senate position, support the removal of the cap on executive salaries, and return for final adoption by this House a conference report consistent with that position.

NATIONAL FAMILY WEEK

(Mr. SMITH of Alabama asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Alabama. Mr. Speaker, I rise to commend and support our President's declaration of next week as Family Week throughout this Nation. To honor family life is especially fitting as we gather to give thanks for our great American heritage of faith, freedom, and independence in which strong American families have played such a critical part.

The family is the cradle of our civil society. It is the first unit of government in our Nation. Ours is a government of laws—not of individuals. Strong family life teaches young American citizens the values, motivations, and standards of judgment they need to participate in our democracy. Like the family, democracy requires that its citizens act for the common good. Unless self-discipline and selfless action are first taught through strong family life, our republic, our national greatness and our prosperity, cannot be maintained. The fate of our Nation and the fate of American family life are inextricably intertwined. That fact is both our greatest hope and our greatest responsibility as Members of this body.

During Family Week, I urge my distinguished colleagues to join me in supporting legislation to curb the alarming Federal erosion of privileges and responsibilities that have always been—and should always be—reserved

for families. The Family Protection Act, H.R. 3955, will take parenting away from Federal bureaucrats and restore it to parents. It will assure parents' rights to determine their children's moral and spiritual development. It will provide tax incentives to hard-working American families to care for their elderly members in the family circle, to educate their children, and to provide for the retirement years of nonworking spouses. The Family Protection Act will restore parents' rights to participate fully in the formal education of their children. It will reinstate the fundamental free exercise of voluntary prayer that forms such an important part of our constitutional and spiritual heritage.

American family life is our greatest national treasure. We cannot afford to let this cornerstone of our Republic erode and collapse. As Members of Congress, we must not fail to preserve the promise that strong family values hold for our children. The state of the American family is truly the state of America's future. If we fail to act, not only our heritage but our democracy and its freedoms will be lost.

I call upon you to join me in strengthening our Nation by reaffirming the value of the family to the American way of life, not only this week, but every day that we serve the American people.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS, 1982

(Mr. McEWEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McEWEN. Mr. Speaker, today we are to consider the conference report on the fiscal year 1982 energy and water development appropriations. I rise to express my disappointment in the conference report on the energy and water appropriations for fiscal year 1982. Although I will support final passage of this legislation, I believe that the incorporated Senate funding level for uranium enrichment is highly unwise. I am disappointed that the conference committee chose to follow the advice of the Senate and to reduce next year's uranium enrichment budget rather than to follow the action of the House, where full funding was approved.

The conferees' $86 million reduction in the uranium enrichment program could result in a serious reduction in the Nation's only gas centrifuge enrichment plant (GCEP). The Department of Energy has repeatedly stated that this cut would cause an additional delay of 1 year to a project already 6 years behind schedule. If that is the case, this reduction will ultimately result in $100 million plus in increased construction costs.

This action is a perfect example of why the legislation I introduced earlier this year to establish a uranium enrichment revolving fund is necessary. Rather than requiring the Department of Energy to submit yearly requests for GCEP funding, my bill—H.R. 2144—would fund this project directly out of revenues from the sale of enriched uranium. Upon passage of H.R. 2144, there would no longer be a need for the Congress to perform this annual appropriations pirouette.

H.R. 5050 ADDRESSES QUESTION OF IMBALANCE OF TRADE

(Mr. DUNN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DUNN. Mr. Speaker, yesterday I joined my colleague from California (Mr. HUNTER) in the introduction of a bill, H.R. 5050, designed to remedy the imbalance between our treatment of foreign car imports and that of the Japanese.

The Japanese Government and industry have for years boasted about their automobiles taking an increasing portion of the U.S. market. They throw up their hands in defense of the free trade concept, knowing that they are protected by the American sense of fair play in international trade. Back home, though, the Japanese have moved fair play to the back seat. Even before the sticker is attached, it is predetermined that American cars will be marketed at a disadvantage on Japanese soil. It appears that when Japanese manufacturers argue the merits of free trade and a free market, they do so only on a one-way street.

By adding ocean freight and port handling costs to the import car's basis, the commodity tax in Japan for imports has been made relatively higher than for their domestic products. The requirements that import dealers sell only imports, that import cars must meet safety and environmental standards tailored to their own models, and that import cars must go through a more strenuous approval process than their domestically made counterparts all add to the cost of the American car in the Japanese market. These artificial trade barriers should be negotiated away. This bill will provide a strong platform from which can do just that.

H.R. 5050 establishes a Parity Fee Commission. Its sole purpose is to study the inequities which exist in our trade of automobiles with Japan and establish fees to compensate for the unfair trade practices. This bill provides a straightforward means by which the United States can address the imbalance of trade and tactics between our auto market and that in Japan. It also provides strong comment to Japanese manufacturers and their Government to cease these methods and put free trade principles into actions as well as words.

SURPLUS PROPERTY POLICY

(Mr. WINN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WINN. Mr. Speaker, on November 5, I instroduced House Resolution 265. Senator CHARLES PERCY has introduced an identical resolution in the other body. We are trying to bring attention to the fact that this country needs to take a new look at our surplus property policy.

The Government has $1.3 billion of surplus property on the books. There is potential source of revenue there, and especially when that $1.3 billion figure is merely an adding up of original purchase prices. There are no figures for current market values—we have never put them together.

House Resolution 265 is simple: It directs the President to prepare an inventory of Federal assets, with estimates of current market values, and to submit recommendations to Congress on how to streamline surplus property policy and procedures.

It does not make sense to have buildings sit unused and deteriorating—often for years.

It does make sense to put unneeded property back onto the tax rolls.

You all should have a "Dear Colleague" on this, dated November 18, I hope you will join me in supporting this initiative.

ALASKA NATURAL GAS PIPELINE WAIVERS ARE NOT A FINANCIAL GUARANTEE

(Mr. CORCORAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORCORAN. Mr. Speaker, according to the Government Research Corporation, in 1975 the estimated cost of the Alaska natural gas transportation system (ANGTS) was $10 billion. Today, according to the testimony of Mr. John McMillian, chairman and chief executive officer of Northwest Energy Co., before the Energy and Commerce Committee's Subcommittee on Fossil and Synthetic Fuels, the cost of the project using an inflation rate of 7 to 11 percent and an interest rate of 10 to 14 percent will amount to $36.3 billion to $44.9 billion. Independent costs estimates by our Energy and Commerce Committee suggest that the total cost will certainly exceed $50 billion.

Though I am a strong supporter of private financing for the pipeline, I do not see how the proposed waivers will secure this financing. The lenders who

testified before the Fossil and Synthetic Fuels Subcommittee on October 22 made it clear that this waiver package may not be sufficient to secure financing. Of the four leading bankers that testified, not one was willing to commit his bank to the completion of the pipeline even if the waivers are passed. Mr. A. Anton Tucher, vice president of the Bank of America, testified that his bank will not go forward until we have done a "due diligence" investigation to satisfy ourselves on the technical, economic, financial, and regulatory feasibility of completing the whole system.

The banks are unwilling to commit their money until the project has been thoroughly studied, yet the Government is considering the commitment of consumer capital with no study of its own. Mr. Niskanen, a member of the Council of Economic Advisers, made it clear that a thorough economic evaluation of the pipeline has not been made. James Edwards, the Secretary of Energy, testified that the administration has not performed a cost estimate of its own nor has it conducted a final evaluation of the sponsors' estimated costs.

I ask you, Mr. Speaker, and our colleagues, how can we support these waivers when we have no idea of the cost effectiveness of this proposal or even if the cost estimates are accurate? We are dealing with consumer dollars. We will commit the money of our constituents if we pass this waiver package. How then can this project be referred to as privately financed? Consumer financed? Yes, I guess it could be called consumer financing, but the consumers may never consume any Alaskan natural gas.

POLITICAL SPLIT PERSONALITY

(Mr. DERWINSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DERWINSKI. Mr. Speaker, my remarks are not covered by a press release to the gallery. I did not write them last night. They are purely spontaneous.

I am inspired by the remarks this morning of the majority leader, the gentleman from Texas (Mr. WRIGHT), in which he in a clearly partisan, critical fashion commented on the social security situation. This amazed me. Just yesterday our dear friend, Mr. WRIGHT, reached the heights of nobility when he supported the President's peace proposals. I cannot help but wonder why we have this political split personality being exhibited by the highly respected majority leader? But I have come to an understanding of the contradictory behavior. When he is acting as a Texan, Mr. WRIGHT is natural, charming, correct, and noble. But when he is surrounded by his fellow members of the majority who are nervous about their political future, Mr. WRIGHT becomes highly partisan as he sees the success of the Reagan administration, the gentleman from Texas forgets the nobility of bipartisanship.

HIGH INTEREST RATES

(Mr. MORRISON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORRISON. Mr. Speaker, I have heard repeated expressions of concern on this floor about high interest rates and their impact on the ability of Americans to buy or build a home.

There is no argument over this concern. It is a universal concern. But the argument is and remains what causes the high cost of borrowing and what we do about it.

A major cause of high interest is the growing share of this Nation's capital that is borrowed to finance the deficits of Government. Unfortunately, those making the most noise about high interest rates are generally the ones who have voted to increase spending, raising interest rates even higher.

What do we do about it? We must stop trying to mislead the public about who is to blame for our cumulative deficits and work together to get out of the hole irresponsible Government dug over the last 25 years.

WHAT THE COUNTRY NEEDS IS A GOOD 5-CENT CIGAR WITHOUT AN EXCISE TAX

(Mr. NELLIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELLIGAN. Mr. Speaker, last week I stood in the well of this House and I said what this country needs is a good 5-cent cigar without an excise tax.

I would like to point out that I was not kidding. There is talk about doubling the excise tax on cigars, a tax which is already levied on cigars and it is not levied on other similar products. Just to let you know how serious this problem is, yesterday the General Cigar & Tobacco Co., in Kingston, Pa., which employs 300 people in the 11th Congressional District of Pennsylvania, announced that it is closing its doors after many, many years.

For those in the OMB and those in the administration who are considering doubling that excess excise tax on cigars as a means to increasing revenues, I would hope that they would consider the devastating impact of such a decision on the cigar industry and the thousands of taxpaying employees in that industry.

I would like them also to consider the impact of their action on the Congress. To do otherwise, might force many of my colleagues to smoke cigarettes when cigars are extinct.

AN ISSUE OF COMPASSION

(Ms. FERRARO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FERRARO. Mr. Speaker, yesterday there was an article in the New York Times in which it described the President as having a women problem. The problem is that women sternly disapprove of his policies, both foreign and domestic, and his appointments as well. In the article a White House aide is quoted as saying that the President has to find an issue of compassion, that he has been focusing on the economy, and that women do not understand interest rates as well as men. Such a statement strikes me as somewhat odd, someone out of touch with reality. I suggest that if the administration wants an issue of compassion, it should take a very close look at its budget proposals, proposals which eliminate funding for important programs serving women, children, the elderly, and the poor.

Maybe the administration's spokeperson should speak with farmers' wives like the ones I met out in South Dakota this past weekend, women working side by side with their husbands, to protect the family farm. Women who are dependent upon loans to purchase seed and to buy machinery. The administration thinks that these women do not understand interest rates. Maybe they do not understand what causes them, but they do understand its effects.

Maybe they should speak with the women in Queens, the people who are trying to get low-interest loans to rehabilitate and to protect their neighborhoods.

The women who depended on the section 312 program's 3-percent interest rates, the program this administration has eliminated.

And, maybe they should talk with young female high school students whose dreams of attending college are now over because the administration has raised the interest rates on student loans.

If the administration is looking for issues of compassion, I suggest that they look at the effects their budget and their economic policy is having on women. I think they will find that women are not as blissfully ignorant as they seem to think.

□ 1100

IS REAGANOMICS WORKING?

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, the gentleman from California recently surprised us all with his unilateral declaration that Reaganomics is working, and he encouraged those of us who felt like it to stand up and say we were wrong.

I would like to say that I was wrong because Reaganomics will not produce a $42½ billion deficit in 1982. It looks like it will be $80 billion.

So we were wrong. If that is a definition of what works, then my guess is that the gentleman still thinks that the *Hindenburg* is still trying to land, or the *Titanic* is still trying to sail.

If the gentleman believes that is success, I would hate to hear him describe failure.

POLITICAL NUMBERS

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, in the often quoted Atlantic Monthly article on Dave Stockman, he tells us that the Democrats in the budget process engaged in drafting what he called political numbers, and it is obvious from the speeches on this floor today that they are still doing so.

When a political football is made out of social security in order to kick it around, but it is not mentioned that not Gramm-Latta but the Democratic budget proposal denied benefits to all 36 million social security recipients, that is political numbers.

When it is suggested that the Reagan economics is not showing dramatic economic improvement, despite lower interest rates and lower inflation, that is political numbers.

When it is seriously suggested that this House has been holding down spending since the 1940's, boy, that is really political numbers.

CRITICISM IS NOT JUSTIFIED

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, I thought I might sit here and take in a little different perspective this morning as we heard the minutes. So I sat on this, the Democratic side of the aisle to see if some of the comments of criticism of the Reagan administration made more sense from this perspective. I must suggest to my colleagues, they do not. I heard a speaker get up here and say that Reaganomics is not working because the inflation rate is going higher.

I would suggest that that gentleman, who happens to have a leadership position on the Democratic side, go read the Joint Economic Committee report which suggests that is not true.

I heard him criticize the Reagan administration because interest rates are high.

If anybody has a recipe for high interest rates, it has to be this, the Democratic side of the aisle, which brought us record high interest rates for 2 years in a row.

I heard the gentleman criticize us because the gross national product growth is down, and, in fact, we found that the most recent report shows that it is not. If my colleagues want to find out how we really put this economy flat on its back, how we get back to back, 3 years in a row, negative productivity growth figures, they should go back and find out how the Carter administration did it. Yes, that is what they gave us—3 years, back to back negative productivity growth. And this was not for two consecutive quarters, but for 3 solid years. That is a real, almost unstoppable depression in the most important economic statistic I know.

LET US TALK ABOUT POSITIVE THINGS

(Mr. CARMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARMAN. Mr. Speaker, why has the economy moved toward a recession? It seems to me it is obvious. It has no connection with Reaganomics. It is, in fact, the collision course of the swollen budget of President Carter for fiscal 1981 and the tight fiscal policies of the Fed which caused the interest rates to go so high.

The effect of Reaganomics, which has not truly been felt, will really appear in the next several quarters.

I think what is important for us to do is recognize the importance of having an upper and not a downer. It is about time we start talking about positive things, about how this administration can reach all of the people in a way that will be more constructive than anything we have seen for the last 25 years.

GENERAL LEAVE

Mr. BEVILL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the bill, H.R. 4144, as well as the Senate amendments reported in disagreement, and that I may include extraneous material and tables.

The SPEAKER pro tempore (Mr. RATCHFORD). Is there objection to the request of the gentleman from Alabama?

There was no objection.

CONFERENCE REPORT ON H.R. 4144, ENERGY AND WATER DEVELOPMENT APPROPRIATIONS, 1982

Mr. BEVILL. Mr. Speaker, pursuant to the unanimous-consent agreement of November 12, 1981, I call up the conference report on the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes, and I ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of November 19, 1981, page H8549.)

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as having been read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The SPEAKER pro tempore. The gentleman from Alabama (Mr. BEVILL) will be recognized for 30 minutes, and the gentleman from Indiana (Mr. MYERS) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Speaker, I yield myself such time as I may consume.

(Mr. BEVILL asked and was given permission to revise and extend his remarks.)

Mr. BEVILL. Mr. Speaker, I am pleased to present the conference report on the fiscal year 1982 energy and water development appropriation bill for your favorable consideration. Our colleagues will recall that debate on this bill occurred in the House on July 23 and 24. The bill was passed by substantial margins in both Houses: 244 to 104 in the House on July 24, and 71 to 22 in the other body on November 5.

Mr. Speaker, our conference committee meeting was held on Wednesday of this week. I wish to compliment our friends from the other body, particularly the Senator from Oregon, Mr. HATFIELD, the chairman of the Senate subcommittee, and the Senator from Louisiana, Mr. JOHNSTON, the ranking minority member, for the fine spirit of compromise displayed in the conference meeting. I also wish to thank my colleagues, the House conferees, for

their support and their valuable contributions during the conference deliberations.

Now I would like to comment on various aspects of the conference agreement.

Mr. Speaker, this bill is certainly not a budget buster. It is a bill that can be signed by the President and is a bill that reflects the priorities of the House and Senate as well as the administration.

Mr. Speaker, the bill passed by the House contained $13,189,674,000 in new budget authority. That was $220,000,000 below the budget requests then pending. As the bill passed the Senate, it contained $12,763,636,000.

For the various agencies and programs under the jurisdiction of the Energy and Water Development Subcommittee, the committee of conference recommends $12,472,025,000 in new budget authority. This amount is $375,478,000 more than the revised request which came up in September but $949,962,000 less than the March estimates. In total, we have accommodated over 70 percent of the President's proposed reductions in budget authority. From an outlay standpoint, CBO estimates that we are about $92,000,000 over the $12,835,000,000 in outlays associated with the revised request, or about seven-tenths of 1 percent.

Because of the ceilings imposed by the budget resolution and the budget amendments submitted by the administration after House consideration of the bill, the Senate made more changes to the House bill than they had in many years. Your House conferees did their best to maintain the House position. However, to bring back a conference report that is within the budget target for the energy and water development programs, a great many items had to be compromised.

We would like more money for energy, for the weapons program, and for the water projects. But, if we have to stay close to the budget level, we could not provide all of the funds for all of the programs and projects to the extent we would have liked.

Mr. Speaker, I am pleased to advise the House that the conference agreement is $1,238,975,000 under the House budget allocation of $13,711,000,000.

Mr. Speaker, the conference agreement contains $2,914,666,000 in title I for the Army Corps of Engineers. This is $248,536,000 less than the bill as passed by the House and $22,845,000 more than the Senate-passed bill. These funds will finance 18 new and 206 continuing studies, 3 new and 45 continuing planning items, and 227 continuing construction projects. The bill contains no new construction starts for either the Corps of Engineers or the Bureau of Reclamation.

For title II, the Bureau of Reclamation, the conferees recommend a total of $760,161,000, which is $78,427,000 less than the House-passed bill and $2,500,000 more than the Senate-passed bill.

This will fund 13 new and 35 continuing studies, 1 continuing planning item, 84 continuing construction projects, and 12 continuing loans.

In my view, the conference agreement provides for a financially prudent and environmentally sound water resources development program.

The conference agreement contains $8,044,766,000 for Department of Energy programs in title III. This includes $2,303,126,000 for energy supply, research, and development activities; $529,360,000 for general science and research activities; $243,318,000 for power marketing administrations and $76,177,000 for the Federal Energy Regulatory Commission. The energy accounts include $341,316,000 for solar, geothermal, and renewable energy development; $327,274,000 for conventional nuclear reactor systems development and nuclear waste management; $687,016,000 for breeder reactor systems including $195,000,000 for the Clinch River breeder reactor project; and $456,000,000 for fusion energy development.

ATOMIC ENERGY DEFENSE ACTIVITIES

The conference agreement provides a total of $4,673,154,000 for atomic energy defense activities. This is an increase of $1,004,514,000 or 21 percent over the fiscal year 1981 level. It is $174,481,000, or 4 percent below the President's September budget request.

The recommended conference allowance provides for the following increases totaling $207,000,000 over either the House or Senate level:

Operating expenses:	(*Thousands*)
Weapons R. & D	+$3,000
Inertial confinement fusion	+17,637
Production and surveillance	+25,394
Materials production	+6,430
Defense waste management	+2,500
Nuclear materials safeguards	+4,500
Security investigations	+4,000
Plant and capital:	
Naval reactors development	+12,000
Research and development	+6,200
Inertial confinement fusion	+12,500
Production and surveillance	+60,300
Reactor operations	+6,500
Special isotope separations	+14,000
Materials production	+19,500
Defense nuclear waste	+12,300
Total	+206,761

The conferees agreed with recommendations of both the House and Senate committees concerning the estimates in the budget for inflation, contingencies, and other general, nonspecific activities. The following general reductions were made in the conference agreement:

General reductions:	*Thousands*
Inflation estimates, operating expenses	−$30,000
Contingencies and uncertainties	−25,000
Inflation estimates, plant and capital	−26,000
Unobligated balances/1981 deferral	−30,000
Risk factor	−32,000
Total	−143,000

The budget request included a total of over $500,000,000 for inflation, uncertainties, and contingencies that are not related to any specific program or weapons system. One item that both committees found to be totally unjustified was the so-called risk factor—a $32 million slush fund that could be used to correct mistakes, start new programs, or do other things without congressional approval. It was this kind of thing that the conferees found not critical to our national security and reductions were made accordingly.

The conference allowance makes provision for the cruise missile, the MX, and the 155mm AFAP. Because of the uncertainty over selection of an MX warhead and a basing mode that could affect the warhead selection, production funds for the MX were limited and design and planning funds were provided. Because of some uncertainty over the final configuration of the cruise missile warhead and a need for additional testing on it, the committee will receive a report on tests prior to obligation of funds. The 155mm AFAP is still some time away from full production and only the essential long-lead facilities were found to be necessary in fiscal year 1982. Adequate funding ($198,000,000) has been provided to continue the facilities restoration program.

In summary, the conference agreement provides for all major weapons systems requested at levels consistent with the capability and need, it provides substantial increases over last year's levels in all areas including R. & D., inertial confinement fusion, testing and materials production. It balances the real needs of defense against the sometimes overly ambitious wishes of Department of Energy planners and provides a realistic funding level in the context of the national economic situation.

Mr. Speaker, the conference agreement includes $752,432,000 for seven independent agencies and commissions in title IV, including $150,000,000 for the Appalachian regional development program, $465,700,000 for the Nuclear Regulatory Commission, $129,162,000 for the Tennessee Valley Authority, and $3,888,000 for the Water Resources Council.

I will insert a table in the RECORD at this point which summarizes the financial aspects of the conference agreement:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	Enacted	Estimates	House	Senate	Conference	Conference compared with enacted	Conference compared with estimates	Conference compared with House bill	Conference compared with Senate bill

Mr. Speaker, there is one typographical error in the CONGRESSIONAL RECORD. On page H-8557, in amendment No. 41, the amount shown for the Senate proposed amount should be $375,368,000.

Mr. FORD of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. BEVILL. I yield to the gentleman from Tennessee.

Mr. FORD of Tennessee. I thank the gentleman for yielding.

Mr. Speaker, I want the gentleman to know that I have been informed by TVA officials that they are having difficulty with the SBA over the interpretation of the subcommittee's intent when the subcommittee appropriated moneys in fiscal year 1980 to fund two minority enterprise small business investment companies (MESBIC's).

In order to clarify this issue, would the chairman please tell me if it was the intent of the gentleman's subcommittee, the Subcommittee on Energy and Water Development, for the moneys appropriated to TVA for the funding of these two MESBIC's was meant to qualify them for matching funds from the SBA as indicated in the March 2, 1979, hearing on TVA's appropriations.

Mr. BEVILL. The gentleman is correct. This is the intent of the committee.

Mr. MYERS. Mr. Speaker, I yield myself such time as I may consume.

(Mr. MYERS asked and was given permission to revise and extend his remarks.)

Mr. MYERS. Mr. Speaker, our chairman has done an excellent job in presenting the bill that we bring back today. It is not the bill that any of us would like to see. I know a number of my colleagues have requested that we include items that were of particular interest to them, but in a conference when our target is cutting dollars to get a bill that the President will sign, we had to cut some programs and projects that were very vital to the interest of some Members of this body.

It is a bill that I am pretty sure—I have not talked to the President—but, I feel reasonably certain from talking to his advisers that if this conference report is adopted today, he will sign it. I think this is very important at this late hour.

□ 1115

As the chairman has said, when we first acted upon this back in July, when it came out of the House our bill was at that time $232 million under in budget authority, under the present budget. It was $111 million under in outlays, well within what we were going to be able to accomplish.

This chart here shows all of these, how we steadily have gone downhill and have tried to compromise and work out some type of bill that the President will sign that is agreeable to both bodies. As you can see, President Carter's request was for $14,680,000,000. It was revised in March with President Reagan down to $13,411,000,000.

In June the budget resolution allocated $13,711,000,000. That was what we had decided among ourselves in budget outlays. We would allow ourselves $13,711,000,000.

In July when it passed the House, we had budget authority of $13,178,000,000, well below the budget office and well below the President.

But, as we all know, President Reagan revised in September his request and brought that down to the budget authority of $12,097,000,000, and for outlays of $12,835,000,000.

This left us high and dry. The other body acted after that and even went higher.

In conference this week, we have been able to whittle this down to where now we are over in budget authority, but what we are really concerned about and what the administration is concerned about is outlays, how much money it is going to take to meet these obligations in the next year.

We find that now with our conference report that we are bringing back to you today that we are slightly over $91,000,000 in outlays over the September request. This is, as the chairman said, less than 1 percent over the President's target. The President asked for a 12-percent cut. We did not quite go that far because there are some items here that just simply cannot be cut back as far as we all would like to reduce the total. It would be unwise to stop some programs that are also close to completion.

There are some other items in this bill; we have over $4 billion for atomic energy defense activities in this bill.

You just cannot cut the bill down that far, but we have a bill that can be signed into law. It is reasonable.

So I urge our colleagues today to accept what your conferees have worked out with the other body and let us get one bill signed into law.

I might say here, I have heard this morning that because we are slightly over the President's target, that members may not vote for it, because as an example, defense is under the President's target, but let us remember that target has been going up for defense. It was not difficult to come in under that when the target was not cut 12 percent.

The other was the District of Columbia bill, which was right exactly on the money; but remember, the District of Columbia was not changed in September by the President. It remained at $750 million. If ours had not changed, we would be below, not on the target, we would be below the target.

So I urge my colleagues to support your committee and let us get a bill

that is very vital to our country and energy development, in the development of our natural resources and the protection of our natural resources.

Vote for the conference report.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. MYERS. I yield to my friend, the gentleman from California.

Mr. ROUSSELOT. I appreciate my colleague yielding and also for being helpful enough to bring a chart to show the difference between the March request for outlays and the September request; so again, the gentleman is emphasizing that this committee has come in with a bill that is below the March outlay request.

Mr. MYERS. Much below.

Mr. ROUSSELOT. How much below, roughly?

Mr. MYERS. In outlays, it is $559 million under.

Mr. ROUSSELOT. One hundred and eleven million?

Mr. MYERS. Yes, and $930 million under in budget authority.

Mr. ROUSSELOT. And within 1 percent, or slightly above——

Mr. MYERS. Less than 1 percent.

Mr. ROUSSELOT. Of the September request?

Mr. MYERS. Seven-tenths of 1 percent deviation from the President's request.

Mr. ROUSSELOT. So the September request by the President was quite a bit below the March request, but the gentleman is saying we are within 1 percent of that September request; so the gentleman is saying that we have adjusted very rapidly since the September request.

Mr. MYERS. Yes. The conferees on both sides of the aisle, and I certainly thank our colleagues, both in the other body as well as in this other body, both sides were trying to compromise and get something. We understand the problems the President has, that our country has. We want to have something that is agreeable, and we have bent over backward.

I think another important facet is what was appropriated last year. The black lines are the budget authority. The blue is the outlay.

Now, we have some contract authority, as you can see here. Last year we had budget authority of $12,309,000,000. The outlays ran $12½ billion.

We are doing our part trying to get our economy in order as we have been talking about in the 1-minute speeches earlier this morning.

Mr. ROUSSELOT. This is very much below the Carter request, is it not?

Mr. MYERS. Oh, considerably. The second bar, as you notice, is $14.6 billion in authority and $14.4 billion in spending. This bill is over $2 billion less than the Carter request.

Mr. ROUSSELOT. Well, I compliment the committee for their efforts to bring spending down in this area, in a very important area, as the gentleman has said, $650 million below the March request and within 1 percent of the September request. I think the committee is to be complimented for bringing spending down in this area and certainly way below the Carter request of some of our Democratic colleagues.

Mr. MYERS. Not members of this committee, I will advise the gentleman.

I thank my colleague, the gentleman from California, coming from him who has been one of the outspoken critics of spending, one who has been very much concerned about holding the line and a compliment to this committee which we much appreciate. I thank the gentleman for that.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. MYERS. I yield to my friend, the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding, because I would like to emphasize the point that the gentleman from California just made and I think that the gentleman from Indiana has amplified and that is that the Carter administration came in here with a budget request that evidently was just inordinately high and that through the work of this administration to get cuts from that Carter request and then with the help of the gentleman's committee, we have been able to lower those figures substantially, which shows that really the President's program and the cooperation of the gentleman's committee has saved the American people a good deal of money and that would not have been possible if we had not had that kind of leadership. Is that not true?

Mr. MYERS. Well, in fairness to President Carter, of course, he came in with a different approach than President Reagan has. Our committee was going to cut down from President Carter also; so in fairness, President Carter might have made this request, but the committee and the action of Congress would have been less; but yes, we have cut down considerably since that time.

Mr. WALKER. Well, I thank the gentleman.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. MYERS. Yes, I yield to my friend, the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding and I thank him for his presentation.

My question is, could the gentleman put once again as he has done earlier, some dollar figures on the difference where the committee of the conference came out and what the President recommended in September?

As I understand it, the conference report is still above the President's September request.

Mr. MYERS. Slightly.

Mr. ROEMER. My question is, How much in dollars and cents?

Mr. MYERS. In outlays, and this is what we are concerned about, outlays is what we will actually be spending. As projected during the next fiscal year, which we now are 2 months into, these are figures that you can play with somewhat, because no one knows exactly what dollars will be spent. This is something that is subject to other controls, such as deferrals or recisions that the President might recommend after he gets this bill, and signs it. It can be changed, but presently as best we can estimate, it would be $91,300,000 in outlays over what the President requested in September. This is about as close as you can come.

Mr. ROEMER. I appreciate the gentleman saying that. What about budget authority?

Mr. MYERS. Budget authority is a little over $300 million, or $375 million, as I recall; but that authority will not be spent. You have to have the authority, because there has to be in the future in net outlays in 1983 and 1984 and 1985 that we talked about, some of these things have to be projected out. There has to be an understanding that they can contract, even though it will not be spent. There has to be the right to contract, to negotiate contracts. You have to have the authority above the outlays.

Mr. ROEMER. I hope the gentleman appreciates that we are just trying to get the facts straight. It is $300 million over in authority and $90 million in outlays?

Mr. MYERS. Outlays, yes.

Mr. ROEMER. I thank the gentleman.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. MYERS. I yield to my friend, the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Speaker, I thank the gentleman for yielding and I appreciate his explanation of the dollar amount over and under the September request.

I was struck earlier by the questions asked by my colleague, the gentleman from California, and the gentleman from Pennsylvania, in terms of the Carter request versus the Reagan request. I appreciate the gentleman's statement that the President of the United States and this committee this year has seen fit to move this spending into more realistic numbers, but I would like the record at least to show that the gentleman in the well and others supported much higher appropriations, authorizations, and outlays in previous years with no hesitation. I commend the gentleman for his coming here and suggesting that there might be some little bit of leeway for us to cut back on some of the spending, and I commend the gentleman for

cutting back on some of it; but I think the demagoging that I heard earlier in the questioning should be clarified; that, in fact——

Mr. WALKER. Mr. Speaker.

Mr. EDGAR. There were a number of requests made over the last few years under Carter and under Reagan that——

Mr. WALKER. Mr. Speaker, I ask that the gentleman's words be taken down.

The SPEAKER pro tempore. The gentleman from Pennsylvania (Mr. WALKER) demands that the words be taken down.

The Clerk will read the words.

The Clerk read as follows:

Mr. EDGAR. But I think the demagoging I heard earlier in the questioning should be clarified.

Mr. EDGAR. I thank the gentleman for yielding and I thank my colleague from Pennsylvania for underlining those words.

The SPEAKER pro tempore. The gentleman from Pennsylvania has asked that words be taken down. The gentleman will be seated.

Mr. MYERS. Does the gentleman from Pennsylvania pursue his request?

Mr. WALKER. Well, no. I will not pursue the request, if the gentleman will yield.

The SPEAKER pro tempore. The gentleman from Pennsylvania withdraws his request.

Mr. MYERS. Mr. Speaker, I yield to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, the only point I was trying to emphasize was that the gentleman did make specific reference earlier in his speech, to the gentleman from California and the gentleman from Pennsylvania, and I do think that in House floor proceedings that we ought to refrain from ascribing motivations to individual Members. That is what the gentleman from Pennsylvania was obviously trying to do. He may have slipped by with regard to the exact parliamentary procedures of the House, but he was making an indirect reference and I think that that kind of thing demeans the House.

I would hope that the gentleman from Pennsylvania would not engage in such procedures in the future.

I thank the gentleman for yielding.

The SPEAKER pro tempore. Members will proceed in order in the debate.

Mr. MYERS. Mr. Speaker, I think there has been a misunderstanding of what our committee has been doing in the past.

I do not remember any year of which we ever exceeded the request of any President, regardless of the party affiliation of former Presidents. This committee has always been very careful how the tax money has been spent. We have changed priorities. We had some disagreements with the former President, President Carter, not over the dollars, because we were under the President's request, but over which items we would authorize; but our committee has always been very cautious, and the figure here that President Carter had in his request would have been cut down, I am quite certain.

But in any event, I think your committee and your conferees have done a good job and I urge support for this conference report. It is one we can all be proud of. It is one that other committees and subcommittees and this Appropriation Committee will take, I am sure, a word from and a lesson from and a commendation similar to this. If we all do this, and I know the Appropriations Committee and each subcommittee ought to be this, we will be able to hold the line on expenditures and we will be able to meet that balanced budget in 1984.

□ 1130

Mr. HANSEN of Idaho. Mr. Speaker, will the gentleman yield?

The SPEAKER pro tempore. The gentleman has consumed 14 minutes.

Mr. MYERS. I yield to the gentleman from Idaho.

Mr. HANSEN of Idaho. Mr. Speaker, I do commend the House conferees, the gentleman in the well, the gentleman on the minority side of the aisle, for a job well done.

I would ask one brief question, if I might, at this time.

Mr. Speaker, the House conferees deserve special commendation for negotiating and drafting conference report language to resolve our concerns about the future of the loss-of-fluid test (LOFT) program at Idaho National Engineering Laboratory. The conference language reads as follows:

The Nuclear Regulatory Commission shall submit to the Committees on Appropriations for prior approval any changes from priorities in research programs identified in the House and Senate reports, and subject to the above is directed to carry out the testing matrix and schedule identified by the Office of Nuclear Regulatory Research drawing from the LOFT special review group.

To insure that there is no ambiguity with respect to this conference report language, I ask the distinguished chairman if he shares my understanding that the NRC's LOFT research priority is accurately characterized on page 153 of the Senate report No. 97-256, under the title "loss-of-fluid test program," which I ask unanimous consent be inserted in the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Idaho?

There was no objection.

The material follows:

Loss-of-fluid test program.—Within the funds appropriated to the Nuclear Regulatory Commission, the Committee notes that $44,000,000 is recommended to be allocated to the loss-of-fluid test (LOFT) program at Idaho National Engineering Laboratory. The Committee underlines its support for this program which is designed to conduct experiments to determine the results of the loss of reactor coolant water.

The Committee notes further that the LOFT Special Review Group (LSRG) was established to review the LOFT program and report its findings to the Nuclear Regulatory Commission. The primary purpose of the group was to consider whether LOFT should be decommissioned in fiscal year 1983, as recommended by the Advisory Committee for Reactor Safeguards. On February 11, 1981, the NRC Commissioners met to hear the report of the LSRG and the response of the Office of Nuclear Regulatory Research (RES).

RES developed a testing scheme which drew from tests suggested by LSRG. The RES testing scheme proposed a particular sequence which would provide, in their view, an optimum feedback and scientific return. The views presented by RES were consistent with those presented by the LSRG.

Mr. MYERS. I yield to the chairman for that purpose.

Mr. BEVILL. I thank the gentleman from Indiana for yielding.

Mr. Speaker, I say to the gentleman from Idaho that the Senate language which you quoted does reflect the conferees' understanding and interpretation of the NRC's commitment to the LOFT and related programs.

Mr. HANSEN of Idaho. I thank the gentleman for his responsive comments.

Mr. MYERS. I might add that the language you read was worked out in conference. Differences between the other body's version and our version were worked out in conference to accomplish what the gentleman from Idaho is vitally concerned with. Before any changes are made, they do come back with a recommendation to be approved by both the other body and this subcommittee.

Mr. HANSEN of Idaho. I thank the gentleman from Indiana very much.

The SPEAKER pro tempore. The gentleman has consumed 16 minutes.

Mr. BEVILL. Mr. Speaker, I yield such time as he may consume to our distinguished chairman of the Appropriations Committee, the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. I thank the gentleman.

Mr. Speaker, I wish to compliment the gentleman from Alabama (Mr. BEVILL) and the gentleman from Indiana (Mr. MYERS), the chairman and ranking member of this subcommittee, as well as the other members of the subcommittee, for the splendid job they have done.

I think I have a continuous record, since I have been here, of trying to distinguish between investment and spending, between that which protects our country and that which goes for other probably less essential activities.

So I appreciate, and I am sure everyone here does, that we have tried to stay within the funding limits to get along with the executive branch which, of course, has its responsibilities.

I would like to say here once again that we have serious financial troubles, but there is a whole lot of difference between our money and real wealth. The reason that we have a rich country in reality, with financial problems, is that 27 times out of 27 we have overridden the Bureau of the Budget and OMB regarding funds for soil conservation, reforestation, and flood prevention. As my colleagues know, one can leave one's children and one's children's children all the money in the world, and without land they can never make it. If we continue, as our colleagues on this committee have done, to look after our land, to develop our resources, to build our harbors, protect the real wealth of our country, they can straighten out the finances.

I hope we can help them, but let us distinguish between our financial system, where many, many dollars are wasted, and our real wealth, which is the country and its development—roads, schools, highways, harbors, its rivers, its watersheds. That is our real wealth. I hope we can straighten out or finances, but let us not do it at the expense of letting our country go down the drain as has happened to China and India.

I have reviewed the various projects and treated them fairly—large and small as our subcommittee has always done.

Again, I congratulate my colleagues on this committee, where I have served for many years.

You do not try to save expense on an automobile by cutting out the oil, and you do not try to save a house by knocking out the foundation. This is the foundation on which our money has to depend. Again, I congratulate you.

Mr. MYERS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BEVILL. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, I rise to ask the chairman of the committee several questions about the conference report.

During the course of the debate on this legislation, as it came through the House, my colleague, the gentleman from Washington (Mr. PRITCHARD), and I led a fight to delete funding for the Tennessee-Tombigbee Waterway.

It is my understanding that this conference report includes $189 million for work on the Tennessee-Tombigbee Waterway for 1982?

Mr. BEVILL. If the gentleman will yield, the gentleman is correct. The House approved it, as you know. The Senate approved it. It is not at issue. So the $189 million will be appropriated when the President signs the bill.

Mr. EDGAR. The second question that I have relates to the item on page H8553 of yesterday's RECORD, which includes the conference report. The item listed as Red River Waterway, Mississippi River to Shreveport, which is a navigation project, the budget estimate was $27 million. The conference allowance was $50 million.

I wonder if the gentleman could explain why the figure is almost double that which the budget request was from the new administration?

Mr. BEVILL. Mr. Speaker, it was found that the corps had a much greater capability than was known at the time the budget request came in.

Mr. EDGAR. So this is a request by the committee to double the figure for the Red River.

Mr. BEVILL. The committee increased the amount in the budget request from $27 to $50 million.

Mr. EDGAR. And finally, Mr. Speaker, the final question I have relates, on the same page, to an item that is listed at $218,343,000 of reduction. It is in the category of reduction for anticipated savings and slippage.

Could the gentleman clarify for the House what this means in terms of the construction area?

Mr. BEVILL. There are always delays on projects, caused by a variety of reasons—strikes, court orders, weather, and that type of thing. This is what that line in the table refers to.

Mr. EDGAR. So that you anticipate that $218 million less will be spent on the total number of these projects because of the slippage?

Mr. BEVILL. That is true. It has to be an estimate, and that is our estimate.

Mr. EDGAR. If the continuing resolution is passed, and this is not signed into law by the President, and there is a reduction of 4 percent, as was indicated by the other body last evening, then that figure, the reduction, would be below that?

Mr. BEVILL. Yes, the 4 percent would apply to the bill, including water projects.

Mr. EDGAR. I appreciate the gentleman answering the question.

Mr. DERRICK. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from South Carolina.

Mr. DERRICK. Mr. Speaker, it is my understanding that under the conference report, the Savannah River plant will receive between $6 and $10 million more than they did in the House-passed bill, and that reports which indicate that the SRP will lose 336 jobs under the conference report are not accurate.

Mr. BEVILL. The gentleman is correct.

Mr. DERRICK. I thank the gentleman.

Mr. EDGAR. Mr. Speaker, I would like to commend the chairman and thank him for his cooperation in answering questions that the gentleman from Pennsylvania has from time to time on water projects.

I would like to commend the gentleman for his work, and the ranking minority member's work, in reducing the level of expenditure in this particular area in wrestling with some very difficult questions.

I still have grave concerns about the level of funding, particularly for the Tennessee-Tombigbee Waterway. I still have some concerns that we have not adequately addressed the ability to cut waste out of the area of construction grants by the Army Corps of Engineers. But I think we are moving in the right direction, and we have over the last few years identified those projects which should be eliminated or should be reduced substantially, and many of them have come under a more critical eye and a more critical view.

Mr. Speaker, I intend to vote no on this conference report because of the continued accelerated funding of the Tennessee-Tombigbee Waterway and other projects which I think are inappropriate for this legislation, but I think we are moving in the right direction, and I think in terms of a national water policy we are beginning to really raise some questions on merit.

As we move with less Federal dollars to spend, I think we have to target those dollars much more adequately, and perhaps in the reduction of funding levels it will give us an opportunity to have a more critical eye on water projects.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania (Mr. EDGAR) has expired.

Mr. BEVILL. Mr. Speaker, I yield 1 additional minute to the gentleman from Pennsylvania.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Mr. Speaker, I would like to join in the gentleman's comments about the hard work of the committee in trying to meet tight fiscal requirements, and yet the bill is still, as I understand it, and maybe the gentleman in the well can agree or disagree, some $90 million over the September request.

In addition, I would like to join with the chairman's response to your question on the Red River Waterway in that at the $50 million level it is only 50 percent of what was spent last year. At $50 million it has been cut 50 percent. Yet, still with one project, that large cut in half, this bill is $90 million

over the President's request in September.

Mr. EDGAR. Mr. Speaker, I thank the gentleman for his leadership in trying to develop a merit water policy.

I yield back the balance of my time.

Mr. BEVILL. Mr. Speaker, I yield to the gentleman from California (Mr. ANDERSON) for a question.

Mr. ANDERSON. I thank the gentleman for yielding.

Mr. Speaker, I am concerned about the operation and maintenance funds for the Los Angeles-Long Beach ports, often referred to as the San Pedro Bay model study.

It is my understanding that there are no projects specified in the conference report under general operation and maintenance for the Army Corps of Engineers. However, it is also my understanding, and I believe it is in your report, that the Army Corps should be guided by the recommendations contained in the project table in the House report, the Senate report, and the language contained in the House report on the continuing resolution regarding the various projects and safety-related work in allocating funds for operation and maintenance.

I would like to have the chairman tell us a little bit about that.

Mr. BEVILL. The gentleman's statement is correct, that is the intention of the committee. He has stated it correctly.

Mr. ANDERSON. I thank the chairman.

Mr. BEVILL. Mr. Speaker, I yield such time as he may consume to my good colleague and member of this committee that works very diligently and has put much effort into this conference report, the gentleman from Oklahoma (Mr. WATKINS).

Mr. WATKINS. I appreciate the chairman yielding.

Mr. Speaker, I will not take but just a very few seconds. I want to commend the chairman and staff, and also, I would like to commend the ranking minority member for his hard work.

I can say as a member of this committee that we all would have liked to have done a whole lot more. The staff and the minority, as well as the majority side, agonized on where to cut on some very essential problems. We wanted to do a lot more.

I would just like to have the record show that we have a tremendous water problem in this country. This year we were within 45 days of having some major cities with millions of people without water. We cannot solve our water problem overnight. I would just like for us, as Members of this body, to realize it is going to take long-term planning and a long-term effort, and we have got to get on with the job. We know we have cut back in this bill probably more than what a lot of us really would have personally liked to have seen, but in order to try to be frugal and to try to provide the savings within the budget, we have done that.

But I would just like to agree with the chairman of the Appropriations Committee, the gentleman from Mississippi, (Mr. WHITTEN), there is a difference in just spending and investment. There is truly a tremendous need for an investment to secure the future development of water of this country of ours and the future livelihood of our people.

So I just wanted to state that I think under the critical time period that we had, and the critical budget restraints, that the minority, and especially I want to say thanks to the ranking minority member from Indiana, and also our chairman, the gentleman from Alabama (Mr. BEVILL) for their tremendous work on this particular piece of legislation.

● Mr. STARK. Mr. Speaker, I support passage of this conference report. It provides funds for a number of important energy research and development projects which can help lead the United States toward greater energy independence. I am particularly pleased that the House conferees were able to improve on the Senate's figures for certain fusion research. To me, fusion holds the key to the future and saves us from the terrible disposal and control problems associated with fission energy and its byproducts. Indeed, I regret that the full House figure for certain fusion projects was not accepted at this time.

I must say, Mr. Speaker, that this is a sort of "sweet-and-sour" bill. I do not agree with a number of the water projects included in it. I certainly do not agree with some of the nuclear war expenditures which it makes. The nuclear arms buildup is of growing concern to all of us. Yesterday, the House passed H.R. 3413, a bill authorizing appropriations for the Department of Energy's national security and military applications of nuclear energy. Because that bill was significantly above the budget request, I voted against it. We must be most careful in our budgeting for those programs. Because this bill avoids the problems of yesterday's legislation, I believe it is worthy of support.

Unlike yesterday's bill, this bill contributes to the future of America—its strength, both economically and politically. This bill does not only deal with weapons research and buildup, as did yesterday's, but it deals with the research and development of innovative alternative energy sources. This bill will lead us to the energy independence we all desire. And we all know that energy independence will not only strengthen our economy, but will strengthen our international political standing. I believe that our decision to exceed the current budgetary goals, in the case of this vitally important piece of legislation, will, in the long run, be a wise one.●

Mr. BEVILL. Mr. Speaker, I have no further requests for time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

□ 1145

AMENDMENTS IN DISAGREEMENT

Mr. BEVILL. Mr. Speaker, I ask unanimous consent that the Clerk designate each Senate amendment in disagreement by number as they are reached, and that their reading be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

Mr. DINGELL. Mr. Speaker, reserving the right to object, I have no objection to the gentleman having his unanimous-consent request apply to all except Senate amendment No. 23. I think that one should be read.

Mr. BEVILL. Mr. Speaker, I so amend my request.

The SPEAKER pro tempore. The gentleman excepts Senate amendment No. 23 from his request.

Is there objection to the request of the gentleman from Alabama?

There was no objection.

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 14: Page 7, after line 18, insert:

SEC. 104. Funds herein or hereinafter appropriated in this title for the Chetco River, Oregon navigation project, authorized by the 1945 River and Harbor Act, as amended and modified, shall be used to design and construct further modifications to that project in accordance with the Report of the Chief of Engineers, dated May 2, 1977.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 14 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

"Sec. 110. Funds herein or hereinafter appropriated in this title for the Chetco River, Oregon navigation project, authorized by the 1945 River and Harbor Act, as amended and modified, shall be used to design and construct further modifications to that project in accordance with the Report of the Chief of Engineers, dated May 2, 1977."

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 17: Page 8, after line 11, insert:

SEC. 106. The Chief of Engineers is hereby directed to raise the dam at Lake Darling, North Dakota, by approximately four feet and to implement upstream and downstream flood control measures.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 17 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

"SEC. 111. The Chief of Engineers is hereby directed to raise the dam at Lake Darling, North Dakota, by approximately four feet and to implement upstream and downstream flood control measures."

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 18: Page 8, after line 11, insert:

SEC. 107. No funds appropriated in this Act may be used to construct channel realignment work on the Ouachita and Black Rivers navigation project in Arkansas and Louisiana until such time as the Chief of Engineers has completed a restudy of the various options for navigation above Crossett, Arkansas, including the two barge abreast configuration, with a view toward reducing the number of cutoffs and bend widenings required. The results of this restudy should be reported to the respective Appropriations Committees of both Houses of the Congress for review, and should accurately reflect the economic and environmental tradeoffs of providing greater than two-barge navigation.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 18 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

"SEC. 112. No funds appropriated in this Act may be used to construct channel realignment work on the Ouachita and Black Rivers navigation project in Arkansas and Louisiana until such time as the Chief of Engineers has completed a restudy of the various options for navigation above Crossett, Arkansas, including the two barge abreast configuration, with a view toward reducing the number of cutoffs and bend widenings required. The results of this restudy should be reported to the respective Appropriations Committees of both Houses of the Congress for review, and should accurately reflect the economic and environmental tradeoffs of providing greater than two-barge navigation."

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 21: Page 9, line 2, after "fund" insert: ": *Provided*, That of the amount herein appropriated not to exceed $50,000 shall be available to initiate a rehabilitation and betterment program with the Farmers Irrigation District to rehabilitate facilities under the Act of October 7, 1949 (63 Stat. 724), as amended, to be repaid in full by the lands served and under conditions satisfactory to the Secretary of the Interior."

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 21 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 23: Page 10, line 5, after "monument" insert: ": *Provided further*, That (i) the Secretary of the Interior is directed to proceed with construction of the initial stage of the Garrison Diversion Unit as provided by the Act of August 5, 1965 (Public Law 89-108) notwithstanding the Stipulation and Order of May 11, 1977, referred to at page 80 of Senate Report No. 95-301, and any subsequent court order in respect of the May 11, 1977 Stipulation and Order; providing that other provisions of law shall continue to be applicable to the project; (ii) none of the funds appropriated in this Act for the Garrison Diversion Unit shall be used for the acquisition of mitigation lands by condemnation, or for the construction of features affecting waters flowing into Canada under the authorized plan".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 23 and concur therein.

The SPEAKER pro tempore. Does the gentleman from Alabama desire time on this motion?

Mr. BEVILL. Mr. Speaker, I ask for 30 minutes.

The SPEAKER pro tempore. The gentleman from Alabama (Mr. BEVILL) will be recognized for 30 minutes, and the gentleman from Massachusetts (Mr. CONTE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Alabama (Mr. BEVILL).

Mr. BEVILL. Mr. Speaker, I yield 7 minutes to the distinguished gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, I thank my good friend and colleague for his kindness in yielding to me.

Mr. DINGELL. Mr. Speaker, we have here a rather bold attempt on the part of the other body to amend statutory law through the appropriations process. Were this to be done in a piece of legislation which were coming from the Senate, it would be subject to a point of order; and were it to be tried on the House floor, it would again be subject to a point of order. Now, I recognize the concerns of the people in North Dakota, and I sympathize with those concerns. However, it should be understood that the people of North Dakota are not entirely in sympathy with this particular project.

When the Garrison unit was before Congress for authorization in 1965, the late Congressman John Saylor of Pennsylvania predicted that the project, while holding the seeds of hope, would prove to be a Pandora's box when opened. That prediction has come back to haunt this Chamber.

Some of the finest public lands in this Nation are located within the national wildlife refuge system, a system for which I feel a great sense of responsibility. A portion of that system absolutely essential to the welfare of this continent's migratory waterfowl resources—the heritage of whistling wings that we have an obligation to maintain for our children's children—are the major refuges in North Dakota. I am shocked to learn that data now available indicates that the Garrison unit would adversely affect no less than a dozen such refuges in the Dakotas, including world-renowned refuges such as Sand Lake in South Dakota and Arrowwood in North Dakota.

I do not believe the Congress of the United States intended to damage these irreplaceable lands, held in public trust, when the project was authorized. Indeed, I can find no data indicating that Congress was ever informed such serious damage to the refuge system would result if Garrison were authorized. If we had known this, I doubt the project would ever have gotten off the ground.

In addition, I am shocked to learn that the project will adversely affect nearly 70,000 additional acres of prime prairie wetlands—critical nesting habitat for this Nation's migratory waterfowl.

Furthermore, there are now strong indications that the project's mitigation plan, via which 146,530 acres were to be acquired for wildlife habitat to offset project-caused damages, will never be realized—as farmers in North

Dakota are understandably upset to learn that some of their land may be acquired for mitigation features.

In short, Garrison will damage more refuges than any other water project in our Nation's history, will cause a devastating impact on additional prime prairie wetlands, and involves a mitigation plan that likely will not be realized because of strong landowner opposition with North Dakota.

Claimed wildlife benefits for the project, which are second only to irrigation in benefit/cost computations—are a fraud. We are not getting the wildlife benefits we were promised, which we, in turn, promised to the American people. This project should not move forward any further until the issue of wildlife damages is addressed—and a plan implemented for avoiding or fully offsetting those damages.

I do not understand how my colleagues from North Dakota can support such calloused condemnation of our Nation's refuges and wetlands. I further do not understand how he can support the amendment added by the Senate to H.R. 4144, which would remove an existing stipulation and order against the project, thus effectively removing the only tool the public now has to force the Bureau of Reclamation to disclose what the impacts of the project will be.

The House needs more information on the Garrison issue, including an accounting from the Interior of just what they intend to build on the North Dakota prairies—and how they intend to deal with evidence of massive additional costs—such as those to national wildlife refuges and associated prairie wetlands. In the interim, the Bureau of Reclamation has no business condemning anybody's land for a still undetermined ultimate project.

The existing stipulation and order provides an orderly mechanism for addressing Garrison's problems, while keeping the project under the umbrella of necessary Federal laws and statutes. It should remain there, and the Department of the Interior should provide to the Congress the remaining information set forth in the stipulation.

I must point out that the Senate amendment is opposed by a long list of national conservation organizations including the Audubon Society, National Wildlife Federation, Friends of the Earth, Wildlife Management Institute, and a host of others.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I would be delighted to yield.

Mr. ROUSSELOT. I heard the list of the other groups, which I have some problem with. The National Taxpayers Union?

Mr. DINGELL. That is correct.

Mr. ROUSSELOT. What do they say about this?

Mr. DINGELL. Well, they say that the Senate amendment ought to be rejected by the House. I will make a copy of their letter available to my good friend. Basically they say they would prefer the Garrison project not be funded at all. I quote from their November 18, 1981 letter in opposition to the Senate amendment:

> Unfortunately, that will not be the issue before you. The issue is simply whether the Congress should set aside court orders and direct construction of a wasteful project without first resolving the real fiscal and environmental problems associated with the project. We strongly urge you to support the Conte-Dingell effort to delete the Senate language, and in less hectic times re-examine the Garrison project and make a deliberate determination of the project's future.

Mr. ROUSSELOT. The gentleman, I think, has made the main point. The other body attempted to set aside a court order?

Mr. DINGELL. That is correct.

Mr. ROUSSELOT. They have gone in the judiciary business?

Mr. DINGELL. They have gone in the judiciary business, and the Senate in appropriating money has gone into the business of overturning statutes and court orders in an appropriation bill. They have tried to repeal the Fish and Wildlife Coordination Act and the National Environmental Policy Act interestingly enough, in this single action by the Senate. I will be glad to yield to my friend.

Mr. ROUSSELOT. What are the main purposes of this project? I understand it is a potential duckpond. Is that correct?

Mr. DINGELL. No, the purpose of this particular project is to divert massive amounts of water from the Garrison Reservoir over into ultimately two other drainages, the Souris drainage and the drainage of the Red River, which will ultimately move waters on up into Canada and the Hudson Bay area.

Mr. ROUSSELOT. Would it become a duckpond then?

Mr. DINGELL. No, I think this project is going to have a more disastrous impact on the migratory waterfowl population and wildlife refuge system of the United States than any single project that has ever been undertaken in the history of the United States, and perhaps a worse impact on the refuge system and migratory waterfowl than all other water projects in the history of the United States.

Mr. ROUSSELOT. I thank my colleague.

Mr. DINGELL. Mr. Speaker, I think it has to be observed that the refuge system is one of the great national treasures. No less than 12 refuges in North Dakota, some of the finest wildlife refuges and finest migratory waterfowl habitats in the entire United States will be absolutely decimated, if not totally destroyed, by this particular project.

The House needs more information on the Garrison project. One of the reasons the stipulation and order is of importance is that it requires an orderly process for resolving the environmental and international issues and for protection of refuges, prairie wetlands, and the wildlife values of the particular area. It also assures that the questions which cannot be resolved through the administrative or judicial process will be presented to the Congress. The stipulation and order of the court, which the action of the Senate would upset, is not something which would prevent the Garrison project from going forward. Quite the contrary, it is something which will assure that it goes forward with appropriate environmental and international safeguards and appropriate congressional supervision to see to it that the fish and wildlife values of the area are protected.

To repeat, Mr. Speaker, there are no indications whatsoever that if objectional Senate language is adopted, that the rights of farmers in the area—and they are now commencing condemnation of farmers' lands along the Rockford Canal which will move waters of the Garrison project over into the Red River drainage. In fact there is really no assurance that this project can be constructed within the foreseeable future. Farmers will be involuntarily moved off their lands before there is a need for that action to be taken under this particular proposal.

Mr. FASCELL. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Florida.

Mr. FASCELL. What the gentleman is saying is that they are going to take farmers off their lands in order to make land for farmers to go back on the land and the taxpayers will pick up the tab. From this perspective, I agree with the gentleman from Michigan and am in complete support of his motion to disagree with the Senate amendment on the Garrison diversion project.

As a member, and more recently as Chairman, of the Canadian-United States Interparliamentary Group, I have participated in lengthy discussions with Canadian Members of Parliament during our past eight meetings and I can assure you that the Garrison diversion project is a national issue in Canada. After acid rain, it is the environmental issue of greatest concern to the Canadians.

The U.S. Government has made a commitment to Canada not to proceed with this project until resolution is reached on the matters of concern to Canada. Past Congresses have respect-

ed this agreement with Canada, yet we are now being asked to renege on that commitment by inclusion of the Senate provision dealing with this project.

Not only is it unconscionable for the United States to contravene its understanding with Canada, but the timing could not be worse. Last year the United States provided a major affront to Canada by its refusal to ratify the fisheries treaty. Only lengthy negotiations and explanations of the atmosphere in the U.S. Senate convinced the Canadian Parliament to approve the companion boundary treaty. Further, in the past month we have seen evidence of moderation in the rhetoric on both sides of the border regarding Canada's energy and investment policies, and Canadian officials appear to finally be taking steps to deal with some of the U.S. objections. Just last week the Canadian Government provided a signal that it will not expand the jurisdiction and activities of the Foreign Investment Review Agency. The painstaking progress that has been made in this important area could be seriously jeopardized by the injury that Canadians would feel by approval of the Senate provision.

Mr. Chairman, I strongly urge our colleagues to reject this provision.

Mr. DINGELL. One might say this is a project for musical farms. Presumably, they are going to move some farmers off their land so that they can farm other land. Curiously, the lands they will be farming will probably be of less value in terms of agriculture, and when we couple that with the loss of wildlife habitat in the area, it could result in a significant losses for both farmers and wildlife.

Mr. STANGELAND. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Minnesota.

Mr. STANGELAND. Mr. Speaker, I thank the gentleman for yielding.

In the gentleman's discussion as far as the loss of wildlife habitat and degradation of wildlife environment, the gentleman might also want to point out the thousands and thousands of acres that are in mitigation, mitigated acres that are put back into wildlife habitat.

Mr. DINGELL. I am glad the gentleman mentioned that because, first of all, if he will read the language of the Senate amendment——

The SPEAKER pro tempore. The time of the gentleman from Michigan has expired.

Mr. BEVILL. Mr. Speaker, I yield 2 additional minutes to the gentleman from Michigan.

Mr. DINGELL. The language of the particular amendment says as follows:

None of the funds appropriated in this act for the Garrison diversion unit shall be used for the acquisition of mitigation lands by condemnation, or for the construction of features affecting waters flowing into Canada under the authorized plan.

What they are saying is, if we adopt this amendment we will assure that there is no way that lands can be acquired to mitigate the losses of fish and wildlife habitat as a result of this project. We are essentially foreclosing that action by the Interior Department. I would point out, too, that periodically the Congress has passed provisions prohibiting expenditures of funds for the mitigation of lost habitat, but it is only through authorizing legislation—and not through legislating in an appropriations bill that this should be accomplished, if at all.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I yield.

Mr. MYERS. The gentleman has been here for a long time and is familiar with the language. I am sure he knows what this language says, that none of the funds in this act shall be used for buying mitigating lands, because the purpose of this money is not for the entire program.

Mr. DINGELL. I am keenly aware of that, but the hard fact of the matter is, the gentleman very well knows that no other funds are available anywhere for the purchase of mitigation lands because we have said that moneys for mitigation cannot be expended if condemnation has to be used, and the only way you can get lands of this kind in this particular area is through condemnation. So, the effect of the Senate amendment would be to see to it that while the project is moved forward, the mitigation promised in the 1965 authorization of the Garrison project, some 140,000 acres of it, would not be available for the purposes of mitigating the loss.

Mr. MYERS. I am sure the gentleman is aware that it is 145,000.

Mr. DINGELL. Whatever the figure is.

Mr. MYERS. Twenty-five thousand has already been set aside to the Department of the Interior. They have control of 25,000 acres right now.

Mr. DINGELL. They have got 115,000 acres more to acquire, and a promise was made when this project was finally implemented that those lands would be available.

I urge the rejection of the Senate amendment.

Mr. CONTE. Mr. Speaker, I yield 6 minutes to the gentleman from Indiana (Mr. MYERS).

Mr. MYERS. Mr. Speaker, this language in this bill is legislation on an appropriations bill. That is the reason it is in disagreement right now, and brought back by your committee, because it is an item in technical disagreement. But, how did it get here, and why?

We must go back to 1976, when the Audubon Society and a few other environmental groups brought suit against the Secretary of the Interior, Tom Kleppe, a former colleague of ours, that all of the NEPA laws had not been abided by, and that the basic law for authorizing the construction had not been complied with. The court reviewed it and found this to be true, and left an order, but in the meantime there was a stipulation entered into by part of the parties—but not all of them; the defendant was not involved in the stipulation. The stipulation made an agreement between the Audubon Society and then the new Secretary of the Interior, because there had been an election, the new Secretary of the Interior setting aside what would take place here.

□ 1200

And the court in its direction, in its order—and I cite the language in the last sentence of the Court's order which was filed in May of 1977—"further ordered that this case shall not proceed on the merits pursuant to the terms of the agreement until Congress has reauthorized the project."

Now, there is a serious question whether the court has the authority to direct Congress to do anything or whether the executive branch has the right to set aside and deauthorize, because this is what the stipulation actually did, that is, to deauthorize, and the executive does not have that authority.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. MYERS. I yield to my colleague, the gentleman from Michigan.

Mr. DINGELL. Mr. Speaker, the gentleman read a part of the stipulation.

Mr. MYERS. I did not read from the stipulation; it was from the court's order.

Mr. DINGELL. The court order reads as follows: "or authorizing funds for project development until an additional 60 days has passed."

Mr. MYERS. "Or."

Mr. DINGELL. That does not mean the stipulation and orders deauthorized the project. It says simply that Congress is required to act before there is any further construction on the project. That is quite different from saying the project has been deauthorized.

Mr. MYERS. And this is the basis of this legislation provided by the other body. We all know that authorization in an appropriation bill is not permitted by our rules, but it is by the other body. This is what happened in the conference, and we agreed in conference.

This is one of the things we had to agree on. We had to meet them halfway.

It is not all as bad as is being painted here. We are going to hear later that this is going to destroy 13 refuge areas

in North Dakota. There are only 13 to start with, and some of them are 300 miles from the Garrison project.

The money in this bill and the direction in this legislation is only for a small pumping station to provide water for about 5,000 acres for irrigation and for a study to see about percolation tests.

What damage will irrigation do in this area? We do not know today. It is authorized, yes. This is reauthorizing just a very small part of this program. We have to look at if further in the future, but today we do not know about percolation tests. We do not know what damage it might do in the future after drainage waters are turned back in. This money will provide a chance to get some answers to some questions.

Then we have the question about Canada. We are going to hear about Canada. This provision very specifically says that "none of the funds appropriated in this Act * * * shall be used * * * for the construction of features affecting waters flowing into Canada * * *."

That is very clear. It will not affect Canada. In fact, it may help answer some questions.

Now, as for the wildlife, the question comes up here about how it is going to destroy all of these 13 refuge areas. The fact is that 25,000 acres have already been handed over to the Department of the Interior for its control for fish and wildlife. It has been expanded to 146,000 acres total if we go along with the entire program, which we have not done yet. But there are 146,000 acres set aside which are not there today.

So if we should continue this, and I think we should, we are going to enhance the wildlife. Our friend, the gentleman from Massachusetts (Mr. CONTE), is going to have a lot of canvasbacks to shoot, and he has not got that today. There are 146,000 acres of land there for the ducks, but we think we also ought to have a few thousand acres for the people.

Yes, we are going to set aside 146,000 acres, 25,000 of which have already been set aside and being used for this purpose, but we are also going to give a few thousand acres for people. The ducks get 146,000 acres; the people get about 15,000. A lot of people think that is not a very good proportion, but we have been dealing with 12 percent, and that is a lot better than 12 percent. I do not think the ducks fare too badly.

I do not know of any member in our committee or any Member in Congress who wants to destroy the wildlife. We want to enhance it, and this is what it is all about.

In closing, Mr. Speaker, I urge this body to respond to what the court invited Congress to do. This really is not a reauthorization. The court invited Congress to reauthorize. Congress does not have to reauthorize because the court did not have the power to deauthorize in this instance, nor did the Executive in the stipulation order have that authority to deauthorize.

The court invited us to do just exactly what Congress has done at this point. So it is not setting aside any court order. We are following the court order by doing what they invited us to do, reauthorizing a very small portion of this, affecting about 5,000 acres, part of which will be for ducks and part of which will be for people. That is not a bad thing to do.

Mr. Speaker, I urge our colleagues not to follow the people who say, "Do it all for ducks and forget about people's needs." Some of these days people are going to have to eat, too, and that is what this bill is all about. We want to answer some questions.

Mr. BEVILL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this committee has supported this project for many years. The bill contains $4 million for this project which has been agreed upon by the Senate.

The Senate has simply added some language to the bill that these gentleman are objecting to. The $4 million will be spent on a test area only.

As the distinguished gentleman from Indians (Mr. MYERS) said, the court legislated. The Senate wants to unlegislate what the court legislated. They have no business legislating, they have no business telling this Congress they are going to deauthorize a project. These courts have taken on enough authority, and they have assumed enough jurisdiction.

Our action today is to overrule the court which has deauthorized a project. They had no business deauthorizing the project. We have been supporting this project which was authorized in 1965, and the Congress has consistently appropriated money for it.

Canadian objections have been mentioned. The language states specifically, "none of the funds appropriated in this act for the Garrison Diversion Unit shall be used * * * for the construction of features affecting waters flowing into Canada * * *."

That is there in black and white, so that is a moot argument.

I believe the other objections have been covered.

Mr. Speaker, the committee feels that this is a good project and the Court has no business deauthorizing it.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. BEVILL. I yield to the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, I thank my good friend for yielding.

I appreciate the gentleman's concern, and there is room here for honest men to differ. But the hard fact of the matter is that the Senate language reverses a ruling of the court, and nullifies the effect of two statutes passed by the Congress, the Fish and Wildlife Coordination Act and the National Environmental Policy Act. The language totally overrules a stipulation and order by the court which was agreed to by the Interior Department and by the Audubon Society. More importantly, the language directs the Secretary to move a project forward by taking lands away from people in the area at a time when the court says they cannot go forward.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. BEVILL. I yield to the distinguished ranking minority member.

Mr. MYERS. Mr. Speaker, what the gentleman from Michigan said is not right. This does not set aside EPA laws. Very clearly, it says, "providing other provisions of law shall continue to be applicable to the project."

A new impact statement has been made, and it has been delivered under the direction of the court. That has been completed. This does not set aside EPA. It provides what the court says we must do. It reauthorizes the project, and we are just reauthorizing a very small segment in this instance.

Mr. DINGELL. Mr. Speaker, will the gentleman yield further?

Mr. BEVILL. Mr. Speaker, I believe we are running out of time. Let me just say that I urge the Members to support the committee on this amendment, since it is not going to cause any harm.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may need.

Mr. CONTE. Mr. Speaker, if the motion to recede and concur is defeated, I will then make a motion that the House disagree to the Senate amendment No. 23, and I urge my colleagues who are not here and who are back in their offices to vote no when they come here.

The Members will remember the last time we were on this motion, which is not quite the same motion, because, if you who are here or are listening to this debate back in your offices, you know that this is a much worse situation now than before. The last time you voted aye on my motion to strike the $4 million; this time you will vote "no" on this.

My good friend, the gentleman from Indiana (Mr. MYERS), says that everything is for the ducks and there is nothing to eat. I may suggest to him that there is nothing like roast duck and orange sauce, and I will be glad to give him the recipe for that later on.

Mr. MYERS. Mr. Speaker, if the gentleman will yield, I will accept.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I am glad to yield to my friend, the very charming, lovely, and brilliant gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I thank my colleague for yielding and for speaking on this matter in this constructive vein. I would like to associate myself with the gentleman's remarks and urge that this House vote no.

I think we have gone far enough with the damage that we have done.

Mr. CONTE. Mr. Speaker, I thank the gentlewoman for her contribution.

Mr. Speaker, the Senate amendment effectively guts, as the gentlewoman from New Jersey said, a U.S. Federal district court decision of May 6, 1981. That decision suspends construction on the 250,000-acre Garrison diversion unit boondoggle until Congress, acting through its authorizing committees, has had an opportunity to consider two items. Item No. 1 is consideration of supplemental environmental studies of the project. Item No. 2 is consideration of new authorizing legislation, to be prepared in light of those studies and designed to resolve the international, economic, and environmental problems which currently affect the project.

At this point, Mr. Speaker, I would like to insert a letter from the Premier of Manitoba of November 17, 1981.

I do not care what the Members hear, on November 17, he was opposing this particular project. The letter is as follows:

CANADIAN EMBASSY,
Washington, D.C., November 17, 1981.

Hon. SILVIO O. CONTE,
U.S. House of Representatives.

DEAR REPRESENTATIVE CONTE: I have had occasion to write to you in the past regarding Canadian concerns about the Garrison diversion project in North Dakota. Its completion, as it is currently authorized, would lead to serious environmental and economic consequences in Manitoba.

In light of your impending review of this project, The Honourable Sterling Lyon, Premier of Manitoba, has asked me to transmit to you his views, as set out in the attached telegram. In it, the Premier summarizes the views and concerns about the Garrison of the Government of Manitoba, which the Canadian Government fully shares.

Yours sincerely,

PETER M. TOWE,
Ambassador.

TEXT OF TELEGRAM FROM PREMIER STERLING LYON TO THE MEMBERS OF THE U.S. HOUSE OF REPRESENTATIVES

The Government of Manitoba is informed that the United States House of Representatives will be considering the Energy and Water Appropriations Bill (1982), one component of which is a dollars four million appropriation to the Garrison Diversion Unit.

I wish to remind you of my letter of May 29, 1980 and the information brochure accompanying that letter, both of which set out the unequivocal opposition of the people of Manitoba to the Garrison project as authorized by Congress.

We remain steadfast in our opposition to any Garrison plan which contemplates the transfer of water across the Continental Divide into the Hudson Bay Drainage Basin, with the resultant damage to our fisheries and our water environment in general, as documented by the International Joint Commission. I am sure that you would not wish to support a plan which would inevitably damage or destroy an important sector of our industry and our environment.

STERLING LYON,
Premier of Manitoba.

As many of you are aware, I have opposed this project on the merits or the lack of merits, for many years. In July of this year, when the House first considered the energy and water appropriations bill for fiscal year 1982, I offered an amendment which would have eliminated the $4 million in new funding for this wasteful project. The amendment did not pass, but the margin was by a mere 18 votes.

Today, we are faced with voting on the conference report on this same energy and water appropriations bill, but now it includes even more offensive language regarding this destructive project. The few proponents of this language now want you to overturn a U.S. Federal court decision as well as "any subsequent court order" relative to the same carefully crafted litigation agreement. Such language is totally unacceptable and sets fourth a very bad precedent for this Chamber to labor under.

Mr. DINGELL. Mr Speaker, will the gentleman yield?

Mr. CONTE. Certainly I yield to the gentleman from Michigan.

Mr. DINGELL. Mr. Speaker, the gentleman said a very important thing. The language of the Senate amendment that the gentleman objects to says that the Secretary is directed to proceed notwithstanding the stipulation and order of May 11, 1977. But the Senate language says, "And any subsequent court order."

So the Senate language not only kills the existing court order but it tells the citizens of the area, they can not even go back into court and get any subsequent orders protecting their rights against action by the U.S. Senate. I say that that is an outrage.

Mr. Speaker, I thank the gentleman for yielding.

□ 1215

Mr. MYERS. Will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. MYERS. Again, you did not read all of the order or all of the bill. It says that any subsequent court order, notwithstanding the stipulation. Then it goes on and says, only that stipulation in that order. It does not preclude the courts from, in the future, looking at something. We are not saying the court has no jurisdiction, just relative to the stipulation which is highly suspect.

Mr. DINGELL. I will bet the minute somebody goes into court to complain about some further action that the Senate language will be cited as stripping the plaintiff of his right to litigate the question. I would even wager if that litigant is successful, the U.S. Senate will be back again to take away the rights of people in the area.

I thank the gentleman from Massachusetts for yielding to me.

Mr. CONTE. I thank the gentleman for his contribution.

This language of the other body adds insult to the already economic and environmental injury to the farmers of the State of North Dakota.

The proponents of this language which mandates the construction of the project would have you—listen to this—take 220,000 acres of prime land to irrigate 250,000 acres of agricultural land, destroy 60,000 acres of prairie wetlands, which are necessary for the breeding of the canvasback duck. No other State in the Union with the exception of Alaska produces more of this waterfowl. It will adversely affect 13,175 acres of prairie wetlands destroy or damage 12 national wildlife refuges, which I fought so hard for as a member of the Migratory Bird Commission, Ducks Unlimited, who are against this particular action of destroying these wetlands up there in North Dakota.

The fund also is a project which the International Joint Commission concluded "would cause significant injury to the health and property in Canada as a result of an adverse impact on the water quality and thus be in violation of the 1909 Boundary Waters Treaty with Canada" and which the Canadian Government has again vehemently opposed in a letter to me dated November 17, 1981.

Mr. DORGAN of North Dakota. Mr. Speaker, will the gentleman yield to me?

Mr. CONTE. I yield to the gentleman from North Dakota.

Mr. DORGAN of North Dakota. In terms of the statistics about destruction, would be the gentleman tell us how many mitigation acres will be taken for that project?

Mr. CONTE. 145,000.

Mr. DORGAN of North Dakota. So that ought to be considered in the description of the statistics the gentleman uses about destruction.

Mr. CONTE. Let me go on with this disaster. Let me go on with this disaster.

They would require the construction of the first phase of three of this environmentally unsound maze of canals, dams, and reservoirs which has skyrocketed in cost from $206 million to—listen to this—$1.01 billion.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I will be glad to yield.

Mr. ROUSSELOT. Did you say $1 billion?

Mr. CONTE. I said $1.01 billion. The benefit/cost ratio has plummeted 45 percent in the last 2 years. Now listen to this.

Mr. ROUSSELOT. I am listening.

Mr. CONTE. Are you listening? They would have you approve the design of, listen to this, the "Venice of the West." This will make the gondola country of Venice, Italy, look anemic by contrast, there will be so many canals up there.

Mr. ROUSSELOT. We have a Venice in California that is not doing too well.

Mr. CONTE. But that is dry. This is going to be wet canals all over.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Michigan.

Mr. DINGELL. The National Taxpayers Union has a very interesting comment on the point which supports what my good friend and colleague from Massachusetts says. They state:

It is now estimated that the Garrison project will cost the taxpayers $1 billion. And if past history is any indication, this cost can surely be expected to increase. The project costs have increased nearly five times—from an original authorization of $207 million to the current estimate of $1.018 billion. As the cost is escalating, the cost/benefit ratio is rapidly decreasing. In two years, the benefit/cost ratio has dropped from two-to-one to one-to-one (and this is using the artificially low interest rate of 3.225 percent).

Mr. CONTE. I am going to submit the entire letter.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I would like to comment I think our colleague in the well puts the case a little more colorfully and cogently than the National Taxpayers Union, valuable as those figures are.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Speaker, I rise in support of the motion by Mr. DINGELL and Mr. CONTE. I support the pending motion to oppose language the Senate added to H.R. 4144 because that language will not help resolve Garrison's problem's, rather it seeks to sweep them under the rug.

The language would set aside a stipulation and court order that provides a clear process by which the Congress can address problems with the project that have only become apparent since authorization, which are among the most serious unresolved problems faced by any proposed water development project in this Nation. The stipulation does not take final authority for the project away from Congress. We have the final say, and we will always have the final say. It does prevent new construction until we have had an opportunity to study the damage to national wildlife refuges, and the international issue, and the related issue of just what originally planned irrigation lands might still be developed. It allows us to decide where this project is going, at taxpayers' expense, before it goes any further.

If, for example, the final report of the International Joint Commission, which concluded the project would result in a treaty violation, is accepted by the State Department—and I believe it will be—then 79 percent of the lands first planned for irrigation under the authorized Garrison unit cannot be developed.

In light of that consideration alone, the existing stipulation must not be set aside. This project must remain within the law.

I believe appropriate committees of this House, including Interior, Foreign Affairs, and Appropriations, must undertake a more intensive review of the Garrison issue than has been the case to date. I further believe the Secretary of the Interior should provide for that review by completing the analysis and legislation contemplated by the stipulation, and providing that material to Congress for our review and action.

I hope the pending motion will pass, and expect that it will. After it does, I pledge to work with my good friend from North Dakota in following the process outlined by the stipulation, which I believe is realistically the only process by which this project, likely in modified form, will ever move forward again.

Mr. BARNES. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I am glad to yield to the gentleman.

Mr. BARNES. Mr. Speaker, I want to take this opportunity to join my colleagues in opposing the Senate provisions on the Garrison diversion project in North Dakota, which are contained in the energy and water appropriations bill.

As chairman of the House Foreign Affairs Subcommittee with jurisdiction over United States-Canadian relations, I feel a responsibility to express my view that this project will do damage to our relations with our neighbor to the north. Opposition to the Garrison diversion project focuses on several points—the project will pollute the rivers that flow from North Dakota into Canada; it violates the Boundary Waters Treaty between the United States and Canada; and it ignores pending court action aimed at resolving international and environmental problems. I am also concerned that the Committee on Foreign Affairs should have the opportunity to review the implications that this project has for the furture of United States-Canadian relations. For these reasons, it is my conclusion that the Senate provision should not be accepted. To do otherwise would be against our national interest, and would needlessly hurt our relations with Canada.

Mr. CONTE. Because of the principle of "separation of powers," there is a very serious question concerning the constitutionality of the other body's amendment. The judicial branch has crafted carefully a decision which establishes a procedure whereby the Congress must effectively review this project; a project which was first reviewed and authorized in 1965, under totally different assumptions and cost factors—some 16 years ago.

The Senate language sidesteps the agreement of the Secretary of the Interior in which he recognized an obligation to respond to the requirements of the law—the National Environmental Policy Act, as well as to honor our Nation's commitment to Canada through our 1909 Boundary Waters Treaty Act. Paragraph D of the negotiated agreement which was upheld by the U.S. Federal district court in May of this year states, "No action * * * will be undertaken until * * * Congress has thereafter reauthorized the project. * * *"

Although the last phrase in the other body's amendment purports to satisfy the Canadians' concerns, it does not. In fact, the Canadian Embassy has, again, protested this action. The fact of the matter is that 79 percent of the originally authorized project will "affect waters flowing into Canada," contrary to the amendment language. The 5,000 acre "test plot," which the amendment mandates construction, does not satisfy the very serious concerns of the Canadians regarding the transfer of rough fish into the Canadian waters in violation of our 1909 treaty. It does not, because the originally authorized design of the pumping station is of such a size that it would pump water into both the Missouri River and the Hudson Bay watershed.

It is appropriate that Congress should take a hard and fresh look at this maze in view of rising costs, U.S. treaty commitments with Canada, and the damage to this Nation's National Wildlife Refuge System that would result. These problems should be reviewed by the appropriate authorization committees including Interior and Foreign Affairs. Clearly, this is not the time to allow a select few to ride roughshod over our carefully drafted laws as well as the wisdom of the judicial branch. For the economic and environmental well-being of this Nation and Canada and the preservation of the integrity of the judicial and legislative branches of Government, I urge you to support my motion.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate my colleague yielding and I have been fascinated by this map my colleague has presented here. It says here that this Garrison diversion project would provide 3,000 miles of canals, drains, and channelized river, and it shows all of that in red all across the State. Is that correct?

Mr. CONTE. As I said, this will make the Venice of Italy look anemic by contrast, and they do not even have a gondola up there.

Mr. ROUSSELOT. It is 3,000 miles of canals?

Mr. CONTE. 3,000 miles and $1 billion, over $1 billion.

Mr. ROUSSELOT. I remember that.

Mr. CONTE. How in the heck do you think you are going to build 3,000 miles of canal?

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I will be glad to yield to my colleague from Indiana.

Mr. MYERS. How many ducks would 3,000 miles of canal hold?

Mr. CONTE. It is not how many ducks it will hold but how many ducks it will destroy. You must understand what breeding grounds are and what canals are. They are two different things. You are talking about apples and oranges. I will take you out in a duckblind someday and I will show you.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Michigan.

Mr. DINGELL. I thank the gentleman for yielding.

For the benefit of my friend from Indiana, canals do not produce ducks; wetlands do.

Mr. CONTE. I told him that.

Mr. DINGELL. If the gentleman were a duck hunter he would understand that.

Mr. MYERS. We will stipulate that.

Mr. DINGELL. Let me read what one of the ranchers in the area has to say about this. It also should be known that this is not something that is greeted with uniform enthusiasm in the State of North Dakota. Here is what one citizen up there has to say. This is Richard Steinbach, chairman of the New Rockford Canal Protesters Association. He is one of those that lives on this 3,000 miles of canal that is going to be built with $1 billion of your money and subsidized interest rates. But, interestingly enough, he is protesting because he says as follows:

I own land that would be taken for the eastern portion of the proposed New Rockford Canal—a 50 mile plus canal that would run west to east, carrying water from the proposed Lonetree Reservoir to irrigation districts in central and southeast North Dakota. The reservoir on the western portion of the canal would lie in the Canadian watershed, and water carried through the canal would also involve direct connections to that same watershed. Since our State Department has promised not to build project features affecting Canada until differences over the project are resolved, one might think that my land, and that of my neighbors, could be spared under the shield of international diplomacy.

But listen to this. That is what the action of the other body does to this poor soul.

Not so, apparently—although they can't build either end of the New Rockford Canal, James Watt's bureaucrats are now out to try and build the middle portion of the canal. That makes as much sense as starting to build a bridge in the middle of a river, even though there are indications the bridge will never be allowed to touch either shore.

This is a boondoggle.

Mr. CONTE. If I might wind up, the gentleman from Michigan has quoted from the National Taxpayers Union letter. I ask unanimous consent, Mr. Speaker, to submit the entire letter into the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The letter referred to follows:

NATIONAL TAXPAYERS UNION,
Washington, D.C., November 18, 1981.

DEAR REPRESENTATIVE: It has come to our attention that the Senate added language to the Energy and Water Appropriations bill (H.R. 4144) setting aside a court order and certain future court orders pertaining to the Garrison Diversion project in North Dakota.

When the Energy and Water Appropriations bill is returned to the House for final approval, Congressmen Dingell and Conte will raise an objection to the Senate language. We urge you to support this effort and vote to strike the Senate-added language concerning the Garrison project.

The Senate language, in addition to setting aside court orders, directs the Secretary of Interior to proceed with construction of the project. That was originally authorized by Congress sixteen years ago. It not only is a waste of taxpayer dollars but will also be in violation of the National Environmental Policy Act and the Boundary Waters Treaty with Canada. Because of the wasteful and questionable aspects of the project, we urge you not to take precipitous action. Instead, we ask that you take a careful look at the project and resolve some of the controversy now associated with it before spending any more money on it.

It is now estimated that the Garrison project will cost the taxpayers a billion dollars. And if past history is any indication, this cost can surely be expected to increase. The project costs have increased nearly five times—from an original authorization of $207 million to the current estimate of $1.018 billion. As the cost is escalating, the cost-benefit ratio is rapidly decreasing. In two years, the benefit-cost ratio has dropped from 2:1 to 1:1 (and this is using the artifically low interest rate of 3.225%).

At a time when it is absolutely essential to cut unnecessary spending from the federal budget, it is even more important that projects such as the Garrison receive careful cost scrutiny by the Congress. We are confident that if you take a hard look at the Garrison project—and balance its costs and its benefits against other programs you will agree that it cannot be economically justified. In the present economic climate, we cannot think of any agrument which justifies a federal subsidy of $800,000 per benefitted farm, yet this is what the Garrison project will provide to those few lucky farmers.

We would prefer that Garrison not be funded at all. Unfortunately that will not be the issue before you. The issue is simply whether Congress should set aside court orders and direct the construction of a wasteful project without first resolving the real fiscal and environmental problems associated with that project. We strongly urge you to support the Dingell-Conte effort to delete the Senate language and, in less hectic times, reexamine the Garrison project and make a deliberate determination about the project's future.

Sincerely,

LEN RIPPA,
Director of Congressional Affairs.

Mr. CONTE. I would like to wind up, because the other day one of the gentleman from South Carolina referred to silk stocking liberals and I notice a lot of these silk stocking liberals voted for this boondoggle. They can get a nice conservative vote here.

The last paragraph of that letter from the National Taxpayers Union says:

We would prefer that Garrison not be funded at all. Unfortunately, that will not be the issue before you. The issue is simply whether Congress should set aside court orders and direct the construction of a wasteful project without first resolving the real fiscal and environomental problems associated with that project. We strongly urge you to support the Dingell-Conte effort to delete the Senate language and, in less hectic times, reexamine the Garrison project and make a deliberate determination about the project's future.

My colleagues listening, watching, this is the National Taxpayers Union—"We strongly urge you to support"—this is the only bad part of the letter. It says Dingell-Conte. "We strongly urge you to support the Dingell-Conte effort to delete the Senate language and, in less hectic times, reexamine the Garrison project and make a deliberate determination about the project's future."

Mr. DORGAN of North Dakota. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from North Dakota.

Mr. DORGAN of North Dakota. I thank the gentleman for yielding. I just want to say that the gentleman from Michigan (Mr. DINGELL) gave us some information about the New Rockford Canal. Could the gentleman tell me whether the appropriations we are discussing include any money to construct the New Rockford Canal?

Mr. CONTE. The $4 million, as I understand it, no, but it will overturn the court order, and allow general construction immediately. That is the bad thing. Once you have started, you are gone.

□ 1230

Mr. DORGAN of North Dakota. So that the answer then, is "no"?

Mr. CONTE. "No." I told you that.

Mr. DORGAN of North Dakota. I thank the gentleman.

Mr. BEVILL. Mr. Speaker, I yield such time as he may consume to our distinguished colleague, Mr. DORGAN, the gentleman from the State of North Dakota where this project is located.

Mr. DORGAN of North Dakota. I thank the gentleman for yielding.

Mr. Speaker, I was mesmerized here, not so much by substance, but by style, the fascinating discussion about this project. As I listened I was wondering whether it was a discussion about Garrison Diversion or part of the "Bob and Ray Show." We are not talking about the living habits of canvasback ducks; we are talking about a water project. We are talking about a project that was included as part of the Pick-Sloan plan in 1944. It was formally authorized by Congress in 1965. At the present time it is not built. It is a controversial project, to be sure. It is a project that has had some difficulties.

But let us focus this. The gentlewoman from New Jersey, the gentleman from Michigan, and others have talked about the New Rockford Canal, they have talked about Canada, they have talked about a lot of things. But the focus here is: Shall we spend $4 million to build a pumping station, the Oakes pumping station, to send water to a test irrigation plot. That is the issue. The Canadian issue is not present in this appropriation. So I would like to focus on that for just a moment.

But before I do that, Mr. Speaker, I would like to point out some facts about the court order that has halted the work on this project. I think it is important to note that both the stipulation between the Interior Secretary and the Audubon Society and the court order, both of them, talked about nullification of the agreement.

Let me just point out that in the stipulation, page 5, it says:

> This agreement is nonseverable. If any portion of the agreement becomes unenforceable, is violated, or is nullified * * *

The stipulation itself uses the word "nullified."

Now, the court order, which I think is interesting, also refers to "nullification."

It says, on page 3:

> Congress has taken no action since the execution of the May, 1977 Stipulation and Order to nullify the agreement.

And it says:

> Any Senate action subsequent to the stipulation could only render the stipulation legally null and void if it compelled the Federal defendants to expend the funds on the Garrison Project * * *

That is the language that is important.

The point is that the judge himself indicated a remedy for this kind of situation. The judge contemplated that if Congress decided it wanted to compel the spending of those funds, it could and should do so. This is not interference with the court. That is nonsense. This is a discussion in the court order that talks about nullification.

Now, on page 11 of the court order it says:

> One of the actions is to defer further expenditures until Congress has acted to reauthorize the project, or an alternative, or "nullify" the stipulation.

That is all this language is doing. It is nullifying the stipulation. It says, No. 1, we are going to appropriate $4 million. And, No. 2, we are going to insert this language and nullify the stipulation so that the $4 million can be used. For what? For construction of the Oakes pumping station. It is an irrigation test plot. Not for the construction of the Lone Tree Reservoir, not for the construction of the New Rockford Canal. We are not talking about the ducks. We are talking about the construction of the Oakes pumping station.

Now, the gentleman from Massachusetts talked a lot about mitigation. Actually, he talked more about destruction than mitigation. The fact is, there are going to be 146,530 acres of mitigation on this project; 25,000 acres of mitigation have already been taken. But mitigation represents an enhancement or, at least, a maintenance of the kind of wetlands that the gentleman is concerned about. And I think a balanced presentation by the gentleman from Massachusetts would include acknowledgement that this project would incorporate 146,000 acres of mitigation.

Now, I notice that the "Dear Colleague" that was sent around to the Members of the House said that this language would negate mitigation. Now, if the gentleman really believes that this language would negate mitigation, he has not read the language very carefully, because the language says that mitigation shall not be acquired through condemnation at this point. The mitigation has already been underway. And it talks about acquiring mitigation acres from willing sellers only.

Mr. CONTE. Mr. Speaker, will the gentleman yield on that point?

Mr. DORGAN of North Dakota. I yield to the gentleman from Massachusetts.

Mr. CONTE. The language in the Senate says:

> None of the funds appropriated in this Act for the Garrison Diversion Unit shall be used for the acquisition of mitigation lands by condemnation.

Mr. DORGAN of North Dakota. Precisely.

Mr. CONTE. Well, there is nobody willing to sell.

Mr. DORGAN of North Dakota. Oh, come now. The gentleman from Massachusetts just has not talked to some folks. The fact is, there are two ways of acquiring mitigation acres. One is by condemnation; the other is by doing it from willing sellers.

You are presupposing, of course, that you cannot go out and find someone who is willing to sell their land for a certain price.

This does not negate the approach to getting mitigation acres. If they wanted to do that, they probably would have done that in the language. But they did not, because they do not want to negate mitigation acreage. They understand the need for mitigation acreage. They have simply said, "We are not going to take mitigation acreage during this fiscal year through the process of condemnation," and they have said that in past bills, as well.

I would like to also point out that in the "Dear Colleague" letter that was sent around it was alleged the Secretary of the Interior would be directed by this Congress to proceed without necessary and proper environmental assessments.

The fact is that all of the environmental impact statements that have been required by NEPA and the May 11, 1977, stipulation have been completed.

Now, I think that it is important for us to discuss a little history. The fact is, our State gave up a half-million acres to build a dam. In the Pick-Sloan project, they said, "Let's build a dam up there in North Dakota. People from North Dakota, give up a half a million acres for that dam, because we want to provide flood control downstream, we want to provide navigation capabilitites downstream, we want to provide the hydroelectric power that can be generated from the dam." So the dam was built, and now we have flood control downstream in other States, we have navigation capabilities that are fine, and we have all of the benefits from hydroelectric power that were contemplated.

But in 1944 they also said "North Dakota, in exchange for giving up half a million acres, we are going to give you a 1 million-acre irrigation project. That is what we are going to give you."

Well, it is 1981, and we do not have a project.

I was in Massachusetts one day about a little over a decade ago, and I was reading the morning papers. The papers said the citizens of Boston and surrounding area had raised a tremendous protest over the possible emplacement of the antiballistic missile system. So they decided later on, "We do not want to put the anti-ballistic

missile system around Boston or the major cities. Let's ship it out in the country." So North Dakota got the antiballistic missile system. North Dakota also has 300 ICBM Minutemen poised in the silos out there. I suppose it is our own peculiar kind of mitigation through the Pentagon. But the fact is, North Dakota has been willing to house those kinds of projects, that kind of Federal spending, but now when it comes time to talk about Federal spending that will enhance agriculture, that will provide some municipal and industrial water supplies, we have folks in the House who stand up and say, "Well, now, we want to forget about those promises made to States like North Dakota. Those promises we do not think hold the test of time."

I am not someone who says that this project does not have some difficulties, but the fact is, we are not building anything more than the Oakes pumping station at this point. If you want to discuss the New Rockford Canal, the Lone Tree Reservoir, discuss that when we appropriate funds next year in fiscal year 1983. It is a good discussion to have. I think the project ought to be able to stand the test of its own merits. But I think that is when we ought to have that discussion.

Mr. STANGELAND. Mr. Speaker, will the gentleman yield?

Mr. DORGAN of North Dakota. I yield to the gentleman from Minnesota.

Mr. STANGELAND. I appreciate my colleague yielding, and I want to commend him on an excellent statement.

Someone said earlier that we have to know more about this project. This project has to be, if you want to study the record, the best known project in this House. And the gentleman from North Dakota has given an excellent lesson in history as to what North Dakota gave up, the commitments that were made to North Dakota. But, my friend, the problem is that, unfortunately, North Dakota only has one Congressman to defend it, and there are 434 who can vote very fiscally conservative and ignore the needs of North Dakota, ignore the needs of North Dakotans.

The gentleman also forgot one of the prime benefits of this kind of a project, and that is the municipal and industrial water needed for the development of the cities in central North Dakota and on the borders of my district in Minnesota.

When the gentleman speaks of the Hydroelectric power, North Dakota did not benefit from that hydroelectric power, but Minnesota, Iowa, Wisconsin, Michigan, clear to Chicago, did benefit from that hydroelectric power. North Dakota did not benefit from the flood control. The flood control benefits went on down into South Dakota, to Nebraska, to Missouri, to other parts of the country.

And I think those people who are watching in their offices had ought to listen to what the gentleman from North Dakota is saying, because he is giving you the straight facts without a great dog and pony show.

I appreciate the gentleman yielding to me, and I want to associate myself with his remarks.

Mr. DORGAN of North Dakota. Obviously, I appreciate the gentleman's remarks. When I talk about the history of this project, I think I understand why Sitting Bull didn't trust Washington. You know, Sitting Bull and the people who were around him, always had to wonder whether Washington would ever keep its word. And they discovered that there were a lot of folks in Washington who do not care much about their word. The word was, "You people give up a half a million acres and we will give you something. We will give you a project—one that provides a consistent and stable municipal and industrial water supply and one that provides enhanced irrigation capabilities. We will give you something to show for what you've lost."

Now, we have people in Washington who say, "Well, we are not so sure we want you to have that."

I think a promise is a promise. If, as we go along, this project needs some changes, we ought to be willing to make those changes. But the fact is, we are talking today about a $4 million appropriation, we are talking about the construction of a pumping station for a test irrigation plot that will in fact move toward resolving, I hope, some of those difficulties we have with Canada because we will be able to measure the quality of the return flows from this irrigation test site.

I am really taken aback by the newfound friendship with the National Taxpayers Union, because my friend from Michigan surprises me when he uses the National Taxpayers Union as his credential for opposing this project. I have discovered that you should never be too surprised on the floor of this House, so I will suppress that surprise for the moment and simply say that this is a very narrow question. Despite the tremendous style with which my friend from Massachusetts delivered his presentation, the issue is: Can we and shall we spend $4 million to build an irrigation test plot and a pumping station that will feed water down to the Oahes area of North Dakota. That is a very small step to resolving the need for a water project in our State's future—one that Congress has promised the State of North Dakota. I would urge a yes vote on this issue despite the meanderings of the charges of some of the opponents.

Mr. CONTE. Very briefly, Mr. Speaker, I want everyone to understand—I wish I could, but I cannot—we are not touching the $4 million. There is no way we can get at the $4 million. The $4 million remains in there. What we are trying to do is take out the Senate language which was not in the House-passed version of this project, which nullifies the Federal district court decision and violates a 1909 treaty with Canada.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Michigan.

Mr. DINGELL. And which is violative of the rules of the House, which is nongermane and which constitutes legislation on an appropriation bill.

Mr. CONTE. Exactly right. If we could only get this in here, we would have a point of order against it, and the point of order would lie. But the Senate, with their loose-footed rules over there, have gotten this thing in here the way they have.

Mr. BEVILL. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Indiana (Mr. MYERS).

Mr. MYERS. I thank the gentleman for yielding.

Now, we have been learning today all about what you would like to know about the Garrison project and were always afraid to ask.

The problem is that there have been a lot of facts thrown around here that just simply are not what this amendment does. This amendment was offered by the other body. Yes, it came back in disagreement. It is legislation on an appropriation bill. No one is trying to cloud it or trying to disguise it any other way. But some of the facts and statistics that have been thrown out by the opponents of this would suggest that we are rewriting Public Law 89-108, which was the act in 1965 that provided authorization. This amendment does not change the basic law. It does not exempt this project from other NEPA laws—not for a moment. It does not do many things here that was suggested by the opponents of this language.

In fact, you would think this project encompassed all of North Dakota and the south half of Canada, when it simply does not do that. The language in here merely—and I reiterate what this language does—says to proceed with construction of the initial stage, the initial stage, of the Garrison diversion unit, as provided by the act.

□ 1245

It is suggested here that it is going to exempt it from all other law. That is not true. It says providing that other provisions of law shall continue to be applicable to the project.

Does this suggest that we are wanting to exempt this program, this authorization, this unit from all other provisions of law, the NEPA law? NEPA is going to continue to prevail here. They must. The builders and contractors must comply with all the other NEPA regulations.

It is suggested that this is going to provide for land for all other things. It is not all. The money is here and it very specifically says not even for mitigation, under condemnation. It can only be spent for an agreement or contract entered into for pumping stations, which is very small, to buy a right of way, which the sellers are willing to sell, you can through condemnation. There has to be mutual agreement. No land can be taken through condemnation.

Then we keep talking about Canada. I thought for a moment I was sitting in the Parliament for a while. We are concerned about the Boundary Waters Treaty. This does not violate this. The language in the amendment very clearly says that none of the funds in this act may be used for construction of features affecting waters flowing into Canada.

If Canada sent the gentleman a letter on November 17 saying anything different, they had not read the amendment, and I suggest they might not because I am not sure it was written by them.

Last, we are concerned about the wildlife. It has been suggested we are going to destroy all the wildlife, the breeding grounds and 3,000 acres of canals. I do not know how many people visit canals. I have a little lake on my farm, not nearly 3,000 acres. I have ducks on it all the time. But we are providing in the basic authorization, which goes back to 1965, adding back to North Dakota's wetlands 146,530.

I might say for those who did not know how many acres were being affected, of course they did not know, they have not read it. With 146,530 acres of mitigated land for wildlife breeding, they will have more ducks than they have ever had. We are not affecting that part of the law. We are not doing that at this time.

Mr. BEVILL. Mr. Speaker, will the gentleman yield?

Mr. MYERS. I yield to the gentleman from Alabama.

Mr. BEVILL. We are not talking about money, we are not talking about saving money, we are talking about a court order that has deauthorized an act of Congress. The budget contained funds for the project. The elected representatives of North Dakota support the project. The people support it. The people who are talking against this project, I believe not a one of them even live with 200 miles of it. Is that right?

Mr. MYERS. As far as I know. I have not heard anything else.

The amendment was offered by the Senators from North Dakota. The Member from North Dakota here supports it. But we always get opposition from people far removed from it both in fact as well as geography.

But let me close by saying that there are 500 acres of wetlands, according to the Department of the Interior and according to the environmental impact statement that will be impacted.

Mr. BEVILL. Mr. Speaker, I yield 4 minutes to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I will not take the full 4 minutes, but I certainly want to challenge the gentleman from Indiana.

I gave the facts as they are. I never try to mislead anybody on the floor of the House. I gave the facts of what this project will ultimately cost. It is a billion—over a billion dollars. I am sure this is the beginning. That is all I said. It is the beginning. Once we begin a project, it goes through to the end. I have seen it in the 24 years I have been here. We never stop these projects. The Corps of Engineers says this project will cost over a billion dollars.

The other gentleman from Alabama said nobody lives 200 miles next to these projects. These are my taxpayers paying for the boondoggles. I do not care if it is 5,000 miles away, my taxpayers are paying and I have a right to oppose it. Two hundred miles, three hundred, it is the taxpayers' money. That is why the taxpayers' union has written the letter against this boondoggle here today.

Now, this language not only tries to overturn that district court case but the language even goes farther than that. The language says subsequent court order, and any subsequent court order in respect to the May 11, 1977, decision.

Who in the heck are we, a bunch of tin gods up here in the Congress. We are going to overturn cases before they are ever tried.

We must come to our senses and vote "no" on this big boondoggle. It is the biggest boondoggle I have seen in the 24 years I have been in the Congress. We will choke on this one if we vote for it.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Alabama (Mr. BEVILL).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. BEVILL. Mr. Speaker, I demand a recorded vote, and pending that, I make the point of order that a quorum in not present.

The SPEAKER pro tempore. Does the gentleman make a point of order?

Mr. DINGELL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 67, nays 314, not voting 52, as follows:

□ 1300

The Clerk announced the following pairs:

Mr. Biaggi with Mr. Pritchard.
Mr. AuCoin with Mr. Rudd.
Mrs. Chisholm with Mr. Beard.
Mr. Garcia with Mr. Clausen.
Mr. Mattox with Mr. Siljander.
Mr. Ginn with Mr. Edwards of Alabama.
Mr. Foley with Mr. Paul.
Mr. Jones of North Carolina with Mr. Roth.
Mr. Bowen with Mr. Quillen.
Mr. Dicks with Mr. Cheney.
Mr. Early with Mr. Dornan of California.
Mr. Brown of California with Mr. Railsback.
Mr. Dixon with Mr. Hillis.
Mr. Moffett with Mr. McKinney.
Mr. Simon with Mr. Kindness.
Mr. Udall with Mr. McCloskey.
Mr. Reuss with Mr. Goldwater.
Mr. Santini with Mr. Lott.
Mr. Schumer with Mr. Hagedorn.
Mr. Waxman with Mr. Madigan.
Mr. Montgomery with Mr. Duncan.
Mr. Wilson with Mr. Evans of Delaware.
Mr. Howard with Mr. Goodling.
Mr. Clay with Mr. Gilman.
Mr. Murphy with Mr. Bedell.

Messrs. GINGRICH, FINDLEY, GEJDENSON, ALBOSTA, EMERSON, KRAMER, KEMP, and LIVINGSTON changed their votes from "yea" to "nay."

Mr. RALPH M. HALL changed his vote from "nay" to "yea."

So the motion was rejected.

The result of the vote was announced as above recorded.

MOTION OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. CONTE moves that the House insist on its disagreement to the amendment of the Senate numbered 23.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 24: Page 10, line 5, after "momument" insert: ": *Provided further,* That of the amount herein appropriated under the Central Arizona Project, $2,000,000 shall be available for preconstruction activities on distribution systems pursuant to the Distribution Act of July 4, 1955, as amended."

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 24 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 29: Page 16, line 6, strike out all after "205." down to and including "rights" in line 8 and insert "Appropriations in this title shall be available for acquisition of land for the McGee Creek project, Oklahoma: *Provided,* That land required for the dam, dike, and any other authorized permanent features shall be acquired in fee title (surface and minerals): *Provided further,* That mineral and subsurface interests shall be acquired by subordination in the conservation pool area of the reservoir, natural scenic recreation area, and the wildlife management area in such a manner as to allow the present mineral owners, their successors and assignees the right to explore for and extract minerals under restrictions required to protect the project: *Provided further,* That only the surface estate be acquired for any other lands required for the McGee Creek project".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 29 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 33: Page 17, line 7, after "96-368" insert: ": *Provided,* That $1,300,000 of the funds provided herein shall be for the Region X wood-derived fuels program and transferred to the Bonneville Power Administration for obligation and expenditure".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 33 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ":*Provided,* That of the funds appropriated herein, $9,000,000 is to be derived by transfer of unobligated balances from the funds appropriated under the heading "Operation and Maintenance, Southwestern Power Administration", and $16,000,000 is to be derived by transfer from funds apprpriated under the heading "Plant and Capital Equipment, Departmental Administration": *Provided further,* That $1,300,000 of the funds provided herein shall be for the Region X wood-derived fuels program and transferred to the Bonneville Power Administration for obligation and expenditure"

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 40: Page 19, line 2, after "vehicles" insert "and official reception and representation expenses (not to exceed $35,000)".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 40 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 47: Page 22, after line 12, insert:

URANIUM SUPPLY AND ENRICHMENT ACTIVITIES

"For expenses of the Department of Energy in connection with operating expenses; the purchase, construction, and acquistion of plant and capital equipment and other expenses incidental thereto necessary

for uranium supply and enrichment activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; purchase of passenger motor vehicles (not to exceed 23 for replacement only); $1,811,000,000, to remain available until expended of which $1,805,000,000 shall be derived from revenues received from the enrichment of uranium as authorized by section 111(h) of Public Law 93-438, as amended, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484): *Provided,* That within the limits of this appropriation, obligations may be incurred in advance of uranium enrichment revenue collections and shall be liquidated from such collections.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 47 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

"URANIUM SUPPLY AND ENRICHMENT ACTIVITIES

For expenses of the Department of Energy in connection with operating expenses; the purchase, construction, and acquisition of plant and capital equipment and other expenses incidental thereto necessary for uranium supply and enrichment activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; purchase of passenger motor vehicles (not to exceed 23 for replacement only); $1,806,000,000, to remain available until expended: *Provided,* That revenues received by the Department for the enrichment of uranium and estimated to total $1,805,000,000 in fiscal year 1982, shall be retained and used for the specific purpose of offsetting costs incurred by the Department in providing uranium enrichment service activities as authorized by section 201 of Public Law 95-238, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484): *Provided further,* That the sum herein appropriated shall be reduced as uranium enrichment revenues are received during fiscal year 1982 so as to result in a final fiscal year 1982 appropriation estimated at not more than $1,000,000."

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 52: Page 25, strike out lines 14 to 20, inclusive, and insert:

For administrative expenses of the Geothermal Resources Development Fund, $200,000, to remain available until expended; and for carrying out the Geothermal Loan Guarantee and Interest Assistance Program as authorized by the Geothermal Energy, Research, Development and Demonstration Act of 1974 (Public Law 93-410), $2,000,000, to remain available until expended: *Provided,* That not to exceed $2,000,000 from the Fund shall be available for interest differential payments in fiscal year 1982: *Provided further,* That the amounts remaining in the Fund shall be used as a default reserve for loan guarantees to be issued pursuant to section 201 of title II of Public Law 93-410, as amended.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 52 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following:

"For administrative expenses of the Geothermal Resources Development Fund, $200,000, to remain available until expended; and for carrying out the Geothermal Loan Guarantee and Interest Assistance Program as authorized by the Geothermal Energy, Research, Development and Demonstration Act of 1974 (Public Law 93-410), $2,000,000, to remain available until expended: *Provided,* That not to exceed $2,000,000 from the Fund shall be available for interest differential payments in fiscal year 1982: *Provided further,* That the amounts remaining in the Fund shall be used as a default reserve for loan guarantees issued pursuant to section 201 of title II of Public Law 93-410, as amended."

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

□ 1315

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 57: Page 29, line 10, after "uniforms;" insert "official entertainment expenses (not to exceed $3,000);".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 57 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: "official entertainment expenses (not to exceed $1,500);".

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 59: Page 29, line 13, strike out all after "$477,535,000," down to and including "Enforcement" in line 17 and insert "to remain available until expended".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 59 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 60: Page 30, line 2, strike out all after "until" down to and including "1983" in line 4 and insert "expended".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 60 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 61: Page 30, line 14, after "1980" insert ", or to require any State to adopt such requirements in order for the State to continue to exercise authority under State law for uranium mill and mill tailings licensing, or to exercise any regulatory authority for uranium mill and mill tailings licensing in any State that has acted to exercise such authority under State law: *Provided, however,* That the Commission may use such funds to continue to regulate byproduct material, as defined in section 11 e. (2) of the Atomic Energy Act of 1954, as amended, in the manner and to the extent permitted prior to October 3, 1980".

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 61 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 64: Page 31, after line 16, insert:

WATER RESOURCE PLANNING

For the Water Resources Council for salaries and related expenses necessary in carrying out the provisions of the Water Resources Planning Act of 1965 (42 U.S.C. 1962-1962d-3), as amended, including services as authorized by 5 U.S.C. 3109 and 42 U.S.C. 1962a-4(5), $6,730,000 including $2,500,000 for expenses in administering the Act (42 U.S.C. 1962d(b)), $3,230,000 for prep-

aration of assessments and plans (42 U.S.C. 1962d(c)), and $1,000,000 for the Upper Mississippi Comprehensive Management Plan (Public Law 95-502): *Provided*, That none of the funds included herein shall be used for an Independent Project Review, for expenses of River Basin Commissions (other than necessary expenses related to the Upper Mississippi Comprehensive Management Plan), or for Grants to States.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 64 and concur therein with an amendment, as follows: in lieu of the matter proposed by said amendment, insert the following:

"WATER RESOURCES PLANNING

"For the Water Resources Council for salaries and related expenses necessary in carrying out the provisions of the Water Resources Planning Act of 1965 (42 U.S.C. 1962-1962d-3), as amended, including services as authorized by 5 U.S.C. 3109 and 42 U.S.C. 1962a-4(5), $3,888,000 including $658,000 for expenses in administering the Act (42 U.S.C. 1962d(b)), and $3,230,000 for preparation of assessments and plans (42 U.S.C. 1962d(c)): *Provided*, That none of the funds included herein shall be used for an Independent Project Review, for expenses of River Basin Commissions or for Grants to States."

Mr. BEVILL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 66: Page 32, after line 21, insert:

SEC. 508. The Senate hereby expresses its intention not to appropriate funds for improvements on the portion of the Black Warrior-Tombigbee Waterway south of Demopolis, Alabama.

MOTION OFFERED BY MR. BEVILL

Mr. BEVILL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BEVILL moves that the House recede from its disagreement to the amendment of the Senate numbered 66 and concur therein.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

APPOINTMENT OF CONFEREES ON S. 1211, EXTENDING FOR 1 YEAR TOXIC SUBSTANCE CONTROL ACT

Mr. DINGELL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1211) to authorize funds for fiscal year 1982 for the control of toxic substances, with House amendments thereto, insist on the House amendment, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan? The Chair hears none and, without objection, appoints the following conferees: Messrs. DINGELL, FLORIO, SCHEUER, BROYHILL, and LENT.

There was no objection.

EXPLANATION AS TO VOTE

Mr. DANIELSON. Mr. Speaker, I was unable to be present on the floor of the House of Representatives for three rollcall votes on Wednesday November 18, 1981. Had I been present, I would have voted as follows:

On rollcall No. 310, the House voted to suspend the rules and pass H.R. 4482, amended, to establish a U.S. Court of Appeals for the Federal Circuit, and to establish a U.S. Claims Court; 321 yeas to 76 nays: I would have voted "yea."

On rollcall No. 311, the House agreed to the conference report on H.R. 3453, the Intelligence Authorization Act; 379 yeas to 22 nays; I would have voted "yea."

On rollcall No. 313, the House rejected a motion to recede from its disagreement and concur, with an amendment, to Senate amendment No. 42 to H.R. 4522, the District of Columbia appropriations for the fiscal year ending September 30, 1982; 228 yeas to 174 nays; I would have voted "yea."

At the time of the above votes I was attending to business of the Judiciary Committee elsewhere in the Capitol complex. My vote would have made no difference on the outcome on any of the three issues.

PRESIDENTIAL ELECTIONS IN HONDURAS

Mr. BARNES. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs be discharged from further consideration of the concurrent resolution (H. Con. Res. 225) with respect to the scheduled Presidential elections in Honduras, and ask for its immediate consideration in the House.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, and I do not intend to object, the peaceful democratic electoral process that is now currently underway in Honduras, stands in stark contrast to the efforts of the Cuban/Soviet backed and trained Marxist terrorists throughout the rest of Central America who seek to use violence to achieve power. The upcoming Presidential elections in Honduras are but a first in a series of elections scheduled to take place in Central America. Costa Rica, Guatemala, and El Salvador all have elections scheduled for next spring to let the people of those nations choose their own leaders and control their own future.

In fact, in all of Central America, only Nicaragua has no elections scheduled. Not only have the Sandinistas, with the help of their Cuban allies, reneged on their promises to the people of that country, they have actively sought to undermine the democratic aspirations and processes of their neighbors.

Through the passage of this resolution, the Congress can go on record as strongly supporting the people of Honduras and their efforts to follow a democratic path. We can also state our strong opposition to those in Nicaragua, Cuba, and elsewhere who seek to impose their will through bullets and not ballots.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

Mr. JEFFORDS. Mr. Speaker, reserving the right to object, and I will not object. I rise in support of this resolution.

On Tuesday, I will leave Washington for Tagucigalpa, the capital of Honduras, to be an international observer in the elections to be held on November 29. My interest in Honduras comes from the active partnership between that nation and my State of Vermont and from my belief that we have neglected the regions closest to us for too long. With the problems in El Salvador and Nicaragua, we have seen the results of this neglect.

The Honduran elections are clearly a significant step for a country in that troubled part of the world. It is extremely important that Honduras not be engulfed by the extremist movements that have taken hold in other nations in Latin America. With the exception of Costa Rica, Honduras has the most progressive political tradition of any of these countries.

It is critical that we in the United States encourage such movements toward peaceful democracy in Latin America and in the rest of the world. The election in Honduras is particularly significant because it constitutes a transition of power to civilians from the military, which has held power since 1972.

I have been asked by the House Foreign Affairs Committee to transmit this resolution to officials in the Honduran Government and I will be pleased to do so.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

Mr. DERWINSKI. Mr. Speaker, reserving the right to object, I am strongly tempted to do so, but I will not.

I will at least state my views on the floor, as I do occasionally in committee.

I think these resolutions make a joke of the committee and the Congress.

Further reserving the right to object, I want to point out that the pattern of these resolutions over the years is one of selective indignation. I see the great stalwarts of human rights on the other side of the aisle who are always lecturing a government like Honduras, or Salvador, but are very quiet about the acts being perpetrated in Nicaragua. They seem to have forgotten all about Fidel Castro. They love to lecture a regime like Morocco, but never a word about Algeria. And yet, because that is where the predominance of opinion is in the Foreign Affairs Committee, we get those pious-sounding, noble, useless, politically motivated resolutions that make a joke of the Congress. This is nothing but gratuitous advice from a bunch of people who are not objective enough about the subject to be pontificating.

However, in a spirit of diplomacy, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 225

Whereas the country of Honduras is presently seeking to achieve a peaceful and democratic transition from military to civilian rule:

Whereas the process of democratization in Honduras has been occurring at a time of enormous political and military strife throughout Central America; and

Whereas the United States is firmly committed to the support of democratic institutions and processes throughout the world: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress extends its best wishes to the people of Honduras and expresses its desire and hope that the scheduled Presidential elections will be conducted successfully and in an atmosphere of openness and tranquillity.

The SPEAKER pro tempore. The gentleman from Maryland is recognized for 1 hour.

Mr. BARNES. Mr. Speaker, I yield such time as he may consume to the sponsor of the resolution, the gentleman from Massachusetts (Mr. STUDDS).

Mr. STUDDS. Mr. Speaker, after those devastating remarks by the gentleman from Illinois (Mr. DERWINSKI), let me see if I can convince the House that, while this is not a matter of controversy, at least as far as I know it is not, it is a matter of genuine substance.

Mr. Speaker, on November 29, the small Central American nation of Honduras is scheduled to make the enormously difficult and perilous transition from military to democratically elected civilian rule. Elections for President and Constituent Assembly will be held under conditions which permit at least a strong hope that the views of the majority of Hondurans will be accurately and fairly recorded.

Honduras is the second poorest country in the Western Hemisphere. It is situated alongside revolutionary Nicaragua, reactionary Guatemala, and war-torn El Salvador. If democracy can begin to flourish in Honduras, it will mean a great deal. Fairly and openly conducted elections remain the most powerful possible response to those on both the extreme right and the extreme left in our hemisphere who seek to impose their own will on others through the use of military force.

The neighbors of Honduras fear free elections. In Guatemala, elections are scheduled, but they will be conducted in an atmosphere of intimidation and repression, and will mean nothing. In El Salvador, elections are scheduled, but in a climate of civil war and officially tolerated terrorism; they, too, will bear little relation to democracy. In Nicaragua, the revolutionary government's leadership seems unwilling to put their boasts of popularity to a test at the polls. But, in Honduras, the electoral process, though flawed, will have real importance.

The resolution I have introduced will send a message to the people of Honduras that the United States supports and admires their courage in choosing a democratic path. Rumors persist that the Honduran military may still move to prevent the elections from going forward, or that the electoral results will be ignored. This resolution intends to convey a warning that the U.S. Congress would view any military interference in the electoral process with grave concern and that, under such circumstances, an immediate and highly critical reexamination of all U.S. assistance to the Honduran military would be undertaken.

I urge the adoption of the resolution.

Mr. Speaker, this is utterly, both the substance and purpose of this resolution, without controversy. It was adopted without dissent, unanimously, by members of both sides on both the subcommittee and the full Committee on Foreign Affairs. While I do not choose to inject any controversy for that reason, because we think this is important here, let me just observe parenthetically, in reponse to the remarks of the gentleman from Illinois, that we do believe this is a matter of substance, it is an opportunity for all of us to go on record on behalf of genuine elections, whatever we may or may not think of the Government of Honduras and that of neighboring countries.

Let me also say the gentleman wondered aloud why some kind of resolutions are not coming with respect to countries—I believe he mentioned Nicaragua and Cuba and Algeria. We do not give military aid to Nicaragua. We do not give military aid to Cuba or Algeria. Those of us who have been expressing concerns about human rights have been expressing those concerns with respect to governments around the world to whom we send arms.

Having said that, Mr. Speaker, let me urge my colleagues of both parties to make it abundantly clear to Honduras, to the hemisphere, and to the world, that we do indeed stand firmly in support of nations when they attempt to resolve their problems through the democratic process.

I urge support of the resolution.

Mr. BARNES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first of all, I want to commend the gentleman from Massachusetts (Mr. STUDDS) for his leadership on this issue. I agree with him totally that this is a matter of substance. It is by no means a frivolous issue to the people of Honduras as to whether or not they will have elections on the 29th of November.

On November 29, Honduras is scheduled to elect a civilian President, ending 10 years of military rule. This event is important not only in itself but it is also important for the example that it will set for the rest of Central America. It is fundamental to the interests of our Nation to foster and encourage the emergence of stable democracies among our neighbors to the south. Therefore, I congratulate the gentleman for his resolution, which places the United States squarely behind the electoral process and extends the best wishes of the U.S. Congress for successful elections on the 29th.

This resolution was reported out of the Subcommittee on Inter-American Affairs, which I have the privilege of chairing, and out of the full Committee on Foreign Affairs by unanimous votes. I hope and trust that all Members of the House will lend their support to this important expression of what out Nation stands for in foreign policy.

If I may briefly respond to the comments made by the gentleman from Illinois, I would say that when Nicaragua or when Algeria or when the Soviet Union schedules elections, I would hope that many of us would be

here to congratulate them, as we are, I hope, about to congratulate Honduras. I would think it is altogether appropriate for us to note the importance of what is happening in Honduras.

Yesterday, when the majority leader and the ranking Republican on my subcommittee, and the chairman of our full committee met with the President of Venezuela and discussed with him what we were about to do in the committee, namely, the adoption of this resolution, he indicated that he thought this could be important in terms of the considerations that are taking place today in Honduras.

I commend the resolution to all of my colleagues.

● Mr. GILMAN. Mr. Speaker, I rise in support of House Concurrent Resolution 225 in recognition of the upcoming Presidential elections in Honduras.

At a time when violence and destruction threaten to engulf the entire Central American area, the Government and people of Honduras have offered a ray of hope in the struggle for freedom and democracy. While suffering from many of the same ills that have thrusted her neighbors into armed conflict, the Government of Honduras has shown a determination to pursue peace and democracy through the electoral process.

In April of last year, Honduras freely and democratically elected a constituent assembly. This momentus occasion was the prelude to this month's scheduled Presidential elections. As Assistant Secretary of State Thomas Enders recently stated—

> The courage of Honduran leaders in standing by their election commitments despite regional turmoil and economic difficulties deserves recognition as an important contribution to the advancement of peaceful political processes in their country and in the region as a whole.

House Concurrent Resolution 225 extends to the people of Honduras the best wishes of the Congress and our desire and hope that the scheduled Presidential elections will be conducted successfully and in the same openness and tranquillity that accompanied the constituent elections.

I urge accordingly my colleagues to support House Concurrent Resolution 225.●

Mr. BARNES. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the concurrent resolution.

The previous question was ordered.

□ 1330

The SPEAKER pro tempore (Mr. BENNETT). The question is on the concurrent resolution.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BARNES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

OLDER AMERICANS ACT AMENDMENTS OF 1981

Mr. PEPPER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 279 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 279

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3046) to amend the Older Americans Act of 1965 to extend the authorizations of appropriations contained in such Act, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and all points of order against said substitute for failure to comply with the provisions of section 401(a) of the Congressional Budget Act (Public Law 93-344) and clause 5, rule XXI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After the passage of H.R. 3046, it shall be in order to take from the Speaker's table and consider the bill S. 1086 in the House, and it shall then be in order in the House to move to strike out all after the enacting clause of the said Senate bill and to insert in lieu thereof the provisions contained in H.R. 3046 as passed by the House.

The SPEAKER pro tempore. The gentleman from Florida (Mr. PEPPER) is recognized for 1 hour.

Mr. PEPPER. Mr. Speaker, I yield 30 minutes to the able gentleman from Missouri (Mr. TAYLOR) for debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, the Members will recall that the White House Conference on Aging in 1961 brought forth some meaningful legislation for programs for older Americans, and then the White House Conference on Aging in 1971 amended the Older Americans Act, which has been a wonderful piece of legislation for providing assistance for the elderly people of this Nation.

This rule today is to authorize the consideration of the bill extending for a 3-year period the Older Americans Act.

This rule is an open rule, with a number of necessary waivers in it.

The resolution provides for 1 hour of debate, to be equally divided and controlled between the chairman and ranking minority member of the Committee on Education and Labor. The bill makes in order a committee amendment in the nature of a substitute to be considered as an original bill for purposes of amendment. The rule waives section 401(a) of the Congressional Budget Act against consideration of the substitute. Very simply, section 401(a) prohibits any legislation that provides contract or borrowing authority which is not made subject in advance to appropriations acts. This technical waiver is necessary because several sections of the bill relating to home maintenance and repair services, special projects in comprehensive long-term care, and other provisions of the reported bill provide new contract authority without limiting such new authority to amounts provided in appropriation acts. The Rules Committee was advised that the Education and Labor Committee intends to offer floor amendments curing the Budget Act violations. Thus, the waiver was granted. The rule also waives clause 5 of rule XXI against the substitute. Clause 5 of rule XXI very simply prohibits appropriations in a legislative bill by a committee not having jurisdiction to report appropriations. This waiver is necessary because section 17 of the bill authorizes States to transfer 20 percent of funds appropriated in any fiscal year between social services and nutrition services programs and thus constitutes an appropriation in a legislative bill in violation of clause 5, rule XXI.

The resolution also provides one motion to recommit, with or without instructions. Upon the passage of H.R. 3046, the resolution makes in order consideration of S. 1086 in the House, and a motion to strike out all after the enacting clause and insert the House-passed provisions.

Mr. Speaker, the purpose of this bill is, as you may well know, one that I strongly support. Under the Older Americans Act of 1965, the act sets out the policy goals aimed at improving the lives of older Americans in the areas of income, health, housing, employment, retirement, and community services; and provides a legislative

basis for the creation of the Administration on Aging within the Office of the Secretary of the Department of Health and Human Services.

This is the legislation that provides home-delivered meals to those who cannot come to a congregate place to enjoy those meals; those who need help for home maintenance and repair; the foster grandparent and senior companion programs, and other necessary but often overlooked services.

Cited as the Older Americans Act of 1981, H.R. 3046 would provide for a 3-year extension of the Older Americans Act.

Mr. Speaker, I urge the passage of this resolution, and I reserve the remainder of my time.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, since this rule on the Older Americans Act amendments has already been described, there are just a couple of points I will make. First, the bill will be open to amendment. Second, the rule includes two waivers of points of order. The first is a waiver of the Budget Act provision which prohibits new contract authority not subject to appropriations. The Rules Committee was advised that the Committee on Education and Labor intends to offer floor amendments correcting the Budget Act violations, and therefore, the waiver was included.

The rule also includes a waiver of points of order because the bill technically includes appropriations on a legislative bill.

Mr. Speaker, the bill made in order by this rule amends the Older Americans Act to extend the authorizations in the act.

As always, one of the main problem areas is how much money is to be authorized. The following figures, provided through the minority staff of the Committee on Education and Labor serves to put this bill in perspective.

The bill as reported back on May 19, 1981, authorized a total of $1,810 million for fiscal year 1982, according to the committee report. The budget reconciliation bill set a level of $992 million for fiscal year 1982. In September, the Reagan administration requested $899 million for fiscal year 1982, for these same purposes.

According to information provided to the Rules Committee an amendment will be offered with bipartisan support to at least bring the level down to the amount in the budget reconciliation bill.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. PEPPER. Mr. Speaker, I have no further requests for time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. ANDREWS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3046) to amend the Older Americans Act of 1965 to extend the authorizations of appropriations contained in such act, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. ANDREWS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3046, with Mr. RAHALL in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

The gentleman from North Carolina (Mr. ANDREWS) will be recognized for 30 minutes, and the gentleman from Wisconsin (Mr. PETRI), will be recognized for 30 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. ANDREWS).

Mr. ANDREWS. Mr. Chairman, I yield myself such time as I consume.

Mr. Chairman, today the Committee on Education and Labor presents H.R. 3046, the Older Americans Act Amendments of 1981. Its purpose is to amend the Older Americans Act of 1965 to extend the authorization of appropriations for the act and for other purposes.

In presenting H.R. 3046, we are proud to present a bill which represents a strong, bipartisan effort. I am, in fact, pleased to be joined by 66 of my colleagues, Democrat and Republican alike, in sponsoring this bill. I should like to thank all of them for their contributions and would particularly like to note the hard work of each subcommittee member—Mr. CORRADA and Mr. WILLIAMS of Montana who join me as sponsors of H.R 3046, as well as Mr. PETRI, the ranking minority member of the Subcommittee on Human Resources and Mr. COLEMAN. I would of course be remiss at this point if I did not also express my deep appreciation to the distinguished chairman of our committee, Hon. CARL PERKINS, whose support of this bill and of this Nation's senior citizens has been tireless and immensely successful. In addition, the distinguished ranking minority member of the Committee on Education and Labor, Mr. JOHN ASHBROOK, has been a consistent supporter of H.R. 3046 and has worked hard on its development. I likewise wish to pay tribute to and to thank Mr. Gordon Roley, staff director of our subcommittee and the five members of that staff for their hard, conscientious work, friendship and support.

As you can tell from the rather long list of cosponsors, cooperation on both sides of the aisle has been considerable. As further evidence, may I note that H.R. 3046 was reported unanimously out of both the subcommittee and the full committee.

As reported out of committee, the Older American's Act Amendments of 1981 extend the Older Americans Act of 1965 for 3 additional years. The older American volunteer programs of the ACTION Agency are also extended.

While the bill proposes only a few changes in an act the committee believes is working well, it does strengthen the Administration on Aging within the Department of Health and Human Services, provide State and local service providers with additional administrative flexibility, and make other modest improvements. A new program to assist older Americans with home maintenance and repair, including weatherization activities, is also included.

Under H.R. 3046, Federal administration of the Older American's Act has been strengthened and streamlined. The bill proposes that the Commissioner of AOA report directly to the Secretary of Health and Human Services, rather than having to go through the Assistant Secretary for Human Development Services. This should increase the effectiveness of AOA within the Department of HHS, improve efficiency by cutting redtape, and demonstrate our resolve that our older citizens become a high priority within Department policy. The functions of the National Information and Resource Clearinghouse are transferred to the Office of the Commissioner on Aging. During the last several years the Clearinghouse has functioned inconsistently if at all. The repeal of the Clearinghouse authority can put the $2 million a year it cost to better use within AOA, actually serving the elderly. As a further streamlining initiative, the title IV research and demonstration program has been rewritten and streamlined generally along administration requests. The areas of mental health and long-term care have been reemphasized within the title.

The committee bill continues to recognize the important rule that State and local governments play in providing services through the Older Americans Act. With this in mind, H.R. 3046 proposes changes which would grant increased administrative flexibility to State and local service providers. The bill would remove the arbitrary "50 percent funding requirement" with regard to priority service allocations

within a given State. This would enable States to determine how much of their total allocation should go to priority services. The bill would give flexibility to local senior centers to use AOA funds to serve meals to handicapped individuals under 60 if those handicapped persons lived in the same senior center and if the senior center director deemed it appropriate. Perhaps most importantly, it allows a State the option of transferring up to 20 percent of its allocation between the part B—supportive service category, which includes transportation to and from meal sites, and the part C—nutrition category. This should work to the advantage of rural and urban States alike. Rural States need the flexibility to cover increasing transportation costs. Often they have the meals but cannot afford to get the people to the meal sites or the meals to the people. Conversely, in urban States where there may be high concentrations of older individuals in need of nutrition services, transportation may not be a problem—but additional moneys for food is.

In addition to these provisions, H.R. 3046 makes other modest amendments to the act which have been requested during committee consideration of the act's reauthorization and which I believe are noncontroversial. The bill would clarify and emphasize existing authorities within the act with regard to education and training services. It would place private profitmaking and private nonprofit organizations on equal footing with regard to contract negotiations in order to improve cost effectiveness. It clarifies that home-delivered meal providers do not necessarily have to serve congregate meals as well. It increases eligibility for older American Indians and it provides that private contributions for meals made by seniors themsleves can be used to help defray the cost of transportation as well as for additional meals.

Mr. Chairman, the committee is pleased to present what we believe is a strong bill today for consideration by the House. It continues a program that is important to older citizens throughout this country; it is a program that seems to be working well; it is a program that deserves the continued support of the Congress.

□ 1345

Mr. PERKINS. Mr. Chairman, will the distinguished subcommittee chairman yield to me?

Mr. ANDREWS. I am happy to yield to the distinguished chairman of the full committee.

Mr. PERKINS. Mr. Chairman, first I wish to compliment the distinguished chairman of the subcommittee, the gentleman from North Carolina (Mr. ANDREWS), and the entire subcommittee, including the gentleman from Wisconsin (Mr. PETRI) and all the other members on the minority who participated in bringing this legislation to the floor.

During my career in the Congress I cannot think of any legislation that has benefited the American people more than the enactment of the Older Americans Act. I recall that we put many of the ideas that were the forerunners of this legislation in the Economic Opportunities Act of 1964. Then, in 1965, we passed the first Older Americans Act, where we provided for transportation of the elderly, made opportunities available for them to assemble in certain places, and made available funds for housing, nutrition, and job training. To my way of thinking, this has been one of the most successful programs that the Congress has ever enacted.

In dealing with problems throughout the Appalachian area, I have observed, on hundreds of occasions, instances where the elderly were meeting, and I saw how their lives were changed and how those in need have benefited from the programs established by this act.

I just want to congratulate all the Members who brought the bill to the floor today and say that it represents money well expended. We can all be proud of this legislation, and I hope that we will have a unanimous vote in favor of extending the act for another 3 years. I know that many older Americans have benefited from the housing provisions of the act, from its nutrition programs, and from the employment opportunities it has made available, I know that these services would have been beyond their reach otherwise.

Mr. Chairman, in conclusion, I just want to again compliment the entire subcommittee for a job well done. I feel that the bill before us is a needed measure which will continue to help an ever-growing and very deserving segment of our population. I urge my colleagues to support passage of H.R. 3046 with their votes. It deserves the support of every Member of this House.

Mr. ANDREWS. Mr. Chairman, I certainly appreciate the remarks made by my committee chairman, especially in view of the fact that I know him to be essentially the original author of this legislation.

I know that early in this year there were many people of great influence who sought to drastically reduce the funds available for older Americans under this act and to block grant them out in such a way that we thought would virtually destroy the act. The chairman of the committee, the gentleman from Kentucky (Mr. PERKINS), was one of our stalwarts, and we on our subcommittee were certainly pleased to join with him in being able to defeat that effort and to cause this program, rather than being block granted out or killed or even reduced in funds, to be brought here today with good hope for some increase, not drastically but with some reasonable hope for the funds that are available under the act to be increased.

Mr. PETRI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 3046. this legislation continues for 3 additional years the programs operated by the Administration on Aging and the community service employment program for senior citizens at the Department of Labor.

Approximately 610 area agencies on aging, 1,185 nutrition service programs and 12,556 congregate nutrition sites operated under the Older Americans Act in fiscal year 1980. In addition, 54,200 senior citizens were employed part time in community service.

The legislation has bipartisan support. In the committee, my colleague from Ohio, JOHN ASHBROOK, facilitated speedy committee action.

One concern I have with the bill before us relates to title III of the act. The existing act places responsibility for meeting the needs of senior citizens at the State and local levels. In H.R. 3046, this structure is improved upon by allowing States to transfer up to 20 percent of their title III allotments between their social services and nutrition program accounts.

The amendment I intend to offer will build on the increased flexibility by consolidating the existing separate title III authorizations into a single authorization. Under this amendment, States will be freed from some existing but unnecessary reporting and record-keeping requirements resulting from the separate authorizations.

The amendment does not alter the requirement in H.R. 3046 that States provide an adequate portion of funds for priority services—such as legal, in-home, and transportation services. Nor does my amendment alter the existing USDA program of distribution of commodities or cash in lieu of commodities to elderly nutrition programs. The authorization figure set in my amendment is $685,100,000 which corresponds directly to the sum of the separate title III authorizations established in the amendment to be offered by the distinguished chairman of the subcommittee, Mr. ANDREWS.

Finally, I would like to mention that the administration is supporting a 3-year reauthorization of the Older Americans Act.

I urge my colleagues on both sides of the aisle to join in supporting this measure.

Mr. RINALDO. Mr. Chairman, will the gentleman yield?

Mr. PETRI. I am happy to yield to my colleague, the gentleman from New Jersey.

Mr. RINALDO. Mr. Chairman, I rise in support of H.R. 3046, the Older Americans Act Amendments of 1981.

As the ranking Republican member of the Select Committee on Aging, I have taken a strong interest in the needs and concerns of older Americans, who have made this country the great Nation it is today. And while we are a nation of different races, ethnic backgrounds, and religions, all of us share the common denominator that we will someday be old.

The Congress has responded to the often unique needs of the Nation's 24 million persons 65 and over—now nearly 11 percent of our population and expected to double to 22.1 percent of the population by the year 2030.

Social security, supplemental security income (SSI), medicare, medicaid, veterans' benefits, special housing, and transportation programs, are several of the vast array of Federal programs adopted to meet the needs of older Americans.

Just as important to millions of older Americans, however, are the programs created by the Older Americans Act of 1965.

Since coming to Congress in 1973, I have consistently supported the Older Americans Act and I have worked to strengthen it at every opportunity.

The 1973 amendments, which I supported, created the area agencies on aging, which now number 21 in my own State of New Jersey and over 600 nationwide.

These area agencies, which plan, coordinate, and advocate programs for the elderly, serve as a critical service and information link between the often bewildering Government bureaucracy and the older persons that same bureaucracy is supposed to help.

Mr. Chairman, I believe the 1981 amendments further refine and strengthen the act.

They provide increased flexibility for State and area agencies on aging to respond to the needs of their constituents by allowing them to increase the relative amount of funds for social services, group meals, or home-delivered meals according to local priority.

The bill authorizes the Commissioner on Aging to make grants for special projects in the important field of mental health care.

It allows older workers employed through the title V program to engage in weatherization activities, a major need in Northern States like New Jersey.

It gives area agencies the option to select home-delivered meals providers who may not also be congregate meal providers.

Thus, the bill reaffirms congressional intent that private nonprofit Meals on Wheels groups, funded in large part through charity and consisting of volunteers, play a valuable and necessary role in meeting the nutritional needs of the Nation's elderly and should not be displaced by Federal programs.

The Older Americans Act is a grassroots act. Older people are directly involved in the planning and execution of programs under the act through participation in needs assessment surveys, public hearings, program delivery, and advisory councils.

In fiscal year 1980 in New Jersey, 93,000 persons were provided transportation services; 4,000 people in-home services; 1,000 people home repair or renovation assistance; and 165,000 people information and referral.

Nearly 5 million hot meals were served to 90,000 persons in 25 nutrition projects and through home delivery for the infirm; 1,687 people 55 and over were given jobs through title V.

By approving H.R. 3046, the Congress will again go on record in support of a program that has proven success in aiding older Americans to lead independent, secure, fulfilling, and productive lives.

Mr. Chairman, I urge my colleagues to join me in voting for enactment of this legislation.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. PETRI. I yield to my colleague, the gentleman from Missouri.

Mr. COLEMAN. Mr. Chairman, I rise to offer my support of H.R. 3046, the Older Americans Act Amendments of 1981.

We in Missouri are among the six States in the Nation with the highest concentration of senior men and women. More than 800,000 Missourians are 60 years of age and older and, unfortunately, of these, some 200,000 are at or below the poverty threshold. Mr. Chairman, Missouri counts its older Americans as one of its greatest resources.

As a member of the Human Resources Subcommittee, I am keenly aware that senior citizens everywhere are confronted with complex and interrelated problems which adversely and cruelly effect their ability to live out their lives in relative ease and comfort and with the full measure of personal dignity which they so richly deserve.

The Older Americans Act Amendments of 1981 alone—do not and cannot—address in a comprehensive fashion the wide range of difficult issues and problems which have an impact on the lives of our senior citizens. What these amendments do represent, however, is a continuing and compassionate commitment to provide this Nation's senior citizens with nutrition, social and support services, as well as community service-oriented employment opportunities. All of these elements are necessary for maintaining and improving the lifestyles of many of our senior men and women.

I have seen in operation many of the programs made possible thanks to the resources authorized by the Older Americans Act. And, Mr. Chairman, they are sound investments. They are working well.

In closing, Mr. Chairman, I wish to compliment Chairman PERKINS, Mr. ANDREWS, the chairman of our Subcommittee on Human Resources, together with my colleague from Wisconsin, Mr. PETRI, on a job well done. I urge all of my colleagues in the House to join me in supporting passage of H.R. 3046 and in so doing, renewing our longlasting commitment to this Nation's senior citizens.

Mr. PETRI. Mr. Chairman, I would just like to take a moment to commend my colleague, the gentleman from Missouri (Mr. COLEMAN), for his excellent work on this committee and on other committees in the House of Representatives in behalf of the older Americans.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. PETRI. I am happy to yield to my colleague, the gentleman from Vermont.

□ 1400

Mr. JEFFORDS. Mr. Chairman, as a member of both the Select Education Subcommittee and of the Select Committee on Aging, I have been involved in deliberations on H.R. 3046 since its inception, I can say without hesitation that this bill is in excellent shape, and should be passed without delay.

The bill, essentially, keeps intact the network of programs existing under the umbrella of the Older Americans Act. The changes are relatively minor, and for the most part designed to give more flexibility to people at the State and local levels in implementation of these important programs. That, of course, is the very constructive trend we are following in many legislative areas this year. But the Older Americans Act is already far ahead of most federally funded programs in that regard. Only minor changes are needed, because the priorities for spending the Federal funds authorized by the Older Americans Act have always been established by senior citizens and their advocates residing within our districts.

Another general point should be made: at a time when we are examining the cost effectiveness of all Federal programs, at a time when everything that the taxpayers are asked to buy needs examination to determine its value, the Older Americans Act programs are among our best bargains. These are programs which effectively provide people with whatever minimal help they need to remain independent in their retirement years. The value of that effort in maintaining essential human dignity cannot be measured in

dollars. But in a time when we must always be conscious of money, it is obvious that the financial cost of helping people remain self-sufficient is only a tiny fraction of what the cost would be if we abandoned that effort, and forced older Americans to become dependent upon society for their survival.

The bill before us, by reauthorizing the Older Americans Act programs for 3 more years, confirms our national commitment to improvement of the quality of life of America's senior citizens. The legislation recognizes that this is one area in which the Federal Government has performed extremely well, providing needed funding and guidelines, but with the major decisions made by local people who have understanding and insight into the real needs of their States and areas.

These programs reach huge numbers of Americans: over 9 million have participated in the social services programs over the past year, and 3 million have participated in nutrition services.

In my own small State of Vermont, over a third of the 79,000 residents over age 65 have been touched, in one way or another, by these programs. I should point out that my own enthusiasm for the Older Americans Act is based in part upon the enormous successes of the programs in Vermont, under the dynamic direction of Mary Ellen Spencer, director of the Vermont Office on Aging.

Those successes cannot be adequately described by statistics, but the statistics are impressive. The nutrition programs provide 2,700 meals per day in Vermont, and have served 16,000 elderly Vermonters. Other essential services, such as transportation, home health care, homemaker services, home repair, and legal counseling, have reached 18,000 Vermonters over the past year. In-home services have been provided for 1,100 Vermont households, whose elderly inhabitants in most cases could not otherwise have the means to maintain their independent lifestyles. Over the past year, 9,000 elderly Vermonters have participated in personal counseling programs. Services have been provided for 25 to 30 percent of the SSI recipients in the State. The numbers of Vermonters served may not seem impressive to my colleagues from big metropolitan areas, but in Vermont, these numbers represent significant and needed help for substantial numbers of all of our friends, neighbors, and relatives.

In support of a change to be offered in a portion of this act, I believe that we must vote to continue forward funding for title V, senior employment. The reason for this funding is to give advance funding for planning and administration purposes to nonprofit sponsors of the job positions in the workforce. It would also guarantee funding for the program in the event that appropriation bills do not pass the Congress and thus prevent workers in this program from being laid off. Proposals that would oppose this forward funding are actually hiding drastic cuts in title V. Therefore, it is imperative that we support the amendment, offered by my colleague Mr. BURTON, to insure the continuation of forward funding.

The Older Americans Act, as carried out by the State and area agencies on aging, has proven its worth. The programs stress self-reliance, encourage local communities to cast aside prejudices and fears of the aging population, and carry out a firm national commitment to improve the quality of life for a portion of the population that we all hope to be part of some day.

Mr. PETRI. I would like to thank my colleague for his concern and for his work on the Education and Labor Committee.

I yield such time as she may consume to my colleague from Maine (Mrs. SNOWE).

Mrs. SNOWE. Mr. Chairman, I rise in support of the Older Americans Act amendments. The life expectancy of Americans continues to grow, and so, correspondingly, does the senior population. The growing numbers and proportions of seniors is certainly a triumph for our Nation. It reflects the improved quality of life in America and allows it to continue to improve by using the knowledge and experience of our senior citizens as one of our greatest assets. We can expect great demographic changes by the end of this century as the Nation's senior population becomes a greater percentage of the population as a whole. The Older Americans Act was originally established in 1965 to meet the needs of the elderly community for community and social services. Our vote to reauthorize the Older Americans Act reaffirms this Nation's high sense of responsibility toward the well-being of the growing senior population.

The needs of the elderly are generally different from those of the rest of the population. And within the category "elderly" there are people with specific needs—some who are basically healthy and able, and others who are frail and dependent. The Older American Act addresses the needs of the entire elderly population because of the wide range of services which States may provide with funds authorized by this act.

The Older Americans Act has been very successful in its purpose of improving the quality of life for our citizens in the areas of income, housing, health, employment, and community services. The amendments of 1981 include some changes which will make it easier to achieve these goals.

Title V provides senior citizens with the opportunity to be employed in the community service if they desire to work and supplement their income. The 1981 amendments also include weatherization activities as an appropriate community service. In my home State of Maine, there are many citizens, particularly the elderly, whose homes are not energy efficient but who cannot physically manage to make such improvements to their homes. The winters in Maine are very cold, and these people continue to spend an increasing portion of their limited incomes on energy. With the reduction in funds this year for weatherization programs, I was pleased to see the community services employment program granted the option of placing able-bodied seniors in jobs where they can help other senior citizens fix up their homes and save money on heating bills.

An other important improvement to the Older Americans Act will help communities to transport senior citizens to congregate meal programs authorized under title III. For years, the Area Agencies on Aging in Maine have asked me about the possibility of using a portion of the funding under title III-C for transportation to the meal sites. Maine is a very rural State, and many or our elderly are isolated. The 1981 amendments will allow the use of contributions for meals to be used to pay some of the cost of a transportation network to bring seniors to the meal sites.

In addition to the many important services reauthorized under this act, there is also an extension of the Older Americans Volunteer Programs administered by the ACTION Agency. These include Foster Grandparents, Senior Companions, and the Retired Senior Volunteer Program (RSVP). This year marks the 10th anniversary of RSVP. These senior citizens volunteer their time to provide services which cover a wide range of community needs, including energy conservation, housing, health, nutrition, and education. These volunteer programs have been very successful in involving seniors in many different projects that help their local communities. Our vote to reauthorize the Older Americans Act will allow the volunteer programs to continue their good work.

The Older Americans Act gives senior citizens a number of avenues through which to help each other. The program is very cost effective because it allows many of the frail elderly to remain in their own homes by receiving help through the homemaker and home companion services provided in this act. It provides the elderly with meaningful work during their retirement years, and demonstrates that we value their experience and knowledge. A vote to reauthorize the Older Ameri-

cans Act is one to confirm our commitment to a high quality of life for the millions of senior citizens in America. I urge you to join me in support of this worthwhile endeavor.

Mr. PETRI. I would like to commend the gentlewoman from Maine for a very excellent statement and express my appreciation for her support for this important reauthorization.

I yield such time as he may consume to my colleague, the gentleman from Pennsylvania (Mr. CLINGER).

Mr. CLINGER. I thank the gentleman and would like to commend the chairman of the committee and the ranking member of the committee and all members of the committee for bringing this, I think, very significant legislation to the floor.

Mr. Chairman, I rise in support of the bill providing reauthorization for programs under the Older Americans Act.

As a Representative from a rural district in a largely rural State, I know how much these programs have meant to senior citizens living outside our major urban areas. In rural America, as their children grow up and move away, there is a tendency for older people to lose contact with their communities and to withdraw into themselves. Too many of them, losing spouses and friends as well, fall into patterns of solitude and restricted activity that are harmful to their physical and psychological health.

Older Americans Act programs work effectively to counter these tendencies, breaking the isolation that entraps many older citizens and drawing them back into the life of their communities. These programs provide the elderly with the comforts of society, companionship that can in many cases be lifesaving. It provides them with new interests and news ways in which to participate in the life of their communities, which also benefit from the gift of their time, their enthusiasm, and their valuable experience.

The Older Americans Act provides, at minimal experience, precious benefits for older Americans and for the communties of which they are a part. Knowing of their importance in rural areas especially, I urge support for these highly effective Older Americans Act programs.

Mr. ANDREWS. Mr. Chairman, I would just like to point out that I do not believe there is a subcommittee in the Congress wherein the members from the two parties work as well together. I truly do not believe that. We work as a Subcommittee on Human Resources with many programs that are vital to the poor, the young, the old, et cetera, and I find in our subcommittee absolutely no difference based on party whatsoever. I am just proud of that and our staff seems to share the same kind of relationship.

At this time I am pleased to yield 6 minutes to my friend from New York (Mr. PEYSER), a great champion of all agricultural programs.

[Mr. ANDREWS addressed the Committee. His remarks will appear hereafter in the Extensions of Remarks.]

Mr. PEYSER. Mr. Chairman, first of all let me say that obviously I support the legislation we have in front of us today. I have served on the Education and Labor Committee since 1971 and I was privileged to help John Brademas with the major amendment that brought about a tremendous change in this program in the early 1970's.

Having said that, I am inclined to end the lovefest that has been going on on the floor here because I think we better recognize what we are really doing to the elderly here. I am not totally supportive of what we have to work with because there were no options left for this committee to move within when the final reconciliations and the Gramm-Latta budgets were finished.

But the truth is our priorities in this Government today are not favoring the elderly. When I looked the other day and I saw that we appropriated twice as much money to build the B-1 bombers as we are authorizing in this bill today to serve over 9 million senior citizens in our country, something is out of kilter. I think that everyone should recognize this because we had better start working hard to turn some of these things around.

All of us in this Congress have senior citizen groups that we meet with, senior citizens that we know. And it is true, many senior citizens are reasonably well off, they are comfortable, they have decent places to live, they eat regularly. But I can tell you in my own area, and what I have learned in traveling to other areas in this country, there are millions of senior citizens who do not eat well, who do not have proper medical care, who do not have transportation, who live in homes that in many cases you would not have anybody in your family considering living in. And then at this time we are cutting back tremendously on these programs.

When this bill that we have in front of us right now is completed today we will be authorizing and keep in mind the difference between authorization and appropriation. There is a broad difference. An appropriation puts the money on the line and the authorization is the goal of what we would like to see. We are authorizing $400 million less than we did a year ago. That is not taking into account inflation. It is not taking into account that we have added many hundreds of thousands of new senior citizens to the senior citizen rolls.

So while everyone has worked well in putting this bill together, by God, we have not done a very good job for the senior citizens in this country, and that is really what we are talking about.

In this connection, I am beginning to wonder whether this last week or two has been an attack on the senior citizen week. Just a week ago a report was released by the Justice Department saying the elderly exaggerate the effect of crime on them. Unbelievable. They paid nearly a quarter of a million dollars for a report that said the elderly really do not suffer too much from crime. I do not happen to believe it, and I have registered that thought with the Justice Department, and also provided them with statistics as to what really is happening in crime to the elderly, particularly in the streets. Really the main target of crime in the streets are the elderly.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. PEYSER. I yield to the gentlewoman from Ohio.

Ms. OAKAR. That is an excellent point and I, too, refute the points made in that report. I had a resolution that asked the Justice Department to visit the communities, to interview the senior citizens.

I would absolutely refute that. Crime is one of their biggest problems and we all know that, but somehow these theoreticians still do not believe it.

So I really commend the gentleman on that point.

Mr. PEYSER. I thank the gentlewoman for her comment.

Today in the papers I read the results of another survey and it said the elderly are really pretty well off in this country. I said there are some elderly that are pretty well off, but it is the millions who are not well off, and that is what this legislation was all about. I think the Older Americans Act was one of the great pieces of legislation that this Congress enacted. But it really gets to me when I see us cutting back, and perhaps in the 1983 and 1984 years where there are no sums indicated in this legislation as to what it is going to be, but with the reports that are coming out now for 1983 and 1984 budgets, it is going to be even less than it is today. There will be more elderly and more inflation and less money.

I just hope that we can recognize we have to turn around this situation and really continue helping the older people in this country.

I thank the chairman for yielding.

□ 1415

Mr. ANDREWS. Mr. Chairman, I yield 5 minutes to the gentleman from Connecticut (Mr. RATCHFORD).

Mr. RATCHFORD. Mr. Chairman, I speak as a former commissioner on aging for the State of Connecticut and someone who has been a strong sup-

porter over these many years of the Older Americans Act.

In my State alone, there are 600,000 people over the age of 60, and I would say to you, through my direct involvement, that this legislation, first put on the books in 1965, has gone a long way toward allowing that age group to fulfill the American dream.

I would point out also that the Older Americans Act was a direct outgrowth of an earlier White House Conference on Aging. As we approach a conference at the end of this month, my hope would be that it would be open, freewheeling and an opportunity for the older American to express himself and herself.

This act has been the difference between allowing millions of Americans to live in decency and dignity, as opposed to being forced to live in isolation, insulation, and loneliness.

The programs are where they should be, at the State, regional and local level. They are well run. In addition, these programs serve the fastest-growing sector of America, that sector over the age of 60.

What type of programs do they offer? Nutrition programs, home care programs, transportation programs, health care programs and senior centers. These are necessary services. These are good programs. Therefore, the act we consider today deserves our support, and the subcommittee and the Select Committee on Aging, also heavily involved under the gentleman from Florida, deserve our commendation.

I would, however, alert the Members, both here and back in their offices, that I see a threat in one of the amendments that will be offered later this afternoon. It is offered by a gentleman who has made a very positive contribution at the level of the subcommittee and the committee, and I fear that the amendment offered by the gentleman from Wisconsin will have an effect that he does not envision.

Later this afternoon, under the rule, the gentleman from Wisconsin will offer an amendment to consolidate three separate services—congregate nutrition programs, home-delivered meals and other services.

My concern is that if this consolidation takes place that the focus on home-delivered meals and the other critical programs provided at the nutrition sites will diminish in their support.

Just last week the President of the United States spoke out in favor of home care. I would say to the Members that if we deemphasize home-delivered meals, home care in most States will not become a reality, because we need those home-delivered meals to sustain that person at home.

I would say to the Members also that if we are able to have only congregate meal sites, we are losing something. Health screening, medicare counseling, social security programs, and transportation services are all funded under that separate category that the gentleman would lump together with the congregate meals, with the home-delivered meals and the other services.

Mr. Chairman, if we do this, we have one melting pot, yes; but out of it, we have a diminished focus on homebound services and health services and transportation services and, in the long run, we will have, I predict, diminished appropriations, lessened commitment, and the older American will not advance under this program but will be the loser.

I commend the committee, I commend the efforts of the select committee. The bill itself is a good one. Let us not minimize that commitment by adopting an amendment the intent of which is good but the effect of which would be to step back on our commitment to the older American.

Mr. ANDREWS. Mr. Chairman, I am pleased to yield 5 minutes to a distinguished member of our subcommittee, the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 3046, the Older Americans Act Amendments of 1981. This piece of legislation provides the cornerstone of Federal assistance toward the elderly in all areas—income, health, housing, employment, retirement, and community services. It has proven itself to be a comprehensive and well-run package of programs providing essential service to older Americans.

Programs which affect the senior adults of this Nation are among the most important social programs considered by Congress. I am told that each day some 5,000 Americans celebrate their 64th birthday and that literally 1 out of 9 Americans is an older American.

We know that older Americans face many problems, for many of our senior adults have worked hard and contributed during their early adulthood and are now driven to a low-income status when inflation erases fixed incomes set by retirement and social security. While every ninth American is over 65 years, every seventh American over 65 years is poor. This problem is particularly acute among women and minorities, as one out of every four Americans of Hispanic origin is of low income, as are about one-third of all black older Americans.

In Puerto Rico, for example, the elderly community comprises more than 11 percent of our populace of 3.2 million. Of the island's 255,000 persons over age 65, fully 70.8 percent live under the poverty level. Few receive more than the minimum social security payment, and many are ineligible for even that. SSI is not at their disposal, and medicaid funds have long been restricted for Puerto Rico at a level much inferior to the needs of eligible beneficiaries. Health and housing costs in Puerto Rico are just as high as the mainland, and inflation is felt just as sharply there as anywhere in the United States.

In effect, the elderly in Puerto Rico suffer not only from the most devastating of hardships, but receive support from their Government at a lower real level than other Americans. This situation is compounded by the fact that high illiteracy and poor health are rampant among our aged, making entry into a labor market with a 20.7 percent unemployment rate impossible.

Puerto Rico is indeed a microcosm of the mainland, reflecting surprisingly accurately the status of older Americans around the country. Knowing that these difficulties confront persons in every State rather than being limited to elderly in my district, I join with the efforts of my good friend, the gentleman from North Carolina, in strongly supporting the amendments which make up H.R. 3046.

Living comfortably, even surviving, in this inflation-wracked world is extremely difficult for senior citizens, most of whom live on fixed incomes. Of course, it is even worse for those seniors whose income is below the poverty line.

As a result, the programs under the Older Americans Act are absolutely crucial to the Nation's elderly because they help save lives and money, and they enable senior citizens to continue to be active, productive members of society.

The nutritious meals, transportation to doctor's appointments and grocery stores, and assistance with chores and shopping help many senior citizens stay healthy and independent—thereby avoiding costly long-term illness and institutionalization in expensive nursing homes. They also provide opportunities for meeting new people, making friends, helping others, and learning new skills. This kind of personal enrichment is good for the body, mind, and spirit. It gives senior citizens a greater sense of belonging and self worth.

When we consider the serious impact cuts in other programs, such as food stamps, medicaid, social security, housing, and low-income energy assistance may have on the elderly, our determination to preserve the programs in the Older Americans Act becomes especially important.

Consider, for example, the variety of services received by the elderly through this act:

Supportive services, including transportation, outreach, legal services, and

information and referral for more than 9.3 million older persons. Two million of these were of minority background and 5 million were reported as low-income participants.

Nutrition programs, both congregate meals and home-delivery services, aided 3 million elderly at 12,556 local sites.

Employment opportunities were provided for 80,000 elderly in universities, private nonprofit agencies, city and county governments, and Indian tribal organizations.

In addition to these projects, the act would extend the Older Americans volunteer programs, including Foster Grandparents, Senior Companions, and retired senior volunteer program. Last year, almost 300,000 senior volunteers contributed 78 million hours of community service through these programs.

I find it sad that our society turns its back on persons over the age of 60, ignoring the wisdom, the experience, and more importantly, the human dignity of those reaching advanced ages. More and more they are being forced into retirement against their will, being placed on the shelf simply because of their age. The human capital we are wasting through this action is immense.

The volunteer programs for the aging provide a means for these people to continue to contribute to society. They are allowed to work, to be useful, and to reap the personal rewards that come from helping a fellow human being.

Mr. Chairman, also included in H.R. 3046 is a new title VII, which addresses the problems of senior citizens in maintaining their homes in a safe and inhabitable manner.

A recent congressional study has revealed that as many as one-third of the 25 million older Americans remain ill housed in substandard, deteriorating, or dilapidated housing. Yet although 70 percent of these elderly individuals live in their own homes, most Federal programs have been targeted to assist elderly renters, and little funding has been made available to help elderly homeowners. However, due to spiraling maintenance and energy costs, many homes owned by elderly headed households are falling into serious disrepair.

The need to assist many of these senior citizens who are unable to make the repairs themselves is great. Fifty-eight percent of the elderly own homes built before 1936. Furthermore, upon retirement, elder individuals are typically faced with a cut in personal income of one-third to one-half, and are often unable to afford to make needed repairs. Health and mobility are also important determinants of the ability to make repairs, and with the 75 and over age group being the fastest growing segment of the population, a vastly growing number of elderly are physically unable to make the repairs themselves.

Title VII of this act will provide a program to help for making needed repairs and will fill a large deficiency in the network of service provision for our elderly.

Our older citizens are, indeed, a valuable source of wisdom and knowledge, which is many times disregarded as outdated or irrelevant. I take issue with this view as I believe the experience they can offer is priceless and should be used to its greatest advantage. When senior citizens in Puerto Rico tell me repeatedly that it is essential that they be given increased incentives to live and learn and to help others, I can only admire them for their spirit and the continued enthusiasm they display for life. The programs of the Older Americans Act are a great beginning in addressing these needs. Our senior citizens are proud people—as they have a right to be—and they are independent. But these are difficult times, and sometimes they need a little help. The Older Americans Act programs have proven, time and again, their ability to provide that help. They have proven to be an unequaled success at helping to make life a little less difficult and a lot more enjoyable for our senior citizens.

Best of all, they have done so in a way that preserved the flexibility needed to make sure that decisions about local needs are made by local people. And perhaps the most important of all, they have done so in a way that allows senior citizens themselves to provide that help to each other.

These programs deserve to be continued. I therefore urge my colleagues to join me in support of H.R. 3046, the Older Americans Act Amendments of 1981.

Mr. ANDREWS. Mr. Chairman, I am pleased to yield 3 minutes to the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, I support passage of H.R. 3046, the 1981 Older Americans Act Amendments.

First, however, I want to pay special tribute to the distinguished chairmen of the Education and Labor Committee (Mr. PERKINS) and the Subcommittee on Human Resources (Mr. ANDREWS) for their leadership in bringing this important measure to the floor.

The Older Americans Act has enjoyed strong bipartisan support since Congress enacted this landmark legislation in 1965. The value and worth of the Older Americans Act for the elderly and our Nation have been amply demonstrated time and time again.

Mr. Chairman, I think that there is a tendency sometimes to believe that all of our work is done and that we can now relax our concern for the care and well-being of the elderly. The fact is, however, that although legislation adopted since the 1930's, starting with the Social Security Act, and up through the adoption of the Older Americans Act have played a very important role in improving the situation, the battle is by no means permanently won.

For example, while the 20-year period between 1959 and 1978 showed a reduction of that sector of the elderly community that is below the poverty level from some 39 percent to about 14 percent; yet in the years between 1978 through 1980, we began to backslide. In those 2 years an additional 700,000 older Americans slid below the poverty level for the first time. Clearly this is not the time to relax and to rest on our laurels and to believe that all of the work has been done. We must be aware of both the physical and psychological concerns of older Americans. They listen to all of the publicity about the cutbacks. They rely on the programs which this Congress has adopted over the years to help see them through the remaining years of their lives. And when the newspapers and radio and TV are filled with news of cutbacks in social security or medicare or medicaid or food stamps, they are affected very seriously because it places their very lives in uncertainty and perhaps in jeopardy.

So I would hope that what we would be doing by the adoption of the Older Americans Act Amendments of 1981 is to provide a sense of reassurance to older citizens and to demonstrate to them that, in spite of all of the damage that has been done to the so-called safety net, in spite of all of the purported attacks on the programs that the elderly desperately need, the Members of this House will not stand by and let those attacks continue. We will make sure that the elderly continue to receive the benefits which this Congress and the American people have promised them.

Today many older persons are able to live independently in their own homes because of the services they receive from the Administration on Aging network. Home health, homemaker, chore, friendly visitor, telephone reassurance calls, and other vital services have not only helped older persons psychologically but have also enabled them to remain in their own homes, instead of being placed in a nursing home at a much higher public cost.

Another major achievement is the nutrition program for the elderly. It not only delivers nutritious meals for older persons but provides an opportunity for the aged to meet and talk with others. This socialization function can be as important as the meal itself, especially for lonely shut-ins.

The nutrition program now provides meals for about 611,000 older persons on a daily basis. More than 528,000 are served in senior centers, schools,

churches, and other nonprofit settings. Nearly 83,000 homebound elderly receive home-delivered meals each day.

The Older Americans Act also responds to one of the most critical problems in the field of aging: The need for more trained personnel to deliver services to the elderly. During the 1977-78 academic year, for example, about 14,200 students took courses in aging, and 1,000 received degrees. Title IV demonstrations have produced many innovative developments under the Older Americans Act, including the nutrition program, Foster Grandparents, the retired senior volunteer program (RSVP), area agencies on aging, the nursing home ombudsman program, and others.

The title V senior community service employment program (SCSEP) provides jobs for about 52,250 low-income persons 55 or older in a wide range of useful and fulfilling activities, including community beautification, weatherization, home repairs, and others. Title V has enabled older Americans to help themselves while helping others in their communities at the same time.

THREE-YEAR EXTENSION

H.R. 3046 would build upon the earlier successful efforts of the Older Americans Act by extending the legislation for 3 years, through fiscal year 1984. This time frame would permit State and local offices on aging to engage in more long-range planning. This is essential if our Nation is to meet the challenges of an older population.

In addition, this extension will enable the older Americans network to adjust to the new regulations governing the act. A 3-year continuation will permit a more indepth review to determine whether the regulations are working properly.

And, it will also allow the Congress to review carefully the recommendations of the 1981 White House Conference on Aging. These proposals will probably not be available in final form until later in 1982—and quite likely after this Congress would have full opportunity to develop legislation to implement them.

Finally, a 3-year extension reaffirms congressional support for the Older Americans Act. This becomes all the more important now, since the administration proposes to cut the heart out of many programs or fold them into block grants to States with substantially reduced funding levels.

INCREASED FLEXIBILITY

The 1981 Older Americans Act also include several provisions to improve the administration of the act and provide greater flexibility for State and local offices on aging.

First, the act would continue the separate authorizations for social services, congregate meals, and home-delivered meals. But, local offices on aging would be able to shift 20 percent of the funds from one program to another. This would provide greater latitude for area agencies on aging in assessing the needs within their communities. At the same time, it would help to maintain the visibility of these programs.

Second, Meals on Wheels caterers would no longer be required to provide meals in a group setting. They would simply have to demonstrate their capability to deliver meals to the homebound elderly in an effective manner.

The existing requirement that home-delivered meals preparers must also provide congregate meals can create serious problems. Moreover, the ability to deliver Meals on Wheels may be quite different than the capacity to provide quality meals in group settings.

Third, H.R. 3046 would permit handicapped persons at senior centers to participate in the congregate meals program, regardless of age. As a practical matter, it is difficult to serve meals only to senior citizens when older Americans and disabled persons are receiving services at the same center.

Fourth, meal contributions from the elderly could be used under H.R. 3046 to purchase social services as well as additional meals. This would enable the nutrition program to carry out a broader purpose by improving accessibility for older persons. Some potentially eligible elderly persons do not eat at congregate meal sites because they are unable to obtain a ride. Social services can enable older persons to overcome other barriers which deny them the opportunity to participate in the nutrition program.

SERVING MINORITIES

I am especially pleased that the legislation would continue the existing requirement that social services must be delivered to older persons with the "greatest economic or social needs." This language was inserted in the law in recognition that there are simply not enough funds for the Older Americans Act to serve all elderly persons. The targeting of services is necessary to assure that appropriations are used most effectively. This has been achieved, I am pleased to say, without imposing a degrading means test for elderly persons.

Second, H.R. 3046 would require the Administration on Aging to consult with minority organizations in assessing personnel needs in gerontology. At present, minorities are underrepresented in the field of aging. This provision would help to encourage more minority students to pursue careers in gerontology.

ADMINISTRATION ON AGING

The bill also includes provisions to strengthen the role of AOA as a high-level advocate for the elderly. I want to commend my colleague from New York City (Mr. BIAGGI) for his efforts in winning approval of these measures.

AOA would report directly to the Health and Human Services Secretary under H.R. 3046, instead of the Assistant Secretary for Human Development Services. Congress intended AOA to be a high level advocate when it enacted the Older Americans Act in 1965. Sponsors of the legislation did not want AOA to become submerged in another HHS unit. Rather, they wanted AOA to be a high-level agency coequal in status with the Social Security Administration. This is why the Commissioner on Aging is a Presidentially appointed office subject to confirmation by the Senate.

SENIOR COMMUNITY SERVICE EMPLOYMENT PROGRAM

H.R. 3046 would continue the highly successful senior community service employment program (SCSEP). Title V has been an extraordinarily effective program. It has worked well for the elderly participants, the communities served, and our Nation. Title V is probably the single most effective community service employment program ever enacted.

For many older Americans, title V has meant much more than a means to earn badly needed income to cope with rising prices. It has also provided an opportunity to engage in purposeful and gainful activity. For a substantial number of the enrollees, the SCSEP has provided a means to move on to employment in the private sector.

LIFELONG LEARNING

I support the clarifying language in the bill to emphasize that Older Americans Act funding is available for career-related educational opportunities as well as cultural enrichment. More and more older persons are entering or reentering colleges, universities, or community colleges for a career-related objective, such as brushing up on their existing skills, preparing for new employment or making a job switch. Moreover, many older Americans are receiving instruction at nontraditional academic centers, including senior citizen centers, labor unions, businesses, or private nonprofit organizations. Quite clearly, lifelong learning is an important need for aged and aging persons, and it must be responsive to changing developments and the goals of the elderly.

ACTION'S OLDER AMERICAN VOLUNTEER PROGRAMS

Finally, H.R. 3046 would continue ACTION's older American volunteer programs (OAVP)—Foster Grandparents, RSVP, and Senior Companions—for 2 years.

These programs have been enormously effective, and deserve to be extended.

In my home district of New York City, I have had an opportunity to see firsthand how Foster Grandparents have helped disadvantaged young children in institutional settings. They have produced remarkable changes through tender love and care for mentally retarded and otherwise disadvantaged children.

RSVP and Senior Companions have been equally effective in serving people in a community setting.

The Older Americans Act provides this wide variety of services for thousands and thousands of senior citizens across the Nation. The act has never received the funding which would enable all older Americans to avail themselves of these programs. And now, an attempt will be made to reduce the amount of moneys under the act by over one-quarter. The committee on which I serve, Education and Labor reported authorized all the titles of the act at over $1 billion. The senior community service employment program was authorized at $350 million. The amendment would reduce the authorization for all titles to $715 million and $277 million for title V. I strongly oppose this amendment, and urge my colleagues to join me in defeating it.

CONCLUSION

All Americans—whether they are young, middle aged, or old—have a direct and vital stake in assuring that our commitment in aging is built upon a solid and sound foundation.

The 1981 Older Americans Act amendments help to improve and perfect earlier efforts to enable more older persons to live independently in their homes, where most of them would prefer to be. This legislation also provides opportunities for them to improve their economic well-being by providing essential services in their communities.

For these reasons, I reaffirm my support for prompt approval of H.R. 3046.

Mr. PETRI. Mr. Chairman, I yield such time as he may consume to the gentleman from Kentucky (Mr. ROGERS).

Mr. ROGERS. Mr. Chairman, I rise today in strong support for the bill, H.R. 3046, authorizing the Older Americans Act. I would like to commend my good friend, the distinguished chairman of the Education and Labor Committee, my colleague from Wisconsin, and the gentleman from North Carolina for their hard work in bringing this bill to the House floor today.

Because, despite the need to reduce the Federal budget, we must keep the programs this bill will continue. We need the senior citizens centers, we need the meals for the homebound, we need the buses and vans to take senior citizens to the doctor and to the store, and we need the senior citizens employment programs.

There are times, Mr. Chairman, when I am absolutely appalled by the way our Nation treats senior citizens. It is today's senior citizens who built our Nation into the strongest country on Earth. They built our schools, founded our businesses, ran our farms, raised our families, paid their taxes, and fought our Nation's wars. We owe these senior citizens a tremendous debt of love, gratitude, and profound respect. They deserve better than to be forgotten now that they are moving on in years.

If I were to ask any of my colleagues here on the House floor how they would like their own parents to be treated, I am pretty sure what the answer would be. They would say they wanted their parents to have a warm, well-tended home. They would want to make sure that there were groceries in the cupboards. And they would want to be absolutely certain that if their parents were to become ill, that there would be a good neighbor dropping by to bring them warm meals, take them to the doctor, and maybe just brighten up their day with a friendly visit.

Well, Mr. Chairman, the senior citizens centers, meal programs, and transportation assistance have done just this. They have helped us take care of senior citizens the way we should.

Now Mr. Chairman, there is not a Congressman here today who would vote to deprive his own parents. If that is the case, Mr. Chairman, we should never even think of cutting back the programs that senior citizens need.

And as the folks back in my district have been telling me, they absolutely need the senior citizen centers, meals, and transportation programs.

And since these people cannot tell you themselves, I would like to bring their message straight to the Congress. I want to tell you just how much we need these programs.

For instance, there was the 81-year-old lady in Irvine, Ky., who told me that the center keeps her from feeling old. Now if this one lady was helped, just think of how many senior citizens' lives have been improved by these centers.

And there was the widow who told me about the difficult years after her husband had died. She wrote to me:

I could hardly have gone through the days of loneliness and sorrow had it not been for a place to go and be with my friends.

And they told me about the home-delivered meals, too. One fine lady in Taylor County wrote to me:

I am a disabled person confined to my home. I depend on the hot meal I receive every day. I don't know what I would do if the program was taken away.

Well, let me tell you, the Congress never should take away these programs when senior citizens, such as this lady, are relying on them in order to eat.

These programs have proven their worth in each of the lives they have brightened, in each of the lives they have made healthier with the hot, balanced meals. We all have an obligation to our senior citizens, to make sure that they are not forgotten and that they are taken care of. The bill before us will help us to fulfill this essential obligation. I urge my colleagues to join with me in supporting this bill and continuing the senior citizens centers as well as the meal and transportation programs. Our senior citizens need them.

Mr. PETRI. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. MARKS).

Mr. MARKS. I appreciate the gentleman yielding.

Mr. Chairman, I rise to speak in favor of H.R. 3046, the Older Americans Act Amendments of 1981, and I do so both in my capacity as Representative of Pennsylvania's 24th Congressional District as well as my capacity as ranking Republican member on the Subcommittee on Health and Long-Term Care of the Select Committee on Aging.

I would like to commend Messrs. ANDREWS and PETRI for the long hours they contributed so that this bill could come before us today.

The older American is a special resource and this bill allows us to demonstrate our continuing commitment to them. Through reauthorization we are expressing our belief that old age should be rewarded with respect and dignity. By funding the programs for senior employment, extending the social service and nutrition program and the senior volunteer programs we are declaring that the senior citizen is one of our national priorities.

After extensive discussions with the secretary of my State's department on aging and the directors of the area agencies in my district, I also wish to speak in favor of the consolidation of social service and nutrition programs into one funding allocation. This will allow the area agencies to better establish local priorities and to spend the moneys in the most beneficial manner.

I also wish to speak in favor of the amendment which will extend the authority of the nursing home ombudsman to boarding homes. During the past year the Select Committee on Aging, on which I serve, held numerous hearings on the problems in boarding homes. I believe this extension of authority will go a long way in redressing the existing problems.

Finally, I wish to express my support for a study of the problems in

rural transportation. My district has vast expanses between towns and service centers. If we can demonstrate a more efficient means of providing transportation services, this would allow an expansion of other social and nutritional services.

We have all spoken of the need to maintain senior citizens as a vital part of the community. A vote in favor of H.R. 3046 will demonstrate conclusively our commitment to that goal.

□ 1430

Mr. PETRI. I would like to commend my colleague from Pennsylvania for his excellent statement.

Mr. Chairman, I yield such time as she may consume to the gentlewoman from California (Ms. FIEDLER)

Ms. FIEDLER. Mr. Speaker, first, I, too, would like to rise in support of this bill and to commend the committee for the outstanding job that they have done.

I have had the opportunity of serving some of the medical needs of the seniors of our country and I would like to express my concern that we continue to make every effort to keep seniors and their families together. This is something that has not really been done over a period of years. There have been a good deal of division of the family. The family has become fragmented. Many of our senior citizens live isolated from both their community as well as their family.

I think that it is important as we begin to adopt this very important legislation that we make every effort within government policy to encourage the staying together of families and the support for our senior citizens. They have contributed a lot. They are the backbone of this country.

I look forward to supporting this bill and other efforts which will help to further the causes of supporting their continuing good health and good will.

Mr. PETRI. Mr. Chairman, I would like to commend my colleague, the gentlewoman from California, for her excellent statement in support of this legislation.

Mr. Chairman, I yield such time as he may consume to the distinguished gentleman from Kentucky (Mr. HOPKINS).

Mr. HOPKINS. Mr. Chairman, I want to join my colleagues in complimenting both the minority side and the majority side for their excellent work on this piece of legislation and I associate myself with their remarks.

I wonder if I might ask one brief question of either the chairman or ranking minority member.

We are all aware that the White House Conference on Aging is scheduled to begin its work, I believe, in about 10 days.

I was wondering if it would not have been perhpaps in their best interests and in the best interests of older persons of this country, if we did not wait until the White House Conference on Aging had completed its work, to consider this bill, so that perhaps we might incorporate their recommendations and suggestions into this piece of legislation?

Why did we not wait, I guess is what I am asking, until after the White House Conference on Aging had met and hear their recommendations?

Mr. ANDREWS. Mr. Chairman, will the gentleman yield?

Mr. HOPKINS. I yield to the gentleman from North Carolina.

Mr. ANDREWS. I apologize to the gentleman. I was disscussing a matter relating to the bill with the gentleman from Florida and I did not hear the question.

Mr. HOPKINS. What I am asking is, I do not want it to be misinterpreted, I am certainly in favor of this legislation and I compliment the gentleman on his work—my question is: I am aware that the White House Conference on Aging is scheduled to begin its work in I believe about 10 days.

Why did we not wait to consider this legislation until after the White House Conference on Aging had met? I think perhaps they might have had some recommendations or suggestions that we might have incorporated into this legislation.

Mr. ANDREWS. I might say to the gentleman that, first of all, the Senate has already passed the counterpart of the bill and we have held ours about as long as we can to try to get it in during this calendar year; but I believe that we will have an opportunity prior to the termination of this conference committee to consider in that conference committee any recommendations with respect to this legislation which might come from the White House Conference.

Mr. HOPKINS. I thank the gentleman.

Mr. ANDREWS. I appreciate the gentleman suggesting perhaps we should do that and I will make that effort.

Mr. PETRI. Mr. Chairman, will the gentleman yield?

Mr. HOPKINS. I yield to the gentleman from Wisconsin.

Mr. PETRI. I should also like to add that there was a commitment to get this reauthorization to the floor before the end of this calendar year so that we could have the basic program reauthorized. But I would imagine that the chairman of the subcommittee and I certainly would support and urge that any recommendations coming out of this conference be given every consideration, that appropriate hearings be held so that we could listen to the spokesmen for that group and get the benefits of what they come up with, and that we could have followup legislation to implement the recommendations if they did have general support in the country.

Mr. HOPKINS. I thank both the gentlemen for their participation.

Mr. PERKINS. Mr. Chairman, will the gentleman yield?

Mr. HOPKINS. I yield to the gentleman from Kentucky.

Mr. PERKINS. I thank the gentleman for yielding.

I think we have had at least two White House Conferences on Older Americans prior to the one scheduled for this year. I know because I have participated in those Conferences held heretofore. It was in 1978 that we authorized this White House Conference and we perhaps really should have had it before this time.

However, I know that in the recent past, we have held State conferences, and—like them—this White House Conference is just one of several ways to try to put some input by the elderly into solving their own problems. While I would like to have seen it completed before we brought up the legislation today, we reported the legislation out of the full committee on May 5 based not only on the evidence gained from past White House and State conferences, but also on considerable information gained through hearings. The committee felt that the needs of the elderly required immediate attention.

If we had available the recommendations of the Conference 2 or 3 months ago, perhaps, it would have been better. Nevertheless, they will be available to us next year, and can be included in future legislation relating to the Older Americans Act.

Mr. HOPKINS. I thank the gentleman.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. HOPKINS. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I rise to express my strong support for H.R. 3046, the Older Americans Act Amendments of 1981. As reported by the Committee on Education and Labor, this measure reauthorizes the major titles of the act through September 30, 1984. In addition, it incorporates a series of modest amendments designed to improve program coordination and implementation at the State and local levels.

Let me take this opportunity to commend our distinguished chairman, and subcommittee chairman, the gentleman from Kentucky (Mr. PERKINS), and the gentleman from North Carolina (Mr. ANDREWS), together with my friend and colleague from Wisconsin (Mr. PETRI), our ranking minority member on the Human Resources Subcommittee, for their untiring efforts in bringing a bill to the floor that enjoys broad, bipartisan support.

Under the auspices of activities authorized by the Older Americans Act,

a wide range of much-needed social, nutrition, and employment services are being afforded to thousands of deserving senior citizens, not only in my own State of Ohio, but across the Nation.

The Older Americans Act has proven to be a highly successful vehicle for providing millions of our most deserving citizens—our senior citizens—with a host of direct services that will improve the quality of their lives.

For these reasons, Mr. Chairman, I urge immediate and favorable consideration of H.R. 3046, as amended.

Mr. PETRI. Mr. Chairman, I have no further requests for time.

Mr. Chairman, I yield 5 minutes of my time to the gentleman from North Carolina (Mr. ANDREWS).

Mr. ANDREWS. Mr. Chairman, I yield such time as he may consume to one of the Nation's greatest champion of programs for the elderly, the gentleman from Florida (Mr. PEPPER).

Mr. PEPPER. Mr. Chairman, I very deeply thank the distinguished gentleman from North Carolina for yielding to me to say a word on this matter.

My primary purpose is to commend the distinguished gentleman from North Carolina (Mr. ANDREWS) and all those who have been working with him on his able and dedicated committee in bringing forth this new extension of the Older Americans Act.

Mr. Chairman, we all know that in 1961 the Medicare Act came out of the White House Conference on Aging, and the model, the act that we are basically amending or extending, the Older Americans Act, came out of the White House Conference in 1971.

Now, we are going to have another great White House Conference, I hope, this year, beginning the latter part of this month.

I wish that that great conference of older Americans come here with all their dedication to their better lives, might take all of the legislation that we now have for the aid of the elderly of this country, medicaid, medicare, housing legislation, the Older Americans Act, all of the legislation that provides for the betterment, the enrichment of the lives of the elderly people, and take a look at them and see in what respects, if any, the whole of the package is still deficient according to the elderly of America—the aid and assistance that they should have.

I am sure that in the field of medical care we can improve on what is available through medicaid and medicare and the private system that we have today.

So, I would like to express the hope that this White House Conference on Aging, the third in the great succession of these wonderful conferences, might rise to the majesty of the challenge of the present and make more perfect the legislative provisions of the Congress of the United States to provide more richly and fully to extend the lives and to make them healthier and happier for the elderly people of America.

In other words, Mr. Chairman, I would pray that this White House Conference on Aging will make more meaningful to this and succeeding generations of older Americans the dream of the poet Browning when he said:

Come grow old along with me, the best is yet to be, the last for which the first was made.

● Mrs. BOUQUARD. Mr. Chairman, I rise in support of the bill now under consideration. The Older Americans Act was designed to increase the opportunities for all older persons to provide services to those in need of assistance. It is proof of our Nation's commitment to its elderly. I feel the changes made in H.R. 3046 improve greatly the means of achieving these goals. As the Representative from a largely rural district, I strongly support those provisions, such as that permitting a transfer of funds between nutritional services and transportation, providing flexibility to area agencies to deal with problems unique to their locations.

I think it is important for us all to keep in mind that age does not necessarily mean one is infirm in either mind or body. Through the OAA, it is possible to deliver services to help the elderly in the activities of daily life. These programs make it possible for so many of our citizens to continue to live in their homes, work in their communities, to make a contribution to society that can come only from the experience of years. I urge my colleagues to support passage of H.R. 3046.●

● Mr. ZEFERETTI. Mr. Chairman, the bill we are considering today, which will extend the programs of the Older Americans Act for 3 years, is of vital importance to our Nation's senior citizens. As the basic Federal statute which deals with the problems of our seniors, the Older Americans Act continues to provide crucial Federal support for social, health, housing, employment, and nutrition programs at the community level.

In fiscal year 1980, approximately 9.3 million older persons participated in social service programs established by the act. Nearly 3 million seniors participated in nutrition projects operating at 12,556 local sites. This included delivery of 167 million meals.

I am proud to have been a cosponsor of legislation establishing a program of home-delivered meals for the elderly. I know that there are many older persons who face the prospect of institutionalization simply because they are unable to adequately provide meals for themselves. To the homebound older person, one meal delivered daily, 5 days a week, can make the difference between self-sufficiency and dependency. In terms of cost, congressional studies have shown that by adopting a meals-on-wheels program, as much as $400 million could be saved in nursing homes. The cost for this program is less than 25 percent of that figure.

Also of great importance is the ACTION older Americans volunteer programs which are designed to foster volunteerism among citizens aged 60 and over. This concept has proven to benefit multiple segments of society, both those serving and those being served. In a less tangible but no less meaningful way, sponsoring communities are benefited by the insight and perspective which older American volunteers contribute to civic life, resources too often left untapped.

In closing, I would like to pay tribute to Congressman CLAUDE PEPPER, chairman of the Select Committee on Aging, for the fine job he has done in helping to shape this extension of the Older Americans Act. By extending this legislation, the Congress will show our senior citizens that the Federal Government recognizes their needs and programs and will continue to address them.●

● Mr. BONKER. Mr. Chairman, I rise in support of the Older Americans Act. The Older Americans Act, enacted by Congress in 1965, provided for the first time a comprehensive program to benefit elderly people across the country. The act set out policy goals aimed at improving the lives of older Americans in areas of income, health, housing, employment, retirement, and community services.

The significant impact this act has made on the lives of the elderly puts it in the same league as other landmark programs, such as social security and medicare. Like these programs, the Older Americans Act's main objective is to provide for the independence and security of older Americans who have spent their lives making this country great.

The Older Americans Act was up for reauthorization in a year when fiscal conservatism is very popular and social programs' budgets are being drastically reduced. That is why it is so encouraging to see that both parties and both Houses of Congress have seen fit to reauthorize this vital program another 3 years at an adequate funding level. The legislation that we are voting on today shows that Congress can be fiscally responsible while at the same time be responsive to the basic needs of America's senior citizens.●

● Mr. HOLLENBECK. Mr. Chairman, as a member of the Select Committee on Aging, I have long advocated that our basic commitment to older Americans must be maintained. The Older Americans Act has served as a central policy vehicle through which the Federal Government has been able to allo-

cate valuable resources for a wide variety of social services for the elderly. The legislation has provided opportunities for the integration of all older people into the mainstream of American society, and it continues to assist those elderly who depend on these services to receive the support they require to lead their lives with dignity, security, physical, mental, and social well-being.

Given the present economic situation and the growing number of older people, the present and future well-being of today's senior citizen depends on the Government's ability to secure policy goals aimed at improving the lives of older Americans in areas such as income, health, housing, employment, retirement, and community services.

The Older Americans Act has been the major source of funding for social and nutritional service delivery programs for the elderly, and the 1978 amendments have strengthened both the advocacy and the service delivery provisions of the legislation in several critical respects. However, if older citizens are to continue to receive needed services, the Older Americans Act must be reauthorized.

Clearly, Mr. Chairman, the Older Americans Act has demonstrated its success in providing social services, employment, and information about services to the elderly. I strongly urge my colleagues' support for this legislation without weakening amendments.●

● Mr. WALGREN. Mr. Chairman, I am pleased today to support H.R. 3046, the bill before us to continue the programs authorized by the Older Americans Act. This is one of the Federal Government's most constructive programs because its thrust is to help elderly people remain healthy, productive, and active. It helps many older citizens stay in their own homes rather than live in institutions. It helps many to continue to be active in their communities.

In 1980, 9.3 million older people participated in the social service programs under the act and another 3 million older persons participated in the nutrition projects, which included the delivery of 167 million meals. A wide range of services are provided, among them nutrition counseling and meals, transportation, counseling, legal help, and aides in the home.

This bill would also continue several volunteer programs for older Americans. Under the foster grandparents program, for example, older people help children with problems resulting from physical, mental, or emotional disabilities who, without this help, might be institutionalized. The senior companions program helps many elderly citizens returning to community life from institutions to adjust to independent living. In my area, the Retired Senior Volunteer Program, which is also continued by this bill, has helped people with energy conservation, housing, health nutrition, and education.

In my district, Allegheny County has been able to provide a wide variety of services to older Pennsylvanians. We have both congregate meals and meals-on-wheels supported by the Older Americans Act. We have senior centers which provide both recreation and counseling in everything from how to get a rent rebate to filling out insurance forms. The act has helped us provide shuttle buses for seniors to go to the doctor. Most important, because of the Older Americans Act, we have homemaker services and health aides in the home. And finally, in Allegheny County, the Older Americans Act has helped low-income elderly people get part-time work.

Our elderly population is continually increasing and people are living longer and longer. We will all be older Americans soon and probably already have parents, relatives, and friends who are elderly. Programs like this one are vital in helping people live longer, live happily, and live securely. This is one area where I cannot support "getting Government off our backs," as some in Washington would urge us to do. This is a critical program and I hope my colleagues will join me in voting to continue it.●

● Mr. LOWERY of California. Mr. Chairman, it has been over 15 years since the enactment of the Older Americans Act of 1965. During that time, its programs have grown from a few small social service grants and research projects to a network of 57 State units on aging, over 600 area agencies on aging, and countless community organizations providing services on both a paid and volunteer basis. The size of the Older Americans Act budget has increased from $7.5 million in 1966 to almost $961 million in the present fiscal year. The act has been amended eight times, adding major new initiatives such as the nutrition program for the elderly and the senior community service employment program.

Mr. Chairman, the Older Americans Act is an extraordinary legislative document. This act is not simply a collection of unrelated titles. It is a comprehensive declaration of the long-term goals of American society with regard to our elderly citizens. The act commits us as a Nation to actively work to enhance the quality of life of older Americans.

In case after case, examples abound of hungry individuals being fed, loneliness being met with compassion and caring, and chronic health problems being ameliorated through concerted community efforts. This act has proven itself worthy of our continued support and its programs deserve full funding in the budget.

As we enter the eighties, we face an era of new fiscal realities and new public policy challenges. Our agenda for the 1980's should look toward a positive change in the direction of public policy for the aged. This is an excellent time to examine the success of the Older Americans Act in meeting its goals and in achieving the changes we have hoped to accomplish. Accordingly, I am looking forward to the 1981 White House Conference on Aging to be held after Thanksgiving here in Washington.

I am confident the White House Conference will result in constructive recommendations which streamline and improve the efficiency of Older Americans Act programs, increasing local flexibility to meet local needs, and increasing participation of older people in the operation of programs intended to serve them.

Finally, Mr. Chairman, let me say that our job as advocates and Representatives for senior citizens does not end with the Older Americans Act. Rather, it sets the benchmark that we will do no less for seniors, and we want to do more. We need to address the problems of income security and access to quality health care. We need to eliminate the fear and vulnerability of growing older. We need to nourish programs, both public and private, that allow each year of age to build richness and experience to lives well lived without fear of growing old. The Older Americans Act is just the beginning.●

● Mr. ASHBROOK. Mr. Chairman, I rise to express my strong support for H.R. 3046, the Older Americans Act Amendments of 1981. As reported by the Committee on Education and Labor, this measure reauthorizes the major titles of the act through September 30, 1984. In addition, it incorporates a series of modest amendments designed to improve program coordination and implementation at the State and local levels.

Let me take this opportunity to commend our distinguished chairman, and subcommittee chairman, the gentleman from Kentucky (Mr. PERKINS), and the gentleman from North Carolina (Mr. ANDREWS), together with my friend and colleague from Wisconsin (Mr. PETRI), our ranking minority member on the Human Resources Subcommittee, for their untiring efforts in bringing a bill to the floor that enjoys broad, bipartisan support.

Under the auspices of activities authorized by the Older Americans Act, a wide range of much-needed social, nutrition, and employment services is being afforded to thousands of deserving senior citizens, not only in my own State of Ohio, but across the Nation.

The Older Americans Act has proven to be a highly successful vehicle for providing millions of our most deserv-

ing citizens—our senior citizens—with a host of direct services that will improve the quality of their lives. For these reasons, Mr. Speaker, I urge immediate and favorable consideration of H.R. 3046, as amended.●

● Mrs. COLLINS of Illinois. Mr. Chairman, as a Representative from an urban area where the cost of living continues to rise very rapidly, I am fully aware of how much present programs actually mean to senior citizens.

The Older Americans Act, which sets 10 policy goals aimed at improving the lives of older Americans in the areas of income, health, housing, employment, retirement, and community services, has been a major asset for the elderly since its inception during the 89th Congress.

I am proud to rise in support of the amendments to this act. There are those who would castigate the bill for authorizing a higher level of funding than the administration had requested; this agreement is negligible when the positive attributes to be reaped from H.R 3046 are assessed. The amendments display an excellent effort to assist older citizens. Its programs endeavor to effectively provide people with whatever minimal help they need to remain independent in their retirement years. The bill we will be voting on is the greatest possible confirmation of our national commitment to improvement of the quality of life of American citizens.

I have based my own enthusiasm and advocacy for those amendments on the success of the Older Americans Act in my home State of Illinois. The essential services, such as home health care, homemaker services, and employment, have served to fill an economic void which the elderly could normally not have answered.

I believe that we must vote to approve H.R. 3046 because the Older Americans Act has more than proven its worth. These programs have made the best possible effort to encourage local communities to cast aside preconceptions and fears of the aging population. In addition, the act carries out a firm national commitment to improve the quality of life for a portion of the population which we will ultimately be a part of someday.

The Older Americans Act of 1965 was originally established to augment the fixed incomes of the elderly by providing necessary services. This is imperative because the needs of seniors are generally more intense than those of the rest of the population. Older Americans are plagued by unintentional solicitude and are inclined to be alone a great deal of the time which is physiologically and psychologically detrimental to their health. The amendments include provisions to rectify such dilemmas such as grants to States for community planning and services, the legislative basis for the Administration on Aging (AOA), grants to Indian tribal organizations, and community service programs for low-income persons.

Again, I support the Older Americans Act Amendments of 1981. These amemdments will probably mean the difference between deprivation and living at a standard level for the elderly. I am sure that my colleagues will recognize the need for H.R. 3046 and respond by lending it their support.●

● Mr. GILMAN. Mr. Chairman, I was pleased to support today the reauthorization of the very effective Older Americans Act, which provides for the funding of a wide variety of programs throughout our Nation which serve the elderly.

I am proud of the support that the House of Representatives has provided over the past few years to service programs for our older Americans, and I am particularly proud of the way that they have been carried into effect in our 26th Congressional District, which I am honored to represent in the House of Representatives.

For the information of our constituents, I ask that a summary of this measure, H.R. 3046, be printed at this point in the RECORD:

H.R. 3046 provides for a three-year extension of the Older Americans Act, making a number of significant changes in program operation:

ADMINISTRATION ON AGING

H.R. 3046 upgrades the Commissioner on Aging's role by requiring a direct line of authority to the Secretary of HHS and by clarifying and strengthening prohibitions against delegation of the Commissioner's functions;

Removes restrictions against contracting with or providing grants to profitmaking organizations; and

Deletes authority for the National Information and Resource Clearing House for the Aging.

GRANTS FOR STATE AND COMMUNITY PROGRAMS ON AGING

H.R. 3046 revises grant-program regulations to permit states to transfer not more than 20 percent of funds appropriated during any fiscal year between social services and nutrition services programs;

Define and emphasize education and training services for the elderly;

Strike the current law requirement that 50 percent of social service funds be spent on three priority services (access, in-home, and legal services) requiring instead only adequate funding;

Liberalize nutrition service program regulations to give area agencies the option to make grants to home-delivered-meal providers who may or may not also be congregate meal providers (priority goes to those with a demonstrated ability to provide services and solicit volunteer support) and to expand the program to include any handicapped or disabled person under age 60 residing in a residential senior center offering congregate nutrition services; and

Permit the use of contributions for meals to provide transportation to and from meal sites.

Training, research, and discretionary projects and programs.—H.R. 3046 repeals the current program, substituting provisions to permit the commissioner to make grants and contracts for education and training, multidisciplinary gerontology centers, research and development, demonstration projects, long-term care projects, mental health projects, and national impact activities relating to the elderly. The bill authorizes $45 million in fiscal year 1982 and "such sums" in fiscal years 1983 and 1984, not more than 15 percent of which may be used for national impact activities.

Community service employment for older Americans.—Current law governing SCSEPs is revised to include "weatherization activities" as an appropriate "community service" and the Northern Marianas under the definition of a state and authorize $350 million for fiscal year 1982 and such sums as may be necessary for fiscal years 1983 and 1984.

Grants for Indian Tribes.—H.R. 3046 authorizes $6 million in fiscal year 1982, $6.4 million in fiscal year 1983, and $6.8 million in fiscal year 1984 for grants to Indian tribes. The bill amends the Indian-grant program to broaden the scope of the program to include "older Indians" (current law restricts the program to Indians over age 60);

Strike provisions requiring Indian grantees to select an organization to evaluate the project and AOA-Interior consultation;

Make the provision of legal or ombudsman services permissive; and

Strike the requirement that the Indian population served directly be subtracted from base for purposes of determining the state's grant allocation.

Home maintenance and repair services.—H.R. 3046 establishes a new discretionary grant and contract authority to assist state agencies providing home maintenance and repair services for older individuals. "Such sums" are authorized through fiscal year 1984.

OLDER AMERICANS VOLUNTEER PROGRAMS

In addition, H.R. 3046 extends the foster grandparent program, the senior companion program, and the retired senior volunteer program all administered by ACTION, for an additional 2 years, through fiscal year 1983, authorizing $91.1 million in fiscal year 1982 and "such sums" in fiscal year 1983 for the other two programs.

BACKGROUND—OLDER AMERICANS ACT

The Older Americans Act of 1965 set forth objectives for assisting older Americans and established the Administration on Aging (AOA) as the primary federal service agency for older people. It also created three grant programs, authorizing grants to states for community social service projects, research and demonstration projects, and training in the field of aging.

Subsequent legislation revised and extended the program. Separate legislation in 1972 added a "Nutrition Program for the Elderly," which was in turn consolidated into Title III of the act in 1978.

Until 1973, the principal focus of activities under the act was title III, under which, at that time, funds were allotted to states for project grants, usually senior centers, within each state. By 1973, however, an office of aging had been established in every state, and some 1,500 projects had been funded under title III.

The 1973 amendments required division of states into separate planning and service areas and designation of an agency within the area for development and implementation of a plan for services to the aged. In addition, the amendments established a Na-

tional Information and Resource Clearing House to collect and disseminate information on the field of aging and a Federal Council on Aging to serve as an advocate and spokesperson on behalf of older Americans. The amendments also created the Senior Community Service Employment Program (SCSEP) to promote useful employment of the elderly.

The 1975 amendments extended the social services, nutrition, and community service employment programs and authorized provision of funds directly to Indian tribes for services to the elderly.

A major rewrite of the Older Americans Act of 1965 occurred in 1978. Amendments enacted that year provided for consolidation of the social services, senior centers, and nutrition services under a single administrative structure—the area agencies on aging. The amendments also added a separate authority under title III for home-delivered meals and provided new authority for separate social and nutrition services for federally recognized Indian tribes. In addition, a new provision required that 50% of each area agency's social services allotment be used for certain priority services including access services (transportation, outreach, and information and referral), legal services, and in-home care.

Other changes provided by the 1978 amendments included an increase, beginning in fiscal year 1981, of from 5% to 15% in the nonfederal matching requirement for social and nutrition services; institution of a three-year planning cycle for state and area agencies; establishment of a state nursing home ombudsman program using funds from the state's social services allotment; and a number of changes in the SCSEP, including improved coordination between state agencies on aging and national contractors. (This program is administered by the Department of Labor under Title V.)

OLDER AMERICANS VOLUNTEER PROGRAMS

The older Americans volunteer programs, which include the foster grandparent program, the senior companion program, and the retired senior volunteer program (RSVP), were first authorized under the 1969 Older Americans Act amendments. These three programs, administered by ACTION under title II of the Domestic Volunteer Services Act of 1973, were designed to promote volunteerism among citizens aged 60 and over and have met with moderate success.

Low-income volunteers aged 60 and over are eligible for foster grandparents and work under the sponsorship of nonprofit agencies and institutions such as schools, hospitals, and day-care centers to help children with problems resulting from physical, mental, or emotional disabilities. Volunteers work 20 hours per week and receive small financial stipends, annual physical examinations, accident and personal liability insurance, on-the-job meals, and transportation expenses.

Like the foster grandparent program, the senior companion program is open to low-income persons aged 60 and over. Senior companions provide assistance to homebound elderly citizens who, without such help, would face the possibility of institutionalization. Elderly citizens returning to community life from institutionalization are assisted by senior companions in making the adjustment to independent living. Senior companions receive the same compensation for their services as foster grandparents.

Participants in RSVP provide services which cover a wide variety of community needs, including energy conservation, housing, health, nutrition, and education. Projects are sponsored by local private and public nonprofit organizations and agencies. Participation in RSVP is open to persons aged 60 and over, regardless of income, and volunteers are entitled to reimbursement for transportation, meals, and out-of-pocket expenses related to their work.

All three volunteer programs received extension through fiscal year 1981 under the Older Americans Act amendments of 1978 (P.L. 95-478).

LEGISLATIVE HISTORY

Under the Omnibus Reconciliation Act of 1981 (P.L. 97-35) all Older Americans Act programs except senior community service employment were reauthorized for fiscal years 1982 and 1983, with $715 million provided for fiscal year 1982. A cap of $23.2 million was placed on R. & D. No changes in programs were made, but the conferees at the time stressed that revisions would be considered in later reauthorizations, leading to the current consideration of H.R. 3046.

The older Americans volunteer programs were also reauthorized for fiscal year 1982 and 1983 under reconciliation, which provided $95 million for fiscal year 1982.●

● Mr. HEFNER. Mr. Chairman, I rise in support of the Older Americans Act and commend my colleague from North Carolina (Mr. ANDREWS) for his efforts and staunch support of this legislation to continue the various programs which have meant so much to our senior citizens.

Mr. Chairman, it has been my privilege and pleasure to hold several Senior Citizens Days in my district during the past few months. This has given me a wonderful opportunity to talk personally with people and to determine what provides meaning for their lives. These are people who have worked hard all their lives to raise families but are now retired through choice or because they are physically no longer able to work at a job. They have all told me how important the meals program is to them. Many of them are unable to cook for themselves but because the meals program exists, they can receive the nutritional requirements necessary to maintain their health. The congregate meal sites also provide a place for people to get together for the warm fellowship which is so vital to all of us. Life can be terribly bleak and dreary when you live alone and when you seemingly have no further contributions to make to society. These opportunities for fellowship often mean the difference between carrying on and giving up altogether.

These elderly citizens have told me how vital the transportation system provided under the Older American Act is for them. It means that they have a measure of freedom and can take care of their business with a feeling of independence.

The opportunities for service to their community through participation in the community services employment program conveys to our senior citizens that we believe they are valuable citizens and can still make significant contributions to society.

The elderly in this country have provided leadership and guidance throughout these last years. It is because of their efforts and contributions that we can enjoy the security and prosperity we know today. Our country is still the greatest nation in the world and we cannot forsake those who have done so much before us to make it so.●

● Mr. ALBOSTA. Mr. Chairman, as a member of the Select Committee on Aging, I wish to emphasize the importance of maintaining the programs funded under the Older Americans Act. The overwhelming success and support of these programs is undebatable. This is evidenced by the senior citizens in my home district of Michigan and throughout the country who are leading fuller and more productive lives as a direct result of the programs under the Older Americans Act.

I am proud to represent a rural district of Michigan and have witnessed first hand some of the accomplishments of the Older Americans Act in my area. While rural senior citizens are by nature independent, they face some problems unique to the area in which they live. Priority services to the rural elderly should deal with access to such basic necessities as transportation and energy assistance. It is with these particular problems in mind that I look to the Older Americans Act's programs for special assistance to help alleviate this situation facing rural elderly. To help relieve the rural older American from the fear of not being able to keep a doctor's appointment or buy groceries for the coming week because no transportation is available. I commend the progress thus far and the attempts to assist the elderly with their transportation needs. But the job has just begun.

We will be closely monitoring in the months ahead where the funds earmarked for these services are going. The administration suggests that title III funds be consolidated into one grant to the States instead of three separate grants. The question that arises is if the funds are consolidated into one State grant will these moneys be used to assist seniors throughout an individual State, equally in both urban and rural areas. Or as in the State of Michigan today, will the funding be concentrated into the urban areas rather than equally distributed thoughout the State. I hope that my colleagues in the Congress will support the concept of equal distribution of these funds between rural and urban seniors alike. As a Member of this body, I pledge my full support and cooperation in advancing this principle of equal distribution of services under

the Older Americans Act. In doing so I feel that we should encourage careful review of the priorities of the act and where these moneys are directed. We all can realize through this process of reexamination and public comment that we can refine our plan for continuing the act, making it even more effective and successful. I believe it is important to retain the basic goals and existing structure of the Older Americans Act and to allow for equitable funding for both the rural and urban areas of this country.

Mr. Chairman, it is important to me and to the people of the State of Michigan that the Congress continue to focus their attention and actions to the improvement of programs such as the Older Americans Act for all seniors, urban and rural. It is only through this type of action can we enhance the achievements of the past and look toward the goals of the future of all our senior citizens.●

● Mr. BONER of Tennessee. Mr. Chairman, in 1980, there were an estimated 25 million people aged 65 or older living in the United States, and by the year 2000, it is estimated that 31.8 million Americans, or 12 percent of the Nation's population will be over the age of 65. We must be prepared to recognize and accept our responsibility to the elderly.

The Older Americans Act has provided a sense of independence and security for persons in their retirement years. The reauthorization of the Older Americans Act will allow us to renew our commitment to the elderly, who have contributed so much to our Nation.

One of the major fears of the elderly is inadequate income, and such economic pressures are forcing them to make sacrifices in such critical areas as nutrition and health care. The health and social services programs of this legislation help to provide a defense for our elderly population. The Older Americans Act has successfully provided certain home health care programs which have kept many individuals from being confined to nursing homes or hospitals. In addition, the meals program has provided for those who otherwise would not have a nutritional diet.

Of paramount importance among the many services funded through this legislation are senior citizen centers in our communities. These centers are an essential element in combating a serious problem of the aged—and that is the feeling of loneliness and isolation. The centers promote socialization with peers through congregate meals and other group activities.

Trained and experienced older people are one of our country's vast resources, and through grants to the States for elderly programs and community service employment programs, we enable them to continue to contribute and be active, participating members of society. Their involvement in programs such as Foster Grandparents, Senior Companion, and the retired senior volunteer program has benefited them as participants as well as those who they serve in our communities.

In closing, I am reminded of a statement made by former Vice President Hubert H. Humphrey, who said:

> The moral test of government is how it treats those who are in the dawn of life . . . the children, those who are in the twilight of life . . . the aged, and those who are in the shadow of life . . . the sick, the needy and the handicapped.

With the spirit of those words in mind, I urge my colleagues to join me in support of continuing the vital services provided for in the Older Americans Act.●

● Mr. EVANS of Delaware. Mr. Chairman, I rise in strong support of H.R. 3046, legislation to reauthorize the vitally important programs that serve our Nation's senior citizens, in the Older Americans Act.

Many of our older citizens are forced to live on fixed incomes, and are therefore most severely impacted by high inflation, high interest rates, and our general economic turndown. Accordingly, it is even more essential for us to maintain a strong and effective level of support for these important programs such as Meals on Wheels, Senior Centers, and other efforts to make life a little easier for our senior citizens.

In addition to these assistance programs, this legislation reauthorizes the Foster Grandparent program, Senior Companion program, and the retired Senior Volunteer program (RSVP). These efforts promote volunteerism among citizens aged 60 and over and have met with clear success. In particular, participants in the RSVP program in Delaware do an excellent job and cover an extremely wide variety of community needs, including energy conservation, housing, health, nutrition, and education. I am especially pleased to see this important program will be reauthorized and extended through 1983.

Mr. Chairman, Delaware is home for over 80,000 older Americans, and all of us in Delaware are extremely proud of their accomplishments. They have served our community and our Nation in the Armed Forces, in our schools, our hospitals, and our stores and factories as productive citizens of our country. We all owe a deep debt of gratitude to these outstanding Americans, and we should wholeheartedly support this essential measure to continue our effective Federal programs under the Older Americans Act.●

● Mr. BIAGGI. Mr. Chairman, as an original cosposor of the pending bill and a member of the Education and Labor Committee, I rise to lend my full and enthusiastic support to H.R. 3046, the Older Americans Act Reauthorization of 1981. For the past 16 years, and hopefully for many years to come—the Older Americans Act has been the centerpiece of this Nation's ppolicy for providing social and hyman services to millions of our older citizens.

We consider this legislation—and all of its key provisions—just days before the convening of the 1981 White House Conference on Aging. The fact is, the Older Americans Act grew directly out of the very first White House Conference conducted in 1961. Just 4 years later under the auspices of the Great Society programs of President Lyndon Johnson, the Older Americans Act of 1965 was enacted. It began as a $6 million social service program and today its funding level has grown close to $1 billion. It has also grown in the variety of services it offers to older Americans as well and now includes nutrition, employment, legal, and transportation, as well as educational and outreach services.

This bill H.R. 3046, will extend all programs of the Older Americans Act for an additional 3 years and will extend the number of titles in the act to seven. The length of the reauthoriazation is critical. Equally vital is the fact that passage of this legislation by the House will reaffirm total congressional support for the Older American Act remaining a categorical grant progrram as it has been from its inception. The significance of this is especially evident in 1981 with the new wave of "block grant fever" which has swept this Nation. The maintenance of the categorical status of this act is fundamental to its success.

The bill contains a number of improving amendments. The most critical of them is provision which permits State agencies to transfer up to 20 percent of its funds between title III-B and III-C. The purpose of this is to provide/needed flexibility to States in how they allocate their social service dollars. More specifically, the 1978 amendments to the Act called for title III-B to assume funding responsibilities for the supportive service related to the nutrition program under III-C. One of the most important of these services is transportation. A basic problem developoed when the funding levels for III-B did not grow at a rate sufficient to assume responsibility for services such as transportation

Consequently, States found themselves with adequate funds for nutrition but not enough money to get the people to the meal sites. The 20-percent transfer language—which I authored—should greatly relieve this problem.

In addition, H.R. 3046 eliminates one of the more contradictory provisions in the act which mandate that area

agencies on aging allocate 50 percent of their funds under title III-B for in-home access and legal services. While no one has ever disputed the importance of these services, a number of us always had problems with the Congress telling area agencies on aging how the had to spend their money. Earlier amendments to the act created the "aging network" which included area agencies as a concept. Today, there are more than 660 AAA's nationwide. They are the central focus on the local level for the development of social and human services to the elderly.

H.R. 3046 eliminates the 50 percent mandate and instead, urges that an adequate portion of funds be used. It would be my hope, as a cosponsor of this legislation, that the determination for the "adequate" portion will be that of the area agency.

Other important provisions of this legislation include an amendment which I authored in the Education and Labor Committee, which would greatly upgrade the status of the Commissioner on Aging. Presently, the Commissioner and her administration on aging is mired deep within the bureaucracy of the Department of Health and Human Services. My amendment would have elevated the Commissioner's position by giving the job directly line authority to the Secretary, rather than the Office of the Secretary, as is the present case. It is a long-overdue recognition of the importantce of this position and of course, the act, to older Americans. This amendment was approved in 1978 and almost made it into the final legislation. I contend that with older Americans being the fastest growing segment of this Nation's population—we must begin to give them something better than second-class treatment by the Federal Government.

This bill retains the grandfather clause which has helped to insure speedy delivery of nutrition services to millions under the act. The thousands of nutrition projects which provide one hot meal a day, 5 days a week, are a vital element in the overall Older Americans Act, I hope there can be a complete continuation of existing services without any major interruptions in whatever revised administrative structure is agreed upon as part of the reauthorized bill.

It is important to note that H.R. 3046 clearly rejects the so-called "consolidation" proposal proposed by the administration. Under this plan, authroizations for the home-delivered and congregate meals programs and the commodity foods program within the Department of Agriculture, would have been merged. This consoldiation would have not achieved better efficiency in terms of the delivery of nutrition services and might in fact lead to interruptions. The Committee on Education and Labor clearly went on record against a consolidation proposal and I hope that the House will accept the reported bill's language in this area.

I wish to not that the bill also allows contributions received at nutrition sites from participants to be used for both nutrition and supportive services. This is an important reform which should help us in our quest to provide a balanced and coordinated network of services to our seniors.

The committee bill also approved my amendment establishing special demonstration project in mental health. This amendment was offered on behalf of my colleague, Mr. HAMMERSCHMDT, and is reflective of the concern of the House Select Committee on Aging on which we both serve—about the mental health needs of our seniors. While the elderly make up just over 12 percent of our population—they have more than 25 percent of all the cases of mental illness in our Nation.

The authorizations provided in the committee-reported bill are a reflection of the high degree of support which our committee has for the various key service programs in the act. We felt that substantial growth in needed in these programs if we are to better fulfill the mandate of the Older Americans Act. I willl suport, with reluctance, the committee amendment which will lower the authorizations to be more in line with the Budget Reconiliation Act, but sincerely hope that we can maintain or increase appropriation levels.

Several other points in brief. While H.R. 3046 retains the 1 percent set-aside for a nursing home ombudsman program on the State level]the Senate passed Older Americans Act eliminates the specific set-aside amount. I wish to reiterate my total support for the nursing home ombudsman program and urge States to guarantee its continuation.

Finally I wish to bring to the attention of my colleagues a matter of profound concern to me. Under the terms of the Older Americans Act formula for the dstribution of funds under title III—States are awarded funds on the basis of their percentage of the 60 and over population. A total of 19 States in this Nation, including and especially my home State of New York, have registered increases in their 60 and over population—but not at a rate suficient to increase their percentage of older people thus increasing their portion of funds under the act. I am seeking to address this problem in one of two ways—either through earmarking funds from section 206(g) for a hold harmless for these States to avert service reductions, or a commitment from the administration that they will distribute some $1.4 million from these same funds, outside the existing formula to insure no reductions.

Mr. Chairman—I fully support this bill and urge its adoption.●

The CHAIRMAN. All time has expired.

Pursuant to the rule, the Clerk will read the committee amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 3046

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Older Americans Act Amendments of 1981".

DEFINITIONS

SEC. 2. Section 102(3) of the Older Americans Act of 1965 (42 U.S.C. 3002(3)) is amended by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa,".

ADMINISTRATION ON AGING

SEC. 3. (a) The third sentence of section 201(a) of the Older Americans Act of 1965 (42 U.S.C. 3011(a)) is amended by striking out "the Office of".

(b) The last sentence of section 201(a) of the Older Americans Act of 1965 (42 U.S.C. 3011(a)) is amended by inserting after "Commissioner" the first place it appears therein the following: "under section 202 (including policymaking, programmatic, regional, fiscal, administrative, and personnel responsibilities)".

FUNCTIONS OF COMMISSIONER

SEC. 4. (a) The heading for section 202 of the Older Americans Act of 1965 (42 U.S.C. 3012) is amended by striking out "ADMINISTRATION" and inserting in lieu thereof "COMMISSIONER".

(b) Section 202(a) of the Older Americans Act of 1965 (42 U.S.C. 3012(a)) is amended—

(1) by striking out "Administration" and inserting in lieu thereof "Commissioner";

(2) in paragraph (5) thereof, by inserting "education and training services (including" after "hospitalization,", by inserting "and" after "training,", and by inserting a closing parenthetical mark after "education";

(3) in paragraph (8) thereof, by inserting before the semicolon at the end thereof the following: ", and take whatever action is necessary to achieve coordination of activities carried out or assisted by all departments, agencies, and instrumentalities of the Federal Government with respect to the collection, preparation, and dissemination of information relevant to older individuals";

(4) in paragraph (12) thereof, by striking out "nonprofit"; and

(5) in paragraph (16) thereof, by striking out "nonprofit".

FEDERAL AGENCY CONSULTATION

SEC. 5. Section 203(b) of the Older Americans Act of 1965 (42 U.S.C. 3013(b)) is amended—

(1) by striking out "and" at the end of paragraph (9) thereof;

(2) by striking out the period at the end of paragraph (10) thereof and inserting in lieu thereof a comma; and

(3) by adding at the end thereof the following new paragraphs:

"(11) title I of the Higher Education Act of 1965, and

"(12) the Adult Education Act.".

NATIONAL INFORMATION AND RESOURCE CLEARING HOUSE FOR THE AGING

SEC. 6. (a) Title II of the Older Americans Act of 1965 (42 U.S.C. 3011 et seq.) is amended by striking out section 204, and by redesignating section 205 through section 214 as section 204 through section 213, respectively.

(b)(1) Section 204(d) of the Older Americans Act of 1965, as so redesignated in subsection (a), is amended—

(A) by inserting "and" at the end of paragraph (4) thereof;

(B) by striking out paragraph (5) thereof; and

(C) by redesignating paragraph (6) as paragraph (5).

(2) Section 206(b) of the Older Americans Act of 1965, as so redesignated in subsection (a), is amended by striking out "section 208" and inserting in lieu thereof "section 207".

FEDERAL COUNCIL ON THE AGING

SEC. 7. (a) Section 204(c) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out "but not less often than four times a year" and inserting in lieu thereof "at least quarterly".

(b) Section 204(g)(1) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by adding at the end thereof the following new sentence: "Such study shall be submitted to the Congress not later than March 31, 1982.".

(c) Section 204(h) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out "and", and by inserting "1982, 1983, and 1984," after "1981,".

ADMINISTRATION

SEC. 8. (a) Section 205 of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out subsection (b) thereof, and by redesignating subsection (c) and subsection (d) as subsection (b) and subsection (c), respectively.

(b) Section 205(c) of the Older Americans Act of 1965, as so redesignated in section 6(a) and in subsection (a), is amended by inserting "to the Commissioner" after "appropriated".

APPLICATION OF OTHER LAWS

SEC. 9. Section 210(a) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out ", and of title V of the Act of October 15, 1977 (Public Law 95-134; 91 Stat. 1164),".

CONTRACTING AND GRANT AUTHORITY

SEC. 10. Section 212 of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out ", where such organization" and all that follows through "such contract".

TECHNICAL ASSISTANCE AND COOPERATION

SEC. 11. Section 301(b)(2) of the Older Americans Act of 1965 (42 U.S.C. 3021(b)(2)) is amended by inserting "the Department of Education," after "cooperation of".

DEFINITIONS FOR TITLE III

SEC. 12. Section 302 of the Older Americans Act of 1965 (42 U.S.C. 3022) is amended by adding at the end thereof the following new paragraph:

"(9) The term 'education and training service' means a social service designed to assist older individuals to better cope with their economic, health, and personal needs through services such as consumer education, continuing education, health education, preretirement education, financial planning, and other education and training services which will advance the objectives of this Act.".

AUTHORIZATION OF APPROPRIATIONS FOR TITLE III PROGRAMS

SEC. 13. (a) Section 303(a) of the Older Americans Act of 1965 (42 U.S.C. 3023(a)) is amended by inserting "each of the" after "for" the third place it appears therein, by striking out "year" the last place it appears therein and inserting in lieu thereof "years", and by inserting "and 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984," after "1981".

(b) Section 303(b)(1) of the Older Americans Act of 1965 (42 U.S.C. 3023(b)(1)) is amended by inserting "each of the" after "for" the third place it appears therein, by striking out "year" the last place it appears therein and inserting in lieu thereof "years", and by inserting "and 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984," after "1981".

(c) Section 303(b)(2) of the Older Americans Act of 1965 (42 U.S.C. 3023(b)(2)) is amended by inserting "each of the" after "for" the third place it appears therein, by striking out "year" the last place it appears therein and inserting in lieu thereof "years", and by inserting "and 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984," after "1981".

ALLOTMENT; FEDERAL SHARE

SEC. 14. (a) Section 304(a)(1) of the Older Americans Act of 1965 (42 U.S.C. 3024(a)(1)) is amended by striking out "and" the second place it appears therein, and by inserting "1982, 1983, and 1984," after "1981,".

(b) Section 304(d)(1)(B) of the Older Americans Act of 1965 (42 U.S.C. 3024(d)(1)(B)) is amended by striking out "year" and inserting in lieu thereof "years", and by inserting "1982, 1983, and 1984," after "1981,".

AREA PLANS

SEC. 15. Section 306(a)(2) of the Older Americans Act of 1965 (42 U.S.C. 3026(a)(2)) is amended by striking out "at least 50 percent" and inserting in lieu thereof "an adequate proportion".

STATE PLANS

SEC. 16. (a) Section 307(a)(13)(A) of the Older Americans Act of 1965 (42 U.S.C. 3027(a)(13)(A)) is amended by striking out the comma, and by inserting before the semicolon at the end thereof the following: ", and may be made available to handicapped or disabled individuals who have not attained 60 years of age but who reside in senior citizen centers at which congregate nutrition services are provided".

(b) Section 307(a)(13)(B) of the Older Americans Act of 1965 (42 U.S.C. 3027(a)(13)(B)) is amended to read as follows:

"(B) such plan shall give primary consideration to the provision of meals in a congregate setting, except that each area agency (i) shall have authority to award funds made available under this title to organizations for the provision of home delivered meals to older individuals in accordance with the provisions of subpart 2 of part C, based upon a determination of need made by the recipient of a grant or contract entered into under this title, without requiring that such organizations also provide meals to older individuals in a congregate setting; and (ii) shall, in awarding such funds, select such organizations in a manner which complies with the provisions of subparagraph (H);".

(c) Section 307(a)(13)(C)(ii) of Older Americans Act of 1965 (42 U.S.C. 3027(a)(13)(C)(ii)) is amended by inserting ", and access to such meals when the use of such charges for access is deemed appropriate" before the semicoln at the end thereof.

(d) Section 307(a)(13) of the Older Americans Act of 1965 (42 U.S.C. 3027(a)(13)) is amended—

(1) by adding "and" at the end of subparagraph (G) thereof;

(2) by striking out "and" at the end of subparagraph (H) thereof; and

(3) by striking out subparagraph (I) thereof.

(e) Section 307(a) of the Older Americans Act of 1965 (42 U.S.C. 3027(a)) is amended—

(1) by striking out "and" at the end of paragraph (15) thereof;

(2) by redesignating paragraph (16) thereof as paragraph (17); and

(3) by inserting after paragraph (15) the following new paragraph:

"(16) provide that area agencies on aging may enter into grants and contracts with providers of education and training services which can demonstrate the experience or capacity to provide such services; and".

AVAILABILITY OF FUNDS FOR SOCIAL SERVICES AND NUTRITION SERVICES

SEC. 17. Section 308(b) of the Older Americans Act of 1965 (42 U.S.C. 3028(b)) is amended by adding at the end thereof the following new paragraph:

"(6) Notwithstanding any other provison of this title, with respect to funds received under subsection (a) and subsection (b) of section 303, a State may elect to transfer not more than 20 percent of the funds appropriated for any fiscal year between programs under part B and part C of this title, for use as the State considers appropriate. The State shall notify the Commissioner of any such election.".

AVAILABILITY OF SURPLUS COMMODITIES

SEC. 18. (a) The first sentence of section 311(a)(4) of the Older Americans Act of 1965 (42 U.S.C. 3030a(a)(4)) is amended by striking out "three" and inserting in lieu thereof "six".

(b) Section 311(b)(1) of the Older Americans Act of 1965 (42 U.S.C. 3030a(b)(1)) is amended by striking out "1981" and inserting in lieu thereof "1984".

SOCIAL SERVICES PROGRAMS

SEC. 19. Section 321(a) of the Older Americans Act of 1965 (42 U.S.C. 3030d(a)) is amended—

(1) in paragraph (1) thereof, by striking out "continuing education,";

(2) by striking out "or" at the end of paragraph (11) thereof;

(3) by redesignating paragraph (12) thereof as paragraph (13); and

(4) by inserting after paragraph (11) the following new paragraph:

"(12) education and training services; or".

REVISION OF TRAINING, RESEARCH, AND DISCRETIONARY PROJECTS AND PROGRAMS

SEC. 20. (a) Title IV of the Older Americans Act of 1965 (42 U.S.C. 3031 et seq.) is amended to read as follows:

"TITLE IV—TRAINING, RESEARCH, AND DISCRETIONARY PROJECTS AND PROGRAMS

"PART A—EDUCATION AND TRAINING

"TRAINING AND RECRUITING PERSONNEL FOR THE FIELD OF AGING

"SEC. 411. The Commissioner may make grants to any public or nonprofit private agency, organization, or institution, and may enter into contracts with any agency, organization, or institution, to assist the Commissioner in recruiting persons to enter the field of aging, training volunteers and persons employed in or preparing for employment in the field of aging (including such stipends to persons participating in training programs as the Commissioner may find appropriate), technical assistance, and other activities related to such training.

"MULTIDISCIPLINARY CENTERS OF GERONTOLOGY

"SEC. 412. The Commissioner may make grants to public and private nonprofit agencies, organizations, and institutions for the purpose of establishing or supporting multidisciplinary centers of gerontology, and gerontology centers of special emphasis.

"PART B—RESEARCH, DEMONSTRATIONS, AND OTHER ACTIVITIES

"RESEARCH AND DEVELOPMENT PROJECTS

"SEC. 421. The Commissioner may make grants to any public or nonprofit private agency, organization, or institution, and may enter into contracts with any agency, organization, institution, or individual to support research and development related to the purposes of this Act, evaluation of the results of such research and development activities, and collection and dissemination of information concerning research findings, demonstration results, and other materials developed in connection with activities assisted under this title, and conducting of conferences and other meetings for purposes of exchange of information and other activities related to the purposes of this title.

"DEMONSTRATION PROJECTS

"SEC. 422. the Commissioner may make grants to any public agency or nonprofit private organization, and may enter into contracts with any agency or organization to pay part or all of the cost of developing or operating model projects to demonstrate methods to improve or expand services to or otherwise promote the well-being of older individuals. Such projects may include projects for the development of comprehensive, coordinated systems of social services, community long-term care for older individuals, projects to meet the special housing needs of older individuals (including weatherization improvements), and other priority projects determined appropriate by the Commissioner.

"SPECIAL PROJECTS IN COMPREHENSIVE LONG-TERM CARE

"SEC. 423. (a)(1) The Commissioner may—

"(A) make grants to selected State agencies, designated under section 305(a)(1), and, in consultation with State agencies, selected area agencies on aging designated under section 305(a)(2)(A), institutions of higher education, and other public agencies and nonprofit private organizations; and

"(B) enter into contracts with any agency, organization, or institution;

to support the development of comprehensive, coordinated systems of community long-term care for older individuals, with special emphasis upon services designed to support alternatives to institutional living and the assessment of need, the development of a plan of care, and the referral of individuals, in the delivery of long-term care services, including noninstitutional and institutional services, where appropriate.

"(2) A grant under this section may be made to pay part or all of the estimated cost of the program (including startup cost) for a period of not more than 3 years, except that no funds may be used to pay for direct services which are eligible for reimbursement under title XVIII, title XIX, or title XX of the Social Security Act.

"(3) A grant made under this section shall be used for the development of programs which provide a full continuum of services. Such services may include adult day health care; monitoring and evaluation of service effectiveness; supported living in public and private nonprofit housing; family respite services; preventive health services; home health, homemaker, and other rehabilitative and maintenance in-home services; services provided by geriatric health maintenance organizations; and other services which the Commissioner determines are appropriate, and which at a minimum, provide for identification and assessment of the long-term care needs of older individuals, referral of such individuals to the appropriate services, and follow-up and evaluation of the continued appropriateness of such services with provision for re-referral as appropriate.

"(b)(1) In making grants to State under this section, preference shall be given to applicants which demonstrate that—

"(A) adequate State standards have been developed to ensure the quality of services provided;

"(B) the State has made a commitment to carry out the program assisted under this section with the State agency responsible for the administration of title XIX of the Social Security Act or title XX of the Social Security Act, or both such agencies;

"(C) the State will develop plans to finance the comprehensive program assisted under this section; and

"(D) the State agency has a plan for statewide or designated regions of the State containing provisions designed to maximize access by older individuals to long-term care services.

"(2) In awarding grants to or entering into contracts with agencies and organizations under this section, preference shall be given to applicants that possess the capability to establish community-based long-term care programs and demonstrate that a need exists for the establishment of such programs in the area to be served.

"(3) Agencies and organizations assisted under this section shall establish procedures for evaluating the program assisted under this section, with respect to the benefits accruing to persons receiving assistance, the feasibility of the administrative model used for comprehensive coordination of services including coordination with other local programs, and the comparative costs and quality of services provided, and shall submit such evaluation to the Commissioner on a periodic basis.

"(c) The Secretary shall involve appropriate Federal departments and agencies in carrying out the provisions of this section in order to assure coordination at the Federal level and to avoid duplication and shall include in the annual report to the Congress required by section 207, a report on the impact of grants made, or contracts entered into, on the experiences of grantees and contractors in meeting the requirements of this section, and on the comparative benefits and costs of projects assisted under this section.

"(d) Sums appropriated to carry out this section shall, to the extent feasible, be used to support programs equitably distributed throughout the Nation between urban and rural areas

SPECIAL PROJECTS IN MENTAL HEALTH CARE

"SEC. 424. (a) The Commissioner, after consultation with the Director of the National Institute of Mental Health and the Center for Studies of the Mental Health of the Aging, may make grants to, and enter into contracts with, any public or private nonprofit entity for projects under this section. Each such project shall include—

"(1) the location of older individuals who are in need of mental health services;

"(2) the provision of, or arrangement for the provision of, medical differential diagnoses of older individuals to distinguish between their need for mental health services and other medical care;

"(3) the specification of the mental health needs of older individuals, and the mental health and support services required to meet such needs; and

"(4) the provision of—

"(A) the mental health and support services specified in paragraph (3) in the communities; or

"(B) such services for older individuals in nursing homes and intermediate care facilities, and training of the employees of such homes and facilities in the provision of such services.

"(b) Funds may not be obligated to carry out this section for any fiscal year if funds are appropriated to carry out section 204 of the Mental Health Systems Act for such fiscal year.

"(c) For purposes of carrying out this section, there are authorized to be appropriated such sums as may be necessary for each of the fiscal years 1982, 1983, and 1984.

"NATIONAL IMPACT ACTIVITIES

"SEC. 425. The Commissioner may carry out directly or through grants or contracts—

"(1) innovation and development projects and activities of national significance which show promise of having substantial impact on the expansion or improvement of social services, nutrition services, or multipurpose senior centers, or otherwise promoting the well-being of older individuals; and

"(2) dissemination of information activities related to such programs.

"(b) An amount not to exceed 15 percent of any sums appropriated under section 431 may be used for carrying out this section.

"PART C—GENERAL PROVISIONS

AUTHORIZATION OF APPROPRIATIONS

"Sec. 431. (a) There are authorized to be appropriated to carry out the provisions of this title $45,000,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984.

"(b) No funds appropriated under this title—

"(1) may be transferred to any office or other authority of the Federal Government which is not directly responsible to the Commissioner; or

"(2) may be used for any program or activity which is not specifically authorized by this title.

"PAYMENTS OF GRANTS

"SEC. 432. (a) To the extent he deems it appropriate, the Commissioner shall require the recipient of any grant or contract under

this title to contribute money, facilities, or services for carrying out the project for which such grant or contract was made.

"(b) Payments under this title pursuant to a grant or contract may be made (after necessary adjustment, in the case of grants, on account of previously made overpayments or underpayments) in advance or by way of reimbursement, and in such installments and on such conditions, as the Commissioner may determine.

"(c) The Commissioner shall make no grant or contract under this title in any State which has established or designated a State agency for purposes of title III unless the Commissioner has consulted with such State agency regarding such grant or contract.".

(b)(1) Section 204(d)(2) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out "the appraisal of needs required by section 402" and inserting in lieu thereof "an appraisal of needs pursuant to the functions carried out by the Commissioner under section 411".

(2) Section 310 of the Older Americans Act of 1965 (42 U.S.C. 3030) is amended by striking out "section 421" each place it appears therein and inserting in lieu thereof "section 422".

EQUITABLE DISTRIBUTION OF ASSISTANCE

SEC. 21. (a) Section 506(a)(3) of the Older Americans Act of 1965 (42 U.S.C. 3056d(a)(3)) is amended by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa," each place it appears therein.

(b) Section 506(a)(4)(A) of the Older Americans Act of 1965 (42 U.S.C. 3056d(a)(4)(A)) is amended by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa,".

DEFINITIONS FOR TITLE V

SEC. 22. (a) Section 507(1) of the Older Americans Act of 1965 (42 U.S.C. 3056e(1)) is amended by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa,".

(b) Section 507(3) of the Older Americans Act of 1965 (42 U.S.C. 3056e(3)) is amended by inserting "weatherization activities;" after "efforts;".

AUTHORIZATION OF APPROPRIATIONS FOR TITLE V PROGRAMS

SEC. 23. Section 508 of the Older Americans Act of 1965 (42 U.S.C. 3056f) is amended by striking out "and" the last place it appears therein, and by inserting before the period at the end thereof the following: ", $350,000,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984".

GRANTS AUTHORIZED UNDER TITLE VI

SEC. 24. Section 603 of the Older Americans Act of 1965 (42 U.S.C. 3057b) is amended by striking out "Indians who are aged 60 and older" and inserting in lieu thereof "older Indians".

APPLICATIONS UNDER TITLE VI

SEC. 25. (a) Section 604(a)(4) of the Older Americans Act of 1965 (42 U.S.C. 3057c(a)(4)) is amended by striking out "that" and all that follows through "conduct" and inserting in lieu thereof "for".

(b) Section 604(a)(10) of the Older Americans Act of 1965 (42 U.S.C. 3057c(a)(10)) is amended to read as follows:

"(10) provide that any legal or ombudsman services made available to older Indians represented by the tribal organization will be substantially in compliance with the provisions of title III relating to the furnishing of similar services; and".

(c) Section 604 of the Older Americans Act of 1965 (42 U.S.C. 3057c) is amended by striking out subsection (d) thereof, and by redesignating subsection (e) and subsection (f) as subsection (d) and subsection (e), respectively.

ADMINISTRATION OF TITLE VI

SEC. 26. Section 605 of the Older Americans Act of 1965 (42 U.S.C. 3057d) is amended by striking out "(a)", and by striking out subsection (b) thereof.

AUTHORIZATION OF APPROPRIATIONS FOR TITLE VI

SEC. 27. Section 608(a) of the Older Americans Act of 1965 (42 U.S.C. 3057g(a)) is amended to read as follows:

"SEC. 608. (a) There are authorized to be appropriated $6,000,000 for fiscal year 1982, $6,400,000 for fiscal year 1983, and $6,800,000 for fiscal year 1984, to carry out the provisions of this title (other than section 606).".

HOME MAINTENANCE AND REPAIR SERVICES

SEC. 28. (a) The Older Americans Act of 1965 (42 U.S.C. 3001 et seq.) is amended by adding at the end thereof the following new title:

"TITLE VII—HOME MAINTENANCE AND REPAIR SERVICES

"CONGRESSIONAL FINDINGS

"SEC. 701. The Congress hereby finds that—

"(1) of the 25,000,000 older individuals living in the United States today, approximately one-third are housed in substandard, deteriorating, or dilapidated housing;

"(2) while 70 percent of such older individuals living in the United States reside in their own homes, most Federal housing assistance programs for older individuals focus on the problems of such individuals who rent their housing, and insufficient funding has been made available to assist such individuals who are homeowners;

"(3) 58 percent of older individuals who are homeowners own homes that were built before 1939;

"(4) continually increasing maintenance and energy costs have forced many older individuals to forgo necessary home repairs, thereby causing the condition of the homes of such individuals to deteriorate significantly and creating serious health and safety hazards;

"(5) upon retirement, older individuals generally undergo a reduction of income of one-third to one-half and are therefore less able to afford necessary home repairs; and

"(6) mobility and health are important determinants of the ability to undertake repairs, and, in light of the increasingly large segment of the population that is composed of older individuals, greater numbers of Americans become physically unable to make necessary home repairs each year.

"HOME MAINTENANCE AND REPAIR PROGRAM

"SEC. 702. (a) The Commissioner is authorized to make grants to, and enter into contracts with, any State agency designated under section 305(a)(1) for purposes of providing home maintenance and repair services to older individuals.

"(b) The Commissioner shall administer the program established in subsection (a) in accordance with regulations prescribed by the Commissioner and in a manner that ensures that—

"(1) in the provision of services under such program, a preference shall be given to low-income older individuals;

"(2) to an extent that the Commissioner determines to be appropriate, there shall be coordination with other Federal programs designed to provide home maintenance and repair services;

"(3) home maintenance and repair services provided under this section shall be accomplished by teams composed of individuals who are specialists in maintenance and repair and who are, to the maximum extent practicable, older individuals; and

"(4) older individuals receiving home maintenance and repair services under this section shall be provided with sufficient information to enable them to perform their own simple repairs in the future.

"HOUSING COUNSELING

"SEC. 703. The Commissioner shall administer, in coordination with the program established in section 702(a), a program of housing counseling for older individuals, which shall provide such individuals with information concerning home energy conservation, weatherization, and crime prevention programs and techniques.

"ANNUAL REPORT

"SEC. 704. The Commissioner shall annually prepare and submit to the Congress a comprehensive report concerning the housing needs of older individuals and the effectiveness of Federal housing programs in addressing such housing needs.

"DEFINITIONS

"SEC. 705. For purposes of this title—

"(1) the term 'home maintenance and repair services' means maintenance and repair of particular defects and hazards in any housing owned by, and serving as the primary residence of, any older individual, including maintenance and repair, and weatherization, designed to improve the health and safety conditions and increase the livability of such housing, but not including substantial remodeling of such housing;

"(2) the term 'low-income' means income that is not more than 125 percent of the poverty guidelines established periodically under section 624 of the Economic Opportunity Act of 1964; and

"(3) the term 'older individual' means any individual 60 years of age or older.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 706. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this title for each of the fiscal years 1982, 1983, and 1984.".

NATIONAL OLDER AMERICANS VOLUNTEER PROGRAMS

SEC. 29. (a) Section 502(a) of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5082(a)) is amended by striking out "and" after "1980," and by inserting after "1981," the following: "$28,691,000 for the fiscal year ending September 30, 1982, and such sums as may be necessary for the fiscal year ending September 30, 1983,".

(b) The last sentence of section 502(b)(2) of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5082(b)(2)) is amended by striking out "and" after "1980," and by inserting after "1981," the following: "$62,380,000 for the fiscal year ending September 30, 1982, and such sums as may be necessary for the fiscal year ending September 30, 1983,".

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 30. (a) Section 102(1) of the Older Americans Act of 1965 (42 U.S.C. 3002(1)) is amended by striking out ", Education, and

Welfare" and inserting in lieu thereof "and Human Services".

(b)(1) Section 202(a)(1) of the Older Americans Act of 1965 (42 U.S.C. 3012(a)(1)) is amended by striking out ", Education, and Welfare" and inserting in lieu thereof "and Human Services".

(2) Section 202(c) of the Older Americans Act of 1965 (42 U.S.C. 3012(c)) is amended by striking out "Action" and inserting in lieu thereof "the ACTION Agency".

(c)(1) The last sentence of section 203(a) of the Older Americans Act of 1965 (42 U.S.C. 3013(a)) is amended by striking out "purpose" and inserting in lieu thereof "purposes".

(2) Section 203(b) of the Older Americans Act of 1965 (42 U.S.C. 3013(b)) is amended—

(A) by striking out "purpose" and inserting in lieu thereof "purposes";

(B) in paragraph (1) thereof, by striking out "of 1973"; and

(C) in paragraph (8) thereof, by striking out "section 222(a)(8)" and inserting in lieu thereof "section 222(a)(2)".

(d)j Section 206(b) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out "section 308 or", and by striking out "section or".

(e) Section 209(b) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out "the amendment made by".

(f) Section 337 of the Older Americans Act of 1965 (42 U.S.C. 3030g) is amended by striking out "National Association of Title VII Project Directors" and inserting in lieu thereof "National Association of Nutrition and Aging Services Programs".

(g) Section 503(b) of the Older Americans Act of 1965 (42 U.S.C. 3056a(b)) is amended by striking out "of 1973" each place it appears therein.

(h) Section 505(b) of the Older Americans Act of 1965 (42 U.S.C. 3056c(b)) is amended—

(1) by striking out ", Education, and Welfare" and inserting in lieu thereof "and Human Services"; and

(2) by striking out the second sentence thereof.

Mr. ANDREWS (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

AMENDMENT OFFERED BY MR. ANDREWS

Mr. ANDREWS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDREWS: Page 5, beginning on line 21, strike out "striking" and all that follows through line 23, and insert in lieu thereof the following: "inserting before the period at the end thereof the following: ", $200,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984".".

Page 7, beginning on line 16, strike out "inserting" and all that follows through line 21, and insert in lieu thereof the following: "striking out "and", and by inserting after "1981" the following: ", $306,000,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984,".".

Page 7, beginning on line 23, strike out "inserting" and all that follows through page 8, line 3, and insert in lieu thereof the following: "striking out "and", and by inserting after "1981" the following: ", $319,100,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984,".".

Page 8, beginning on line 5, strike out "inserting" and all that follows through line 10, and insert in lieu thereof the following: "striking out "and", and by inserting after "1981" the following: ", $60,000,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984,".".

Page 11, line 2, insert after "services" the following: "(except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in appropriations Acts)".

Page 14, line 24, insert after "institution" the following: "(except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in appropriations Acts)".

Page 18, line 4, insert before the period the following: "(except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in appropriations Acts)".

Page 19, line 21, strike out "$45,000,000" and insert in lieu thereof "$23,200,000".

Page 22, line 5, strike out "inserting before" and insert in lieu thereof "striking out".

Page 22, line 6, insert "and inserting in lieu thereof" after "thereof".

Page 22, line 6, strike out "$350,000,000" and insert in lieu thereof "$277,100,000".

Page 22, beginning on line 7, strike out ", and" and all that follows through line 8, and insert in lieu thereof the following: "(in accordance with the provisions of section 606(b)(1)(A) of the Omnibus Budget Reconciliation Act of 1981), $293,726,000 for fiscal year 1983 (in accordance with the provisions of section 606(b)(1)(A) of the Omnibus Budget Reconciliation Act of 1981), and such sums as may be necessary for fiscal year 1984. Amounts authorized for fiscal years 1982 and 1983 also shall include the additional sums specified in section 606(b)(1)(B) of the Omnibus Budget Reconciliation Act of 1981.".".

Page 23, line 15, strike out "$6,000,000" and insert in lieu thereof "$6,500,000".

Page 23, beginning on line 15, strike out "$6,400,000" and all that follows through "year" on line 16, and insert in lieu thereof the following: "and such sums as may be necessary for each of the fiscal years 1983 and".

Page 25, line 10, insert before the period the following: "(except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in appropriations Acts)".

Page 27, strike out line 16 and all that follows through page 28, line 2, and insert in lieu thereof the following:

SEC. 29. The appropriation of funds for fiscal years 1982, 1983, and 1984 to carry out title II of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5001 et seq.) shall be made in accordance with the authorizations of appropriations contained in the amendments made by section 607(b) of the Omnibus Budget Reconciliation Act of 1981.

Mr. ANDREWS [during the reading]. Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

AMENDMENT OFFERED BY MR. JOHN BURTON TO THE AMENDMENT OFFERED BY MR. ANDREWS

Mr. JOHN L. BURTON. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. JOHN L. BURTON to the amendment offered by Mr. ANDREWS: In the matter proposed to be inserted on page 22 of the bill, beginning on line 7, by the amendment offered by Mr. ANDREWS, insert after "Act of 1981." the following:

"Amounts appropriated under this section for any fiscal year shall be used during the annual period which begins on July 1 of the calendar year immediately following the beginning of such fiscal year and which ends on June 30 of the following calendar year. The Secretary may extend the period during which such amounts may be obligated or expended in the case of a particular organization or agency receiving funds under this title if the Secretary determines that such extension is necessary to ensure the effective use of such funds by such organization or agency. Any such extension shall be for a period of not more than 60 days after the end of such annual period."

Mr. JOHN BURTON. Mr. Chairman, this amendment would provide for what our colleague, the gentleman from Vermont (Mr. JEFFORDS) talked about—the ability to continue the employment progam for the elderly.

Mr. Chairman, this amendment would provide for forward funding to continue for the jobs program for the elderly, which is one of the few jobs programs and the only jobs program in this act.

I would like to commend both the chairman, the gentleman from Kentucky (Mr. PERKINS); the ranking member, the gentleman from Ohio (Mr. ASHBROOK); as well as the gentleman from North Carolina (Mr. ANDREWS); and the gentleman from Wisconsin (Mr. PETRI) for the work they have done on this bill. It is my understanding that the amendment is accepted both by the chairman and the subcommittee chairman as well as the ranking member.

Mr. Chairman, this amendment does not affect the committee's intent to bring the bill's authorization levels in line with the Budget Reconciliation Act. My amendment simply writes into law the forward-funding mechanism which the Appropriations Committee and the Department of Labor have used in title V for over 5 years. I should note that the Budget Reconciliation Act and the House appropriations bill include the full amount needed to continue advance funding for title V.

Title V provides work and wages to over 54,200 low-income older workers. These workers perform important public services that communities otherwise might not be able to afford. These services include work in senior centers, day care for children, weatherization programs, and public libraries and schools. Over the years, both the older workers and local communities have come to rely on the title V program. This reliance will increase as other State and federally funded service programs are cut back.

It is imperative that the program continue to assure older workers an uninterrupted income and their communities a steady source of supplemental public services. But the program's success depends on the advance planning which is made possible by forward funding.

Forward-funding insures that there will be no interruptions in title V jobs even when Congress does not complete appropriations bills by the start of the fiscal year. Most title V sponsors are nonprofit organizations which cannot afford to carry these jobs on their own budgets if appropriations are delayed. Without advance funding, the older people in these jobs might be laid off every time appropriations were late. Many workers would suffer because they need their title V wages to make ends meet. We would risk their economic security if we did not guarantee continued forward-funding for title V.

This amendment is supported by the seven national title V sponsors—National Farmers Union, National Council of Senior Citizens, the National Retired Teachers Association/American Association of Retired Persons (NRTA/AARP), the National Council on the Aging, Inc. (NCOA), National Urban League, National Association Pro Spanish-Speaking Elderly and National Center for Black Aged—and by the National Association of State units on Aging, which represents State agencies that also sponsor the program. I hope that the gentleman from North Carolina (Mr. ANDREWS), who has done such a fine job on the reauthorization bill, has no objection to my amendment.

□ 1445

I will explain the reasons for this amendment

The Senate appropriation voted to eliminate the forward funding in the senior citizens service employment program which would threaten the continuity of the 54,000 part-time jobs for low-income older Americans. We can protect this program by this amendment. It is consistent with our budget reconciliation stand. It is consistent with the appropriation program that would guarantee there would be no interruption of the program.

I know that Mr. PETRI, and I would be happy to yield to the gentleman if he had a question on this; other than that, I know of no opposition to the amendment, except for a question as to why this program would be treated differently. The answer to that is that this is the only jobs program that is provided. Without forward funding, the jobs would be eliminated by the Senate action.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I would be happy to yield to my distinguished colleague from Illinois.

Mr. McCLORY. Is there an authorization funding? The gentleman mentioned the Senate Appropriation Committee. How much money is appropriated for this program that the gentleman is introducing through this amendment?

Mr. JOHN L. BURTON. This would be a continuation and a guarantee of the present program of forward funding. That would come out of the Appropriations Committee. What the Senate Appropriation Committee did is eliminated the forward funding potential, which means that the jobs program will stop and that the jobs will become unavailable.

The actual dollar amounts I do not know, but it affects 54,000 low-income elderly people who depend on this program for wages.

It is not a new action. It has always been a forward funded program.

Mr. McCLORY. If the gentleman will yield further, what was the funding then for the current year?

Mr. JOHN L. BURTON. I am getting that information in a moment.

Mr. PERKINS. Mr. Chairman, if the gentleman will yield, it is $277.9 million.

Mr. JOHN L. BURTON. The gentleman from Kentucky says it is $277.9 million.

I say that this does have the support of the gentleman from Ohio (Mr. ASHBROOK), because it would just totally disrupt the program if we do not have this provision.

Mr. McCLORY. If the gentleman will yield further, then without the gentleman's amendment, there would be no $277 million authorization or appropriation, but with the amendment it would require an appropriation of $277 million.

Mr. JOHN L. BURTON. It would allow the forward funding which is consistent with the bill that passed this House. It is consistent with the Budget Act. Without my amendment it would mean that 54,000 eligible elderly would be taking unemployment. Their jobs would be eliminated, and assuming the other body had a change of heart, they would have to start it up all over again.

It is supported by all the elderly groups, by a bipartisan group on the Aging Committee and the ranking Republican on the full committee, the gentleman from Ohio (Mr. ASHBROOK).

Mr. Chairman, I would ask for a loud "aye" vote when the time comes.

I yield back the balance of my time.

Mr. ANDREWS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do have no objection. This side is pleased to accept the amendment to the amendment, as offered by the gentleman from California (Mr. JOHN L. BURTON).

As to the amendment which I offered and to which this amendment is applicable, may I say that my amendment is offered for the purpose of bringing the authorization levels for fiscal year 1982 in line with the Omnibus Reconciliation Act of 1981 and provides that any new contract authority shall be effective only to such extent as are provided in appropriations act. These amendments have been reviewed by my friends on the other side of the aisle and I believe acceptable to them and as far as I know to everyone.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield for just one second?

Mr. ANDREWS. Yes.

Mr. JOHN L. BURTON. I would like to say to my good friend, the gentleman from Illinois, that this amendment does not affect the authorization levels from being in concert with the Budget Act.

Mr. PETRI. Mr. Chairman, I rise in opposition to the amendment to the amendment.

I differ from my distinguished ranking minority member on the full committee who is supporting this amendment.

I can understand the concern of my colleague, the gentleman from California, and the various organizations involved in this program; but I do not think it is good public policy for us to single out this particular program under the Older Americans Act for forward funding when we are not doing it for the other programs under this act.

I realize that there is some concern in the out years and I realize it would make it somewhat easier for planning, but I feel the same arguments could be made for many of the other programs under this act.

I think the merit of the program will mean that it will survive on its merits in competition with all the others for the funds that are available in future years. I do not think we should be tying our hands in this fashion.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield just for one clarification?

Mr. PETRI. Yes.

Mr. JOHN L. BURTON. This program has been the only program that has always been forward funded, so we

are continuing the practice on the jobs program. Of all the programs in the act this has always received forward funding. It is not being singled out this year for special treatment. I just wanted to make that point and I thank my friend.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. JOHN L. BURTON) to the amendment offered by the gentleman from North Carolina (Mr. ANDREWS).

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina (Mr. ANDREWS), as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. ANDREWS

Mr. ANDREWS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDREWS: Page 11, line 24, insert "(a)" after "SEC. 19.".

Page 12, line 6, strike out "(13)" and insert in lieu thereof "(14)".

Page 12, line 8, strike out "paragraph" and insert in lieu thereof "paragraphs".

Page 12, line 9, strike out "or" and all that follows through the end of line 9.

Page 12, after line 9, insert the following:

"(13) a program, to be known as 'Senior Opportunities and Services', designed to identify and meet the needs of older, poor persons 60 years of age or older in one or more of the following areas: (A) development and provision of new volunteer services; (B) effective referral to existing health, employment, housing, legal, consumer, transportation, and other services; (C) stimulation and creation of additional services and programs to remedy gaps and deficiencies in presently existing services and programs; and (D) such other services as the Commissioner may determine are necessary or especially appropriate to meet the needs of the older poor and to assure them greater self-sufficiency; or".

(b) The heading for part B of title III of the Older Americans Act of 1965 (42 U.S.C. 3030d) is amended by striking out "SOCIAL" and inserting in lieu thereof "SENIOR CENTERS AND SUPPORTIVE".

Page 7, line 21, strike out the period and insert in lieu thereof the following: ", and by striking out "social" and inserting in lieu thereof "senior centers and supportive".".

Mr. ANDREWS (during the reading). Mr. Chairman, I ask unanimous consent that this amendment likewise be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. ANDREWS. Mr. Chairman, this second amendment is a minor, but important amendment to provide permissive language for States and localities, at their discretion, to carry out a program known as the senior opportunities program as part of their part B—senior center and supportive service activity.

This program would serve the elderly poor through the development of new volunteer programs; referral of existing services such as health, employment, and transportation services; and through the development of programs to fill gaps in services.

Again, my friends on the other side of the aisle have reviewed this amendment and, I believe it is noncontroversial.

Mr. CORRADA. Mr. Chairman, I rise in support of the gentleman from North Carolina's amendment to make the senior opportunity service program an eligible activity under the Older Americans Act.

This program has been in existence since 1967 when the Economic Opportunities Act was amended to include the service as a national emphasis program. This year, with the inception of the community services block grant the specific authorization for the SOS program was repealed. Although States may choose to continue funding for this activity, through community service projects, I believe that the Older Americans Act is the more appropriate vehicle for its administration.

Senior opportunity service programs maintain information and outreach networks which seek out the poor for assistance and provide information on where they can obtain services. At senior centers, the elderly share companionship and meals with peers. They can obtain some medical services as well as transportation to doctor's offices for more serious treatment. Special buses or taxi systems provide for trips to the market, church, or service agencies.

The 199 projects funded under these programs are currently in existence in 46 States, Puerto Rico, and the Virgin Islands, serving both urban and rural populations.

I urge my colleagues to support this amendment to further consolidate programs for the elderly under the umbrella of the Older Americans Act.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina (Mr. ANDREWS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ANDREWS

Mr. ANDREWS. Mr. Chairman, I offer a third amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDREWS: Page 29, after line 23, ad the following new section:

ADDITIONAL AMENDMENTS

SEC. 31. (a) Section 673(1) of Public Law 97-35 (42 U.S.C. 2790(1)) is amended—

(1) by inserting ", and any program which received funds under section 221 or section 222 of such Act," after "Act of 1964";

(2) by inserting ", or such program lost its authority to receive funds under section 221 or section 222 of such Act," after "such Act" the first place it appears therein; and

(3) by inserting ", and such designation or authority was not reinstated before the end of such fiscal year" before the period at the end thereof.

(b) Section 675(c)(2)(A)(ii) of such public law (42 U.S.C. 9904(c)(2)(A)(ii)) is amended—

(1) by inserting "(I)" after "directly or to ";

(2) by striking out ", or to" and inserting in lieu thereof "; (II)"; and

(3) by inserting after "farm worker organizations;" the following: "or (III) any organization which administers a program which is treated as an eligible entity under section 673(1) as the result of the receipt of funds by such program under section 221 or section 222 of Public Law 88-452, as amended, for fiscal year 1981, regardless of whether such organization has a board which meets the requirements of clause (3);".

(c) Section 682(b)(4) of Public Law 97-35 (42 U.S.C. 9911(b)(4)) is amended by inserting before the period at the end thereof the following: ", to migrant and seasonal farm worker organizations, or to both such entities and such organizations".

Mr. ANDREWS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. ANDREWS. Mr. Chairman, this is simply a clarifying amendment. The amendment is merely one which makes clear the meaning of the definition of "eligible entities." It has broad support from both the majority and minority members of the Committee on Education and Labor as well, I believe, as all others. As a matter of fact, it is my understanding that there is no opposition and I move its adoption.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina (Mr. ANDREWS).

The amendment was agreed to.

Mr. McCLORY. Mr. Chairman, I move to strike the last word.

Mr. McCLORY. Mr. Chairman, I want to express my general support of this legislation. I think it can contribute to the welfare of our older Americans, providing them with many opportunities for useful activity and meaningful lives in their later years.

I especially want to support the amendment of the gentleman from North Carolina which invites the States to provide opportunity programs for older Americans, particularly service in voluntary organizations and that sort of activity in which the experience and talents of older Americans can be utilized for their benefit and for the benefit of the entire Nation.

Mr. Chairman, the Older Americans Act of 1965 was a significant piece of legislation because it gave Federal recognition to the importance of senior

citizens in the fabric of American society.

Over the years, we have passed laws that impact heavily on this age group in one way or another, and it is good that we now have an agency of the Federal Government to which we can turn for a focus on the effects our laws are having on older Americans.

Older Americans have some unique problems; they also have some unique contributions to make to society. It would be not only a tragedy for the individuals but an inestimable loss to all of us to neglect the special attributes of older Americans, for in them—as strange as this may sound—lies the hope of the future.

For this generation of senior citizens is the survival generation par excellence in the history of the world. No other generation in the recorded history of mankind has seen as many challenges as this generation of grandparents, and that is why they are such marvelous educators of today's young.

As an older American myself, I can attest to the fact that we survived two world wars. We have been witnesses in the transition of the world from a collection of nations with parochial interests to an interconnected community of riders on the planet Earth together. Increasingly, happenings in one part of the world not only affect population centers on the opposite side of the globe but affect them instantaneously, thanks to the marvel of satellite television.

Our generation has gone from horseback to jet travel. We have been beneficiaries of spectacular improvements in science and have lived to share the excitement of putting our fellow beings on the Moon.

In surviving these tremendous changes, older Americans provide living examples for the young people of today of the resiliency, adaptability, and courage of the human spirit. To steal a metaphor from Pogo, we have met the Brave New World, and she is us.

Mr. Speaker, I support the legislation providing for extension of the Older Americans Act and of three older American volunteer programs administered by ACTION. I think it is vital to keep this focus of attention on the concerns of older Americans, and as the baby boom generation advances in age, it is critical that we engage in long-range planning that will take into consideration the financial as well as the social impact upon the society of the coming change in the demographic pattern.

AMENDMENT OFFERED BY MR. RINALDO

Mr. RINALDO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RINALDO: Page 7, after line 1, insert the following:

SEC. 12. (a) Section 302(3) of the Older Americans Act of 1965 (42 U.S.C. 3022(3)) is amended by inserting after "Social Security Act," the last place it appears therein the following: "any category of institutions regulated by a State pursuant to the provisions of section 1616(e) of the Social Security Act (for purposes of section 307(a)(12)),".

Page 7, line 2, strike out "SEC. 12." and insert in lieu thereof "(b)".

Mr. RINALDO. Mr. Chairman, the amendment I am offering would correct a glaring weakness in the long-term care ombudsman program authorized under section 307 of the Older Americans Act.

Under the law, States are required to operate an ombudsman program to protect elderly Americans living in nursing homes.

Unfortunately, however, Congress left to States the option of covering boarding homes under that program.

My amendment would strengthen the law by including boarding homes that come under the provisions of the Keys amendment to the SSI program.

That amendment requires States to regulate boarding homes where a significant number of SSI recipients reside, or are likely to reside.

As ranking Republican member of the House Aging Committee, I have looked closely at the problems in boarding homes, and there is no doubt in my mind that elderly boarding home residents need the protections afforded by the ombudsman program.

In fact, Mr. Chairman, you could say there is even more need with regard to boarding homes.

While nursing homes must meet the stringent statutory and regulatory requirements under medicare and medicaid, boarding home residents are completely unprotected by Federal regulations.

It is my understanding that this amendment has been reviewed by the majority and minority sides of the committee and is acceptable to them.

I would also like to add that it has the strong endorsement and support of the distinguished chairman of the House Aging Committee, CLAUDE PEPPER.

Mr. Chairman, I would also like to point out that the amendment I am offering has been perfected after a conversation between the Aging Committee staff and the staff of the Human Resources Subcommittee.

Mr. Chairman, my amendment would strengthen the Older Americans Act and the ombudsman program, and I urge its adoption.

Mr. DENARDIS. Mr. Chairman, will the gentleman yield?

Mr. RINALDO. I would be pleased to yield.

Mr. DENARDIS. Mr. Chairman, I rise in support of reauthorizing the Older Americans Act. I strongly and enthusiastically support the bill before us known as the Older Americans Act Amendments of 1981.

I look back on my 9 years as a Connecticut State senator and count as my most satisfying accomplishments those measures which I authored and sponsored dealing with older Americans. I am practicularly proud of being the original sponsor of the tax relief for elderly program, known as the circuit breaker, which was enacted in 1974. Today, thousands of citizens in my State, including my parents, benefit from that program. In later years, I sponsored medicaid and nursing home reform legislation, including the establishment of a health and nursing home ombudsman program for Connecticut, which was made possible under the national Older Americans Act.

Therefore, I would first like to commend my colleague from New Jersey, Mr. RINALDO, for his amendment today to broaden the definition of long-term care facility under the nursing home ombudsman program to include boarding homes. This amendment will greatly improve State programs, and I strongly support it.

With respect to the Older Americans Act in general, I would offer the following evaluation and support:

The Older Americans Act of 1965 contains 10 policy goals aimed at improving the lives of older Americans in areas of income, health, employment, retirement, and community services, and provides the legislative basis for the creation of the Administration on Aging (AOA) within the Office of the Secretary of the Department of Health and Human Services. The act also establishes an authority for the following: development of programs to assist older persons—especially those who have the greatest social or economic need—through grants to States, which in turn award funds to area agencies on aging; grants to Indian tribal organizations to assist older Indians; development of research, demonstration, and training programs in the field of aging; and development of community service employment programs for low-income persons 55 years of age or older.

H.R. 3046, the Older Americans Act Amendments of 1981 provides for a 3-year extension of this valuable act with a number of significant changes. Changes in title II—Administration on Aging, include the upgrading of the Commissioner's role by requiring a direct line of authority to the Secretary, the clarification and strengthening of prohibitions against delegation of the Commissioner's functions; the removal of restrictions on profitmaking organizations; and, the delegation of authority for the National Information and Resource Clearing House for the Aging.

Changes to title III—Grants for State and community programs on aging, include permitting States to transfer not more than 20 percent of funds appropriated during any fiscal

year between programs under part B, social services and C, nutrition services; defining and emphasizing education and training services for the elderly; striking the requirement that 50 percent of social services funds be spent on three priority services, access, in-home, and legal services; giving area agencies the option to select home-delivered meal providers who may or may not also be congregate meal providers; and, permitting the use of contributions for meals to provide transportation to and from meals.

Title IV—Training, research and discretionary projects and programs, permits the Commissioner to make grants and contracts for education and training, for multidisciplinary centers of gerontology, for research and development, for demonstration projects, for long-term care projects, for mental health projects, and for national impact activities relating to the elderly.

Title V—Community service employment for older Americans, was amended to include "weatherization activities" as an appropriate "community service" and to provide for an authorized ceiling of $350,000,000 for fiscal year 1982, and such sums as may be necessary for fiscal years 1983 and 1984.

The bill amended title VI—Grants to Indian tribes, to change the definition of Indians to be served from "Indians ages 60 or over" to "older Indians," by striking the provision that the Indian grantee will select the organization to evaluate the project, by making the provision of legal or ombudsman services permissive, and by striking the requirement that a State's title III allocation be reduced by an amount attributable to the number of Indians to be served.

In addition, this bill established a new title VII—Home maintenance and repair services, providing for discretionary grants and contracts to State agencies to provide home maintenance and repair services for older individuals.

H.R. 3046 also extends the Older Americans Volunteer Programs administered by the ACTION agency for 2 years. These programs include Foster Grandparents, Senior Companion, and the Retired Senior Volunteer Program, and are designed to foster volunteerism among citizens aged 60 and over. This concept has proven to benefit multiple segments of society—both those serving and those being served.

I strongly support H.R. 3046 which provides the continuation of the vital programs under the Older Americans Act. The amendments of 1981 continue a program which has proven its effectiveness since 1965 and represents the continuing commitment of our Nation to our senior citizens.

Mr. RINALDO. Mr. Chairman, I thank the gentleman for his support and note that I very much appreciate it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. RINALDO).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ERLENBORN

Mr. ERLENBORN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ERLENBORN: Page 29, after line 23, insert the following new section:

ADDITIONAL TECHNICAL AMENDMENT

SEC. 31. Section 439(1) of the Higher Education Act of 1965 is amended by adding at the end thereof the following new sentence: "The priority established in favor of the United States by section 3466 of the Revised Statutes (31 U.S.C. 191) shall not apply to indebtedness of the Association.".

□ 1500

The CHAIRMAN. The gentleman from Illinois (Mr. ERLENBORN) is recognized for 5 minutes.

Mr. ERLENBORN. Mr. Chairman, this amendment is a minor technical amendment to the Higher Education Act relating to the Student Loan Market Association (Sallie Mae). This amendment clarifies the status of Sallie Mae debt in the event of liquidation or other reorganization under the Bankruptcy Code and corrects a technical error made during the Omnibus Reconciliation Act.

Sallie Mae is a federally chartered corporation in existence since 1972 charged with providing liquidity to financial institutions participating in the guaranteed student loan program.

During reconciliation, Congress sought to facilitate the transition of Sallie Mae from an entity totally financed through Federal Financing Bank (FFB) borrowing to one financed through the public market. Through September 30, 1982, Sallie Mae will borrow over $5,000,000,000 through the FFB. In March 1981, with the strong support of the administration, Sallie Mae agreed with the FFB, the Secretary of the Treasury and the Secretary of Education to begin borrowing in the public market. In May of this year, Sallie Mae began offering nonguaranteed discount notes directly through selected securities dealers.

As these notes were being introduced, Sallie Mae discovered a 1797 bankruptcy statute that gave the U.S. Government first priority for all debts owing it. The effect of this provision, found at 31 U.S.C. 191, is to subordinate all Sallie Mae's public borrowing to the debt owed the FFB. As a result of this provision, Sallie Mae feared there would be no market for their nonguaranteed notes.

To address this unfavorable situation, Congress amended the Higher Education Act during reconciliation, to provide that in the event of liquidation, Sallie Mae's property would be distributed according to the usual priorities established under the Bankruptcy Code. The amendment failed to address what priorities would be utilized in the event of a reorganization or other remedy for the benefit of creditors, whether under the Bankruptcy Code or otherwise.

My technical amendment would clarify the status of Sallie Mae debt and considerably ease its entry into the public marketplace.

Mr. FORD of Michigan. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the gentleman's amendment.

I would simply like to indicate that the amendment corrects an error in something that we did virtually by unanimous consent earlier this year in the reconciliation process.

The gentleman's amendment insures that Sallie Mae may continue to function as a private sector entity and be able to finance its needs in the public markets

The Reconciliation Act amendment, which was intended to correct the situation, failed to provide any certainty on the priorities in the case of reorganization or other such remedies for the benefit of creditors, whether under the bankruptcy code or other statutes. Because of this uncertainty, Sallie Mae effectively has been denied access to the public markets, which it was intended to use. This amendment merely clarifies the situation and the intent of the Higher Education Act.

● Mr. SIMON. Mr. Chairman, I rise in support of the amendment offered by my colleague, JOHN ERLENBORN of Illinois. The amendment is technical in nature and is designed to correct an error in the amendments affecting the Student Loan Market Association (Sallie Mae) which are included in the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35). The Sallie Mae amendments, which were supported by the administration and my colleagues on both sides of the aisle, were intended to assist Sallie Mae in fulfilling its original purpose—to enter the public borrowing market and cease borrowing from the Federal Financing Bank (FFB). The amendments were defective because they failed to take into account an obscure bankruptcy statute which gives the U.S. Government first priority for debts owed to it. The practical effect is to subordinate all of Sallie Mae's public borrowing to the debts owed the FFB. Unless the amendment offered by Mr. ERLENBORN is adopted, Sallie Mae will be denied access to public debt markets and will continue to be dependent upon FFB borrowing.

Sallie Mae is an integral and essential part of the federally insured student loan system. Without Sallie Mae's secondary market and warehousing capability, many small and

medium size banks would not participate in the guaranteed student loan program. In small cities and rural areas like my district in southern Illinois, no Sallie Mae means no guaranteed student loans which means no college education for many young people.

Since Congress clearly intended for Sallie Mae to function as a private corporation and to finance its needs through the public debt market, adoption of this amendment is essential. I urge my colleagues to support the Erlenborn amendment.●

● Mr. PEPPER. Mr. Chairman, I would like to take this opportunity to commend the distinguished ranking Republican member of the House Select Committee on Aging, Mr. RINALDO, for his excellent amendment to the Older Americans Act which has the effect of extending to boarding home residents protections in Federal law which were previously available only to nursing home residents. His amendment was accepted by the House on Friday, November 20.

Boarding homes are the newest class of institutional occupancy. They were created in effect by enactment of the supplementary security income program in 1972. Even though the Federal SSI provides the lion's share of the funds received by these facilities there are no Federal minimum standards which are applicable to them. The problem has become severe as every State in the Union launched an aggressive campaign to empty their State mental and other institutions and place residents in facilities which offered only board and room with SSI paying the bill.

Our committee has held numerous hearings on this topic. Our early hearings in 1975 and 1976 indicated significant poor care and abuse. Other hearings traced the movement of mental patients and the retarded into boarding homes where they often did not receive the care, services, and therapy that they needed.

In 1978 we held hearings which exposed other examples of physical abuse and neglect. A year later we began to investigate a series of boarding home fires. Some 130 people have lost their lives in such fires in 1979–81. In 1981 we began to focus on the financial abuse which takes place in some boarding homes. The U.S. General Accounting Office helped us document that there is widespread fraud and theft of patients' funds in many boarding homes because of a general lack of accountability.

As a result of these hearings our committee is currently considering legislative initiatives. Some time ago, I introduced legislation to require boarding homes to meet certain Federal minimum standards particularly relating to fire safety. We are also working on a proposal to require boarding home residents to file CPA audited cost statements with the Government in order to account for their use of Federal dollars. While this legislation waits for consideration in other committees of the Congress, Mr. RINALDO has found something that we can do which will have an immediate effect on improving the quality of life for residents in boarding homes. His amendment would extend the protections of the federally financed nursing home ombudsman program to boarding homes.

I cannot say enough about the importance of Mr. RINALDO's amendment. Even though the genesis of boarding homes is recent, there are already four times as many boarding homes as there are nursing homes and there are more people in boarding homes than in nursing homes. I would also emphasize that the States are moving the mentally retarded and children with developmental diseases and the handicapped into boarding homes at a rapid rate so that the protections offered in Mr. RINALDO's amendment have application well beyond the elderly.

I anticipate tremendous improvement in the quality of care offered in boarding homes as a consequence of the Rinaldo amendment. What this means is that for the first time a federally funded advocate will be on guard to protect the rights of the disadvantaged. This cannot but have a salutary effect.

Once again, Mr. Chairman, I would like to commend Mr. RINALDO and would like to make it known that I am strongly in support of his amendment. Mr. RINALDO is an extremely valuable member of our committee.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. ERLENBORN).

The amendment was agreed to.

AMENDMENT OFFERED BY MS. OAKAR

Ms. OAKAR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Ms. OAKAR: Page 10, line 20, strike out "(17)" and insert in lieu thereof "(18)".

Page 10, line 22, strike out "paragraph" and insert in lieu thereof "paragraphs".

Page 11, line 2, strike out "and" and all that follows through the end of such line.

Page 11, after line 2, insert the following:

"(17) provide assurances that, if a substantial number of the older individuals residing in any planning and service area in the State are of limited English-speaking ability, then the State will require the area agency on aging for each such planning and service area—

"(A) to utilize, in the delivery of outreach services under section 306(a)(2)(A), the services of workers who are fluent in the language spoken by a predominant number of such older individuals who are of limited English-speaking ability; and

"(B) to designate an individual employed by the area agency on aging, or available to such area agency on aging on a full-time basis, whose responsibilities will include—

"(i) taking such action as may be appropriate to assure that counseling assistance is made available to such older individuals who are of limited English-speaking ability in order to assist such older individuals in participating in programs and receiving assistance under this Act; and

"(ii) providing guidance to individuals engaged in the delivery of social services under the area plan involved to enable such individuals to be aware of cultural sensitivities and to effectively take into account linguistic and cultural differences; and".

Ms. OAKAR (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Ms. OAKAR. Mr. Chairman, this amendment would amend the Older Americans Act of 1965 to include older Americans who have been excluded from outreach services because they do not speak English. Specifically, there are more than 3 million American citizens who are foreign born and past the age of 65. For the most part, these are people who have immigrated from Europe and Asia many years ago, and still speak their native tongue, although most of them are American citizens. The language disabled and elderly cannot communicate with the providers of services, and therefore, very often go without them. Services such as nutrition, housing, transportation, health and social services are vital and necessary, especially for the elderly.

The amendment would provide assurances that if a substantial number of the older Americans, residing in any planning and service area in the State, are of limited English speaking ability, the State would assist the area agency to cooperate for each planning and service area to:

First, deliver outreach services by workers who are fluent in the language spoken by a predominant number of such people; and

Second, designate an individual employed by the area agency on aging to include as his or her responsibilities the providing of appropriate counseling assistance to these people and assisting them in receiving and participating in programs provided under the Older Americans Act.

Mr. Chairman, This would be a positive signal to our seniors who are Italian, Polish, Hungarian, Ukrainian and others in ancestry that we care about them and indeed want them to fully partake in this wonderful act. There is no budget impact and I urge the amendments adoption.

I would urge my colleagues to support the amendment, and I want to again congratulate the chairman of the subcommittee who has done such

a beautiful job with respect to the Older Americans Act, and thank him publicly for all the great work that he has done, and to express how grateful our older people are in Cleveland, Ohio, for the work that he has done in respect to this act.

Mr. ANDREWS. In view of the accolades of the gentlewoman, I could hardly oppose the amendment. But seriously, we think it to be a good amendment, and we appreciate your support.

Ms. OAKAR. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Ohio (Ms. OAKAR).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DAUB

Mr. DAUB. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DAUB: Page 12, line 6, strike out "paragraph (13)" and insert in lieu thereof "paragraph (14)".

Page 12, line 8, strike out "paragraph" and insert in lieu thereof "paragraphs".

Page 12, line 9, strike out "or" and the closing quotation marks and period which follow.

Page 12, line 9, insert the following:

"(13) crime prevention services and victim assistance programs for older individuals; or".

Mr. DAUB (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. DAUB. Mr. Chairman, the purpose of this amendment is to authorize crime prevention services and victim assistance programs for older individuals under the social services title of the Older Americans Act. No additional funding is being asked to implement this amendment. However, I believe we should give States and local area agencies on aging the flexibility and the option to spend their title 3B social services moneys on programs most needed at the local level.

Even in Nebraska, the fear of crime stalks the elderly. I am especially concerned about the devastating impact that crime and the fear of crime has on the lives of older Americans. In my view, an effective anticrime program would encompass stiffer penalities for those criminals who prey upon defenseless older people and more public community involvement in crime prevention. However, this amendment gives those charged with the responsibility to coordinate services for the elderly the opportunity to find creative uses for the Federal dollars we give them. Hopefully this amendment will be a step in the right direction toward restoring a sense of security in our local communities for our older citizens.

Mr. Chairman, this amendment is patterned after one offered in the other body by the distinguished chairman of the Special Committee on Aging. It is an addition which deserves to be added to our version of the Older Americans Act.

Mr. ANDREWS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, there is some confusion that I cannot clarify. Mr. TRAXLER, of Michigan, had, I believe, printed this amendment in the RECORD earlier this week and had spoken to me about it. We had agreed to accept his amendment.

Is this the same amendment?

Mr. TRAXLER. Mr. Chairman, will the gentleman yield?

Mr. ANDREWS. I yield to the gentleman from Michigan.

Mr. TRAXLER. With one small difference. My amendment provides for personnel in addition to the provision for security devices.

Mr. DAUB. If the gentleman would yield, it is a different amendment under a different title.

Mr. TRAXLER. The gentleman's amendment is in title III, is it not?

Mr. DAUB. Title III-B.

Mr. TRAXLER. Could the gentleman reference me to the page and to the line that he is amending?

Mr. DAUB. Yes. Page 12.

Mr. TRAXLER. Line 2?

Mr. DAUB. It would be line 3, with a change of paragraph 14, and then at line 9, at point 12.

Mr. TRAXLER. The gentleman's amendment is essentially the same as mine, with one minor difference. I am not sure what kind of a parliamentary situation we find ourselves in as a result of that.

My amendment is to page 12, line 2.

I just want to compliment the gentleman for offering the amendment. We have no problem from a parliamentary standpoint. I congratulate the gentleman on his initiative. I would certainly join with him on his fine amendment. The gentleman will find that my amendment does just a bit more than his. I know he will join with me in mine.

Mr. DAUB. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The gentleman from North Carolina (Mr. ANDREWS) controls the time.

(On request of Mr. TRAXLER and by unanimous consent, Mr. ANDREWS was allowed to proceed for 1 additional minute.)

Mr. DAUB. Mr. Chairman, will the gentleman yield?

Mr. ANDREWS. I yield to the gentleman from Nebraska.

Mr. DAUB. I thank the gentleman for yielding.

Mr. Chairman, I compliment the gentleman as well and, hoping there is no collision course, will support his initiative and commend him for his insight as well.

Mr. ANDREWS. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Nebraska (Mr. DAUB).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PETRI

Mr. PETRI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PETRI: Page 7, strike out line 15 and all that follows through page 8, line 10, and insert in lieu thereof the following:

SEC. 13. (a) Section 303(a) of the Older Americans Act of 1965 (42 U.S.C. 3023(a)) is amended to read as follows:

"SEC. 303. (a) There are authorized to be appropriated $685,100,000 for fiscal year 1982, and such sums as may be necessary for each of the two succeeding fiscal years, for the purpose of making grants under this title.".

(b) Section 303 of the Older Americans Act of 1965 (42 U.S.C. 3023) is amended by striking out subsection (b), and by redesignating subsection (c) as subsection (b).

(c) Section 303(b) of the Older Americans Act of 1965, as so redesignated in subsection (b), is amended by striking out "parts B and C of".

Page 8, strike out line 12 through line 15, and insert in lieu thereof the following:

SEC. 14. (a) The first sentence of section 304(a)(1) of the Older Americans Act of 1965 (42 U.S.C. 3024(a)(1)) is amended by striking out "parts B and C for fiscal years 1979, 1980, and 1981" and inserting in lieu thereof "this title for each fiscal year".

(b) Section 304(b) of the Older Americans Act of 1965 (42 U.S.C. 3024(b)) is amended by striking out "part B or C" and inserting in lieu thereof "this title".

Page 8, line 16, strike out "(b)" and insert in lieu thereof "(c)".

Page 8, line 19, insert before the period the following: ", and by striking out "parts B and C" and inserting in lieu thereof "this title".".

Page 11, strike out line 3 through line 14 (and redesignate the subsequent sections, and any references to such sections, accordingly).

Mr. PETRI (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. PETRI. Mr. Chairman, this amendment will create a single authorization for all services provided to senior citizens under title III of the Older Americans Act. The purpose of the amendment is to simplify the existing Federal structure of the program, eliminate unnecessary reporting and paperwork requirements, and to increase program flexibility and coordination on the State and local level.

Under existing law, the act contains separate authorizations for social services (title IIIB), congregate nutrition programs (title IIIC-I), and home-delivered meals (title IIIC-II). Separate appropriations are made for these au-

thorizations which are then distributed to the States. The problem is that the needs of senior citizens in the various States differ greatly and the existing structure of separate allocations has sometimes inhibited the ability of State and local area agencies on aging to serve their elderly populations.

The committee reported bill makes a small, but significant step toward eliminating the inflexibility under existing law by permitting fund transfers between social services and nutrition up to 20 percent. Unfortunately, H.R. 3046 does not address the problem of unnecessary reporting and paperwork. In fact, because the 20-percent transfer provision would require additional accounting and reporting requirements, the paperwork burden on the Federal, State, and local levels would increase.

I would expect this added burden would act as a disincentive in some areas. My amendment would avoid this unnecessary expense by consolidating the title III authorizations into a single allotment to the States. With these funds, States would provide services to senior citizens in much the same way as under the existing program. One main difference, however, would be that coordination and effectiveness would be improved. Under existing law, for example, there may be funding available for serving a certain number of meals in the congregate nutrition program, but if there are not funds available for providing transportation to and from the meal site, the program will fail to meet the most isolated, needy persons. Social service funding is also used widely to provide nutrition-related services such as senior centers, homemaker services, home health care, and information and referral. Without these supportive services, a nutrition project becomes little more than a soup line.

One concern that has been raised regarding the title III consolidation is that some irresponsible State agencies on aging will abuse the new flexibility granted under this amendment to use all or practically all their funds for one social service, thus defeating the purpose of the act. I do not share this concern for the following reasons:

Experience under the act since 1965 suggests that State and area agencies on aging can be trusted not to abuse discretion granted under the act.

The existing recognition of priority social services under title IIIB, as amended by the committee reported bill is maintained. Thus, even though a transfer of all funds from social services to nutrition is conceptually possible, the requirement that "an adequate portion" of funds be spent on priority services would continue to be a restriction in State and local discretion.

The Administration of Aging in Washington will continue to have responsibility for reviewing State aging plans and thus will be able to deter a State from abusing its discretion.

Consolidation is in the best interest of our Nation's elderly population. I urge its adoption.

□ 1515

Mr. RINALDO. Mr. Chairman, will the gentleman yield?

Mr. PETRI. Yes, I will.

Mr. RINALDO. It is my understanding that the amendment offered by the gentleman from Wisconsin would increase the flexibility of State units on aging and local area agencies on aging; is that correct?

Mr. PETRI. That is absolutely correct, and that means we are going to be able to, in a time of some budget restraint, do a better job of stretching the dollars that are available to meet the needs as they develop from area to area and State to State across the country.

Mr. RINALDO. It is also my impression that, with this increased discretion and flexibility, local area agencies and the States themselves would be better able to meet the needs of the elderly in their areas; is that correct?

Mr. PETRI. I think that is right, and less money will be eaten up in meeting sterile paperwork requirements.

Mr. RINALDO. It is also my understanding that, through this amendment, Congress would be reducing the administrative costs and paperwork burdens on aging officials and increasing the effective use of title III funds. Would the gentleman agree with that statement?

Mr. PETRI. Yes I would, and I think it will mean more of the funds we will appropriate will go to reach the people we are appropriating the funds for, the elderly people, rather than being eaten up in administrative overhead.

Mr. RINALDO. Mr. Chairman, if the gentleman would yield further, I would like to read a statement from an area agency on aging in my State in response to a survey I conducted earlier this year. In that survey, I asked aging offices whether they supported the administration's proposal to consolidate parts B and C of title III of the Older Americans Act. Twenty out of twenty-two offices replied that they supported this change—virtually the entire aging network in my State. One office said specifically:

It would allow us the opportunity to allocate what we think should be going for nutrition, not what someone in Washington thinks they should get.

Mr. Chairman, I believe the gentleman's amendment would help us in our efforts to meet the needs of the elderly. I commend him for offering it and urge its adoption.

Mr. PETRI. I thank the gentleman.

Mr. RATCHFORD. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, first of all, again, as I did during general debate, I would commend the gentleman from Wisconsin for his sensitivity, his concern, and his involvement in the development of the reauthorization of the Older Americans Act. He has made a major and positive contribution.

I feel, however, that the language sought here is a case of good intention and bad impact. Let me be very specific. What we are talking about is bringing together three categories, congregate meals of the type that are served in the senior centers or at meal sites; second, homebound meals; and third, other services. On the surface it looks fine, but what is the impact?

I found, as commissioner on aging in the State of Connecticut, that without the earmarking for homebound meals, the money simply would not go in that direction. The money would end up in the congregate sites. They are larger. They are more populous, more popular with the mayors and selectmen, and therefore, in that effect they are good, but there are other purposes to be served. If we do not earmark for homebound meals my concern is that the thrust for home services of the type referred to by President Reagan in his Presidential press conference of a week ago simply will not develop. If the meals are not earmarked for homebound, they are not going to go to homebound. If you do not have the meals, you are not going to have the home health care and you, therefore, are going to force, in my judgment as a former commissioner of these programs, more people into nursing homes and hospitals.

So, it has that negative effect. Second, you eliminate the thrust of other services at the meal site. Why is that significant? Meal sites are important, but so is health screening so is medical service, so is transportation, so is medicare counseling, so is advice on social security. Again, if you lump those other services, social services, if you will, into one pot, those services, in my judgment, are not going to be there.

So, the amendment on the face of it is positive, it is attractive in a period of consolidation, but I want to say to the Members that administrative costs in the aging network are low. The programs are run mostly at the regional and local level. We are not looking at a high percentage, but what we do here is to take away, in my judgment, a commitment to the development of home-bound services and an elimination of those other services that make congregate meals more than a good meal, as important as that is.

For these significant reasons I think the amendment would detract from a good act, and therefore I oppose it.

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of

words, and I rise in strong opposition to this amendment.

Mr. Chairman, I certainly agree with my colleague from Connecticut. One of the problems with block grant approaches is that you never know what they are really going to do with the money, and so we do not know, for example, if those people who must reside at home, who are people who are in terrific need of ambulatory care, and they are the ones that need to have that meal coming to their homes because maybe they are invalids, would even be able to participate any longer in the program, because this would be optional. The planners on the local level could decide what they wanted to do with the variety of specified programs that this act has.

I just want to tell the Members that is a very difficult thing to do because we are seeing—we are seeing—let us be honest about it, that our most vulnerable people like those who live on social security, and the poorest people who live on social security, like the ones who partake of the minimum benefit, are the ones who are really getting their kinds of income and services decreased the most. I want this committee to know that if we accept this amendment, I will really bet that the people who really lose these services and the people who really lose the health care and the meals, and so forth, are the ones who are our poorest elderly. Frankly, most of them happen to be women between 70 and 90 years old. I perceive this is a dangerous amendment, and I hope it is solidly rejected.

Mr. ERLENBORN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, it seems to me that the objections to this amendment are based on the assumption that those who are the administrators of the programs for the aged are antagonistic to the needs of the aged. I just do not believe that that is true. I think that those at the area and local level who administer these programs are sensitive to the needs of the aged and the poor, and are trying in their best way to meet those needs.

Now, these separate, narrow, categorical programs, are based on the assumption that we in Washington know better how to assess the needs of each local and community level and how to allocate the funds for those needs. Again, I think this assumption is false. I think the local administrators can assess the needs of the poor, can allocate the resources in a better fashion than we of the Congress or Federal bureaucrats.

So, I strongly support the amendment offered by the gentleman from Wisconsin. It continues all of the programs currently within the law. It does not diminish the funds available, but actually will make more funds available for the delivery of services by reducing the cost of the overhead, reducing the paperwork, and will allow each of the local area administrations to design a program uniquely for the needs of the poor and the needy and the elderly in their local areas.

So, Mr. Chairman, I hope that the amendment is adopted.

Mr. PEPPER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to this amendment.

Mr. Chairman, I will take only a minute. I am opposed to this amendment, as I think those are who want to see the elderly people of this country get all the assistance that can be provided to them. This amendment, although offered undoubtedly in good faith and with good intentions, weakens the present law and makes conditions less desirable, less meaningful for the elderly than they are under present law. I hope my colleagues will not agree to the amendment.

Mr. ANDREWS. Mr. Chairman, I move to strike the requisite number of words, and I rise to speak against the amendment.

Mr. Chairman, I, too, with some hesitancy speak against the amendment. I have such respect for its propounder that I regret to do so, but I do believe that it is a harmful amendment. I do not believe it is a destructive amendment, and I know it is not intended to be either. But, there are problems with it, and may I say that at one point it is my understanding—well, I know—the administration appeared before our subcommittee in favor of some further flexibility given to local authorities in terms of using certain moneys provided in each of these three sections, perhaps to be taken from there and put elsewhere.

So we did that. We have in the bill for the first time, there has been no flexibility until now. We agreed to a 20 percent local discretion flexibility which is in the present act, and since that time let me share with the Members that we have heard no objection to the current bill in this regard from the administration, from any State agency, from any area agency, from any local program. I know of no one other than the two gentlemen—three gentlemen I believe, who have spoken for it, who want this.

The problem is this, and if I may, I say this especially to Mr. ERLENBORN, for whom I have such great respect, and in terms of the remarks he made today giving the local authority—it is like the joke about LeRoy saying, "I don't want the ball." These local people are put under tremendous pressures because in many areas they do not have enough money to feed those who are knocking on the door at the congregate site. They can feed that person much cheaper than they can get the necessary vehicle and driver and go away from the site, perhaps many miles, to someone who is shut in, who is much more deserving perhaps. They make that decision still, but that costs more. So, just the politics of it are such that it is hard to turn away a person at the door. They could feed perhaps 20 of them for what it is going to cost us to deliver that one meal and health service out to that shut-in person.

So, I do not think these local people want the authority. It puts too much local pressure on them to serve more people and hence not serve those who are further away. I think this could be very harmful from that point. I know of no one who is for it except the distinguished three or four gentlemen, and I urge the committee to not accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. PETRI).

The amendment was rejected.

AMENDMENT OFFERED BY MR. COLEMAN

Mr. COLEMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COLEMAN: Page 14, line 12, insert before "and" the following: "projects to improve transportation systems for the rural elderly,".

Mr. COLEMAN. Mr. Chairman, I have an amendment at the desk. This amendment adds improved transportation systems for the rural elderly to the list of eligible demonstration projects funded by the Commissioner under title IV. The purpose of the amendment is to strongly encourage the Commissioner to fund demonstation projects which can be replicated by local transportation projects serving the elderly. The amendment has no effect on the authorization for title IV.

As a member of the Subcommittee on Human Resources representing a large portion of rural north Missouri, I have long been aware of the severe lack of adequate public transportation in small towns and rural areas. During the 96th Congress, the subcommittee held a hearing in Kansas City focusing exclusively on the transportation problems of elderly persons. Among the findings of the hearing were the following:

That small towns and rural areas almost uniformly are not served by adequate public transportation systems.

Steadily rising costs of owning and operating a car have led an increasing number of the rural elderly to give up or severely limit driving their private cars.

Increasingly, older people want to stay in their own homes in their own communities rather than move to more urbanized areas or nursing homes. Providing adequate transporta-

tion in rural areas thus can actually reduce Government expenditures by reducing the number of people unnecessarily going into nursing homes or into other forms of institutionalized care.

The forced isolation of many rural elderly has had a devastating effect on their mental well-being. Providing transportation to enable isolated elderly persons to maintain friendships, participate in senior center social services, and remain active in their communities can thus play a vital role in the lives of isolated elderly persons.

These findings convinced me that transportation should continue to be a high priority under the Older Americans Act. Visits with a number of transportation providers, including the Older Americans Transportation Service and Metropolitan Dial-a-Ride in the Kansas City area, have convinced me that demonstration projects are needed. Such demonstration projects can help existing programs improve their services and can serve to encourage communities without transportation systems for older Americans to establish them.

Among the problems in rural elderly transportation, is one that I especially hope would be addressed in demonstration projects funded under this amendment. The problem is how to improve coordination of services. Transportation services for the rural elderly are often limited by extreme specialization of the transit provider. In other words, an organization may provide one type of transit service to a small population for a limited purpose, but may never consider offering other services to other populations. This results in downtime or ineffective use of transit vehicles. Coordinating efforts among transportation providers would be one solution to the problem of maximally utilizing available transportation resources.

Mr. Chairman, I urge adoption of the amendment.

□ 1530

Mr. ANDREWS. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to the gentleman from North Carolina.

Mr. ANDREWS. Mr. Chairman, this side has no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. COLEMAN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. TRAXLER

Mr. TRAXLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TRAXLER: Page 12, after line 2, insert the following new paragraph (and redesignate the subsequent paragraphs accordingly):

(2) in paragraph (4) thereof—

(A) by inserting "(A)" after "including";

(B) by inserting "(i)" after "designed";

(C) by striking out "or" and inserting in lieu thereof "; (ii)"; and

(D) by adding at the end thereof the following: "or (iii) to prevent unlawful entry into residences of older individuals, through the installation of security devices and through structural modifications or alterations of such residences; and (B) the provision of security personnel who would be responsible for maintaining and monitoring security systems and for otherwise providing security against unlawful entry into residences of older individuals;".

Mr. TRAXLER (during the reading). Mr. Chairman, the amendment was printed in yesterday's RECORD, and, therefore, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. TRAXLER. Mr. Chairman, my amendment makes two simple changes that are designed to help protect older Americans from illegal breakins. It would allow title III part B social services funds to be used to strengthen security in senior housing through the installation of security devices and by providing for security personnel to monitor security systems and otherwise protect the residents from unlawful entry.

We hear more and more about senior citizens being the victims of crime. The rise of crime against older persons has had a devastating effect. In all too many cases, the fear of crime has made older persons prisoners in their own homes, and for many the fear does not subside once they are inside. Crime, and the fear of crime, is a greater problem in some areas than in others, but nonetheless, it is a growing problem for older Americans. It is certainly a problem which should be of concern to this Congress.

By this amendment, I am not mandating that funds be spent for these purposes, but I am allowing area agencies on aging to use social services funds for security purposes if they conclude that providing for this protection is one of the area's high priorities. For example, in some areas general police protection, and even security guards for senior housing complexes, have suffered personnel reductions because of the elimination of CETA public service jobs. In such cases, older Americans are being denied the protection against crime that they either used to have or have long been in need of. Breakins have occurred and many older persons no longer feel safe even within their homes. This is a tragic situation.

My amendment would enable area agencies to respond to critical needs for security devices (such as locks or alarm systems) and security personnel for senior complexes so that older individuals may at least feel safe within their own homes.

Mr. Chairman, I would like to point out that this amendment does not authorize any increase in funding levels, it does not create any new program, and it does not mandate that any funds be used for security purposes over other priority needs. It simply allows area agencies to devote social services funds to security needs if the agencies determine it is a priority within its own area.

I believe it is very important that area agencies be able to respond to the security needs of seniors and I hope that my amendment will receive the support of members of the Education and Labor Committee and of this entire House.

I am grateful to the senior citizens of Bay City, Mich., for bringing this problem to my attention and suggesting this amendment. I hope it becomes law.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. TRAXLER. I yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of Congressman TRAXLER's amendment to the Older Americans Act which would allow area agencies on aging to use funds to acquire security devices for individual homes and senior citizen's centers to hire security personnel for senior citizen's centers.

There is no question that incidents of crime are on the rise across our Nation. Furthermore, there is no disagreement that older Americans are the most common victims of senseless robberies and violent muggings. One out of five elderly who live in public housing can expect to be attacked. The likelihood of victimization is as high for older Americans who live alone.

Crime against one of the most vulnerable sectors of our society—senior citizens—is not a partisan issue. Rather, crime and the fear of crime is a potential threat to all Older Americans. It crosses political, socioeconomic, and cultural boundaries.

As you may be aware, as a member of the Housing Subcommittee, I introduced and had adopted public housing anticrime amendments to the 1980 Housing and Community Development Act. This is the only national crime prevention program that addresses the unconscionable crime rate in public housing estates. This program was supposed to combine Federal intragency cooperation with local contributions; $10 million is available. Mr. Chairman, for the record and as an aside to my support of Congressman TRAXLER's admirable effort to assist the older Americans of this Nation, the Secretary of HUD has not yet

chosen to spend 1 penny of the moneys provided.

As reprehensible as I find this nonaction which so unfairly impacts on the lives and safety of the elderly who reside in federally assisted housing, I enthusiastically support and ask all Members of this body to support my colleague from Michigan amendment to the Older Americans Act. Our endorsement of this provision will not only provide peace of mind for thousands of senior citizens, but also may serve to send a message that it is the sense of Congress that all of our elderly must be protected including those who reside in public housing estates.

Mr. TRAXLER. Mr. Chairman, I commend the gentlewoman from Ohio (Ms. OAKAR) for her fine statement, and I deeply appreciate her support. We are all acquainted with the tremendous support she has demonstrated for America's seniors.

Mr. DAUB. Mr. Chairman, will the gentleman yield?

Mr. TRAXLER. I yield to the gentleman from Nebraska.

Mr. DAUB. Mr. Chairman, I thank my colleague for yielding.

Not only do I thank the gentleman for his amendment but I appreciate its specificity and commend him for his intention. As I know my colleague recalls, the elimination of the Law Enforcement Assistance Administration moneys makes this particular amendment, as well as my amendment just passed, which I think we agree are mutually compatible and not exclusive, even more important.

So I commend the gentleman for his good work and urge my colleagues to support him in adopting this amendment to the act.

Mr. TRAXLER. Mr. Chairman, I thank the gentleman from Nebraska (Mr. DAUB) for his statement, and he certainly is totally correct. The amendments are compatible and not exclusive. I trust the conferees will agree on them, and I thank the gentleman for his endorsement.

Mr. ERLENBORN. Mr. Chairman, I move to strike the last word.●

Mr. ERLENBORN. Mr. Chairman, I would like to direct an inquiry to the gentleman from Michigan (Mr. TRAXLER), the author of the amendment.

From the colloquy that I heard earlier on the amendment offered by my colleague, the gentleman from Nebraska (Mr. DAUB), it sounded as though the gentleman from Michigan (Mr. TRAXLER) was of the opinion that the Traxler amendment and the Daub amendment were identical. Now, are we adopting two amendments that do the same thing, or was the gentleman possibly mistaken during the earlier colloquy?

Mr. TRAXLER. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Michigan.

Mr. TRAXLER. Mr. Chairman, I am pleased to report to the gentleman that I was mistaken. I did not, of course, have a copy of the gentleman's amendment, and I was basing my statement on his remarks.

The amendments are compatible; they are not exclusive. The gentleman and I both understand that we have a mutual concern and have sought different solutions for it and they track perfectly together. I appreciate the gentleman's clarifying that point.

Mr. ERLENBORN. Mr. Chairman, I thank the gentleman for that clarification for the record.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. TRAXLER).

The amendment was agreed to.

Mr. RATCHFORD. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I know that we are coming close to the vote on final passage, and I would commend the subcommittee chairman and the committee for the work they have done in a bipartisan fashion.

I know also that in one section of the bill, section 2069, we are proposing a new distribution of funds, and while I do not propose to offer an amendment to change that, I would point out that it would have the impact in about 19 States, including the State of Connecticut, of potentially reducing funding under that approach.

I would say to my good friend, the subcommittee chairman, who has done such a magnificent job, knowing that we are going to conference, that I would hope he will work with States like Connecticut and the administration to see to it that as we move forward, no one State is penalized in the process.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. If there are no further amendments, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the Chair, Mr. RAHALL, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3046) to amend the Older Americans Act of 1965 to extend the authorizations of appropriations contained in such act, and for other purposes, pursuant to House Resolution 279, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ANDREWS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 379, nays 4, not voting 50, as follows:

[Roll No. 329]

YEAS—379

Addabbo	Clinger	Evans (IN)
Akaka	Coats	Fary
Albosta	Coelho	Fascell
Alexander	Coleman	Fazio

□ 1545

The Clerk announced the following pairs:

Mr. Biaggi with Mr. Edwards of Alabama.
Mr. Reuss with Mr. Kindness.
Mrs. Chisholm with Mr. Schulze.
Mr. Foley with Mr. Weber of Ohio.
Mr. Ginn with Mr. Duncan.
Mr. Mollohan with Mr. Latta.
Mr. Simon with Mr. McCloskey.
Mr. Dicks with Mr. Myers.
Mr. Jones of North Carolina with Mr. Rousselot.
Mr. Daschle with Mr. Oxley.
Mr. AuCoin with Mr. Lott.
Mr. Clay with Mr. Beard.
Mr. Howard with Mr. Burgener.
Mr. Santini with Mr. Hillis.
Mr. Garcia with Mr. Quillen.
Mr. Early with Mr. Pritchard.
Mr. Mattox with Mr. Paul.
Mr. Bowen with Mr. Hagedorn.
Mr. Moffett with Mr. Roth.
Mr. Bedell with Mr. Hansen of Idaho.
Mr. Fish with Mr. Wampler.
Mr. Brown of Ohio with Mr. Wylie.
Mr. Rudd with Mr. Goldwater.
Mr. Schumer with Mr. Williams of Ohio.

Mr. DANIEL B. CRANE changed his vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. ANDREWS. Mr. Speaker, pursuant to the provisions of House Resolution 279, I call up from the Speaker's table the Senate bill (S. 1086) to extend and revise the Older Americans Act of 1965, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. ANDREWS

Mr. ANDREWS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ANDREWS moves to strike out all after the enacting clause of the Senate bill (S. 1086) and to insert in lieu thereof the provisions contained in the bill, H.R. 3046, as passed, as follows:

SHORT TITLE

SECTION 1. This Act may be cited as the "Older Americans Act Amendments of 1981".

DEFINITIONS

SEC. 2. Section 102(3) of the Older Americans Act of 1965 (42 U.S.C. 3002(3)) is amended by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa,".

ADMINISTRATION ON AGING

SEC. 3. (a) The third sentence of section 201(a) of the Older Americans Act of 1965 (42 U.S.C. 3011(a)) is amended by striking out "the Office of".

(b) The last sentence of section 201(a) of the Older Americans Act of 1965 (42 U.S.C. 3011(a)) is amended by inserting after "Commissioner" the first place it appears therein the following: "under section 202 (including policymaking, programmatic, regional, fiscal, administrative, and personnel responsibilities)".

FUNCTIONS OF COMMISSIONER

SEC. 4. (a) The heading for section 202 of the Older Americans Act of 1965 (42 U.S.C. 3012) is amended by striking out "ADMINISTRATION" and inserting in lieu thereof "COMMISSIONER".

(b) Section 202(a) of the Older Americans Act of 1965 (42 U.S.C. 3012(a)) is amended—

(1) by striking out "Administration" and inserting in lieu thereof "Commissioner";

(2) in paragraph (5) thereof, by inserting "education and training services (including" after "hospitalization,", by inserting "and" after "training,", and by inserting a closing parenthetical mark after "education";

(3) in paragraph (8) thereof, by inserting before the semicolon at the end thereof the following: ", and take whatever action is necessary to achieve coordination of activities carried out or assisted by all departments, agencies, and instrumentalities of the Federal Government with respect to the collection, preparation, and dissemination of information relevant to older individuals";

(4) in paragraph (12) thereof, by striking out "nonprofit"; and

(5) in paragraph (16) thereof, by striking out "nonprofit".

FEDERAL AGENCY CONSULTATION

SEC. 5. Section 203(b) of the Older Americans Act of 1965 (42 U.S.C. 3013(b)) is amended—

(1) by striking out "and" at the end of paragraph (9) thereof;

(2) by striking out the period at the end of paragraph (10) thereof and inserting in lieu thereof a comma; and

(3) by adding at the end thereof the following new paragraphs:

"(11) title I of the Higher Education Act of 1965, and

"(12) the Adult Education Act.".

NATIONAL INFORMATION AND RESOURCE CLEARINGHOUSE FOR THE AGING

SEC. 6. (a) Title II of the Older Americans Act of 1965 (42 U.S.C. 3011 et seq.) is amended by striking out section 204, and by redesignating section 205 through section 214 as section 204 through section 213, respectively.

(b)(1) Section 204(d) of the Older Americans Act of 1965, as so redesignated in subsection (a), is amended—

(A) by inserting "and" at the end of paragraph (4) thereof;

(B) by striking out paragraph (5) thereof; and

(C) by redesignating paragraph (6) as paragraph (5).

(2) Section 206(b) of the Older Americans Act of 1965, as so redesignated in subsection (a), is amended by striking out "section 208" and inserting in lieu thereof "section 207".

FEDERAL COUNCIL ON THE AGING

SEC. 7. (a) Section 204(c) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out "but not less often than four times a year" and inserting in lieu thereof "at least quarterly".

(b) Section 204(g)(1) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by adding at the end thereof the following new sentence: "Such study shall be submitted to the Congress not later than March 31, 1982.".

(c) Section 204(h) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by inserting before the period at the end thereof the following: ", $200,000 for fiscal year 1982, and such sums

as may be necessary for each of the fiscal years 1983 and 1984".

ADMINISTRATION

SEC. 8. (a) Section 205 of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out subsection (b) thereof, and by redesignating subsection (c) and subsection (d) as subsection (b) and subsection (c), respectively.

(b) Section 205(c) of the Older Americans Act of 1965, as so redesignated in section 6(a) and in subsection (a), is amended by inserting "to the Commissioner" after "appropriated".

APPLICATION OF OTHER LAWS

SEC. 9. Section 210(a) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out ", and of title V of the Act of October 15, 1977 (Public Law 95-134; 91 Stat. 1164),".

CONTRACTING AND GRANT AUTHORITY

SEC. 10. Section 212 of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out ", where such organization" and all that follows through "such contract".

TECHNICAL ASSISTANCE AND COOPERATION

SEC. 11. Section 301(b)(2) of the Older Americans Act of 1965 (42 U.S.C. 3021(b)(2)) is amended by inserting "the Department of Education," after "cooperation of".

DEFINITIONS FOR TITLE III

SEC. 12. (a) Section 302(3) of the Older Americans Act of 1965 (42 U.S.C. 3022(3)) is amended by inserting after "Social Security Act," the last place it appears therein the following: "any category of institutions regulated by a State pursuant to the provisions of section 1616(e) of the Social Security Act (for purposes of section 307(a)(12)),".

(b) Section 302 of the Older Americans Act of 1965 (42 U.S.C. 3022) is amended by adding at the end thereof the following new paragraph:

"(9) The term 'education and training service' means a social service designed to assist older individuals to better cope with their economic, health, and personal needs through services such as consumer education, continuing education, health education, preretirement education, financial planning, and other education and training services which will advance the objectives of this Act.".

AUTHORIZATION OF APPROPRIATIONS FOR TITLE III PROGRAMS

SEC. 13. (a) Section 303(a) of the Older Americans Act of 1965 (42 U.S.C. 3023(a)) is amended by striking out "and", and by inserting after "1981" the following: ", $306,000,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984," and by striking out "social" and inserting in lieu thereof "senior centers and supportive".

(b) Section 303(b)(1) of the Older Americans Act of 1965 (42 U.S.C. 3023(b)(1)) is amended by striking out "and", and by inserting after "1981" the following: ", $319,100,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984,".

(c) Section 303(b)(2) of the Older Americans Act of 1965 (42 U.S.C. 3023(b)(2)) is amended by striking out "and", and by inserting after "1981" the following: ", $60,000,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984,".

ALLOTMENT; FEDERAL SHARE

SEC. 14. (a) Section 304(a)(1) of the Older Americans Act of 1965 (42 U.S.C. 3024(a)(1)) is amended by striking out "and" the second place it appears therein, and by inserting "1982, 1983, and 1984," after "1981,".

(b) Section 304(d)(1)(B) of the Older Americans Act of 1965 (42 U.S.C. 3024(d)(1)(B)) is amended by striking out "year" and inserting in lieu thereof "years", and by inserting "1982, 1983, and 1984," after "1981,".

AREA PLANS

SEC. 15. Section 306(a)(2) of the Older Americans Act of 1965 (42 U.S.C. 3026(a)(2)) is amended by striking out "at least 50 percent" and inserting in lieu thereof "an adequate proportion".

STATE PLANS

SEC. 16. (a) Section 307(a)(13)(A) of the Older Americans Act of 1965 (42 U.S.C. 3027(a)(13(A)) is amended by striking out the comma, and by inserting before the semicolon at the end thereof the following: ", and may be made available to handicapped or disabled individuals who have not attained 60 years of age but who reside in senior citizen centers at which congregate nutrition services are provided".

(b) Section 307(a)(13)(B) of the Older Americans Act of 1965 (42 U.S.C. 3027(a)(13)(B) is amended to read as follows:

(B) such plan shall give primary consideration to the provision of meals in a congregate setting, except that each area agency (i) shall have authority to award funds made available under this title to organizations for the provision of home delivered meals to older individuals in accordance with the provisions of subpart 2 of part C, based upon a determination of need made by the recipient of a grant or contract entered into under this title, without requiring that such organizations also provide meals to older individuals in a congregate setting; and (ii) shall, in awarding such funds, select such organizations in a manner which complies with the provisions of subparagraph (H);".

(c) Section 307(a)(13)(C)(ii)) of the Older Americans Act of 1965 (42 U.S.C. 3027(a)(13)(C)(ii)) is amended by inserting ", and access to such meals when the use of such charges for access is deemed appropriate" before the semicolon at the end thereof.

(d) Section 307(a)(13) of the Older Americans Act of 1965 (42 U.S.C. 3027(a)(13)) is amended—

(1) by adding "and" at the end of subparagraph (G) thereof;

(2) by striking out "and" at the end of subparagraph (H) thereof; and

(3) by striking out subparagraph (I) thereof.

(e) Section 307(a) of the Older Americans Act of 1965 (42 U.S.C. 3027(a)) is amended—

(1) by striking out "and" at the end of paragraph (15) thereof;

(2) by redesignating paragraph (16) thereof as paragraph (18); and

(3) by inserting after paragraph (15) the following new paragraphs:

(16) provide that area agencies on aging may enter into grants and contracts with providers of education and training services which can demonstrate the experience or capacity to provide such services (except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in approporations Acts);

"(17) provide assurances that, if a substantial number of the older individuals residing in any planning and service area in the State are of limited English-speaking ability, then the State will require the area agency on aging for each such planning and service area—

"(A) to utilize, in the delivery of outreach services under section 306(a)(2)(A), the services of workers who are fluent in the language spoken by a predominant number of such older individuals who are of limited English-speaking ability; and

"(B) to designate an individual employed by the area agency on aging, or available to such area agency on aging on a full-time basis, whose responsibilities will include—

"(i) taking such action as may be appropriate to assure that counseling assistance is made available to such older individuals who are of limited English-speaking ability in order to assist such older individuals in participating in programs and receiving assistance under this Act; and

"(ii) providing guidance to individuals engaged in the delivery of social services under the area plan involved to enable such individuals to be aware of cultural sensitivities and to effectively take into account linguistic and cultural differences; and".

AVAILABILITY OF FUNDS FOR SOCIAL SERVICES AND NUTRITION SERVICES

SEC. 17. Section 308(b) of the Older Americans Act of 1965 (42 U.S.C. 3028(b)) is amended by adding at the end thereof the following new paragraph:

"(6) Notwithstanding any other provision of this title, with respect to funds received under subsection (a) and subsection (b) of section 303, a State may elect to transfer not more than 20 percent of the funds appropriated for any fiscal year between programs under part B and part C of this title, for use as the State considers appropriate. The State shall notify the Commissioner of any such election.".

AVAILABILITY OF SURPLUS COMMODITIES

SEC. 18. (a) The first sentence of section 311(a)(4) of the Older Americans Act of 1965 (42 U.S.C. 3030a(a)(4)) is amended by striking out "three" and inserting in lieu thereof "six".

(b) Section 311(b)(1) of the Older Americans Act of 1965 (42 U.S.C. 3030a(b)(1)) is amended by striking out "1981" and inserting in lieu thereof "1984".

SOCIAL SERVICES PROGRAMS

SEC. 19. (a) Section 321(a) of the Older Americans Act of 1965 (42 U.S.C. 3030d(a)) is amended—

(1) in paragraph (1) thereof, by striking out "continuing education,";

(2) in paragraph (4) thereof—

(A) by inserting "(A)" after "including";

(B) by inserting "(i)" after "designed";

(C) by striking out "or" and inserting in lieu thereof "; (ii)"; and

(D) by adding at the end thereof the following: "or (iii) to prevent unlawful entry into residences of older individuals, through the installation of security devices and through structural modifications or alterations of such residences; and (B) the provision of security personnel who would be responsible for maintaining and monitoring security systems and for otherwise providing security against unlawful entry into residences of older individuals;".

(3) by striking out "or" at the end of paragraph (11) thereof;

(4) by redesignating paragraph (12) thereof as paragraph (15); and

(5) by inserting after paragraph (11) the following new paragraphs:

"(12) education and training services;

"(13) a program, to be known as 'Senior Opportunities and Services', designed to identify and meet the needs of older, poor persons 60 years of age or older in one or more of the following areas: (A) development and provision of new volunteer services; (B) effective referral to existing health, employment, housing, legal, consumer, transportation, and other services; (C) stimulation and creation of additional services and programs to remedy gaps and deficiencies in presently existing services and programs; and (D) such other services as the Commissioner may determine are necessary or especially appropriate to meet the needs of the older poor and to assure them greater self-sufficiency;

"(14) crime prevention services and victim assistance programs for older individuals; or".

(b) The heading for part B of title III of the Older Americans Act of 1965 (42 U.S.C. 3030d) is amended by striking out "SOCIAL" and inserting in lieu thereof "SENIOR CENTERS AND SUPPORTIVE".

REVISION OF TRAINING, RESEARCH, AND DISCRETIONARY PROJECTS AND PROGRAMS

SEC. 20. (a) Title IV of the Older Americans Act of 1965 (42 U.S.C. 3031 et seq.) is amended to read as follows:

"TITLE IV—TRAINING, RESEARCH, AND DISCRETIONARY PROJECTS AND PROGRAMS

"PART A—EDUCATION AND TRAINING

"TRAINING AND RECRUITING PERSONNEL FOR THE FIELD OF AGING

"SEC. 411. The Commissioner may make grants to any public or nonprofit private agency, organization, or institution, and may enter into contracts with any agency, organization, or institution, to assist the Commissioner in recruiting persons to enter the field of aging, training volunteers and persons employed in or preparing for employment in the field of aging (including such stipends to persons participating in training programs as the Commissioner may find appropriate), technical assistance, and other activities related to such training.

"MULTIDISCIPLINARY CENTERS OF GERONTOLOGY

"SEC. 412. The Commissioner may make grants to public and private nonprofit agencies, organizations, and institutions for the purpose of establishing or supporting multidisciplinary centers of gerontology, and gerontology centers of special emphasis.

"PART B—RESEARCH, DEMONSTRATIONS, AND OTHER ACTIVITIES

"RESEARCH AND DEVELOPMENT PROJECTS

"SEC. 421. The Commissioner may make grants to any public or nonprofit private agency, organization, or institution, and may enter into contracts with any agency, organization, institution, or individual to support research and development related to the purposes of this Act, evaluation of the results of such research and development activities, and collection and dissemination of information concerning research findings, demonstration results, and other materials developed in connection with activities assisted under this title, and conducting of conferences and other meetings for purposes of exchange of information and other activities related to the purposes of this title.

"DEMONSTRATION PROJECTS

"SEC. 422. The Commissioner may make grants to any public agency or nonprofit private organization, and may enter into contracts with any agency or organization to pay part or all of the cost of developing or operating model projects to demonstrate methods to improve or expand services to or otherwise promote the well-being of older individuals. Such projects may include projects for the development of comprehensive, coordinated systems of social services, community long-term care for older individuals, projects to meet the special housing needs of older individuals (including weatherization improvements), projects to improve transportation systems for the rural elderly, and other priority projects determined appropriate by the Commissioner.

"SPECIAL PROJECTS IN COMPREHENSIVE LONG-TERM CARE

"SEC. 423. (a)(1) The Commissioner may—

"(A) make grants to selected State agencies, designated under section 305(a)(1), and, in consultation with State agencies, selected area agencies on aging designated under section 305(a)(2)(A), institutions of higher education, and other public agencies and nonprofit organizations; and

"(B) enter into contracts with any agency, organization, or institution (except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in appropriations Acts); to support the development of comprehensive, coordinated systems of community long-term care for older individuals, with special emphasis upon services designed to support alternatives to institutional living and the assessment of need, the development of a plan of care, and the referral of individuals, in the delivery of long-term care services, including noninstitutional and institutional services, where appropriate.

"(2) A grant under this section may be made to pay part or all of the estimated cost of the program (including startup cost) for a period of not more than 3 years, except that no funds may be used to pay for direct services which are eligible for reimbursement under title XVIII, title XIX, or title XX of the Social Security Act.

"(3) A grant made under this section shall be used for the development of programs which provide a full continuum of services. Such services may include adult day health care; monitoring and evaluation of service effectiveness; supported living in public and private nonprofit housing; family respite services; preventive health services; home health, homemaker, and other rehabilitative and maintenance in-home services; services provided by geriatric health maintenance organizations; and other services which the Commissioner determines are appropriate, and which, at a minimum, provide for identification and assessment of the long-term care needs of older individuals, referral of such individuals to the appropriate services, and follow-up and evaluation of the continued appropriateness of such services with provision for re-referral as appropriate.

"(b)(1) In making grants to States under this section, preference shall be given to applicants which demonstrate that—

"(A) adequate State standards have been developed to ensure the quality of services provided;

"(B) the State has made a commitment to carry out the program assisted under this section with the State agency responsible for the administration of title XIX of the Social Security Act or title XX of the Social Security Act, or both such agencies;

"(C) the State will develop plans to finance the comprehensive program assisted under this section; and

"(D) the State agency has a plan for statewide or designated regions of the State containing provisions designed to maximize access by older individuals to long-term care services.

"(2) In awarding grants to or entering into contracts with agencies and organizations under this section, preference shall be given to applicants that possess the capability to establish community-based long-term care programs and demonstrate that a need exists for the establishment of such programs in the area to be served.

"(3) Agencies and organizations assisted under this section shall establish procedures for evaluating the program assisted under this section, with respect to the benefits accruing to persons receiving assistance, the feasibility of the administrative model used for comprehensive coordination of services including coordination with other local programs, and the comparative costs and quality of services provided, and shall submit such evaluation to the Commissioner on a periodic basis.

"(c) The Secretary shall involve appropriate Federal departments and agencies in carrying out the provisions of this section in order to assure coordination at the Federal level and to avoid duplication and shall include the annual report to the Congress required by section 207, a report on the impact of grants made, or contracts entered into, on the experiences of grantees and contractors in meeting the requirements of this section, and on the comparative benefits and costs of projects assisted under this section.

"(d) Sums appropriated to carry out this section shall, to the extent feasible, be used to support programs equitably distributed throughout the Nation between urban and rural areas.

"SPECIAL PROJECTS IN MENTAL HEALTH CARE

"SEC. 424. (a) The Commissioner, after consultation with the Director of the National Institute of Mental Health and the Center for Studies of the Mental Health of the Aging, may make grants to, and enter into contracts with, any public or private nonprofit entity for projects under this section (except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in appropriations Acts). Each such project shall include—

"(1) the location of older individuals who are in need of mental health services;

"(2) the provision of, or arrangement for the provision of, medical differential diagnoses of older individuals to distinguish between their need for mental health services and other medical care;

"(3) the specification of the mental health needs of older individuals, and the mental health and support services required to meet such needs; and

"(4) the provision of—

"(A) the mental health and support services specified in paragraph (3) in the communities; or

"(B) such services for older individuals in nursing homes and intermediate care facilities, and training of the employees of such homes and facilities in the provision of such services.

"(b) Funds may not be obligated to carry out this section for any fiscal year if funds are appropriated to carry out section 204 of the Mental Health Systems Act for such fiscal year.

"(c) For purposes of carrying out this section, there are authorized to be appropriated such sums as may be necessary for each of the fiscal years 1982, 1983, and 1984.

"NATIONAL IMPACT ACTIVITIES

"SEC. 425. The Commissioner may carry out directly or through grants or contracts—

"(1) innovation and development projects and activities of national significance which show promise of having substantial impact on the expansion or improvement of social services, nutrition services, or multipurpose senior centers, or otherwise promoting the well-being of older indviduals; and

"(3) dissemination of information activities related to such programs.

"(b) An amount not to exceed 15 percent of any sums appropriated under section 431 may be used for carrying out this section.

"PART C—GENERAL PROVISIONS

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 431. (a) There are authorized to be appropriated to carry out the provisions of this title $23,200,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984.

"(b) No funds appropriated under this title—

"(1) may be transferred to any office or other authority of the Federal Government which is not directly responsible to the Commissioner; or

"(2) may be used for any program or activity which is not specifically authorized by this title.

"PAYMENTS OF GRANTS

"SEC. 432. (a) To the extent he deems it appropriate, the Commissioner shall require the recipient of any grant or contract under this title to contribute money, facilities, or services for carrying out the project for which such grant or contract was made.

"(b) Payments under this title pursuant to a grant or contract may be made (after necessary adjustment, in the case of grants, on account of previously made overpayments or underpayments) in advance or by way of reimbursement, and in such installments and on such conditions, as the Commissioner may determine.

"(c) The Commissioner shall make no grant or contract under this title in any State which has established or designated a State agency for purposes of title III unless the Commissioner has consulted with such State agency regarding such grant or contract.".

(b)(1) Section 204(d)(2) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out "the appraisal of needs required by section 402" and inserting in lieu thereof "an appraisal of needs pursuant to the functions carried out by the Commissioner under section 411".

(2) Section 310 of the Older Americans Act of 1965 (42 U.S.C. 3030) is amended by striking out "section 421" each place it appears therein and inserting in lieu thereof "section 422".

EQUITABLE DISTRIBUTION OF ASSISTANCE

SEC. 21. (a) Section 506(a)(3) of the Older Americans Act of 1965 (42 U.S.C. 3056d(a)(3)) is amended by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa," in each place it appears therein.

(b) Section 506(a)(4)(A) of the Older Americans Act of 1965 (42 U.S.C. 3056d(a)(4)(A)) is amended by inserting "the Commonwealth of the Northern Mariana Islands" after "Samoa,".

DEFINITIONS FOR TITLE V

SEC. 22. (a) Section 507(1) of the Older Americans Act of 1965 (42 U.S.C. 3056e(1)) is amended by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa,".

(b) Section 507(3) of the Older Americans Act of 1965 (42 U.S.C. 3056e(3)) is amended by inserting "weatherization activities;" after "efforts;".

AUTHORIZATION OF APPROPRIATIONS FOR TITLE V PROGRAMS

SEC. 23. Section 508 of the Older Americans Act of 1965 (42 U.S.C. 3056f) is amended by striking out "and" the last place it appears therein, and by striking out the period at the end thereof and inserting in lieu thereof the following: ", $277,100,000 for fiscal year 1982, (in accordance with the provisions of section 606(b)(1)(A) of the Omnibus Budget Reconciliation Act of 1981), $293,726,000 for fiscal year 1983 (in accordance with the provisions of section 606(b)(1)(A) of the Omnibus Budget Reconciliation Act of 1981), and such sums as may be necessary for fiscal year 1984. Amounts authorized for fiscal years 1982 and 1983 also shall include the additional sums specified in section 606(b)(1)(B) of the Omnibus Budget Reconciliation Act of 1981. Amounts appropriated under this section for any fiscal year shall be used during the annual period which begins on July 1 of the calendar year immediately following the beginning of such fiscal year and which ends on June 30 of the following calendar year. The Secretary may extend the period during which such amounts may be obligated or expended in the case of a particular organization or agency receiving funds under this title if the Secretary determines that such extension is necessary to ensure the effective use of such funds by such organization or agency. Any such extension shall be for a period of not more than 60 days after the end of such annual period.

GRANTS AUTHORIZED UNDER TITLE VI

SEC. 24. Section 603 of the Older Americans Act of 1965 (42 U.S.C. 3057b) is amended by striking out "Indians who are aged 60 and older" and inserting in lieu thereof "older Indians".

APPLICATIONS UNDER TITLE VI

SEC. 25. (a) Section 604(a)(4) of the Older Americans Act of 1965 (42 U.S.C. 3057c(a)(4) is amended by striking out "that" and all that follows through "conduct" and inserting in lieu thereof "for".

(b) Section 604(a)(10) of the Older Americans Act of 1965 (42 U.S.C. 3057c(a)(10)) is amended to read as follows:

"(10) provide that any legal or ombudsman services made available to older Indians represented by the tribal organization will be substantially in compliance with the provisions of title III relating to the furnishing of similar services: and".

(c) Section 604 of the Older Americans Act of 1965 (42 U.S.C. 3057c) is amended by striking out subsection (d) thereof, and by redesignating subsection (e) and subsection (f) as subsection (d) and subsection (e), respectively.

ADMINISTRATION OF TITLE VI

SEC. 26. Section 605 of the Older Americans Act of 1965 (42 U.S.C. 3057d) is amended by striking out "(a)", and by striking out subsection (b) thereof.

AUTHORIZATION OF APPROPRIATIONS FOR TITLE VI

SEC. 27. Section 608(a) of the Older Americans Act of 1965 (42 U.S.C. 3057g(a)) is amended to read as follows:

"SEC. 608. (a) There are authorized to be appropriated $6,500,000 for fiscal year 1982, and such sums as may be necessary for each of the fiscal years 1983 and 1984, to carry out the provisions of this title (other than section 606).".

HOME MAINTENANCE AND REPAIR SERVICES

SEC. 28. (a) The Older Americans Act of 1965 (42 U.S.C 3001 et seq.) is amended by adding at the end thereof the following new title:

"TITLE VII—HOME MAINTENANCE AND REPAIR SERVICES

"CONGRESSIONAL FINDINGS

"SEC. 701. The Congress hereby finds that—

"(1) of the 25,000,000 older individuals living in the United States today approximately one-third are housed in substandard, deteriorating, or dilapidated housing;

"(2) while 70 percent of such older individuals living in the United States reside in their own homes, most Federal housing assistance programs for older individuals focus on the problems of such individuals who rent their housing, and insufficient funding has been made available to assist such individuals who are homeowners;

"(3) 58 percent of older individuals who are homeowners own homes that were built before 1939;

"(4) continually increasing maintenance and energy costs have forced many older individuals to forgo necessary home repairs, thereby causing the condition of the homes of such individuals to deteriorate significantly and creating serious health and safety hazards;

"(5) upon retirement, older individuals generally undergo a reduction of income of one-third to one-half and are therefore less able to afford necessary home repairs; and

"(6) mobility and health are important determinants of the ability to undertake repairs, and, in light of the increasingly large segment of the population that is composed of older individuals, greater numbers of Americans become physically unable to make necessary home repairs each year.

"HOME MAINTENANCE AND REPAIR PROGRAM

"SEC. 702. (a) The Commissioner is authorized to make grants to, and enter into contracts with, any State agency designated under section 1305(a)(1) for purposes of providing home maintenance and repair services to older individuals (except that such contract authority shall be effective for any fiscal year only to such extent, or in such amounts, as are provided in appropriation Acts.

"(b) The Commissioner shall administer the program established in subsection (a) in accordance with regulations prescribed by the Commissioner and in a manner that ensures that—

"(1) in the provision of services under such program, a preference shall be given to low-income older individuals:

"(2) to an extent that the Commissioner determines to be appropriate, there shall be coordination with other Federal programs designed to provide home maintenance and repair services.

"(3) home maintenance and repair services provided under this section shall be accomplished by teams composed of individuals who are specialists in maintenance and repair and who are, to the maximum extent practicable, older individuals; and

"(4) older individuals receiving home maintenance and repair services under this section shall be provided with sufficient information to enable them to perform their own simple repairs in the future.

"HOUSING COUNSELING

"SEC. 703. The Commissioner shall administer, in coordination with the program established in section 702(a), a program of housing counseling for older individuals, which shall provide such individuals with information concerning home energy conservation, weatherization, and crime prevention programs and techniques.

"ANNUAL REPORT

"SEC. 704. The Commissioner shall annually prepare and submit to the Congress a comprehensive report concerning the housing needs of older individuals and the effectiveness of Federal housing programs in addressing such housing needs.

"DEFINITIONS

"SEC. 705. For purposes of this title—

"(1) the term 'home maintenance and repair services' means maintenance and repair of particular defects and hazards in any housing owned by, and serving as the primary residence of, any older individual, including maintenance and repair, and weatherization, designed to improve the health and safety conditions and increase the livability of such housing, but not including substantial remodeling of such housing;

"(2) the term 'low-income' means income that is not more than 125 percent of the poverty guidelines established periodically under section 624 of the Economic Opportunity Act of 1964; and

"(3) the term 'older individual' means any individual 60 years of age or older.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 706. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this title for each of the fiscal years 1982, 1983, and 1984.".

NATIONAL OLDER AMERICANS VOLUNTEER PROGRAMS

SEC. 29. The appropriation of funds for fiscal years 1982, 1983, and 1984 to carry out title II of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5001 et seq.) shall be made in accordance with the authorizations of appropriations contained in the amendments made by section 607(b) of the Omnibus Budget Reconciliation Act of 1981.

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 30. (a) Section 102(1) of the Older Americans Act of 1965 (42 U.S.C. 3002(1)) is amended by striking out ", Education, and Welfare" and inserting in lieu thereof "and Human Services".

(b)(1) Section 202(a)(1) of the Older Americans Act of 1965 (42 U.S.C. 3012(a)(1)) is amended by striking out ", Education, and Welfare" and inserting in lieu thereof "and Human Services".

(2) Section 202(c) of the Older Americans Act of 1965 (42 U.S.C. 3012(c)) is amended by striking out "Action" and inserting in lieu thereof "the ACTION Agency".

(c)(1) The last sentence of section 203(a) of the Older Americans Act of 1965 (42 U.S.C. 3013(a)) is amended by striking out "purpose" and inserting in lieu thereof "purposes".

(2) Section 203(b) of the Older Americans Act of 1965 (42 U.S.C. 3013(b)) is amended—

(A) by striking out "purpose" and inserting in lieu thereof "purposes";

(B) in paragraph (1) thereof, by striking out "of 1973"; and

(C) in paragraph (8) thereof, by striking out "section 222(a)(8)" and inserting in lieu thereof "section 222(a)(2)".

(d) Section 206(b) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out "section 308 or", and by striking out "section or".

(e) Section 209(b) of the Older Americans Act of 1965, as so redesignated in section 6(a), is amended by striking out "the amendment made by".

(f) Section 337 of the Older Americans Act of 1965 (42 U.S.C. 3030g) is amended by striking out "National Association of Title VII Project Directors" and inserting in lieu thereof "National Association of Nutrition and Aging Services Programs".

(g) Section 503(b) of the Older Americans Act of 1965 (42 U.S.C. 3056a(b)) is amended by striking out "of 1973" each place it appears therein.

(h) Section 505(b) of the Older Americans Act of 1965 (42 U.S.C. 3056c(b)) is amended—

(1) by striking out ", Education, and Welfare" and inserting in lieu thereof "and Human Services"; and

(2) by striking out the second sentence thereof.

ADDITIONAL AMENDMENTS

SEC. 31. (a) Section 673(1) of Public Law 96-35 (42 U.S.C. 2790(1)) is amended—

(1) by inserting ", and any program which received funds under section 221 or section 222 of such Act," after "Act of 1964";

(2) by inserting ", or such program lost its authority to receive funds under section 221 or section 222 of such Act," after "such Act" the first place it appears therein; and

(3) by inserting ", and such designation or authority was not reinstated before the end of such fiscal year" before the period at the end thereof.

(b) Section 675(c)(2)(A)(ii) of such Public Law (42 U.S.C. 9904(c)(2)(A)(ii)) is amended—

(1) by inserting "(I)" after "directly or to";

(2) by striking out ", or to" and inserting in lieu thereof "; (II)"; and

(3) by inserting after "farm worker organizations;" the following: "or (III) any organization which administers a program which is treated as an eligible entity under section 673(1) as the result of the receipt of funds by such program under section 221 or section 222 of Public Law 88-452, as amended, for fiscal year 1981, regardless of whether such organization has a board which meets the requirements of clause (3);".

(c) Section 682(b)(4) of Public Law 97-35 (42 U.S.C. 9911(b)(4)) is amended by inserting before the period at the end thereof the following: ", to migrant and seasonal farm worker organizations, or to both such entities and such organizations".

ADDITIONAL TECHNICAL AMENDMENT

SEC. 32. Section 439(1) of the Higher Education Act of 1965 is amended by adding at the end thereof the following new sentence: "The priority established in favor of the United States by section 3466 of the Revised Statutes (31 U.S.C. 191) shall not apply to indebtedness of the Association.".

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to amend the Older Americans Act of 1965 to extend the authorizations of appropriations contained in such act, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill, H.R. 3046, was laid on the table.

APPOINTMENT OF CONFEREES ON S. 1086

Mr. ANDREWS. Mr. Speaker, I ask unanimous consent that the House insist upon its amendment to the Senate bill, S. 1086, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina? The Chair hears none, and appoints the following conferees: Messrs. PERKINS, BIAGGI, ANDREWS, CORRADA, WILLIAMS of Montana, RATCHFORD, ASHBROOK, COLEMAN, and PETRI.

AUTHORIZING CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF HOUSE AMENDMENT TO S. 1086

Mr. ANDREWS. Mr. Speaker, I ask unanimous consent that in the engrossment of the House amendment the Clerk be authorized to correct section numbers, punctuation, and cross-references to reflect the actions of the House in amending the bill, H.R. 3046.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

GENERAL LEAVE

Mr. ANDREWS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3046, just passed.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 3567, EXPORT ADMINISTRATION AMENDMENTS ACT OF 1981

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3567) to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from New York? The Chair hears none, and appoints the following conferees: Messrs. ZABLOCKI, BINGHAM, ECKART, BONKER, WOLPE, SHAMANSKY, BROOMFIELD, LAGOMARSINO, ERDAHL, GILMAN, and Mrs. FENWICK.

PERSONAL EXPLANATION

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, on Thursday, November 19, I missed sev-

eral votes because of previous commitments I had in my district.

However, had I been here I would have voted "aye" on House Concurrent Resolution 224, expressing the support of Congress for the President's peace initiative.

On the report to accompany H.R. 3413, the Department of Energy authorization for national security programs, I would have voted "aye."

On House Joint Resolution 349, to authorize the participation of the United States in a multinational force to implement the treaty of peace between Egypt and Israel I would have voted "aye."

On H.R. 3663. The Bus Regulatory Reform Act, I would have voted "aye" and on the subsequent votes to resolve into the Committee of the Whole and on passage of House Resolution 280, the rule under which H.R. 3663 was considered, I would have voted "aye."

□ 1600

MACON HIGH SCHOOL SENIORS AND SOCIAL SECURITY

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, many articles and statements of late have shown the folly of Reaganomics but I would like to relate a situation which is deliberate and tragic.

Mr. Speaker, Macon High, a small high school in my district, has a graduating class of 120 seniors. These students are anxiously awaiting graduation and the opportunity to further their education at a university. However, 14 of these students are faced with a real problem.

Mr. Speaker, these 14 students, 11 percent of the graduating class, receive social security survivor benefits now, but will lose these benefits unless they are enrolled in and attending 12 college credit hours by May of next year. Their class does not graduate until May 21.

Mr. Speaker, this is a deliberate act of this administration to deny these 14 students in Macon, and untold numbers nationwide, the opportunity to further their education by eliminating their one source of money for tuition.

Mr. Speaker, how can we expect these young people to finance their education? We have limited student loans, grants, and work study so it is more difficult, if not impossible for many students, to get financial assistance. Then, the administration arbitrarily and deliberately deny some 10 percent of graduating seniors the opportunity of a college education by eliminating their one source of income, social security survivor benefits.

Mr. Speaker, maybe it is time we consider selling college credits like we have allowed IBM to buy tax credits from Ford Motor Co. It is a sad state of affairs when it is easy for multinational corporations to buy tax credits than it is a young person to finance a college education.

PROVIDING FOR CONSIDERATION OF HOUSE CONCURRENT RESOLUTION 220, COMMEMORATION OF 100TH ANNIVERSARY OF BIRTH OF FRANKLIN DELANO ROOSEVELT

Mr. PEPPER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 277 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to consider the concurrent resolution (H. Con. Res. 220) providing for the commemoration of the one hundredth anniversary of the birth of Franklin Delano Roosevelt in the House, and debate on said concurrent resolution shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Rules. The previous question shall be considered as ordered on said concurrent resolution to final adoption without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Florida (Mr. PEPPER) is recognized for 1 hour.

Mr. PEPPER. Mr Speaker, I yield the usual 30 minutes to the able gentleman from Arizona (Mr. RHODES), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 227 is the rule providing for the consideration of House Concurrent Resolution 220 which provides for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt.

Mr. Speaker, the concurrent resolution establishes a bipartisan joint committee on arrangements which is instructed to plan a joint meeting of the Congress honoring our 32d President. The joint committee is to be composed of 16 members: The Speaker of the House of Representatives, the President Pro Tempore of the Senate and seven Members from each of the two Houses. The joint committee is instructed to plan a program for the joint meeting and to issue appropriate invitations. The joint committee is authorized to spend not more than $25,000 for these purposes.

Mr. Speaker, the rule reported from the committee is a simple one. It provides 1 hour or general debate to be equally divided between the majority and the minority, permits one motion to recommit and provides for the consideration in the House of the concurrent resolution. In addition, the previous question is considered as ordered. While the effect of this rule is to preclude the offering of any motions or amendments, it is fully consistent with the practice of the Rules Committee in considering noncontroversial measures of this kind. The rule provides for the expeditious handling of House Concurrent Resolution 220 and also protects the traditional rights of the minority to offer a motion to recommit which in this instance could be with or without instructions.

Mr. Speaker, I urge the adoption of this rule.

Mr. RHODES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this rule provides 1 hour of general debate for the consideration of House Concurrent Resolution 220, providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt.

The rule provides for consideration in the House, rather than in the Committee of the Whole. The effect of using this procedure is to cut off all amendments to the resolution.

The rule does provide one motion to recommit.

Mr. Speaker, a few days ago, the Wall Street Journal ran a front page article entitled "All of Us are Busy, But Is This Any Way to Honor F. D. R.?" The author of this article argues that the Government is not doing enough to commemorate F. D. R.'s birthday.

The resolution made in order by this rule is an answer to some of the questions raised in the article. It does provide for the establishment of a joint committee to make arrangements to be held on Wednesday, January 27, 1982, or such other day as may be designated by the Speaker in the Hall of the House of Representatives in commemoration of the 100th anniversary of the birth of F. D. R.

Mr. Speaker, I will not go into the details of the resolution now, because we will have one hour to devote to the merits of the resolution under this rule.

Mr. Speaker, I yield back the balance of my time.

Mr. PEPPER, Mr. Speaker, I have no requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I have asked for this time for the purpose of inquiring of our distinguished majority leader what the membership might expect for the balance of the day or at least for the next several hours. I am

sure the gentleman has some information.

Mr. WRIGHT. If the minority leader will yield, I have had some conversations with the chairman of the Committee on Appropriations (Mr. WHITTEN). He has discussed matters with the chairman and ranking members of the Appropriations Committee in the other body. We felt, initially, that if it seemed possible at all that an agreement could be reached and the papers perfected to the point that we could have a vote here on the House floor on the conference committee report even as late as 11 o'clock tonight, the Members ought to hold themselves in readiness. The reality seems to be, however, that there are such a number of matters in disagreement that will have to be resolved, and will be resolved, that it will take quite considerably longer than that for it to be done and, after the conference has worked its will and come to an agreement, it will take a considerable amount of time, as the gentleman from Illinois would recognize and all other Members know, to perfect the papers and make certain that they fulfilled all of the technical qualifications. Under those circumstances, we think it is unnecessary to keep the Members around tonight on pins and needles, up late. It seems inevitable that it would be tomorrow morning, at the very earliest, before we could expect a vote on the conference committee report. Therefore, it would be our purpose to ask that when the House finishes its business, the business that the gentleman from Florida is about to commence, and any other business appropriately coming before us, we would come back at 10 o'clock tomorrow morning and hope that at that time we might be able to vote on the conference committee report.

□ 1610

Mr. MICHEL. If I might inquire, however, whether it would be possible that if there were a vote to be had by 11 o'clock that we would proceed along those grounds or is the majority leader just flatly accepting the fact that it is impossible to come to an agreement before, say, the hour of 11 o'clock this evening?

The SPEAKER. If the Chair might respond to that, if in the opinion of the Chair, at 9:30, that we would be able to vote by 11 o'clock, then the Members will be notified through the cloakrooms, the Democratic cloakroom, and the Republican cloakroom, 3 hours before. In other words, if we can be notified at 9:30 that they can have a vote, then the vote would be at 12:30 in the morning. If at 9:30 they cannot do that, we will recess until 10 o'clock the following morning.

Mr. MICHEL. I thank the Speaker.

The SPEAKER. In all probability, the Chair would have to agree with the majority leader that after the next matter we would be recessing most likely until 10 o'clock tomorrow morning.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 4930

Mr. PETRI. Mr. Speaker, I ask unanimous consent to have my name removed as a cosponsor of H.R. 4930, the National Petroleum Supply Evaluation Act.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

PROVIDING FOR THE COMMEMORATION OF THE 100TH ANNIVERSARY OF THE BIRTH OF FRANKLIN DELANO ROOSEVELT

Mr. PEPPER. Mr. Speaker, pursuant to the provisions of House Resolution 277, I call up the concurrent resolution (H. Con. Res. 220) providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt, and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 220

Whereas the year 1982 marks the one hundredth anniversary of the birth of Franklin Delano Roosevelt on January 30, 1882;

Whereas Franklin Delano Roosevelt was an inspiring leader during a great economic depression and a majestic Commander in Chief and was four times elected President of the United States; and

Whereas it is appropriate that the Congress should commemorate the centennial year of President Franklin Delano Roosevelt's birth: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That (a) in order to provide for an appropriate commemoration by the Congress of the centennial of the birth of Franklin Delano Rossevelt, thirty-second President of the United States of America, there is established a Special Joint Committee on Arrangements (hereinafter referred to in this concurrent resolution as the "joint committee") which shall be composed of sixteen members as follows:

(1) The President pro tempore of the Senate and the Speaker of the House of Representatives.

(2) Seven members of the Senate to be appointed by the President pro tempore of the Senate, four upon recommendation of the majority of the Senate and three upon recommendation of the minority leader of the Senate.

(3) Seven members of the House of Representatives to be appointed by the Speaker of the House of Representatives, three upon recommendation of the minority leader of the House of Representatives.

(b) The members of the joint committee shall select a chairman and a vice chairman from among its members. A majority of the members shall constitute a quorum for the transaction of business. Any vacancy in the membership of the joint committee shall be filled in the same manner in which the original appointment was made.

(c) For the purposes of paragraph 6 of rule XXV of the Standing Rules of the Senate, service of a Senator as a member or chairman of the joint committee shall not be taken into account.

SEC. 2. It shall be the duty of the joint committee to—

(1) make arrangements for a joint meeting of the Congress to be held on Wednesday, January 27, 1982, or such other day as may be designated by the Speaker, in the Hall of the House of Representatives in commemoration of the centennial of the birth of Franklin Delano Roosevelt;

(2) plan the proceedings of and issue appropriate invitations for such joint meeting; and

(3) coordinate the joint committee's arrangements with the activities of such organizations as it deems appropriate which have been established to observe such centennial.

SEC. 3. The joint committee may—

(1) appoint an Executive Director, who shall serve without compensation, and accept such other volunteer services of individuals as it deems appropriate;

(2) adopt rules respecting its organization and procedures; and

(3) sit and act at such times and places as it shall deem appropriate.

SEC. 4. The expenses of the joint committee under this concurrent resolution may not exceed $25,000 and shall be paid from the contingent fund of the House of Representatives upon vouchers approved by the chairman of the joint committee.

The SPEAKER. Pursuant to the rule, the gentleman form Florida (Mr. PEPPER) will be recognized for 30 minutes, and the gentleman from Arizona (Mr. RHODES) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. PEPPER).

Mr. PEPPER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Concurrent Resolution 220, which provides for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt, was introduced on November 16, 1981, by the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT), for himself; the gentleman from Illinois (Mr. YATES), and for me.

The Committee on Rules reported this concurrent resolution on November 17 as a matter of original jurisdiction, by an unanimous voice vote.

There has long been a bipartisan consensus in this Congress of the importance of honoring the accomplishments of our former Presidents and leaders. In fact, it is difficult to understate the importance of recalling our own national history.

In the past, the Congress has created centennial commissions to plan national observances honoring Presidents from Washington and Lincoln to Theodore Roosevelt and Woodrow Wilson.

In addition, Congress has met in joint session to mark the 200th anni-

versary of the birth of George Washington in 1932, the Lincoln sesquicentennial in 1959, and, of course, the American Bicentennial in 1976. All represent Congress commitment to reminding the country of its vibrant national spirit and to bringing an important sense of history to all our lives.

The tribute to Franklin Roosevelt provided for in this concurrent resolution, by comparison, is a modest proposal.

House Concurrent Resolution 220 establishes a 16 member bipartisan joint committee on arrangements to provide for the centennial anniversary of the birth of Franklin Delano Roosevelt. The joint committee is instructed to arrange a joint meeting of the Congress on January 27, 1982, or on a day selected by the Speaker of the House of Representatives, issue appropriate invitations, and coordinate its functions with the activities of other centennial organizations as it deems appropriate.

The concurrent resolution further instructs the joint committee to appoint an executive director to serve without compensation and to accept other volunteer services at its discretion.

Finally, the joint committee is authorized to spend not more than $25,000, to be paid from the contingent fund of the House of Representatives.

Congress has frequently appropriated funds for a number of other Presidential memorials.

Most recently, it provided $121,000 for the printing of a collection of essays entitled "Herbert Hoover: Reassessed." The volume commemorated the 50th anniversary of Hoover's inauguration as President. In 1974, the Congress observed the centennial anniversary of President Hoover's birth by authorizing $7 million to construct a building at the Hoover Institute at Stanford University, and in 1974, the Congress established a $30 million scholarship program as a national memorial to President Harry S Truman.

Mr. Speaker, Franklin Delano Roosevelt was elected to the Presidency for an unprecedented four terms, serving from 1933 to 1945, longer than any other President.

I have with pride exhibited on one of the walls of my office a letter to me from President Roosevelt written in Warm Springs, Ga., and dated the 9th of April 1945, 3 days before he died. He said in the last paragraph, "I want to see you soon. I will certainly do so as soon as I return from the San Francisco parley * * * " meaning the United Nations. "Always sincerely, F. D. R."

So to the very end of that long period he was keenly alert and his first thoughts were to carry on his efforts to preserve peace for mankind.

Certainly he is among the most influential Presidents this country has ever had. Swept into office by an overwhelming vote, he led the Nation through two of the greatest crises in its history. He came to the White House at the peak of the world's worst depression and sponsored new programs to bring back economic prosperity. He served during the largest and most destructive war man has known, and helped lead democracy to victory.

Most importantly, Franklin Roosevelt led America into the modern era of the 20th century. He understood the urgent need for new economic ideas and social programs. He realized the new force of mass communication and the power of public opinion. He believed in the need for a strong Federal Government, planning for the good of the common man, in a world becoming increasingly complex.

Mr. Speaker, Franklin Delano Roosevelt was a man of the people: the little man, the man on the street, factory workers, farmers, members of minority group—it was these people he believed Government should serve.

□ 1620

The historian, Arthur Schlesinger, Jr., wrote, F. D. R. was a "natural President." Few men in history have dominated their times as did he. He relished being President and he loved to exercise power, but he was at ease in his role and comfortable with informality. For instance, as William Manchester has written:

> He always used first names. In the first week of his administration, before Washington had become accustomed to the Secretary of Labor, Frances Perkins' brown tricorne hat, or she to Washington, one of her assistants picked up the phone one day and heard a voice say, "This is Frank. May I speak with Miss Perkins?" The assistant relayed the message, whereupon Secretary Perkins said, "Frank? I don't know any Frank. Ask him who he's with." Questioned, the caller chuckled and said, "With the United States. This is the President."

Upon his election as President, Roosevelt told his countrymen, "I see one-third of a nation ill-housed, ill-clad, and ill-nourished * * *"

We remember the programs he created and the enduring effects many have had on our Nation. Yet perhaps no single program could be as enduring as his vision for America—a vision as vital to our times as it was to his and doubtless will be 100 years from now.

He warned:

> It is not enough to clothe and feed the body of this nation and instruct and inform its mind. For there is also the spirit, and of these three, the greatest is the spirit.

He gave his country hope—a gift which nourished an impoverished spirit—and that hope, a belief in ourselves and our great potential, is his legacy for generations to come.

Mr. Speaker, as long as America shall love liberty, as long as Americans shall be devoted to compassion for the needs of their fellow men, as long as Americans shall work for the great cause of peace, a brighter and a better world, they shall cherish the memory and honor the record of Franklin Delano Roosevelt.

Mr. RHODES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I think it is particularly fitting and proper that the Member of this body who handles this particular piece of legislation should be the gentleman from Florida, who spent so much time in the other body during the first two Roosevelt terms and was so closely identified with many of the legislative proposals that President Roosevelt was able to get enacted into law.

The gentleman from Florida had a very prominent and important part in the New Deal legislation which came before the other body at the time that the gentleman from Florida was a distinguished Member of that other body.

I particularly congratulate him on what he has said and also on the vivid memories and direct recollections which he has of those very important days in the history of our country.

Mr. PEPPER. Mr. Speaker, if the gentleman will yield, I thank the distinguished gentleman for his kind remarks.

Mr. RHODES. Mr. Speaker, House Concurrent Resolution 220 does establish a joint committee on arrangements to provide for the commemoration of the 100th anniversary of the birth of President Franklin Delano Roosevelt. The joint committee will include the President pro tempore of the Senate and the Speaker of the House. In addition, there will be seven Members of the other body, four appointed from the recommendation of the majority leader and three upon the recommendation of the minority leader.

On the House side, a total of seven Members will be appointed by the Speaker, three upon the recommendation of the Republican leader.

Therefore, both parties will be equally represented.

The concurrent resolution instructs the joint committee to arrange a joint meeting of the Congress to be held on January 27, 1982, or on a day selected by the Speaker of the House.

The committee is also to issue appropriate invitations and coordinate its arrangements with the activities of other centennial organizations.

The committee is permitted to appoint an executive director to serve without compensation and to accept additional volunteer services.

The expenses of the committee are limited to $25,000, which is to be paid

from the contingent fund of the House.

Mr. Speaker, I also think that it is quite appropriate that the House take the lead in commemorating the birth of Franklin Delano Roosevelt due to the fact that two of this sons have served as Members of this body. I have the privilege, as did the gentleman from Florida who is now the occupant of the chair, in serving in the House with both Franklin D. Roosevelt, Jr., and James Roosevelt; so while the President himself never served as a Member of the Congress, certainly his sons did and the Roosevelt family is very closely identified with this body.

Mr. Speaker, I never voted for Franklin Delano Roosevelt; but I am very pleased to have the honor of handling this resolution on this side, because I have great admiration for him, for the foresight which he showed in preparing this country as best he could at a time of almost passivism for the advent of what I am sure he realized must occur, which was World War II. Having served for 5 years in the service during that war, Franklin D. Roosevelt was my Commander in Chief and I had great reverence not only for that office which he held, but for him as an occupant.

So, therefore, Mr. Speaker, I hope that the House will pass this resolution immediately.

Mr. Speaker, I now yield 2 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I have no objection to the House and the Senate honoring the centennial of Franklin D. Roosevelt's birthday. There are some things about the resolution, however, which puzzle me.

I do note that there are six or eight Members from each body to be represented in the Commission and yet I notice the Commission's funding seems to come exclusively out of the House contingency fund.

I wonder if the distinguished gentleman from Florida, the representative of the Rules Committee, could explain to me why the House will be the sole financial angel for the Commission's work.

I yield to the gentleman from Florida.

Mr. PEPPER. Well, there is a total appropriation of $25,000. It is, of course, to be used at the discretion of the joint committee, primarily for the functions of the committee.

I guess this is one of the cheapest memorial provisions that has ever been made by the Congress. It is not a memorial in the sense that we have an extensive celebration and all that, but it is a joint committee and the concurrent resolution provides $25,000 as the maximum expenditure that they may have available.

Mr. FRENZEL. I thank the gentleman.

I wonder if the gentleman could tell me why the House is supplying the full $25,000 and the Senate is supplying zero funds for this Commission?

Mr. PEPPER. I am advised, I will say to my able friend, that the custom is that either one or the other of the Houses will pay the expenses. You do not take half the money from the contingent fund of one House and half from another; usually one House takes it from its fund. After all, it comes out of the same country's pocket.

Mr. FRENZEL. I see; so the House has decided that its enthusiasm is $25,000 worth.

Mr. PEPPER. I am also informed that the Senate paid for the bicentennial committee in 1975, so it has been sort of an alternating thing from one body to the other in taking care of these expenses, especially where the amount is small.

Mr. FRENZEL. I thank the gentleman.

I wonder if the gentleman would respond to another question, that would be how much is it going to cost to print the proceedings of this memorial and distribute it as the Commission might recommend?

□ 1630

Mr. PEPPER. Mr. Speaker, I must say to the able gentleman that I am not able to answer that question. I suppose that the proceeds of $25,000 would be used as far as they would go, and if the committee felt it was necessary to ask the House for some additional funds for some really necessary purpose, they might do so, or they might come out of some other funds. I do not know. I will ask the able gentleman from Illinois.

Mr. RHODES. Mr. Speaker, I yield 3 additional minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Speaker, the reason for requesting these funds is to provide a fitting memorial ceremony in the House of Representatives for both the House and the Senate as the center of celebrations which will be taking place throughout the country. There will be dinner. There will be cooperation with the States.

It is anticipated that in the course of the program that takes place on the floor of the House, there may be such distinguished artists as some who sing in the Metropolitan Opera or who grace the concert stage, and the purpose of that fund is to permit payment for their expenses in coming to the city of Washington in order to participate.

Mr. FRENZEL. I thank the gentleman.

I presume for this joint convention that we will have, there will be some printing of what takes place here, and that it will be distributed around the country. I was asking the gentleman from Florida if he might have any idea how much that would cost. I would ask the same question of the gentleman from Illinois. I am just trying to determine what our total costs are going to be here.

And the further question: If we put up the first $25,000, does the Senate supply additional funds that are needed?

Mr. YATES. Well, if the gentleman will yield, let me say to the gentleman that as contemplated presently, the amount made available of $25,000 will be used for a total program in connection with the ceremony that takes place in the House of Representatives. As far as I know, it is not contemplated that there should be printed and distributed booklets or pamphlets incorporating studies or statements or essays on this, as was done at the time of Herbert Hoover, when copies of his essays were distributed throughout the country. That is not contemplated at the present time.

Mr. FRENZEL. Mr. Speaker, I notice the committee report indicated that cost $121,000. I was going to ask how much the gentleman thought this might cost.

Mr. YATES. I think it is going to be a fairly negligible cost. It is not contemplated it be a grandiose program. It is just in the nature of a statement as to what transpires on the floor of the House on that day.

Mr. FRENZEL. I thank the gentleman.

Mr. Speaker, I yield to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, I should like to call to the attention of the gentleman from Minnesota that never before has there been any question raised in a partisan sense about occasions of this kind, when we commemorate the centennial of the birth of our great Americans.

In the case of Herbert Hoover's centennial, which occurred just a few years ago, the Congress willingly and gladly appropriated $7 million, and not one voice of protest was raised from their side of the aisle. All we are asking is $25,000. I should think that is little enough.

Mr. FRENZEL. I thank the distinguished majority leader. If he thinks that I am complaining, I am sorry. I am trying to raise questions because I want to know what we are letting ourselves in for here.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. RHODES. Mr. Speaker, I yield 1 additional minute to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, I do believe we ought to know what we are about when we spend the people's

money. I prefaced my statement here by saying that I have no objection to the holding of this memorial ceremony, but I do want to know what is involved, and I am grateful to those who tried to supply information.

One further question I would like to direct to the gentleman from Illinois.

With respect to these travel expenses that might be paid, would they also apply to members of Mr. Roosevelt's family as well as to the artists who might participate?

Mr. YATES. As far as I know, that is not contemplated.

Mr. FRENZEL. I thank the gentleman for his response.

I yield back the balance of my time.

Mr. PEPPER. Mr. Speaker, I yield 6 minutes to the distinguished majority leader, the able gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, the centennial of the birth of Franklin Delano Roosevelt most certainly is an event that all of us as Americans should want to celebrate and commemorate. I had hoped initially that we might do something on a much grander scale than this resolution contemplated.

One hundred twenty-three of my colleagues joined me in the introduction of a resolution which would have authorized the Congress to purchase a scholarly work, a 6-volume chronology, by Pare Lorentz, which has been described by the curator of the Franklin D. Roosevelt Memorial Library as one which exceeds in quality the chronology on Abraham Lincoln which was purchased by this Congress in the 1950's, and the chronology on George Washington. But due to budgetary strictures, we acceded to the requests of those who pleaded with us not to spend money for this and have proposed a mere $25,000 for all the expenses of this commission.

It seems to me that what we need to focus on is the lesson that the life of Franklin Roosevelt taught us. Franklin D. Roosevelt came to office and into the leadership of this Nation at a time of great despair. I can remember it vividly. I was but 6 years of age when the stock market crash came about. I did not know much about that. But I was 9 years of age in 1932 when Franklin Roosevelt was elected, and I do have a very vivid recollection of that because fresh in my mind was the stark realization of what had happened to our family and to our family's standard of living in those intervening 3 years. We were not alone.

That same vivid reality was occurring to Americans all over the country.

Franklin Roosevelt came to office at a time when we teetered on the brink of despair. I do not believe Americans who did not live through that depression era can appreciate how near this Nation may have been to revolution. But Mr. Roosevelt spoke on that wintry March day of 1933 with a voice that bespoke confidence, and we breathed easier as he told us, "The only thing we have to fear is fear itself."

He set about doing those things that a nation would do to restore itself from the depths of the depression.

Then when war came, we remember how he stood in this chamber and uttered those memorable words, "Yesterday, December 7, 1941, a date which will live in infamy." And I can remember the thrill that beset all of us, the fear, again, but the determination to triumph when he said toward the conclusion of his speech, "We will gain the inevitable triumph. So help us God."

His was a leadership that was the prime exemplar and probably the greatest inspiration to people of my generation. I am old enough to have voted for Franklin Roosevelt. I cast my first vote for him in 1944. I was still in the military service at the time. And I am very proud that I had that privilege. I am not old enough to have known him personally, nor to have worked with him as our distinguished colleague, the gentleman from Florida (Mr. PEPPER) did, but I think I share with all those of my generation an admiration bordering upon reverence for the memory of this great American who led us when we so desperately needed leadership.

Sir Winston Churchill once wrote of him:

> His life must be regarded as one of the commanding events in human history.

I have always thought that the humanitarian approach which Franklin Roosevelt brought to the American Presidency was expressed superbly in his acceptance speech for renomination to that office on June 27, 1936.

□ 1640

It was on that occasion that President Roosevelt said:

> Governments can err, Presidents do make mistakes, but the immortal Dante tells us that divine justice weighs the sins of the coldblooded and the sins of the warmhearted in different scales. Better the occasional faults of a government that lives in a spirit of charity than the consistent omissions of a government frozen in the ice of its own indifference.

That, I think is a lasting lesson to all of us, and as I supported and joined in the commemoration honoring Theodore Roosevelt on his centennial in 1958, honoring Herbert Hoover when his centennial occurred in 1974, and honoring Abraham Lincoln on the occasion of his sesquicentennial in 1959, I do hope that all of us will join together with a spirit of pride as we honor the 100th anniversary of the birth of this greatest American of his time.

Mr. PEPPER. I yield 5 minutes to the distinguished gentleman from Illinois (Mr. YATES).

Mr. YATES. Mr. Speaker, I rise in support of the resolution to commemorate the centennial of the birth of President Franklin Roosevelt. I am proud to associate myself with the remarks of the distinguished gentleman from Florida, who so eloquently stated the place in history of this President who joins the greatest Presidents of our country in the shining pages of history.

It is fitting and proper that we should celebrate this occasion. Franklin Roosevelt took this Nation from the depths of despair and poverty, through war, and then into peace; in times of anguish into the light of hope and high idealism.

I look forward to the celebration by the House of this centennial. I am proud to be participating in formulating the activities that will take place.

Mr. RHODES. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. GREEN).

Mr. GREEN. Mr. Speaker, I rise to commend the distinguished majority leader, Mr. WRIGHT; the distinguished gentleman from Illinois, Mr. YATES; and the distinguished gentleman from Florida, Mr. PEPPER, for offering us this resolution, and also to commend the distinguished gentleman from Arizona, Mr. RHODES, for handling the resolution on our side of the aisle.

The resolution calls for what I think is a very modest celebration by the Congress of the Franklin Roosevelt centennial. A modest celebration I think is what President Roosevelt would have wanted. The amount involved, $25,000, is small. It should be noted, for example, that if the committee appoints an executive director, he serves without compensation.

So, I think all Members of the House can be satisfied that this resolution will produce a fitting memorial on the part of the Congress to the centennial, while at the same time observing a spirit of frugality in keeping with the budget problems we currently face.

Mr. PEPPER. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Missouri (Mr. SKELTON).

Mr. SKELTON. Mr. Speaker, I would be remiss if I did not say a few words on this occasion on the passage of this resolution commemorating the 100th anniversary of Franklin Delano Roosevelt.

I remember him only as a youngster. I was 12 years old when he died on April 12, 1945. Thus, I remember only his leadership as a wartime leader. I do not remember him, as others have portrayed him, as the leader, the spiritual leader of those economic problem-solving days in the early 1930's.

But, I had an unusual opportunity to get to know him through his friends. Nearly 2 years after President Roosevelt died, I went to Warm Springs, Ga., the foundation for polio

patients in Georgia, Warm Springs Foundation, that he and Basil O'Connor, his former law partner, had founded. There, through his associates and friends, many of us felt as though we knew him, not as a President, but as a warm, kind, and caring human being.

I also remember, Mr. Speaker, the day that the Little White House was dedicated in 1947. I remember not long thereafter seeing a speech that was written by President Roosevelt and meant to be given to the Nation on the annual Jefferson Day of April 13, 1945. That speech, as you know, was never delivered because he died the day before. But, knowing his friends and reading that speech that I copied as a teenager and committed part of it to memory, I realized that he gave us something more than material goods and wartime leadership. He gave us a spirit that we can draw upon today during our economic problems, during our international crises.

He reminded us of that thread of faith that our country has. I would like to recall those words that were never spoken by President Roosevelt, those words that were part of that undelivered address, that they should be part of the RECORD today, because they tell us of the faith and of the need to lay fear aside and to be positive in what we do as Americans.

President Roosevelt wrote these words:

> The only limit to our realizations of tomorrow will be our doubts of today. Let us move forward with strong and active faith.

Those words are a memorial to his entire life. Those words are found engraved in Georgia at the Warm Springs Foundation, and I think that they should be perpetuated in the RECORD today as a memorial to this great man.

Mr. PEPPER. I yield 4 minutes to the distinguished gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, I want to commend the distinguished gentleman from Florida (Mr. PEPPER) for making this effort and taking this time to pay tribute to the man who was undoubtedly the greatest President in this century, and one of the three or four greatest leaders this country has ever produced.

I was a teenager, 14 years old, when Franklin Roosevelt became President, and I was a 26-year-old veteran of World War II when he died. Those of us who lived through that time felt his death as though a member of our family had passed away, such was his personal impact on every American.

I conducted some hearings last week on a bill I authored, which is now pending before my subcommittee, to create a new Youth Work Conservation Corps.

□ 1650

We had some wonderful testimony from young people about what their experience in the Youth Conservation Corps and the Young Adult Conservation Corps had done for them, working for our national parks, national forests, and other similar public projects. We also had testimony from some former members of the Civilian Conservation Corps, and they talked about what a wonderful thing President Roosevelt's CCC had done for the country and done for them personally. One of them said that he would have probably ended up in the penitentiary if it had not been for the CCC, which changed his whole outlook on life.

I got to thinking about Franklin Roosevelt and what a contrast we see today, compared to the days when he was President, with his ability to emphasize the positive and lift everyone up to share his aspirations for our country and for mankind. We need to recapture that kind of spirit today. Practically all we hear these days in this body and in this country are negative ideas—cut this, confront that person, and gut this program. We seem to be spending most of our time these days struggling to save the great humanitarian and conservation programs created in the days of the New Deal and since then against mean-spirited attacks and devastating cuts.

We need to get back some of the spirit of Franklin Roosevelt, a spirit that was perhaps best epitomized in his first Inaugural Address in 1933, a time of the darkest Depression, when he said, "The only thing we have to fear is fear itself." That is just as true today, I say to the Members, as it was when Franklin Roosevelt became President. God knows, if we are going to deal effectively and humanely with the tremendous problems we face today and for the remaining part of this century—the terrible threat of nuclear war that confronts mankind, the threat of mass starvation for one fourth of mankind, the threat of environmental destruction—we need something more than our fears. We need inspiration. We do not need just a movie type "sell." We need inspiration from the heart. We need from the highest office in the land a message of hope and humanity—and deeds to match the message. We need a showing of concern for all our people, not just the wealthy and the powerful.

When I was in Columbia Law School, I had the privilege to study corporation law under Adolph Berle, who was one of President Franklin Roosevelt's brain-trusters. We had an opportunity to get together with Mr. Berle sometimes after class, and on one occasion he told us that one time President Roosevelt asked him to prepare a draft for one of Roosevelt's famous fireside chat radio speeches to the American people. Berle said he put a lot of flowery language and lofty ideas in the draft and gave it to the President. The next day the President called him in and he said:

> Adolph, I want to tell you something. When I get ready to make a fireside chat, I try to envision the people who are listening to me. There will be a housewife cooking dinner, there will be a mechanic working in a garage, millions of individuals each going about his or her own personal affairs. If I am going to get their attention, I first have to tell them what I am doing about their problems and the things that concern them in their daily lives. If I succeed in that, then at the end I can talk about a few high-level concerns of my own.

Adolph Berle said:

> That is the best lecture in public speaking I ever had. Franklin Roosevelt always thought first about the people whom he was elected to serve. He never forgot them. And so they never forgot him.

Mr. Speaker, that is a challenge to us in this day and age, and I think this is a most appropriate time to be thinking about that great American, Franklin Roosevelt.

Mr. PEPPER. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Virginia (Mr. DAN DANIEL).

Mr. DAN DANIEL. Mr. Speaker, I am very grateful to the able gentleman for yielding me this time.

I rise in strong support of this resolution. The gentleman from Ohio (Mr. SEIBERLING) mentioned in the course of his remarks that one of President Roosevelt's programs was the CCC (the Civilian Conservation Corps). I was an enrollee in the Civilian Conservation Corps, and I recall, Mr. Speaker, the events which led up to my acceptance.

During that period, as the son of a tenant farmer, I was living down in Mecklenburg County, Va., and for 2 years in a row our crop did not bring in enough to pay for the fertilizer. I recall that during the fall of 1932, I believe it was, basically what we had to eat we foraged from the creek banks and the floor of the forest.

I had never been away from home for any length of time. I recall that not only did that program keep a lot of us from developing malnutrition, but I think it also gave those of us who did not have the benefit of an education an opportunity to learn basic skills and also to associate with others from different sections of the country. This experience broadened my horizons and today I find frequent opportunity to apply the lessons learned.

There is no more fitting memorial to the memory of President Franklin D. Roosevelt than the parks, the highways, the power projects and the public buildings which stand as living and useful reminders of that terrible time and the man whose vision and compassion made him the leader for the time.

It appears to be a matter of divine will that in this Nation's time of need a leader is called forth who is equal to the need. When the Nation needed them, there was Abraham Lincoln and there was Franklin Roosevelt, John Kennedy and Dwight Eisenhower and Ronald Reagan, who shares their spark.

Mr. Speaker, I want to pay tribute to that great man of his time, Franklin Roosevelt, and I hope that all Members will support this resolution.

● Mr. O'NEILL. Mr. Speaker, today the House gives honor to the greatest American President of this century.

Franklin Delano Roosevelt was a giant.

He was a giant, most of all, in his compassion for the average working person. More than any other President he had the ability to touch the daily concerns of the average citizen. He knew what people felt. He knew what they needed. He knew what they feared. Most important of all, he knew their dreams.

For the average American working family, F.D.R. was a hero. He stood up for us. He fought the special interests. He created a broad national coalition dedicated to achieving economic opportunity for all Americans—not just the few.

Today, America reaps the benefit of what Roosevelt accomplished.

When F.D.R. was inaugurated, half the people in this country were living in poverty or close to poverty. Today, less than 10 percent are in that category. When F.D.R. was inaugurated, only a small fraction of Americans went on to college. Today, the doors of higher education are opened to the great majority of our people.

This is just part of the legacy this great man has left us. In a real sense, it was President Roosevelt himself—and the great coalition that he began—which created the American middle class.

Due to his great work and the great programs he inspired millions of Americans were able to find work, to educate their children, to achieve a new standard of living for their families. They were able to make good on their dreams.

Today, those millions of Americans still have their dreams—to get a job, to own a home, to educate their children, to provide for their retirement. That American dream is as alive today as it was in F.D.R.'s day.

Today, in honoring President Roosevelt we should remember his goals for our country. We should remember the cause for which he fought, the cause of the average American. That was a noble cause in Roosevelt's day. It is a noble cause today.●

● Mr. FISH. Mr. Speaker, I appreciate this opportunity to support House Concurrent Resolution 220, providing for a joint session of Congress to be held the week of January 30, 1982, to commemorate the 100th anniversary of the birth of one of the greatest statesman in the 20th century, Franklin Delano Roosevelt.

The joint committee recommendation—that expenses for this observance not exceed $25,000—is an embarrassment and indignity to the memory of a man who helped to restore faith in our country's institutions through two historic circumstances—the depression and World War II. This sum is completely inadequate to sufficiently provide for an appropriate memorial to F. D. R. Even in these times of budget austerity, there should be an exception made in this instance.

President Reagan has often spoken of the great influence President Roosevelt had on him. Franklin Delano Roosevelt had a profound effect upon this Nation, as few individuals whose memories go back to the 1930's and 1940's were not influenced by this great man. Under Roosevelt, the White House became the focus of all Government—the fountainhead of ideas, the initiator of action, and the representative of the national interest.

Franklin Delano Roosevelt, a resident of Hyde Park, N.Y., and a constituent of my father, Hamilton Fish, was a successful administrator because he gave people a fighting chance for lost causes. Articulating the dreams of the common man, his striking ingenuity and innovation in meeting the problems of governing had nearly everyone in the Government caught up to some degree by a sense of participation in something larger than themselves. It is not merely that the average person received benefits they had not had before—rather that they were recognized as having a place in the commonwealth.

I cannot overestimate the unifying force President Roosevelt had on this country; $1.8 million would have been a modest amount to spend—for the American people to participate in the commemoration of a great human being, who—regardless of his birth into privileged circumstances—strove with those in his party for more social and economic justice for the underprivileged. Disabled by poliomyelitis, Mr. Roosevelt himself became a symbol of hope for those similarly affected.

It is our responsibility that the American people are able to share—in the midst of all-encompassing budget cuts—in the commemoration of this great President who epitomized hope during most uncertain conditions.

The expenditure of $500,000 was originally proposed to cover the costs in paying tribute by acquiring from Mr. Roosevelt's great documentary filmmaker and author, Mr. Pare Lorentz, that academically acclaimed document: "The days of Franklin D. Roosevelt: a chronicle;" specifically coordinating a joint session of Congress to be held on January 29, 1982; and hearing a memorial address by a distinguished scholar. The failure to include money for this purpose is a personal disappointment and the Nation's loss.

Considering that the Congress allocated $7.5 million in 1974 on President Hoover's memorial, we would be spending much much less, even at $1.8 million. $25,000 is a total disgrace. It would be ironic to spend more on the President who helped create the depression than on the man who helped the country out of the depression. $1.8 million would have been a small price to pay to allow wide access of Mr. Lorentz' manuscript among the American public.

The Roosevelt Library in Hyde Park informs me that over 500,000 people visited the Roosevelt home and estate grounds in 1980 alone. The revenue collected goes to a land and conservation fund—a most appropriate allocation considering President Roosevelt was a leading conservationist and celebrated planter of trees on his estate.

Although I support the commemoration of F. D. R.'s 100th birthday, I strongly disagree with the committee's recommendation.●

● Mr. BENNETT. Mr. Speaker, I was a young man in college when Franklin Roosevelt was elected to the Presidency. I spoke for his election and cast my first vote for him. Later while still in college I traveled to Warm Springs to see him. I served in this House with two of his five sons. I often talked with and corresponded with his able wife and widow.

I experienced the dark years of the depression when my family lived in a garage on a dirt road in Tampa. He offered by generation hope from despair. I fought as an infrantryman in World War II when he was our Commander-in-Chief; and his able leadership in that war and in peacetime made life more certain and more meaningful.

At the end of the war, Mr. Speaker, I went back to Warm Springs to help me regain strength lost in the war, as well as to take there another who needed the help given there to those who were crippled by disease or injury. The warm waters were helpful but the warm spirit which made those springs famous was even more curative in my return to civilian life.

Mr. Speaker, I am so glad that with these personal experiences I have today the opportunity to speak here in tribute to the remarkable life of Franklin D. Roosevelt. He offered excellent leadership when it was desperately needed. I am grateful for that.

I am grateful that Franklin D. Roosevelt lived a life that brought hope to replace despair and the vision for a

better life for our Nation and for all mankind.●

● Mr. MOAKLEY. Mr. Speaker, I would like to take the opportunity to insert in the RECORD a brief response to the concerns raised by the gentleman from Minnesota (Mr. FRENZEL).

It has been the standard practice of Congress, for quite some years, to assign the expenses of joint committees, and some other joint entities, to the contingent fund of one House or the other.

The practice appears to stem from a parliamentary situation which dates from 1924. In that year, the Committee on Accounts reported a resolution—House Concurrent Resolution 19, 68th Congress—providing for a contract for extermination of pests at the Capitol, to be paid equally from the contingent funds of each House. Speaker Gillett sustained a point of order that the privilege of the resolution was destroyed by the inclusion of matter relating to the contingent fund of the other body. Although I would not venture to guess how the Chair would rule on a similiar question in the modern practice, it should be noted that the language of clause 4(a) of rule XI relating to funding resolutions is virtually the same as the language of the rule of 1803, on which Speaker Gillett relied in the prior ruling.

Mr. Speaker, in responding to the question raised by the gentleman from Minnesota, it would be untrue to say that we explored this question in the committee when considering House Concurrent Resolution 220.

The simple fact is that the practice of alternately assigning entities to the contingent funds was the obvious and simple response to the parliamentary difficulties encountered earlier in the century, and that the practice has become so routine by this time that the decision to pay the expenses of this joint committee from our contingent fund raised no question in our consideration, at all.

If the House wished to institute a new policy of apportioning the expenses of each joint item to each contingent fund, Mr. Speaker, it does not strike me that it is a policy that would be at all difficult for the Committee on Rules to implement by a minor change in the rules of the House. But, neither would it have been difficult to implement quite some years ago. I rather suspect that the custom has found favor more from pragmatic that procedural advantages.

The Committee on Rules has jurisdiction over the establishment of joint committee and, in the organic statutes, determines which contingent fund will be charged for its expenses. Although I cannot, in all candor, assert that we have any system for keeping the charges exactly equally, the Committee on Appropriation does monitor the joint committees closely through the annual funding process and, of course, we do consult with the committee. During recent years, the appropriations recommended for permanent joint committees have treated the two Houses roughly equally:

[In thousands of dollars]

	Fiscal year—		
	1980	1981	1982
House-funded joint committees: Joint Committee on Taxation (House total)	2,455	2,632	2,967
Senate-funded joint committees:			
Joint Economic Committee	1,806	2,150	2,250
Joint Committee on Printing	719	760	816
Senate total	2,525	2,910	3,066

Therefore, Mr. Speaker, in most years the expenses of joint committees charged to each House have differed by less than $100,000. But the balance appears to be somewhat in our favor, so I would expect that the House ought to be charged in the present case.

Even though the distribution appears to be roughly fair, there are other practical reasons for continuing the present practice and the most compelling is that the present system has enhanced financial management and supervision.

Under current law (2 U.S.C. 95), "No payment shall be made from the contingent fund of the House of Representatives unless sanctioned by the Committee on House Administration." Similar supervisory authorities exist in the Senate. These authorities have enabled each House to establish audit and control procedures and detailed regulations governing the nature of goods and services which can and cannot be charged to the respective contingent funds.

The regulations and the control procedures of the two Houses, however, are not completely uniform. And providing a committee with the ability to choose which guidelines it will be subject to, by virtue of being able to choose which House's voucher to use, could lead to some difficulties. The appropriate supervisory committees would find audit and control awkward unless new coordinating mechanisms could be established.

Although, Mr. Speaker, I would be reluctant to change the funding allocations now used, unless there were substantial changes in the fiscal management procedures, I do think the gentleman from Minnesota has raised an important question. I think it is long overdue for Congress to take a very close look at the way it establishes, funds, supervises, and controls those entities which are not directly subject to either House but which are not only charged to the budget of the legislative branch, but constitute a larger portion of that budget than the House and Senate combined.

Mr. Speaker, I think the gentleman has raised an important question that should be high on the agendas of the committees on which we each serve.

But, in all candor, I have little difficulty in separating House Concurrent Resolution 220 from that concern. The resolution presents little controversy in allowing Congress to discharge its responsibilities for the commemoration of this important anniversary, and it does so in a manner that fully protects the small Federal investment.●

Mr. PEPPER. Mr. Speaker, I yield back the balance of my time.

Mr. RHODES. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. BENNETT). Pursuant to the provisions of House Resolution 277, the previous question is ordered on the concurrent resolution.

The question is on the concurrent resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. RUSSO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 344, nays 18, not voting 71, as follows:

□ 1710

Mr. SILJANDER and Mr. MARLENEE changed their votes from "yea" to "nay."

Mr. FORD of Michigan changed his vote from "nay" to "yea."

So the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

SENATOR STEVENS DESERVES GREAT CREDIT FOR SENATE EFFORT TO LIFT PAY CAP

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WOLF. Mr. Speaker, Senator TED STEVENS, chairman of the Senate Civil Service Subcommittee deserves great credit for the passage of the Stevens amendment to raise the cap on Federal executive salaries. This is the right thing to do, and I commend him for his courage and determination in sheparding his amendment through the Senate once again.

On November 18, 1981, the New York Times in its editorial indicated:

A decent raise would surely pay for itself in efficiency and morale. Federal executives deserve it, and so does the Nation.

On November 19, 1981, the Washington Post in its editorial indicated:

Early retirements among Federal executives in all agencies have reached such alarming proportions—over 95 percent of those newly eligible to retire are now doing so, compared with only 17 percent 5 years ago—that the General Accounting Office recently estimated that lifting the pay cap could actually save the Government money because of reduced pension costs. * * * it is time for Congress to release its federal hostages.

On November 20, 1981, the Wall Street Journal in its editorial indicated:

Today the Congress is face to face again with an issue it keeps trying to duck: raising the pay of top Federal officials. A House-Senate conference is going to consider an amendment to raise the pay cap from its present $50,000 level. It is hard to find an observer who will not agree that this should be done. * * *The conferees should do the right thing by the managers.

I urge my colleagues to support the Stevens language—it is right—and the time to act is now.

I include the editorials of the New York Times, the Washington Post, and the Wall Street Journal at this point in the RECORD.

[From the New York Times, Nov. 18, 1981]

THE TOP OFFICIALS NEED A RAISE

In the parlance of the moment, Congress ought to get off the back of senior Government officials. It needs once and for all to eliminate the link between their salaries and its own.

Increases in the top-level executive grades are urgent. Since 1977 the pay of the highest Federal officials has been raised 5.5 percent; other white-collar Federal employees meanwhile had raises that total 33.5 percent. That means more than 48,000 employees' pay has been leveled flat, eliminating distinctions between managers and those they manage.

That is no way to run a Government or hold superior talent. With executive pay now capped at $50,112 a year, senior managers are fleeing Federal service. Programs in health, education and space exploration seem typically hard hit. Whereas 15.5 percent of eligible executives retired in 1978, the current rate is above 90 percent. Replacing them is no easier than holding them.

The problem is rooted in politics. To camouflage its own pay raises, Congress over the years contrived to link its salary scales to those of the top people in the judicial and executive branches. But it also prohibited almost all of these officials from earning more than a member of Congress.

Now the cost of that folly is coming home. The legislators are embarrassed to raise their own pay while they cut most Federal budgets. And so some of the best talent in Government is deprived and driven away.

The House debate of the issue is not promising; it turns on a bill that would merely extend the cap for another year. The case for a fundamental change has never been stronger. But if that is rejected, Congress should at least provide some relief, by approving a proposal in the Senate to give senior executives an immediate 4.8 percent increase.

A decent raise would surely pay for itself in efficiency and morale. Federal executives deserve it, and so does the nation.

[From the Washington Post, Nov. 19, 1981]

FREE THE FEDERAL HOSTAGES

Congress has another chance today to do right by top federal officials. Sen. Ted Stevens, chairman of the civil service subcommittee, will be urging the Senate to raise the cap on federal executive salaries as part of the spending bill Congress must complete today to keep federal funds flowing.

We have heard from all sides that the problem of pay compression at the top levels of civilian and military pay is causing a massive loss of scarce talent. Pentagon officials are especially alarmed at the loss of technical and administrative personnel to high-paying defense contractors. Early retirements among federal executives in all agencies have reached such alarming proportions-over 95 percent of those newly elegible to retire are now doing so, compared with only 17 percent five years ago—that the General Accounting Office recently estimated that lifting the pay cap could actual-

ly save the government money because of reduced pension costs.

While other factors may contribute to this exodus, the pay cap must be a major contributor. Federal executives now earn only 5.5 percent more than they did five years ago. Over the same period, private-sector executive salaries rose 40 percent and cost-of-living adjustments pushed up federal pensions by 55 percent. For those who have stayed behind, the cap has caused severe management and morale problems. Pay increases at lower grade levels have forced more and more workers up against the pay ceiling. At the moment there is nothing beyond self-esteem to motivate workers to accept the added duties and pressures associated with a promotion within the top five civil service levels.

The Stevens amendment would not remove the pay cap entirely. It would, however, improve the competitiveness of top federal salaries somewhat and restore some incentive for promotion at the top grade levels. For several years now, Congress has held federal officials hostage to its own reluctance either to take the heat for raising congressional pay—to which federal pay is now tied—or allow federal executives to earn more than congressmen. Whatever the merits of a congressional pay raise—and there are many separate factors involved in that matter—it is time for Congress to release its federal hostages.

[From the Wall Street Journal, Nov. 20, 1981]

MANAGING THE DEMOCRACY

Today the Congress is face to face again with an issue it keeps trying to duck; raising the pay of top federal officials. A House-Senate conference is going to consider an amendment to raise the pay cap from its present $50,000 level. It is hard to find an observer who will not agree that this should be done. It is also quite possible that the congressional conferees will refuse to do it. The reasons say something about the limits on our ability to govern ourselves.

Some of the basic facts of the problem are plain enough. Since 1977, the pay of top federal officials has risen by 5.5 percent, while that of lower-level federal employees has gone up by 35.5 percent. The internal pay differentials, in other words, have been shrinking to insignificance. For high federal executives, who have skills salable on the outside, the gap between government and private salaries has been growing. Retirements among eligible top federal executives have increased to the point where it may actually be cheaper to raise their pay than to let them go and have to pay for both their replacements and their pensions at once.

Keeping the cap on at its present level is, in any event, not going to make a dent in the budget anywhere near large enough to justify the losses it will pretty surely continue to cause in the way of poor management. But Congress has so far failed to act. Why? Because at present these executive salaries and congressional salaries are pegged to one another's levels, and the Congress does not want to undergo the public embarrassment of raising its own pay.

So, you ask, why don't these understandably modest Congressmen simply break the executive salaries free of congressional pay and allow them to find a more appropriate level? Because the Congressmen really don't want to set loose the possibility that the managers will end up getting paid more than Congressmen.

You have here a bunch of Congressmen who are obviously incapable of talking about this issue except in the most inappropriate populist terms. If you're in a money-saving mood, they say, it has to come out of the hides of those who earn the most. If you're setting pay scales, the appointed bureaucracy cannot possibly be allowed to get more than the elected representatives of the people.

These are not very surprising arguments to hear in Washington, but they are truly lousy reasons for failing to take a patently sensible action like raising the pay cap. The conferees should do the right thing by the managers, and the rest of us should note the kind of simple-minded thinking about political rights and wrongs that gets us into this sort of mess.

TRIBUTE TO DR. FRANK S. ADAMO

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, Dr. Frank S. Adamo has served his fellow man in many different capacities during his long and distinguished career as a medical doctor. Because of this service he is being honored by the Hillsborough County Medical Association at a ceremony to take place on December 1 in Tampa, Fla.

Dr. Adamo distinguished himself as a member of the medical profession by his service to people in the Tampa Bay area prior to World War II. In 1940 he began his military career by joining the U.S. Army. When the Japanese attacked in 1941, Dr. Adamo was serving in the Philippine Islands and was immediately caught up in the terrible hostilities involving American and Philippine soldiers. During these days of adversity, Dr. Adamo rendered medical service, demonstrating his courage and skill in service to the sick and wounded during the conflict in the Philippine Islands. His service brought him distinction not only as an individual but as a medical doctor. He distinguished himself in the medical field by discovering and perfecting a new and innovative way to treat the wounded under extemely adverse circumstances. After his capture and internment by Japanese forces, Dr. Adamo continued administering to those who needed his service until the termination of the war. For this service he was awarded the Legion of Merit which reads as follows:

As Chief of the surgical service of General Hospital Number 2, on the Bataan Peninsula, Lieutenant Colonel Adamo, in spite of almost total lack of standard equipment and facilities, efficiently directed the surgical service and personally performed a large share of the surgical work with marked success.

Dr. Adamo returned to Tampa after the war to resume his medical practice and to be reunited with his wife and two daughters, Vivian and Mary Frances. He continued in the active practice of medicine until his recent retirement.

Dr. Adamo has always been respected and admired by those who know him, and he has been acclaimed by the citizens of Florida and of the Nation. It is appropriate that he be acclaimed and recognized by his fellow medical doctors on the occasion of December 1, 1981—almost 40 years after the outbreak of hostilities that marked our involvement in World War II. Dr. Frank S. Adamo, the Congress remembers what you have done for your country, its soldiers, and your fellow man. We thank you.

PERSONAL EXPLANATION

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, it was necessary yesterday for me to be absent on rollcall No. 326 when the House was considering House Joint Resolution 349. At that time I was swearing in a new member of the Federal Maritime Commission, Mr. James Carey, and could not be present on the floor. Had I been present and voting, I would have voted in favor of the resolution.

I ask unanimous consent that this explanation be inserted in the permanent RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERSONAL EXPLANATION

Mr. DENARDIS. Mr. Speaker, yesterday I was absent for rollcall No. 326 on House Joint Resolution 349, which is the resolution committing U.S. troops to the Sinai. Had I been here, I would have voted "yes." At the time I was at the Department of Transportation with constituents, visiting with the Federal Railway Administrator.

I ask unanimous consent that this explanation be inserted in the permanent RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

THE FEDERAL RESERVE BOARD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 60 minutes.

● Mr. GONZALEZ. Mr. Speaker, I continue, as I have twice before, on the subject leading to my introduction of two resolutions and three bills having to do in the case of one of the bills, the restructuring of the Federal Reserve Board; in the other, the elimination of the so-called Open Market

Committee; and in the case of the other, the actual elimination of the Board and placing it under the jurisdiction of the Department of the Treasury. And also two resolutions, one asking for the consideration of the impeachment of the Chairman of the Federal Reserve Board, and the other having to do with the Open Market Committee.

In the last discussion, I pointed out how necessary it is for us to understand the history involved in order to comprehend the precipice over which we hang suspended insofar as financial disaster is concerned.

□ 1720

Those businesses that are now bankrupt that were not at the time I started to discuss this issue, and particularly at the time that I introduced the resolutions, certainly they do not consider themselves to be suspended. They consider themselves to be right at the bottom of the pit. They are out of business. As a matter of fact, the way that small businesses are going out now, unquestionably will have to force the attention of not only this body, but the other on this level, on the congressional level, of a necessity, at this point nationally, it is still something that perhaps many can sleep on.

As I said the last time, there is an old Irish saying that goes to the effect that it is very easy to sleep on somebody else's wounds.

And I see that apprehension particularly because I find that everyone in and out of Congress seems to be under the impression that the limited resources of the FDIC, the Federal Deposit Insurance Corporation, and its counterpart, the Federal Saving and Loan Insurance Corporation, are sufficient to prevent what used to be called a monetary panic. And this is absolutely not true. We are not exempt from having the sorry and tragic experiences of the monetary panics of 1873, 1893, and 1907, and, as a matter of fact, as of the beginning of this autumn, and particularly after the meeting of the International Monetary Fund in September.

I am convinced, and I hope I am dead wrong, that it is inevitable that we have now set through happenstance in some cases and through design in others, all of those forces that I think now are irreversible and that we better be prepared and this is the reason I am rising to speak, because I am not only going into the extensive history of this to point out the reason I felt impelled to introduce this proposed legislation, but also the fears that I have as a member of the Banking Committee and the testimony that we have had all this year, from the regulators of the banking and savings institution industry.

From the very beginning of the origin of our Government as a national government, this question of banking and the methods that the Government will use to do its financing, the financing of the people, has been a question of most grievous concern. In fact, in the very first Congress, even though before in the Continental Congress we had the Bank of North America, but since the Continental Congress and particularly under the Articles of Confederation, were so weak there was a question about whether that Bank of North America was legal. So that a State bank in Pennsylvania had to be chartered to carry out those purposes.

But one the formality of the adoption of the Constitution came about, and the first Congress in 1792, and the need for the new government to show its strength by the assumption of the debts incurred during the Revolution, during the various and sundry States it found it necessary to provide for the legislation setting up the first Bank of the United States as it was called.

However, even then there was great dispute and so when the Congress debated the measure and passed it, there was very serious question about its constitutionality. So that President Washington appointed three men, James Madison, Thomas Jefferson, and Alexander Hamilton to give him an opinion on that first bank formation and they did.

And I recommend to my colleagues for reading—they read those opinions today. They are still timely in their own way.

President Washington, after great study, adopted the recommendation contained in Alexander Hamilton's report and so the first bank was created with a 20-year charter. It worked successfully and it expired in 1911. By 1916 the need for a bank of that nature, what we call central bank facilities today, was apparent. The second bank of the United States was formed. But when the attempt was made to renew its charter, in the early 1830's President Jackson vetoed that bill and therefore that second bank went out.

However, the reading of the history of that is very important. It became the biggest issue in the Presidential race of 1832. When he was reelected, then President Jackson withdrew all of the public moneys from that second bank and I am going to read to the Members the statement he made because if ever it was timely it is timely today, because the same thing is being said about these attempts to bring under control the Federal Reserve Board. Identical things.

Here is what President Jackson told his Cabinet:

It has been alleged by some as an objection to the removal of the deposits, that the bank has the power and in that event will have the disposition to destroy the state banks, employed by the government, and bring distress upon the country. It has been the fortune of the President to encounter dangers which were represented as equally alarming and he has seen them vanish before resolution and energy.

If indeed this corporation—the bank that is—now holds in its hands the happiness and prosperity of the American people, it is high time to take the alarm. If the despotism is upon us, and our only safety is in the mercy of the despot recent developments in relation to his designs and the means he employs show how necessary it is to shake it off.

The struggle can never come with less distress to the people of under more favorable auspices than at the present moment.

That is exactly, I think, what a second President Jackson would say today with relation to the Federal Reserve Board which indeed is a monetary despot. It has the whole fate of the country hanging in the balance right now and at this point I want to continue because by the time we came to 1912, because that second bank had failed, it was not until the National Currency Act of 1964 that an actual national banking system was set up and obviously by the turn of the century it was going to be proved just inadequate and the panic of 1907 confirmed.

In 1912, the House of Representatives, Mr. Speaker—not the Congress, not the House and the Senate—the House of Representatives appointed what later became known as the Pujo committee. This was a committee that, in 1912, was founded by virtue of a resolution passed in the House of Representatives on the concentration and control of money and credit.

□ 1730

The House directed the Committee on Banking and Currency, which I have had the honor to belong to in the 20 years I have been in the Congress, to investigate banking and currency with a view to necessary legislation.

It so happened that the subcommittee was headed by a gentleman by the name of Arsene J. Pujo and they investigated and came out with a report.

I ask that at this point in the record I insert an excerpt of that report into the RECORD.

THE CONCENTRATION OF CONTROL OF MONEY AND CREDIT

(Report of the Pujo Committee—1913)

SECTION 2—FACT OF INCREASING CONCENTRATION ADMITTED

The resources of the banks and trust companies of the city of New York on 1911 were $5,121,245,175, which is 21.73 percent of the total banking resources of the country as reported by the Comptroller of the Currency. This takes no account of the unknown resources of the great private banking houses whose affiliations to the New York financial institutions we are about to discuss.

That in recent years concentration of control of the banking resources and consequently of credit by the groups to which we will refer has grown apace in the city of New York is defended by some witnesses and regretted by others, but acknowledged by all to be a fact.

As appears from statistics compiled by accountants for the committee, in 1911, of the total resources of the banks and trust companies in New York City, the 20 largest held 42.97 percent; in 1906, the 20 largest held 38.24 percent of the total; in 1901, 34.07 percent.

SECTION 3—PROCESSES OF CONCENTRATION

This increased concentration of control of money and credit has been effected principally as follows:

First, through consolidations of competitive or potentially competitive banks and trust companies, which consolidations in turn have recently been brought under sympathetic management.

Second, through the same powerful interests becoming large stockholders in potentially competitive banks and trust companies. This is the simplest way of acquiring control, but since it requires the largest investment of capital, it is the least used, although the recent investments in that direction for that apparent purpose amount to tens of millions of dollars in present market values.

Third, through the confederation of potentially competitive banks and trust companies by means of the system of interlocking directorates.

Fourth, through the influence which the more powerful banking houses, banks, and trust companies have secured in the management of insurance companies, railroads, producing and trading corporations, and public utility corporations, by means of stockholdings, voting trusts, fiscal agency contracts, or representation upon their boards of directors, or through supplying the money requirements of railway, industrial, and public utilities corporations and thereby being enabled to participate in the determination of their financial and business policies.

Fifth, through partnership or joint account arrangements between a few of the leading banking houses, banks, and trust companies in the purchase of security issues of the great interstate corporations, accompanied by understandings of recent growth—sometimes called "banking ethics"—which have had the effect of effectually destroying competition between such banking houses, banks, and trust companies in the struggle for business or in the purchase and sale of large issues of such securities.

SECTION 4—AGENTS OF CONCENTRATION

It is a fair deduction from the testimony that the most active agents in forwarding and bringing about the concentration of control of money and credit through one or another of the processes above described have been and are—

J. P. Morgan & Co.

First National Bank of New York.

National City Bank of New York.

Lee, Higginson & Co., of Boston and New York.

Kidder, Peabody & Co., of Boston and New York.

Kuhn, Loeb & Co.

Combined Power of Morgan & Co., the First National, and National City Banks.—In earlier pages of the report the power of these three great banks was separately set forth. It is now appropriate to consider their combined power as one group.

First, as regards banking resources:

The resources of Morgan & Co. are unknown; its deposits are $163,000,000. The resources of the First National Bank are $150,000,000 and those of its appendage, the First Security Co., at a very low estimate, $35,000,000. The resources of the National City Bank are $274,000,000; those of its appendage, the National City Co., are unknown, through the capital of the latter is alone $10,000,000. Thus, leaving out of account the very considerable part which is unknown, the institutions composing this group have resources of upward of $632,000,000, aside from the vast individual resources of Messrs. Morgan, Baker, and Stillman.

Further, as heretofore shown, the members of this group, through stockholdings, voting trusts, interlocking directorates, and other relations, have become in some cases the absolutely dominant factor, in others the most important single factor, in the control of the following banks and trust companies in the city of New York:

[In thousands]

(a) Bankers Trust Co., resources	250,000
(b) Guaranty Trust Co., resources	232,000
(c) Astor Trust Co., resources	27,000
(d) National Bank of Commerce, resources	190,000
(e) Liberty National Bank, resources	29,000
(g) Chase National Bank, resources	150,000
(f) Farmers Loan & Trust Co., resources	135,000
In all, 7, with total resources of	968,000
Which, added to the known resources of members of the group themselves, makes	1,600,000
As the aggregate of known banking resources in the city of New York under their control or influence.	
If there be added also the resources of the Equitable Life Assurance Society controlled through stock ownership of J. P. Morgan	504,000
The amount becomes	2,104,000

Second, as regards the greater transportation systems.

(a) Adams Express Co.: Members of the group have two representatives in the directorate of this company.

(b) Anthracite coal carriers: With the exception of the Pennsylvania, the Reading, the Central of New Jersey (a majority of whose stock is owned by the Reading), the Lehigh Valley, the Delaware, Lackawanna & Western, the Erie (controlling the New York, Susquehanna & Western), and the New York, Ontario & Western, afford the only transportation outlets from the anthracite coal fields. As before stated, they transport 80 percent of the output moving from the mines and own and control 88 percent of the entire deposits. The Reading, as now organized, is the creation of a member of this banking group—Morgan & Co. One or more members of the group are stockholders in that system and have two representatives in its directorate; are stockholders of the Central of New Jersey and have four representatives in its directorate; are stockholders of the Lehigh Valley and have four representatives in its directorate; are stockholders of the Delaware, Lackawanna & Western and have nine representatives in its directorate; are stockholders of the Erie, and have four representatives in its directorate; have two representatives in the directorate of the New York, Ontario & Western; and have purchased or marketed practically all security issues made by these railroads in recent years.

(c) Atchison, Topeka & Sante Fe Railway: One or more members of the group are stockholders and have two representatives in the directorate of the company; and since 1907 have purchased or procured the marketing of its security issues to the amount of $107,244,000.

(d) Chesapeake & Ohio Railway: Members of the group have two directors in common with this company; and since 1907, in association with others, have purchased or procured the marketing of its security issues to the amount of $85,000,000.

(e) Chicago Great Western Railway: Members of the group absolutely control this system through a voting trust.

(f) Chicago, Milwaukee & St. Paul Railway: Members of the group have three directors or officers in common with this company, and since 1909, in association with others, have purchased or procured the marketing of its security issues to the amount of $112,000,000.

(g) Chicago & Northwestern Railway: Members of the group have three directors in common with this company, and since 1909, in association with others, have purchased or procured the marketing of its security issues to the amount of $31,250,000.

(h) Chicago, Rock Island & Pacific Railway: Members of the group have four directors in common with this company.

(i) Great Northern Railway: One or more members of the group are stockholders of and have marketed the only issue of bonds made by this company.

(j) International Mercantile Marine Co.: A member of the group organized this company, is a stockholder, dominates it through a voting trust, and markets its securities.

(k) New York Central Lines: One or more members of the group are stockholders and have four representatives in the directorate of the company, and since 1907 have purchased from or marketed for it and its principal subsidiaries security issues to the extent of $343,000,000, one member of the group being the company's sole fiscal agent.

(l) New York, New Haven & Hartford Railroad: One or more members of the group are stockholders and have three representatives in the directorate of the company, and since 1907 have purchased from or marketed for it and its principal subsidiaries security issues in excess of $150,000,000, one member of the group being the company's sole fiscal agent.

(m) Northern Pacific Railway: One member of the group organized this company and is its fiscal agent, and one or more members are stockholders and have six representatives in its directorate and three in its executive committee.

(n) Southern Railway: Through a voting trust, members of the group have absolutely controlled this company since its reorganization in 1894.

(o) Southern Pacific Co.: Until its separation from the Union Pacific, lately ordered by the Supreme Court of the United States, members of the group had three directors in common with this company.

(p) Union Pacific Railroad: Members of the group have three directors in common with this company.

Third, as regards the greater producing and trading corporations.

(a) Amalgamated Copper Co.: One member of the group took part in the organization of the company, still has one lead-

ing director in common with it, and markets its securities.

(b) American Can Co.: Members of the group have two directors in common with this company.

(c) J. L. Case Threshing Machine Co.: The president of one member of the group is a voting trustee of this company and the group also has one representative in its directorate and markets its securities.

(d) William Cramp Ship & Engine Building Co.: Members of the group absolutely control this company through a voting trust.

(e) General Electric Co.: A member of the group was one of the organizers of the company, is a stockholder, and has always had two representatives in its directorate and markets its securities.

(f) International Harvester Co.: A member of the group organized the company, named its directorate and the chairman of its finance committee, directed its management, through a voting trust, and markets its securities.

(g) Lackawanna Steel Co.: Members of the group have four directors in common with the company and, with associates, marketed its last issue of securities.

(h) Pullman Co.: The group has two representatives, Mr. Morgan and Mr. Baker, in the directorate of this company.

(i) United States Steel Corporation: A member of the group organized this company, named its directorate, and the chairman of its finance committee (which also has the powers of an executive committee) is its sole fiscal agent and a stockholder, and has always controlled its management.

Fourth, as regards the great public utility corporations.

(a) American Telephone and Telegraph Co.: One or more members of the group are stockholders, have three representatives in its directorate, and since 1906, with other associates, have marketed for it and its subsidiaries security issues in excess of $300,000,000.

(b) Chicago Elevated Railways: A member of the group has two officers or directors in common with the company, and in conjunction with others marketed for it in 1911 security issues amounting to $66,000,000.

(c) Consolidated Gas Co. of New York: Members of the group control this company through majority representation on its directorate.

(d) Hudson & Manhattan Railroad: One or more members of the group marketed and have large interests in the securities of this company, though its debt is now being adjusted by Kuhn, Loeb & Co.

(e) Interborough Rapid Transit Co. of New York: A member of the group is the banker of this company, and the group has agreed to market its impending bond issue of $170,000,000.

(f) Philadelphia Rapid Tansit Co.: Members of the group have two representatives in the directorate of this company.

(g) Western Union Telegraph Co.: Members of the group have seven representatives in the directorate of this company.

Summary of Directorships Held by These Members of the Group.—Exhibit 134-B . . . shows the combined directorships in the more important enterprises held by Morgan & Co., the First National Bank, the National City Bank, and the Bankers and Guaranty Trust Cos., which latter two, as previously shown, are absolutely controlled by Morgan & Co. through voting trusts. It appears there that firm members or directors of these institutions together hold:

One hundred and eighteen directorships in 34 banks and trust companies having total resources of $2,679,000,000 and total deposits of $1,983,000,000.

Thirty directorships in 10 insurance companies having total assets of $2,293,000,000.

One hundred and five directorships in 32 transportation systems having a total capitalization of $11,784,000,000 and a total mileage (excluding express companies and steamship lines) of 150,200.

Sixty-three directorships in 24 producing and trading corporations having a total capitalization of $3,339,000,000.

Twenty-five directorships in 12 public utility corporations having a total capitalization of $22,245,000,000.

In all, 341 directorships in 112 corporations having aggregate resources or capitalization of $22,245,000,000.

The members of the firm of J. P. Morgan & Co. held 72 directorships in 47 of the greater corporations: George F. Baker, chairman of the board, F. L. Hine, president, and George F. Baker, Jr., and C. D. Norton, vice-presidents, of the First National Bank of New York, hold 46 directorships in 37 of the greater corporations; and James Stillman, chairman of the board, Frank A. Vanderlip, president, and Samuel McRoberts, J. T. Talbert, W. A. Simonson, vice-presidents, of the National City Bank of New York, hold 32 directorships in 26 of the greater corporations; making in all for these members of the group 150 directorships in 110 of the greater corporations. . . .

This resulted in the 1913 Federal Reserve Board Act and today, of course, we are concerned, because we have a startling, awesome, troubling similarity.

DRASTIC CUTS TO THE ECONOMY OF THE NATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas Mr. (ALEXANDER) is recognized for 60 minutes.

Mr. ALEXANDER. Mr. Speaker, this week the House passed a continuing appropriations resolution which was acted on and sent to the other body. In effect, it contained provisions which were intended to fund the Federal Government for the balance of this fiscal year. Just last night, we are advised that the other body added 75 amendments to that continuing resolution (H.J. Res. 357). Since that time the House has appointed conferees that are meeting this hour with conferees from the other body in an attempt to resolve the differences which exist between the House and the other body.

In effect, what the other body has done is to make changes in the continuing appropriation for the balance of the fiscal year 1982, which will make some very dramatic and fundamental impact upon the economy at large.

Mr. Speaker, I think that it is important for the American people to know what these changes are, and we are prepared to discuss some of those changes at this time.

The appropriations that will result from an action by the House and the Senate will fund the operations of the Federal Government during the balance of this fiscal year. Those reductions which were made by the other body will dramatically impact upon the lives of those people who are dependent upon the Government, will impact upon those programs which this Congress has enacted that impact upon the lives of the American people.

All of the appropriations are extremely important, and at the top of the list are the appropriations for the Departments of Labor and Health, Education, and Welfare.

I see my good friend, the gentleman from Wisconsin (Mr. OBEY), who has arrived in the Chamber and has asked me to yield to him for the purpose of discussing those differences.

I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Speaker, I thank the gentleman for yielding.

I think it is important especially because most of the discussion in the public media has been on the aggregate issue involved.

I think it is important that we understand in somewhat more specific terms exactly what this approach to budgeting mean in specific terms. At NIH, which is the core agency for overseeing and leading most of the medical research in the country, you will see that we have in the Senate a suggestion of a $171 million reduction under the House bill. That means that for the National Cancer Institute, for instance, you will have a $40 million reduction.

We have been trying desperately to keep the number of new research grants at a decent level and yet if the Senate proposal passes, you will have $40 million less to provide research on one of the most dread diseases in the country.

I do not know how many Members saw this morning a story of a little boy who was about to leave this country with his parents to go to Moscow for an operation on his eyes because he is slowly losing his sight and there is no known cure for his disease here in the United States. We do not know whether the procedure which is performed in Moscow offers any hope for that little boy or not, but we do know there appears to be nothing that we know of here in this country that can deal with his problem.

Yet if you look at the budget recommendations of the Senate, you see that they are asking that we reduce the funding which was contained in the House bill for the Eye Institute by $5 million.

Now, for heart, lung, and blood disease, they are asking for a $34 million reduction. Again, we have made more progress in controlling cardiovascular disease than any other group of diseases in the country in recent years.

We are on the verge of really nailing down a good bit of information which is just starting to come through because of the years of emphasis in those areas. We are told we should drop $34 million from that item.

In vocational rehabilitation, they are suggesting for the State grant program that we have a $34 million reduction in that program. That means in real terms a drop in purchasing power for vocational rehabilitation of 12 percent, and for anyone who has bothered to talk in their districts with citizens who have had serious physical problems and need vocational rehabilitation, this is really a sad sight to see.

In youth employment training, they are suggesting that we accept a $208 million reduction from the House proposal. They are suggesting that we go from a base of $696 million down to a figure which is $208 million less than the House figure of $504 million. We would be over 50 percent below the amount we had in fiscal year 1981.

For community health centers, they are asking that we reduce $11 million from the House figure.

In fuel assistance, emergency fuel assistance, we had a wild storm which just went through the upper midwest today. It is continuing on to the eastern part of the country tonight. Last year we were at $1.85 billion for that. The House cut it by $50 million. The Senate has come in $216 million under the House. That means that there will be approximately 532,000 people who received help in 1981 who will receive no help under the Senate proposal. Forty-five percent of those people, 240,000 of them, are elderly.

In Head Start, the President made a grand announcement that he was asking for $950 million this year. The Senate is suggesting that we cut that to $912 million. That means because of the cost increases and recommended cuts in those programs we will lose 15,000 Head Start kids.

Take older workers programs like Green Thumb and Senior Aid; we debated a lot on this floor today about programs that affect senior citizens.

□ 1740

If we accept the Senate proposal, we will have to drop 2,200 workers 55 years of age or older from programs like Green Thumb and Senior Aid.

Elderly nutrition. If the Senate proposals are adopted, we will be dropping 25,000 meals a day at very minimal—25,000 meals a day.

I would like to bring again to the attention of the House an episode which occurred in our Appropriations Subcommittee a few weeks ago.

The Department of Labor came in, Secretary Donovan came in and suggested we ought to reduce the personnel for the Employment Service by 8,000 people. He suggested that would provide a savings of $120 million. I discovered that the Department of Labor has a document which indicates that if we accept the President's recommendations, we will experience a $1 billion overpayment problem next year because of money paid either to ineligibles for unemployment compensation or money paid in the wrong amounts to persons who are eligible.

Now, that $1 billion estimate is not my estimate. That is the estimate of the Department of Labor in a document which they now have, which they have refused to release to the House and which I will be asking the Appropriations Committee to subpena.

That means that if we accept the President's cut in that one area, which is contained in the continuing resolution, we will not save $120 million that is suggested. We will in actuality be experiencing a $1 billion increase in waste and fraud. And I hardly see how that makes the Senate package a very good deal for the American taxpayers.

Mr. ALEXANDER. It is difficult to place in focus and to understand the scope of what we are doing here in dealing with an enormous budget which purports to spend over $700 billion.

Now, there is a lot of rhetoric about saving money on the part of the administration when, in fact, I am advised, by these 75 amendments, even through they purport to reduce the amount of outlays which are intended by the House, that the amount of outlays are actually increased by the other body.

Now, we do not have the calculations from the various computer runs which give us a total sum, but how does the gentleman reconcile the dialog and the rhetoric of reducing the outlays for the Federal Government with the actuality and prospect that the other body is actually increasing the amount of funds which would be appropriated by the Federal Government over the House figures?

Mr. OBEY. I simply cannot answer that, unless someone is using doctored computer figures down at OMB again. It is obvious, if you take a look at a number of these items, we are not going to be saving money. We are going to be costing the taxpayer a good deal of money.

I would also suggest, as J. Richard Monroe, president of Time, Inc., brought to our attention last week, 1 out of every 6 of all American children, about 10 million of them, live in poverty; 1 out of every 6 children in the United States has no regular source of medical care; 1 out of 3 has never seen a dentist. Among black children, 2 out of 5 are poor. And yet we are focusing most of the cuts, again, on that portion of the budget that falls most heavily on the poor and that portion of the budget that provides the most by way of investment in the country's future.

I agree with Senator GARN, who observed the other day that it is unreasonable and unrealistic to expect that we can take another 12 percent out of programs which have already been reduced, when I would observe that there are programs that the President has left untouched and which certainly ought to be scrutinized as a number of our House committees did. Before we go to the same well a second time, we ought to go to the other well at least once.

Mr. ALEXANDER. I thank the gentleman for his contribution.

Mr. STOKES. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Ohio.

Mr. STOKES. I thank the gentleman for yielding.

Mr. Speaker, I would certainly like to commend the gentleman from Arkansas for taking this special order to give us an opportunity to discuss the differences between the House and the Senate bill. There are some significant differences. I would like to take just a few moments to point up a few.

The gentleman from Wisconsin (Mr. OBEY) and I happen to serve on the Labor, Health and Human Services, and Education Subcommittee on Appropriations. He has done an excellent job of pointing up some of the differences between the two bills.

I would like to go over the area of health, where I have a very special interest, and just point out some of the more salient differences that are not only significant but are going to make a tremendous impact upon the American people in our domestic side of the budget if the House side of the budget does not prevail.

For instance, in the area of community health centers, the House proposal is $258,750,000, the Senate has $243.9 million, a difference of $14.9 million. The House is requesting $14.9 million more than the Senate for these community health centers. Our amount will fund 710 projects and serve 4,360,000 people, as compared to 678 projects and 4,200,000 people under the Senate allotment.

Maternal and child health block grant, which is another very important area, the House is $9 million above the Senate figure of $340 million. The maternal and child health programs would allow comprehensive health services not only for pregnant women, but also for infants and school-age children.

In the area of the National Health Service Corps, the House is $52,000 above the Senate figure. These funds would enable the National Health Service Corps to achieve the administration's requested strength of 2,500 health providers in 1982.

We find a $10 million difference between the House and Senate figures in

the area of preventive health services block grant. The amount that was allowed by the House for the preventive health and health services block grant is an increase of $10 million over the Senate allowance. As Members know, this allowance is for grants to fund emergency medical services, health incentive grants, hypertension control, fluoridation, rodent control, home health services, health education, risk reduction, and services.

So here is another very important area where we find a $10 million difference between the House and Senate, with the House having the higher figure.

In the area of health maintenance organizations, HMO's, the House is $2,711,000 over the Senate figure. We find here that this reduction of technical assistance funding would reduce the level of technical assistance available for developing and operating HMO's by approximately 50 percent from what would be available under the budget request and the House action.

One area I am particularly concerned about, and hope that the House conferees will be able to prevail on is, of course, the financial distress area. The House proposal has $8.2 million, the Senate has $7.4 million, a difference of about $800,000. This is an area where the House allowed an increase over the Senate allowance and the President's request. These funds will support the four traditionally black schools—Tuskegee, Zavier, Mehary Medical, and dental schools.

□ 1750

Then, when we look at the curriculum development and conversion grants under the new special health initiatives program, we find the House with an appropriation of $1.8 million, and the Senate has made no provision in their bill here. These particular funds will support four grants to schools of podiatry, to improve the supply and distribution of podiatrists. It also approves a 1-year grant to More- house Medical School to assist in converting it from a 2-year medical school to a 4-year school.

Another area, of course, is that of mental health. The ADAMA block grant, the House has a figure of $485 million. Once again, we find the Senate below by $35 million. Their bill has only $450 million. These are the funds that provide for mental health service doctors for alcohol, drug abuse, mental health administration block grants. One of the particularly interesting areas where young people trying to get into school will be concerned is exceptional financial need scholarships, where the House has $6 million and the Senate only $5 million. Once again, it is $1 million below the House figure. The House allowed $6 million for the exceptional financial needs scholarship program, which is an increase of $1 million over the Senate allowance. The House action would provide for 380 scholarships as compared to only 317 provided by the Senate allowance.

Then, one last area I would refer to is that of health planning, which we know is so very, very important. In this area both the House and Senate, of course, have put in $50 million, but this area is so important because the funding appropriated at these levels for some 207 agencies will really not allow them to carry out their functions as stated by law.

This bill comes up for reauthorization in 1982, and of course is another one of the bills that has been targeted for elimination by the administration. So, I would just say to the gentleman in the well that there are some very serious and very substantitive differences between the House and Senate, and I think that Mr. OBEY and I have tried to point up some of those that come out of our subcommittee, which is a $86 billion bill that we spent several months on, and when we came to the floor of the House we were able to get that bill through in the House. It is one that we were all very, very proud of because, as BILL NATCHER always says, this is the people's bill, and those of us who happened to work in this subcommittee are very proud of these areas where we are able to appropriate to help people in the area of health and education and human services and welfare.

These are people who are really dependent upon Government and these are the kinds of programs that we often hear the Speaker speak of as the programs that the Democrats built over a period of 30 years for the American people.

Mr. ALEXANDER. I thank the gentleman for his valuable contribution, and I know of his concern for people, and I know very well that he has made a contribution in building all of these programs, and in fact, standing on the shoulders of those who have preceded him in order to help people more.

One of the people programs that I encounter a good deal of interest in and expressed concern about as I travel around the colleges and high schools throughout my congressional district is the student loan program. I have not heard anything said about the student loan program. I know that that is within the jurisdiction of the gentleman's committee. Does anyone, does the gentleman from Wisconsin know what the other body did to the student loan program which is a very important and vital program that this committee is very much concerned in?

Mr. OBEY. This Member is frankly unclear as to what the Senate has done on the guaranteed student loan program. But the intent of the subcommittee over there was to include the guaranteed student loan program at the administration level which, given the present interest rates, is far, far below a realistic number. It is also interesting that when you review the administration's concern about the cost of the guaranteed student loan program, to observe that more than three-quarters of the increase in the cost of that program has come simply because interest rates have increased. That means that it is the bankers who are collecting the money and are having to pay it out again because of the high interest rates, and it is not, as they would have us believe, students who are largely in default. Defaults under that loan program has come down a great deal. And as the gentleman indicates, there is no program that is more important to middle-class families in terms of sending their youngsters to school.

I would also point out that this year, on the Pell grants, the basic opportunity grant programs, the Senate proposal will require another 275,000 students be eliminated from that program in addition to those we have already eliminated because of cuts we have already made. If you take a look at title I of the Elementary and Secondary Education Act, we had already eliminated some 600,000 students from title I under past actions. The Senate proposal, as I understand it, would remove another 400,000 youngsters from title I participation which is, I believe, not the way we ought to be going.

Mr. ALEXANDER. Has the gentleman had access to any estimates on the percentage of reduction of the student population that is anticipated next fall as a result of these cuts that have been made? I have heard some varying estimates, but I wonder if the gentleman has heard any estimates?

Mr. OBEY. It is very difficult to tell. The problem is that, given the administration's unemployment situation, there will be an even greater demand placed on universities by young people who are seeking admission to the universities because they have concluded that, given the condition of the job market, they cannot find a good job, and they want to add skills and training to their background. And yet, with the guaranteed student loan opportunity shrinking, the basic opportunity grant program, with the elimination of thousands of shrinking, students from the work-study program, they are being caught in a crunch on both ends.

The administration admits there are going to be 1 million more people out of jobs, looking for work. A lot of those are going to be young people. They are not going to be able to get into universities or vocational or technical schools because they do not have the financial assistance available. I assume the administration has an easy

answer for that one, but I have not been able to find it.

Mr. ALEXANDER. I had occasion not too long ago to confer with a young constituent who had just gone into business last year that caters to students, and his business is entirely dependent upon the volume of students being maintained, that he has justified his gamble for going into private business. Would the gentleman have any advice as to the amount of reduction in students that he might expect? Is there any general figure, such as 10 or 20 percent fewer freshmen in some institutions that depend upon the student loan program?

In one of my colleges I know that over 65 percent of the students that attend this particular university receive some type of Federal student loan which enables them to attend that institution. What estimates does the gentleman have that might be of some advice and guidance to this particular businessman in planning his inventory and his actions for the ensuing year?

Mr. OBEY. I have heard estimates that range all the way up to 15 percent of those students who have been planning to attend schools, who would not be planning to attend through a combination of either decreased access, increased costs, or increased unemployment for family breadwinners. The cost of receiving an education just in 1 year's time at the average university in this country has gone up 13 percent. If you take the combination of increased costs and decreased opportunity because of student aid programs, more unemployment pressures on parents, which means they have less to contribute, it could mean a large number, but I do not really have an honest estimate. I doubt that OMB has either. I would like to cite my own personal example. My father lost his job the day I went away to college. I had been kind of counting on his having that job in order to get at least some help in going to the university.

□ 1800

It is a shock to a family to discover, when they are counting on that income, that the major breadwinner in the family is now out of work. There are going to be a lot of young people whose father or mother, depending on who the major breadwinner in the family is, will lose their jobs if the administration's economic predictions are correct. And if we do have increased unemployment, what we ought to be doing is increasing the educational opportunity available for people, not decreasing it at the same time.

If the administration's numbers were consistent, given rising unemployment figures, they certainly should be providing more in the way of student loans, for instance, to students of those families that do experience hardships because of the loss of income so they will have somewhere to turn in order to put their youngsters through college.

Mr. LOWRY of Washington. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Washington.

Mr. LOWRY of Washington. Mr. Speaker, I thank the gentleman in the well for yielding, and I would also compliment him on this complete explanation of what is going on now in this all-important conference.

As I was listening to the gentleman from Wisconsin (Mr. OBEY), I was thinking of the remarks he made last night that I thought were so apropos and so excellent about how, when we can have an understanding of the financial investment and financial capital necessary in building the productivity of this Nation, we could have such a small understanding of the people that are necessary to be available in the building of this Nation and increasing productivity.

For example, there are about 60,000 unfilled machinists' jobs in this Nation right now. If we had the skilled people, those people could be performing those jobs to increase the productivity that we all need.

When we put this massive increase in the defense budget to make these technological advances in the defense sector, how do we do that when we do not have the skilled labor necessary to do the job, and how do we do that when we do not have the physicists, the engineers, and the managers by which to run those programs?

As I was sitting here listening to this very important discussion, that came back to my memory after watching the gentleman from Wisconsin (Mr. OBEY) last night.

It is so important that in this conference the House does prevail on these important differences between what is a human, a people approach to rebuilding this economy and the approach presented by the other body.

Mr. Speaker, I thank the gentleman from Arkansas (Mr. ALEXANDER) for his leadership and for giving us this opportunity to make these points.

Mr. ALEXANDER. Mr. Speaker, I thank the gentleman from Washington (Mr. LOWRY) for his contribution.

Does the gentleman from Wisconsin (Mr. OBEY) wish to respond?

Mr. OBEY. Yes, Mr. Speaker. Will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Speaker, I would just like to repeat another set of numbers which I used last night. I mentioned last night that most of us in this Chamber—all of us, I guess—are old enough to remember when the Russians sent sputnik up around the globe. I remember the cry that went out, "We have to increase our emphasis on education, on mathematics, on science." In the 25 years since sputnik, the percentage of our national income which has been put into basic science research has dropped by 20 percent. Meanwhile, as to the percentage in Japan, that figure has gone up by 40 percent, in France it has gone up by 30 percent, and in Germany it has gone up by 20 percent.

I would suggest that that has a whole lot to do with our inability to compete in world markets today. And yet this administration in this budget, which it and the other body are asking us to adopt, will reduce overall basic scientific R. & D. in NSF, in the Education Department, in the Agriculture Department, and in the Energy Department by 13 percent below last year's base, which puts us in an even weaker position to compete economically and scientifically than we were in last year.

Mr. Speaker, we are not going to remain No. 1 in some very critical scientific areas if we do not turn those numbers around.

Mr. ALEXANDER. Of course, Mr. Speaker, the joint resolution for continuing appropriations for fiscal year 1982 goes far beyond the matters that we have already discussed: labor, health, education, and matters of productivity. It also includes agriculture and those programs that are embraced within those sections of the resolution that deal with programs that are important to farmers.

I see my good friend and colleague, the gentleman from Arkansas (Mr. ANTHONY), who has just completed a tour of his congressional district, standing and seeking recognition, so I yield to the gentleman from Arkansas.

Mr. ANTHONY. Mr. Speaker, I thank my colleague for yielding.

I have been listening to the discussion about other programs that are being cut, and the comment was made that these were people programs. I just want us to know that it takes people to operate this machinery, and it also takes people to operate the farms.

I would just like to talk to my colleague in the well for a minute about what may be in store for agriculture. I would like to read first a letter that I just received today from one of the more prominent farmers in my area, and then I would like to discuss a telephone call that I had with two of the farmers who are also very prominent in my district and point out some of the concerns they have expressed to me. Then I would just like to ask a question of the gentleman in the well as to whether or not there is any hope in the continuing resolution or even in the farm bill for those farmers.

George L. Pugh is a farmer from Portland, Ark., and he wrote me this letter. I will read the first paragraph because he does say some nice things to me. He wrote this:

DEAR BERYL: I appreciate the stand you have taken in agriculture for the last few years, and I feel you have done an excellent job of representing the Arkansas farmer.

This is the most critical part of the letter, and I say to my colleagues who are trying to decide on the farm bill in conference that I hope they will listen to this also:

This letter is simply to tell you that never in the last twenty-three years have I seen the agricultural economy in the shape we are in at the present. 1980 was a drought year with emergency loan baling out 75 percent of the farmers. 1981 was an average year overall in production, but high interest rates and devastating low prices have put Arkansas agriculture deep in debt. There is no way local financial institutions can approach and help these people.

We all want government out of agriculture. We all want free markets, but the problems that have been created are things farmers have little control over. Agriculture is all small towns like Portland have to look to for the future.

I might point out that Portland is a town of less than 500 population. The letter continues:

The only quick solution to our problem is a short term mandatory acreage reduction. Rice, soybeans, cotton, and corn are priced below cost of production. I support a short term mandatory 10 percent acreage reduction, for the Arkansas farmer can no longer plant and hope. Cotton that brought 75-80 cents in 1980 is selling in today's inflated market at 58 cents simply because the farmer is efficient!

We appreciate your help, and I hope you will discuss with the Secretary of Agriculture an acreage control solution.

Mr. Speaker, I know that my colleague in the well represents a farming community, and it is somewhat alarming when we hear farmers talking about mandated Federal Government acreage control. I think that shows us how serious the problem is.

Before I defer to the gentleman in the well for a response, I would just like to repeat a telephone call that I had with another gentleman, a farmer. He is 44 years old. He says that he has been farming since he was old enough to tie his shoes. He says that conditions are the worst that he has ever seen them.

He said that with cotton production return to break even set at 95 cents by the USDA, he sold his crop for 58 cents, and he said he is getting $160 per bale less. He owns a large farm. He is making $300,000 less. He pays no rent, he has a small indebtedness on the land, he has good equity, and he is just barely going to break even.

But, he said, he has been renting to a gentleman for 35 years. His family has been renting to this other farmer for 35 years 120 acres. He is going to make 95 bales, and he is going to sell at 58 cents. He has two sons in their midtwenties, and he said this year they are selling out. He said they own 80 acres that they also farm, but he is going to put that on the auction block. He is going to get about $2,000 per acre. He hopes to pay his bank off, he hopes to clear his house, and he said he probably will not be able to pay the Farmers Home Loan Association but perhaps they will give him a forbearance on it.

He said that with his wife working and with him going to a factory job, maybe they can make it.

This gentleman also talked about acreage controls. But, more importantly, both these farmers are representing a cross section of farmers who are asking, what is the Federal Government going to do to help the farmer in 1981.

□ 1810

My response has been that the other body's agricultural policy was a blueprint for disaster. We have an administration worried more about dollars than they are about policy. I have told them that there is not much they can look to as far as Government relief is concerned.

Does the gentleman see anything in the continuing resolution that could help these farmers?

Mr. ALEXANDER. I have here an analysis which compares the reductions that were made by the other body in the agricultural part of the continuing appropriations bill. I know from the experience that I have had that not only is that bill important to farmers, it is also important to everyone else who lives in small towns and rural communities in the countryside of this great land. I know that one of the very fundamental industries that affects the lives of every American living in smalltown America is the rural housing program. I just see a quick reference here that the other body has reduced the rural housing program by over $32 million. And I know, having served on the Appropriations Committee that deals with that subject, that it was already at a rockbottom figure.

I talked to a lifelong friend of mine just this week on the question of housing in small towns. He was telling me that he has only been able to build two houses in 1981, two houses, and, because of high interest rates brought upon by the monetary and fiscal policies of this administration, he has not been able to sell either one of those houses. He wants to know how he can plan for next year. The other body has not helped him in his planning. It has not provided him with the prospect of a better year that all of us want in this great land which is the American dream. All of us want a little better dream next year than we had this year or last year.

If we go into some of the other programs in the appropriations bill for agriculture I see that the water and sewer grant program has been reduced by more than $500 million. The small business and industrial loan program, the program that provides opportunities for young and old Americans alike that cannot receive credit at the bank to go to the Farmers Home Administration, the Business and Industrial Loan Division, and obtain a loan in order that they might start a business, that they might go into business for themselves and experience free enterprise that is so much a part of our great Nation—the other body has reduced that program by over $12 million. I know it was at a rockbottom level when it passed through the House.

I see that the rural community fire protection programs have been reduced. There are reductions in virtually every category of the Agriculture Department. The REA is reduced.

I see one of the best friends of the American farmer has come into the Chamber, a gentleman who is not associated with farmers but who is associated with representing the American people and who is as big a friend of the farmer as anyone else, the Speaker of the House, the gentleman from Massachusetts (Mr. O'NEILL).

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Massachusetts.

Mr. O'NEILL. I thank the gentleman from Arkansas. I am delighted he has recognized me and yielded to me.

I have listened here with a great deal of interest to the dialog between the gentleman and his colleagues from Arkansas about the problems of the farmer. It is true that I am from a metropolitan area.

Some years ago, as a Member of Congress, I went out to South Dakota for 5 days. The purpose of that trip was for an urban Congressman to find out about the life of a farmer. Here we annually have the agriculture authorizations and appropriation bills, and I truly did not know the life of a farmer. I stayed at different farm houses 5 nights in a row, and one of my boys was with me, my son Christopher. We got an understanding and an appreciation of the farmer of America.

I wonder if America truly appreciates the debt of gratitude we owe the farmer and how hard the farmer works, getting up on that farm early in the morning to take care of the crops, to take care of the milking, and has a long day into the evening. It is a cruel, hard life, and we really owe the farmer an obligation.

I have tried with any legislation that has come through during the year to make sure that they get the benefit of my vote. As I say, they get the benefit of my vote, yet what does the farmer mean to me? We produce wire in my

area, and more wire is used on the farms of America than any other place in America. We manufacture rope. Other than the truckers, the farmers use more rope than anybody but the truckers. We make chocolate. Probably 25,000 people are in the confectionary business. It is the farmer that munches that chocolate and candybar that puts so many people to work in my area. So we have something mutual.

When they are cutting the programs that affect the farmer, and we are from an urban area, we, too, are concerned, because when you hurt one segment of America you hurt every segment of America.

The truth of the matter is that people scarcely know what this debate is all about. They see the headlines that the Government may stop. They read the figure as 4 percent or 5 percent, or the President wants a $16 billion cut, or a $6 billion cut, and now it could possibly be down to a $3 billion cut.

Believe me, it is not figures and, believe me, it is not numbers; believe me, it is not the budget. We are talking about people. That is what this debate is all about, people.

Reference was made today in a colloquy on the floor when we were speaking of the great President Roosevelt, and I remember during the days of the 1930's when we were in the darkness of the worst depression in the history of the world, when 25 percent of America was unemployed and 51 percent was impoverished. We have changed this through the years. America had 25 or 30 years of the greatest affluency any nation in the world ever had.

All of a sudden they want to change the fiscal responsibility and problems of this country, and they have done it. What has happened? We have more unemployment now than we have had since the days of the 1930's. We are at 8.3 percent, or expect to be before the end of the week. God forbid that this country would ever go to 25 percent again. The automobile industry, one of the bulwarks of making this Nation run economically, has had less sales in the last quarter than there has been for 24 years. Automobiles, along with housing starts, that is what keeps America moving, and what has happened there? We have less housing starts than there were in the 1930's when we were in the highest.

So it looks bad out there. But, on top of that, we have cut the budget so much, and now it comes to these figures. These figures represent people.

Already, according to the Wall Street Journal today, we have cut this year $6 billion out of training programs, out of job programs, out of summer job programs. The bill that was sent over from the other body, it is my understanding, they want to cut another $600 million. These are in programs for the elderly, programs for the handicapped, and programs of nutrition. But what we are interested in is that the elderly in the twilight of their lives, the career person who has made this country great, does not have to suffer.

Some agree it is a philosophical battle that is going on over there. It is not a battle of the budget, but it is a battle of the needy in America. You are standing here today and your colleagues are standing here today expressing your views because you want America to understand what is going on because truly America has care and concern. It is already showing in the newspapers and the polls as we see them show that people were 93 to 7 saying that we should not balance the budget at the expense of those that are on social security. They were 69 to 30-odd, or 65 to 30-odd, or 67 to 30-odd, with regards to whether we have gone too far in the nutrition cuts. We have gone too far on cutting of foster home programs.

Yet the budget that was sent over here today wants us to cut an extra $1 billion.

It is a question of people; it is not a question of figures.

I want to commend the gentleman and I want to thank the gentleman for bringing all of these people here to have a dialog on this great issue that is facing America today.

Mr. ALEXANDER. I thank the Speaker very much.

The Speaker asked a moment ago what it meant to the farmers for their programs to be cut and I would like to answer the question the Speaker asked.

□ 1820

So far as every American citizen who is living in a home, which home is provided with energy that is furnished by the REA, the Rural Electrification Association, their bills will go up next year, their energy bills will go up next year, maybe not because of the increase in the cost of energy, but because of the increase in the cost of money that is imposed upon them by reducing the loan program in the REA by this administration and by the other body.

When the light bills go up across America next year, it is because of the actions of this administration and the other body in reducing the REA loan program that will cause those independent REA's across this land to go to the private money market in New York and pay the exorbitant interest rates that are required in order to fund the operations of those REA's across this great land.

I know that the gentleman who is standing now is a friend of rural America. Not too long ago I had the opportunity to travel to his district with him, to McAlester, Okla., and to speak at a rural development meeting that he had assembled there, and it was a great experience for me and a wonderful opportunity that I had to get to know his people. I know the people of southeast Oklahoma love this gentleman, the gentleman from Oklahoma (Mr. WATKINS), to whom I yield at this time.

Mr. WATKINS. I thank my friend and colleague, the gentleman from Arkansas, for yielding. I do appreciate him coming to Oklahoma at that rural development conference I had there and listening to the concerns and the heartaches and the pains of a lot of farm and agricultural and rural people concerning the problems they are having.

I want to address the Speaker of the House, who just so eloquently said some remarks concerning rural America. Mr. Speaker, right before coming over to make these remarks, a fellow named Frank Wingfield, from Bryan County, down by Durant, Okla., my boyhood home, a county where I grew up on a little peanut and cattle operation, called me. I returned the call to Frank and visited with him. He said, "Wes, they are foreclosing."

Mr. Speaker, I will tell you how serious the situation is with this administration. The Farmers Home Administration has been directed to become a foreclosure agency instead of a loan agency. Farmers across this great land of ours have been told by Farmers Home Administration, "You have got to pay up now or we foreclose."

Now, at a time when they lost money last year because of a drought, and this year, in many of the areas of my district, from floods, they go in to try to renew or to refinance their farm loans, and they are told, "We cannot finance you anymore because we are ranked on a scale of 1 to 5," because they have been called in by this administration and told by the National Farm Home office that "You are ranked on a scale of 1 to 5, and if you do not improve your collections, your foreclosures, then you are going to lose your ranking and maybe even your job."

Now, the State Farm Home man, I have called him, they are county supervisors, and they said, "You are going to be ranked on a scale of 1 to 5 on how much you collect out there," at this time of crucial financing, at a time when there is less equity in the land. As the gentleman from Arkansas well knows, the farmer has been financing his operation in the past on the equity of his land, the value of his land. He has not been making a profit. But now they are saying, as Mr. Wingfield, my friend from the home county where I grew up, said, "They have said to me they are going to foreclose." I

said to Mr. Wingfield, "I will do whatever I can."

Why are they going to foreclose? Mr. Speaker, in the past, the farmers had emergency loans. That has been cut out by this administration. The farmer who goes to the Farm Home office will find no emergency loan money to assist him. Why will he be hurt? Mr. Speaker, there used to be disaster loans under the Farmers Home Administration. But under this administration, all disaster money has been stricken from the Farmers Home Administration. Not only that, they said, "You are going to have to take Federal crop insurance that you are going to have to pay yourself, and under the insurance program you are only going to be remitted only about 20 percent of your loss."

So the farmer looks at the situation, and he cannot afford to pay the insurance premium. So he cannot ever afford to take that insurance out in many of the farm communities in this area.

Not only that, Mr. Speaker, but the farm operating loans have been cut over 50 percent and the farmer ownership loans, the ownership of the new farmers, the young farmers trying to get started, has nearly been cut out.

That is what we are faced with in rural America. At a time when there is no farm credit out there and a farmer tries to refinance, he finds when he walks in the the Farm Home office that he is being turned down.

I would like to talk about one other thing, if the gentleman from Arkansas will allow me a couple more moments, and that is rural housing. Before I came to the Congress, I was a homebuilder, I was a homebuilder in rural America. I built homes over about a five- or six-county area because the small community where I lived could not afford that many homes.

Mr. Speaker, in rural America 50 percent of the counties do not have a savings and loan. There is no conventional, private financing out there in rural America for that little family to be able to finance a home. There are no savings and loans out there. In over 85 percent of the counties in this United States they do not have a mortgage banker. A mortgage banker is one who handles insured mortgage under FHA-HUD.

So what does that mean? It means discrimination against the farm people, the rural people in small towns. They cannot find the financing to even get a home, let alone, even, being confronted with high interest rates, as your individual from Arkansas said, Mr. ALEXANDER, that he only built two.

I mention these things because in rural America there are over 2 million families out there today, 2 million who do not even have running water in their homes. Two-thirds of the dilapidated housing in America happens to be located in rural America. Mr. Cavanaugh, the Farm Home Director, the National Administrator, last year said to me, in front of my committee, that they had a backlog of 350,000 applications of rural families wanting to have a home. Two thirds of the dilapidated housing is in rural America. Two million of the homes do not even have running water. Talk about ghetto. I know when I was a boy and I went to California in the old Okie-Arkie movement, I thought I was moving uptown because we moved into a place in Oakland, Calif., that was called a ghetto but they had running water.

I mention these things because, as we try to build rural America, I find that water and sewer loans have been cut over 60 percent, and EPA has said that you no longer make water and sewer loans in rural America.

What do we do in rural America? Are we second-class citizens?

I find, as I work to try to build jobs, needed jobs, to hold our young people in rural America, that the business-industrial loans have been cut from $741 million down to $288 million, an additional $12 million from the Senate bill, as we try to build jobs, as people outmigrate out of rural America.

In my area, every county I represent, 50 percent of the people have out-migrated in the last 50 years. And, Mr. Speaker, in two of the counties I represent, 68 percent of the people have left during the last 50 years.

□ 1830

Why? In a search for a job. In a search for a job. But, Mr. Speaker, by far the greatest majority of them have said they would like to come home if they could only find a job within commuting distance of where they grew up as a boy or girl.

As we work on this budget and try to pare back and try to shape a program, all I ask for in a budget, the Federal budget, as I look at the Senate figures, I do not find the fairness and equity that is deserving of the people in rural America.

I would like to commend my friend and colleague for his interest and concern and commitment to the people in rural America by having this special order tonight so that we can discuss some of these programs that have been cut out completely and are leaving our people hopeless out in rural America.

Mr. ALEXANDER. I thank the gentleman for his comments and for his dedication to all Americans and not only to those who he represents in southeast Oklahoma, because I know that the gentleman is working, trying to build a district and to build a rural America where people can return to their homeland so that they can have a future for themselves and provide opportunities for their children and for their grandchildren. One of the agencies, in addition to the Farmers Home Administration, that has worked I think with great achievement and success over the past decade to provide economic opportunities and to provide jobs for those people in small towns and large cities alike, is the Economic Development Administration.

What does this administration wish to do with the Economic Development Administration? In the words of Mr. Stockman, the Director of the Office of Management and Budget, they wish to zero out the Economic Development Administration.

In my judgment the EDA should be commended. It should be congratulated, it should not be zeroed out, it should not be canceled. It should not be abolished and sent off to oblivion. Thousands of people who work for the Economic Development Administration are likewise committed to building this country. They are likewise committed to providing job opportunities for Americans all across this great land, and I know that the gentleman from Minnesota (Mr. OBERSTAR) has worked hammer and tongue with the EDA through these years. First as a member of the staff of the Public Works Committee and later as a Member of Congress.

ECONOMIC DEVELOPMENT ADMINISTRATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlemen from Wisconsin (Mr. OBEY) is recognized for 60 minutes.

Mr. OBEY. Mr. Speaker, I yield to the gentleman from Minnesota (Mr. OBERSTAR) so that he might continue the remarks he was going to make when the gentleman from Arkansas (Mr. ALEXANDER) ran out of time.

Mr. OBERSTAR. I thank the gentleman.

I thank the gentleman from Arkansas for his perception of the role of EDA and want to commend him for the tremendous effort that he has made persistently in the Appropriations Subcommittee on which he serves hammering away day after day on the successful role of EDA creating jobs, particularly in rural America, but elsewhere.

Mr. Speaker, I rise in great consternation over this continuing resolution and the provision that it has, the utter arrogance in assuming unto itself, which the other body does, power over the Economic Development Administration programs.

I note in the report of the subcommittee in the other body a reference to a savings of $53 million in the Senate bill below the House bill on the Commerce, Justice, State, Judiciary appropriations bill, a $53 million reduction.

They cut EDA $149,500,000. They took $149,500,000 out of EDA's hide. They sprinkled some of it around to some other agencies, and they came up with a $53 million savings.

But that is not all. I find it very difficult to determine what, if anything, the Senate means by their language in this continuing resolution as it refers to EDA.

Since the beginning of this year, this body and the other body, have gone on record in support of the programs of the Economic Development Administration. Both bodies have mandated a level of funding for EDA that is higher than that proposed in the bill of the other body.

The first budget resolution that this body passed and was ultimately accepted by both Houses of Congress, provided $360 million for EDA in fiscal year 1982.

Then the House Appropriations Committee came back with an appropriation of $315 million that passed this body overwhelmingly without a question on this floor.

Then in the reconciliation bill, both the House and the Senate came to an agreement on an authorization level for EDA programs of $290 million. That came back in the conference report and was not questioned. That was signed into law by the President.

Now along comes the Appropriations Committee in the other body and in total derogation of the will of both Houses of Congress, total derogation of the President who signed it into law, just cut and slashed in total disregard of the will of Congress.

Now, as I read it, it may be $139 million that the other body is providing for EDA and it may be $226 million if we are allowed to use the revolving funds out of the 203 section of EDA, but if not, and it is not very clear in their language, then we would have only $144 million in new appropriated funds.

Now, the bill dealing with the appropriations for EDA has not even passed the Senate and yet in the continuing resolution they presume to set a level of spending for EDA lower than that which has already passed the House, which is a level which has been only approved in committee, but has not passed that body.

That is just the height of arrogance of power.

Now, a message that has been delivered time and time again is that the Economic Development Administration program has succeeded.

In the hearings that we held in the Subcommittee on Economic Development, which I had the privilege to chair, we found earlier this year, back in March, after 3 days of hearings, 27 hours of testimony, witnesses from all over the country, those who were for and those against, that in the 15 years of the EDA program the Federal Government has invested $4,700,000 to generate 1½ million jobs, new jobs, direct jobs that are there, real now, working, creating each year, generating $6½ billion in Federal, State, and local taxes, a program that each year pays for itself, for its whole 15-year existence.

Now, what do they come back and do in this appropriations bill in the other body? All planning money for economic development districts throughout the country would be stopped. More than 200 local economic development districts would be terminated.

The Senate bill provides no planning money whatsoever. The House bill provides $2½ million in planning for economic development districts. There would be no new projects in public works, in planning, or loans, or technical assistance.

None of those would be funded because the other body has chosen to fund only those projects which are in the so-called pipeline, already in effect approved by the agency.

Now, after a yearlong battle of testimony in the Subcommittee on Economic Development of the House Public Works and Transportation Committee, testimony in the subcommittee on State, Justice, Commerce appropriations, which repeatedly and over and over again showed the worth, the value, and the success and the effectiveness of these programs in creating jobs, and a commitment by this administration to carry forth with the programs of EDA by the signature of the President, of that reconciliation bill into law, and the assurance that was given on a bipartisan basis, on both sides of the aisle of this body, you would think that they would have the sense of responsibility to carry forth, carry through with those assurances.

Yet, this bill represents strictly a closed down phaseout EDA position, since no new projects would be allowed, and development districts would be terminated by the end of the year—those districts that provide the expertise for planning.

For heaven's sake, even if they do not want to provide the funds for projects they would at least allow the local government units, who want to do some planning for the future, to take charge of their own destiny, at least give them the funds to keep a staff on hand to figure out how they were going to be innovative—as this administration is so fond of saying—innovative in planning for their own future; that is, do it without money.

□ 1840

At least the EDA program ought to be given that lease on life which this body has said it should have, which the facts, which the history and the record says it should have, but now those assurances that were given in the past are apparently meaningless; so I call upon our conferees in the House-Senate conference on the continuing resolution bill to reject the proposals of the other body. They are totally in derogation of the will of this body. They totally reject the assurances given by the administration, assurances that have been received in good faith by Members of this body to continue the programs of the EDA and allow the legislative process to review the programs of EDA in the future and decide upon a new course of action and whether we should have that program continue in its present or in some future state.

So I thank the gentleman for the opportunity for allowing me to make this statement, which I make with a great deal of enthusiasm, because I believe in the programs to which I am addressing myself.

Mr. OBEY. Mr. Speaker, I thank the gentleman for his comments. As the gentleman knows, we share the Lake Superior area together. We have adjoining districts on Lake Superior. We have held a number of joint hearings on the impact on local governments of reductions in and cutbacks for EDA.

I must say that reviewing the census numbers, the 1980 census versus 1970 and 1960, one pattern is extemely clear. In areas like my district where we had the job flight, which was mentioned by the gentleman from Oklahoma earlier, in areas like that the principal government agency that had the most to do with turning the economy of those areas around has been EDA. That is the agency which has been able to provide the seed money for planning and for economic development which has enabled the private sector to expand the job opportunities for workers in that area. That is the reason why in a district like mine for the first time I have seen a number of those rural counties begin to grow again. They were losing population for 30 years. All but two of the counties in my district have now turned that around and there is no county in my district that has lost more than 500 people and I think that EDA has more to do with that than any agency that you can name.

It is an example of the kind of assistance which is not going to be available to a great degree at all in the coming years under the administration's plans not only for this year, but next year.

I also think it is interesting to note, what the gentleman did on his bill, and I would make the same observation on the labor, health, education, and welfare appropriation bill. It is interesting to me to note that in the other body the product of the Labor-HEW Subcommittee was never brought to the floor for a vote. I have talked to a good many Members of the other body who have told me that

that product would never have survived had it had the opportunity to be discussed openly on the floor of the other body, so that you could have the entire membership addressing the proper levels.

I think procedurally we are on very shaky ground where we wind up with a situation in which subcommittee judgments become the base lines against which we judge competing claims, one House versus another. And in the process we deny to most Members of both parties an opportunity to exercise detailed judgments.

Any time, in my judgment, that you decide that you are going to be either cutting or increasing budgets by a flat percentage amount, what it means is that we have lost our intention to think and we simply react on the basis of slogans and numbers. The Congress does what it all too often does. It acts on the aggregate and the aggregate policy does not make sense when it is translated into specific terms.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield on the EDA?

Mr. OBEY. Certainly, I yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Speaker, I would like to speak on the EDA, because we are talking about generalities. I know from my own experience, had it not been for the Economic Development Administration providing opportunities in my home State of Arkansas for industrial employment to balance the needs that existed from mechanized agriculture which employed tens of thousands of people, I may not have had the opportunity to return to my home State to practice law and later to run for Congress and to be here this evening.

The role of the Economic Development Adminstration has not only helped nonmetropolitan areas like Arkansas, Minnesota, and Wisconsin, and all the States of the Union, it has helped other people in the cities. It has helped people in the cities and I hope that they are watching this debate this evening, because but for the Economic Development Adminstration offering help to cities to attract industry, to provide jobs for people that live in the small towns across America, those people would be required to move out of States like Oklahoma, as referred to a minute ago by our colleague, the gentleman from Oklahoma (Mr. WATKINS) where in all the counties of his region more than 50 percent had moved away and they would move into the cities. With all those tens and even hundreds of thousands and maybe even millions of Americans moving into the cities, that would mean that the taxpayers in cities like Chicago and New York, Milwaukee, St. Louis, Memphis, Dallas, Los Angeles, San Francisco, Denver, and all across this land, would have to dig deeper into their pockets for more tax money, more tax money to provide revenues to build schools and hospitals and to provide the social services that are necessary in order to provide for the needs of the people who move off the land, out of small towns, into the large metropolitan areas of this Nation.

The EDA and the Farmers Home Administration have provided a great service to all Americans, because it is trying to provide an opportunity for people who want to stay in their hometowns, in the small towns of America, in those hometowns, to provide jobs for them so that they can live where they want to live and not have to move out to the cities and to become a burden and to provide more of a need to raise revenues and taxes in the cities of our Nation.

The $5 billion EDA has invested in America since it began operations, 16 years ago, has generated or maintained 1.4 million jobs in the private sector and leveraged $9 billion in private sector investment. More importantly, the evidence shows that the total EDA investment is more than repaid annually by the $6.5 billion in local, State, and Federal taxes paid by holders of those jobs.

In Arkansas alone, the $127 million EDA has invested in these years has generated or maintained 167,000 jobs, with an annual payroll of $500 million and annual tax payments of $107 million.

I thank the gentleman for yielding. I appreciate very much the contribution that he has made this evening.

Mr. OBEY. Mr. Speaker, I thank the gentleman for his comments.

I just would like to observe one additional thing on this point. I think we ought to put into perspective the amount of money which is supposed to be saved by slowly strangling EDA, with the amount of money that was provided almost surreptitiously on the now famous $27 billion new welfare program for corporations, which was built into the tax program that passed last summer, under which corporations like Ford, for instance, can now sell their excess tax credits to another corporation for cash.

I would suggest that that is a device by which great subsidies are provided with no planning, with no judgments made as to the eventual economic value of that subsidy. All that happens is that two CPA's get together and work it out carte blanche. If you compare that to the orderly process by which EDA projects are supposed to be evaluated, if you compare the discipline in both systems, there is no question about how the taxpayers' interests are better served.

Mr. OBERSTAR. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. I thank the gentleman. He is absolutely correct on that point, that the tax law that we passed last summer just willy-nilly, without understanding the consequences of action giving away multibillions of dollars, but I want to come back to a point the gentleman made about process. In the consideration of the EDA programs in this body, we had in my subcommittee 3 intensive days of hearings and witnesses from all over the country, businessmen, public sector representatives, mayors, county commissioners, we had labor union representatives, we had economists, we had representatives of the current administration. When we went to conference on the reconciliation bill, a member of the conferees from the other body after I had detailed the specifics of our hearings, as I just summarized briefly at the outset of my remarks this evening, a member of the conferees of the other body turned to his colleagues and said, "Shame on the Senate, that we did not have 1 minute of hearings on the EDA program."

□ 1850

Look at the splendid record of the other body. And that is exactly the case. They closed their eyes; they closed their minds. And now they have closed their hearts on the problems and the needs of rural America.

I thank the gentleman.

Mr. OBEY. I thank the gentleman.

I would yield next to the gentlewoman from Louisiana, who I know is extremely interested in the implications for science in the continuing resolution which is now at issue between the House and the other body.

Mrs. BOGGS. I thank the gentleman for yielding and for taking this special order in order to give us an opportunity to examine what the other body has done in their continuing resolution suggestions, and for allowing me the privilege to say that we have talked tonight about Sputnik, about education, about agriculture, about economic development, and in all of these areas of science and technology touch them very, very severely. As a matter of fact, in every aspect of our national life, science and technology are going to play an increasingly important role.

Recently, one of our colleagues, the gentleman from Michigan (Mr. CONYERS) shared with us the story that Thomas Paine, who was a former Director of NASA and the head of Northrup Corp., said in an article in Omni magazine. He said:

> I believe that America's national security and economic well being depend upon our continuing technological leadership. As was shown a decade ago, NASA's clear lead in space operations is a sobering deterrent to Soviet miscalculation, and a major stabilizing force in maintaining peace.

He went on to say:

I believe that America's destiny is to demonstrate to a troubled world how people of diverse races and cultures can effectively work together and reach for the stars and that the future of humankind depends upon our skill and our success.

It was then with some very deep feelings of disappointment that I discovered that the other body had cut the NASA appropriations from the proposal of our first conference of $4,973,100,000 to $4,791,900,000, which is a loss of $181,200,000, and with a cap on the Shuttle development of $3,104,900,000; that they had also cut the construction of facilities from $99,800,000 to $80 million, and the research and program management program was cut from $1,114,300,000 to $1,099,300,000. That is a total of $216 million under the conference figures which appear in the continuing resolution of this body.

In the National Science Foundation, in the research department, it was cut from $1,040,000,000 to $950 million, and science education—I hate to say—was cut from the mere $27,450,000 that we had previously provided to $20 million.

Research and related activities down $90 million from the conference level, and science education is down $27,450,000, a drop of $97,450,000 from the original conference agreement.

Now, when we think of looking at the 1980 figures, we recognize that science education in this budget recommended by the other body of $20 million is a true disaster. It is $64.7 million less than the 1980 appropriations for science education.

I do not really think, I would like to say to the Speaker and to the gentleman in the well, that the Nation can afford this type of drastic cut in science education.

I would like to quote Trudy Bell, who in the very first issue of a new magazine called Woman's Life has a story called, "Threshold Space and the New Technologies." She relates that a Harris survey this past May with 1,250 voting-age adults involved, two-thirds of them believe that the United States should spend the billions necessary to develop the full potential of the Shuttle over the next 10 years. And it was a type of survey that has only about 3 percent, plus or minus, possible mistakes if it had been carried on over the entire United States.

And no wonder, she says, that the people are so supportive of this program, because space technology, exploration and industrialization are no longer in the realm of science fiction or marginal concern. They are squarely in the arena of economics and politics affecting our wallets, international balance of power, and quality of life.

Communications satellites annually return revenues of $7 billion, a figure rising each year, with a growing demand by burgeoning industries such as cable TV. Weather satellites show storm systems every evening on the TV news, warning cities and agricultural businesses of impending freak frosts and hurricanes. Earth observation satellites now monitor the health of forests and crops, and migration of airborne plagues. Soon, new satellites will also distinguish between geological formations of keen interest to petroleum and mineral companies, the focus of international politics of supply and scarcity.

Also, we know that new technologies of critical importance in medicine, aerospace, the green revolution of agriculture, with genetic engineering promising great new breakthroughs, industrial production, including computers and robotics, space communications, and new energy options, all of these will spark further rapid advances for the remainder of this century.

So how can we possibly, Mr. Speaker, reduce education and training in the National Science Foundation to a mere $20 million? We know that the barest amount that we could possibly have was this $27.5 million that we have in the House continuing resolution.

The National Science Foundation has said that science and engineering education is at the $27.5 million in the conference report and the continuing resolution. Funding for this activity would provide for about 1,500 National Science Foundation graduate fellowships, continuation of some of the most outstanding, ongoing projects like the "3-2-1 contact," among others, and a small amount to access future directions for science and engineering education at the National Science Foundation.

We also know that it costs the Government a great deal of money, because we are not having enough science education and extending it out to the proper areas.

We had in this body the chief of the Air Force Systems Command tell us that his organization is seriously handicapped by a shortage of qualified engineers. "And I see my problem is going to get even worse," he said.

What are the effects? One of our satellite programs recently suffered a technical problem which we believe could have been detected and corrected sooner, and less expensively, if only an experienced engineer had been available. Estimated cost, $7 million. An inexperienced officer allowed a conflict between associate contractors to linger longer than prudent. Impact? The delivery schedule slipped and the cost increased $2 million.

□ 1900

Air Force Logistics Command has not been able to develop new nondestructive inspection procedures for detection of fatigue damage in B-52 and A-70 aircraft. This has adversely affected the operational readiness of these aircraft.

AFLC also attempted to contract out 264 Minuteman missile circuit boards. No bids were received. The work had to be scheduled in-house, but, because of engineer shortages, the work will take 3 years versus the originally scheduled 2 years.

That is in the military and in our own Government expenditures, Mr. Speaker, but recently I was part of an American Productivity Center mission to Japan, and I can assure you that all of us who were on that mission were very impressed with the Japanese training and education of their scientists, their engineers, their technologists, so I would very much hope that we can do something to increase the amounts that are in the continuing resolution that the other body has sent to us, and I may say that as a grandmother of eight splendid young Americans that I believe that their future is in the hands of this body to increase those appropriations.

I thank the gentleman.

Mr. OBEY. I thank the gentlewoman. I think that is an excellent statement. I must say, as one who has been skeptical, as she knows, from time to time of expenditures made at NASA, I was intrigued by the fact that the value of the program has been sold through the years because of the argument that has been made by a lot of people that so much of what we learn in space exploration and in the NASA programs has a spillover effect in terms of the improvments that can be made in managing our own resources on Earth. I was therefore amazed to notice in the Gramm-Latta budget proposal that one of the areas of NASA which was clobbered the hardest was the portion which had to do with the "on Earth application" of information that was gathered in NASA operations.

It seems to me that if we allow the administration and the other body to further shrink that portion of NASA's budget, that we really do not have a strong justification for the continued investments we have been making, because if we are going to invest money in NASA development programs and then not spend the money to use the information that is learned there in ways which apply to resource management and discovery here on Earth, and in terms of pollution control, for instance, then we really are being pennywise and dollar foolish.

Mr. Speaker, the gentleman from Hawaii (Mr. AKAKA) I know is interested in some of the cost-ineffective reductions made at IRS, and I yield to him.

Mr. AKAKA. Mr. Speaker, I thank the gentleman very much for providing this time and for providing this opportunity to highlight the differences

between the proposals of the two bodies, and to express our feelings about the false economy that is coming about on the other side on the economic recovery program.

Mr. Speaker, in the continuing resolution Senate action reduces appropriations for salaries and expenses for the Internal Revenue Service by $25 million. It is little more than ridiculous to cut back operating funds for the IRS, given the fact that the IRS is an agency that brings in more money for the Federal Government than it spends. The IRS generates revenue for the Federal Government that the Federal Government would be hard pressed to find from other sources.

This particular budget cut is not only ridiculous from an economic point of view, but it is also inconsistent with the administration's new policy of revenue enchancement—a policy recently referred to by OMB as receipt strengthening. Most of us know this policy by the simple words tax increases.

If we accept this amendment, we are making sure that the IRS continues to lose billions of dollars each year in taxpayer noncompliance with IRS policies. It is estimated that the ratio of loss in tax revenue for every dollar we cut from IRS compliance efforts is 6 to 1. For every $1 we cut from the IRS for compliance, the IRS loses $6 in tax revenue.

Studies prepared by the General Accounting Office estimate that in 1981 alone, $30 billion in taxes owed the Federal Government will remain uncollected simply because the IRS cannot properly process and review the tax forms it now receives. To cut the appropriations for an agency already unable to meet its compliance responsibilities due to a serious shortfall in operating expenses makes no economic sense.

President Reagan should want to have that $30 billion that will go uncollected each year if he is really serious about wanting to balance the Federal budget.

The simple fact is that the Government needs these uncollected tax revenues and that is precisely why in this case I strongly urge my colleagues to support the House version of the continuing resolution.

Mr. OBEY. I thank the gentleman.

Mr. Speaker, I new yield to the gentleman from Colorado (Mr. KOGOVSEK), who I know has some observations to make about the Interior appropriation bill. We have had several references to the provisions which are revenue producers for the U.S. Government and its taxpayers. Certainly, the Interior appropriations bill is a very large revenue producer for the U.S. Government. I yield to the gentleman for whatever comments he would like to make.

Mr. KOGOVSEK. Mr. Speaker, I thank the gentleman in the well and the gentlemen from Arkansas for providing the time for all of us tonight to talk about some part of the budget that are near and dear to our hearts.

I would tell the gentleman in the well that each of us keeps an eye on those areas of the budget which most directly affect our States. I would like to briefly speak against the action which cuts funds for Interior Department agencies and water and power resources across the board. The Director of the Bureau of Land Management, recently testified before one of my interior subcommittees. He told us that his agency is taking an approach on budget cuts which allows for smaller cuts in high-priority programs and greater cuts in programs considered to be lower priority. During the last 10 months, these programs have accepted significant budget cuts, up to 25 percent and even 40 percent in the area of cultural resources. While a low-priority program may seem to be just that, these cuts will have a serious impact on their ability to function and to serve their original purpose because their budgets were so small in the first place. For instance, such cuts can cause delays in permit applications and program reviews because of low staffing levels, resulting in increased costs to energy programs and private and public investments. Additional across-the-board cuts are not savings in the Interior Department, instead they are cost ineffective. I would also like to mention the impact of cuts in the area of water and energy development, particularly on water development projects "already under construction" in the West and in Colorado. Projects in my district have already accepted deferral of some funding as part of the first budget resolution. They did so reluctantly but it was accepted as part of an effort to trim Government spending. However, additional across-the-board cuts can have an impact on the cost-benefit ratio which is crucial to the future funding of water projects. If the cost-benefit ratio swings to the cost side, it will be hard for westerners to convince an already reluctant Congress to continue funding for completion of projects in their early stages. These water projects are crucial not just to the West, our agricultural communities and our municipalities, they are crucial to industrial development which is expected by this administration to play a heavy hand in the rejuvenation of our economy. These projects are also crucial to private energy development in the West . . . and providing energy is expected of us as we make our contribution to U.S. energy independence.

Like many of our colleagues, I believe cuts made earlier in this session of Congress have gone far enough. They were made rapidly with little scrutiny in many cases. Before we cut further across the board in these and other programs, we should wait to see the effect previous cuts will have. After all, it has been stated many times in this Chamber that we must give the President's economic program a chance before we start criticizing it. We should also give its impacts a chance before we start adding additional impacts to these programs.

□ 1910

I would tell the gentleman in the well, Mr. Speaker, that prior to the election of the new President and prior to the Republican takeover of the Senate there were constituents of mine in the West who expected better things from the administration. They expected that things would get better under the new administration.

Unfortunately, this has turned out not to be true. There was a great deal of criticism of the Carter "hit list" as far as water projects were concerned, and yet under the new administration we in the West find we are receiving several million dollars less for water projects than we did under the Carter administration.

We had expected or many of my constituents had felt that under this administration we would be doing more for the enhancement of energy development, and so on, and yet we find an administration that is in my estimation pennywise and pound foolish when it comes to developing some of the energy that we can develop in the West.

What I would like to tell the gentleman from Wisconsin (Mr. OBEY) further is that this administration and the Republican Senate are missing a chance in not taking advantage of a lot of the things we have in the West, whether it is our national parks, whether it is energy, or whatever.

We have found—and I think we will find the gentleman from Ohio (Mr. SEIBERLING) will be saying this—that while the administration had suggested that they would do a better job in conserving our national parks, that in fact is not going to happen. We are going to find that people visiting the West to see some of our vast and great national parks are not going to be able to enjoy those national parks, once again because of budget cuts in staffing those national parks.

So, Mr. Speaker, all in all, I think this administration and the Republican Senate is not doing a good job, and once again, I thank the gentleman from Wisconsin (Mr. OBEY) for providing us the time to talk about some of these issues.

Mr. OBEY. Mr. Speaker, I thank the gentleman from Colorado (Mr. KOGOVSEK).

I yield now to the gentleman from Ohio (Mr. SEIBERLING), who has been indicated as sort of the overseer of our national parks.

I happened to be in Glacier National Park with my family when the gentleman was conducting hearings on the grizzly bear issue out there. I learned quite a bit more than I really wanted to know about grizzly bears after reading the Hungry Horse Times and some of the other newspapers.

Mr. Speaker, I yield to the gentleman from Ohio for whatever comments he has on the impacts of the actions of the other body on our public treasures such as the national parks.

Mr. SEIBERLING. Mr. Speaker, I thank the distinguished gentleman from Wisconsin for yielding.

Unfortunately, when I was in Glacier National Park, I spent the 1 day I was there in a hearing about the problems of preserving the grizzly bear population, and I did not get to see much of the park. I saw just enough to whet my appetite to get back there.

I suppose that is a good place to start. We had testimony that unless the grissly bear population has a habitat which is at least as large as Glacier National Park and the Mount Marshall Wilderness complex to the south, which total about 4 million acres between them, the grizzly bear will not survive in that part of the country. And that is the largest grizzly bear population in the country, in the lower 48.

Well, you might ask, what does that mean? Well, when you destroy a magnificant species of wildlife like the grizzly bear, some of the glory goes out of the world, some of the glory goes out of our heritage, and that is what the national parks and our wilderness system and our national forests is all about—preserving some of our natural heritage.

It was very interesting to me that after I went to the hearing, I went over and I looked at the Bob Marshall Wilderness and spent the night there and went up to the oil and gas operations on the eastern edge just outside the wilderness. That certainly confirmed to me and to the other people in that group that we were absolutely right in the Interior Committee when we directed Secretary of the Interior James Watt to withdraw that wilderness from oil and gas leasing, pursuant to a resolution that was introduced by the Congressman from that area, the gentleman from Montana (Mr. PAT WILLIAMS).

Putting together what we saw and what that hearing produced convinced us that if we had allowed oil and gas leasing in that wilderness area, there would go one-half of that crucial habitat to the grizzly bear and probably we would see the destruction of that magnificent species as far as the lower 48 is concerned.

Now, we have before us the proposed cuts in the National Park Service and the Department of Interior budget that have been promulgated by the other body. From the figure that was already cut by the House for the operation of the National Park Service, we find a further cut in the Senate budget proposals of $21,370,000 out of a total of $534 million for 1 year's operation of the National Park System.

I go around to the national parks, and I talk to the superintendents, and I talk to the rangers and to the tourists, and their greatest concern is that they do not have the manpower to provide the kind of service that the American people are entitled to and to even protect this tremendous resource.

This Nation invented the concept of national parks. We have been a forerunner in the development and the preservation of our natural heritage, and it is just a shame that we cannot provide even the minimum services to protect that great resource for the people who use it.

Secretary Watt, when he became Secretary of the Interior, made a great thing of apologizing for the state of the parks and the fact that some of the resources, the buildings and bridges and trails, needed to be put in better condition. Well, when he gets through with his job and we get through with this kind of budget cutting, he will really have something to apologize for because some of the parks will simply not be able to operate, and that includes those near our great cities, following the policy first adopted by Secretary Morton and Mr. Nixon of putting the parks where the people are.

We remember that when Mr. Watt took office, he wanted to deauthorize them, sell them off, get rid of them, and just go back to the remote parks like Yellowstone and Grand Canyon that most of our population will never see.

That is what this kind of cut is going to bring about even if we do not deauthorize them. Mr. Watt said that we—that is, the new administration—are going to use the budget process to change basic policy. And believe you me, that is just what is being done.

Let us look at some of these other figures. The administration came in and asked for only $4,700,000 for historic preservation in this country, and both the House and the Senate decided that that was not enough and we voted $25,400,000 for that purpose. But the budget resolution provides that that will be cut by $1 million. That still leaves a fairly substantial amount, but it is far, far more than what the Secretary originally wanted. But it is not enough to do the job.

The American people are trying to preserve their historic heritage as well as their natural heritage. For land acquisition and State assistance, the Senate resolution proposes to cut $4 million out of $103 million. That is what the conferees agreed to.

And for construction in the national parks—this is the thing that Secretary Watts said he wanted to apologize to the American people about—he wanted $105 million for this fiscal year, for construction and rehabilitation in the national parks. The appropriation bills voted $88 million and $85 million respectively in the House and Senate bills, and the new proposed resolution would cut that by $3.5 million.

So much for apologizing to the American people for the state of the parks.

I thank the gentleman from Arkansas for taking this time to educate the public on the implications of this budget resolution. And it is only the beginning, let me say. We have already seen that for fiscal year 1983 we are going to experience even more drastic cuts.

□ 1920

If I may have 30 seconds more, let me just say this: We saw in the tax bill the terrible consequences of irresponsible legislation in the tax field. We need to cut our budget. But if we do it in an irresponsible, sloppy, ill-thought-through way, we are going to pay a terrible price all across the board and not just the national parks.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. I appreciate very much the remarks that were made by the gentleman from Ohio. He makes me proud to be a Democrat, because we are concerned about little children and grizzly bears.

This afternoon, it is late afternoon in Phoenix and in Denver and in the western part of our country, and I can see some of our good citizens that are returning from an afternoon of golf gathering at the 19th hole to talk about the big-spending Democrats. Just because we are concerned about little children and grizzly bears does not mean that we are necessarily irresponsible fiscally.

I point to the record of the appropriations in Congress since 1943. It is time to let the figures do the talking. Since 1943 the Congress has appropriated less money than requested by any President, save one, in every single year since 1943. This Congress, this House, is attempting to appropriate less money than requested by President Reagan. So the charge that Democrats are not concerned about the budget is not borne out by the facts.

I think it is important to say along with our concern for little children and grizzly bears that we are likewise concerned about fiscal responsibility

and that the three are not mutually exclusive.

I thank the gentleman very much for yielding to me.

Mr. OBEY. I thank the gentleman.

I think in closing what we ought to add, quite frankly, is why this proposal in the other body is before the Congress tonight. I think the answer is very simple. The administration is now recognizing that as a consequence of policies which it has insisted that this Congress adopt we are now facing deficits this year, even if all of the President's suggestions of September 30 were taken, of approximately $73 billion if we follow the President's program to a "T." That is $30 billion off from the President's estimates last January.

I would suggest that most of the difference in those numbers has occurred simply because of the administration's fiscal policy which has resulted in incredibly high interest rates which have added greatly to the amount in the Federal budget which we have to pay for interest, and also has resulted in the now much higher unemployment figures which are projected. Those also cost us a great deal in terms of both additional expenditure for unemployment and welfare, and fewer revenues because unemployed people do not pay taxes.

I think we have this proposal here simply because the administration was looking at its own program, admitting that its own program is now out of control, not knowing where to go, trying to appear that they are doing something, and because they will not face up to the major obligation that we have to correct the economic package or the economic problems we have, the administration is going after the minnows instead of the whales.

If the administration were looking at the major problem it would recognize, for instance, that the tax proposals which were adopted just last year were simply too expensive. People who make more than $50,000 a year make up 1 out of every 20 persons in this society. Yet they will get back $1 out of every $3 in that tax cut. That difference, the difference between the average dollars that we will pay out to the average taxpayer in tax cuts and the amount of tax relief we will provide people who make $50,000 a year or more will add $160 billion to the national debt over the next 5 years.

If we want to deal with the major problem that we have to face in balancing the budget, that is the number we ought to deal with. If we are going to deal with additional budget cuts, which we most certainly must, we ought not to provide, as I indicated earlier, that the programs which have already been reduced substantially be reduced once again while a good many other programs which were exempted the first time remain exempt.

Felix Rohatyn said something recently which I think we ought to remember in closing. He said:

> There is about, in the land today, a meanness of spirit that masquerades as conservatism. . . . This country was not built on meanness of spirit; it was built on a passion for freedom and fairness. Individual freedoms are not threatened by a government willing to intevene in the name of fairness; care and compassion can live alongside a balanced budget, a strong defense and a vigorous fight against crime. . . .

We ought to remember those words as we evaluate the difference between the House resolution and the Senate resolution which is at issue tonight.

I yield back the balance of my time.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Secretary of the Senate be directed to request the House of Representatives to return to the Senate the bill (H.R. 3210) entitled "An act to amend the Surface Transportation Assistance Act of 1978, to establish obligation limitations for fiscal year 1982, and for related purposes," including the Senate amendment thereto.

DRAFT REGISTRATION SHOULD CONTINUE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

● Mr. MONTGOMERY. Mr. Speaker, next Tuesday a Cabinet-level task force is scheduled to make a recommendation on selective service registration. Their decision will have a tremendous impact on the future of America's national security. The importance of an ongoing program of registration to our Nation's ability to mobilize in the event of an emergency cannot be overstated.

A recent editorial in the Los Angeles Times summed the situation up best when the editorial writer said:

> To scrap registration would undercut in the eyes of both the Soviet Union and the European allies, most of which have conscription, the Administration's professed belief in a stronger defense and a stronger Atlantic Alliance.

Mr. Speaker, I would also note that the All-Volunteer military is not working as well as some would have us believe. Yes, we are recruiting the quantity—getting the numbers—but it appears we are still not securing the quality we need.

This is especially true for the U.S. Army. During fiscal year 1981, 30.9 percent of recruits in the Army were in mental category IV and 29.1 percent were in category IIIb. This means fully 60 percent of the new recruits for the Army last year have less than the optimum potential to complete their original term of enlistment based on past experience.

I continue to believe that we must give serious consideration to a return to at least a limited draft to secure the type of personnel we need in the military and in order that the Armed Forces represents a cross section of out Nation. And at a very minimum we must continue draft registration in the interest of a strong national defense posture.

At this point in the RECORD, I would like to share with my colleagues the editorial from the Los Angeles Times.

[From the Los Angeles Times, Nov. 6, 1981]

THE SEMI-SECRET DRAFT

The news that more than 23% of the men born in 1963 had failed to register for the draft as of Sept. 1 has raised a ruckus in Washington. Anti-draft groups are claiming great success among the current 18-year-olds. Defense analysts are talking about harsh crackdowns on violators of the registration law. There have been suggestions to make registration voluntary, not mandatory.

And all this comes as a Cabinet-level task force is trying to decide whether to recommend that President Reagan continue registration, started by President Carter in 1980, or scrap it, as Reagan urged in his campaign.

There's good evidence to show that no one should leap to conclusions about the drop in registration. It appears that many young men aren't registering because the government hasn't been telling them that they should.

When registration began in 1980, men born in 1960 and 1961 were asked to register in one-week periods, back to back, in the summer. The Selective Service System had a $450,000 budget for public affairs, including advertising, and the media were full of stories about registration. Of the men born in 1960, 92% registered; of those born in 1961, 94% did.

The men born in 1962 were asked, with less fanfare, to register in one week in January this year; 87% did.

Content, apparently, to have 6.5 million names in its computers, Selective Service chose to revert to the old system of having men register on their 18th birthdays, at local Post Offices. The service has done little to tell the young men this, but says it will now begin, on a reduced public-affairs budget of $150,000 including staff salaries—a modest program of advertising that, it hopes, will bring registration by the end of the year up over the 90% level, with more expected to register later. Historically, Selective Service says, it took about 18 months for each previous group of 18-year-olds to reach its maximum registration of 95% or higher. That is the goal for the current group.

To reach it, the government should spend more money to tell the young men what the law requires of them; it cannot expect them to register, and certainly should not prosecute them for their failure to register, if they don't know that they should.

And the Administration should not take the figures as an excuse to abandon registration. It is, at best, a poor substitute for the draft that is needed to provide competent armed forces fairly and at an acceptable cost. To scrap registration would under-

cut in the eyes of both the Soviet Union and the European allies, most of which have conscription, the Administration's professed belief in a stronger defense and a stronger Atlantic Alliance.●

SMALL BUSINESS PROMPT PAYMENT ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 10 minutes.

● Mr. LAFALCE. Mr. Speaker, I am introducing today the Small Business Prompt Payment Act of 1981. If adopted, this legislation would greatly improve the Federal Government's bill-paying habits and give small businesses a much-needed assist.

In these times of economic trouble and extraordinary interest rates, cash is extremely hard to come by, particularly for small businesses. Ironically, the Federal Government, as one of the Nation's largest buyers of goods and services, often makes matters even worse by excessively delaying payments to businesses from which it buys.

Managers of small firms that do business with Federal agencies have been quoted as saying that they are often forced to wait 90 to 120 days for payment of goods and services delivered. Because such payment delays cause severe cash flow problems and administrative headaches, the fear of late payments has further reduced the already low incentive small businesses have to bid for Federal procurement contracts.

The General Accounting Office studied the late payment problem in 1978 and discovered that one-third of all Federal bills were paid late, which represented about 20 percent of the money that the Government owed on a given date.

For example, the GAO found that GSA paid 73.6 percent of its invoices more than 30 days late; the Department of Transportation paid 62.6 percent of its bills late; the Department of the Army paid 34.9 percent of its invoices more than 30 days after they became due; the Department of Health and Human Services paid late for invoiced goods two-thirds of the time.

Last month, GAO issued an update of its late payment study. Unfortunately, it found that little has been done to remedy the problem since its initial report. The October report notes that the situation has been made more critical by high interest rates in the private sector and concludes:

If the situation is the same today as at the time of our previous review, we estimate—applying an interest rate of 12 percent and assuming annual Federal procurements of $100 billion—that contractors are possibly losing at least $150 million annually on late payments. The loss could be as high as $375 million. Delays in making payments also cost companies and the Government money in terms of additional time and effort spent tracking down unpaid bills and in resolving disputes over when payment is due.

The Small Business Prompt Payment Act would address these problems by requiring the Federal Government to include in every contract with a small business concern a provision requiring the Government to pay interest on any portion of the amount owed by the Government for more than 30 days. No amount of a payment would be considered as late until the agency received a proper invoice for goods or services furnished to the Government and substantiating documentation.

Moreover, Federal agencies would be allowed to take a discount on a payment to a small business only if the payment is made within a specified time period. Federal agencies would be required to file detailed annual reports with the House and Senate Small Business Committees on any interest payments made during the preceding year. The bill would achieve these purposes by amending the Small Business Act.●

TOWARD REASONABLE HEALTH CARE COSTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. WYDEN) is recognized for 5 minutes.

● Mr. WYDEN. Mr. Speaker, before coming to Congress last January, I spent 7 years working with senior citizens as director of the Oregon Gray Panthers.

During those 7 years, I witnessed one tragedy after another:

Seniors who went without two square meals in order to pay for needed medication.

Seniors who could not afford to heat their homes in the winter because all of their resources were going to pay for hospitalization and other medical care for their husbands or wives.

Seniors who ended up in nursing homes because they just couldn't pay their medical bills and still make ends meet.

I decided then that something had to be done about the skyrocketing health care costs that contributed to these tragedies. Today, I am delighted to introduce a bill that will help make health care affordable for seniors and other Americans.

What my bill does is change medicare regulations to reward hospitals for cutting back on escalating health care costs. Current data—as well as my past experiences—support this move.

Anybody who can read, can tell you that health care costs in this country are getting more and more out of hand with each passing day. Last year, Americans spent $1 out of every $10 on health care. The total tab was some $247 billion—up 15.2 percent over the previous year. This cost is clearly more than most pocketbooks—or the economy as a whole—can bear. And yet none of us really has a choice. Regardless of income, age or any other factors, all of us get sick—and all of us need medical care.

Unfortunately, to date precious little constructive action has been taken to help cut health care costs.

Without my legislation, most of the current proposals to trim back health care costs would do little more than shift the burden of payment onto the shoulders of the elderly and poor—the groups least able to pay.

And there are few, if any, incentives for health care providers to find less expensive ways to provide quality health care. Instead, the Federal Government chooses to cut corners, thus forcing health care providers to grab for every dime—and still lose.

So what can we do about it? My idea is to refuse to cry uncle and see if we can squeeze more from our health dollar—and still provide quality care.

My bill does this through changes in the medicare system. Under our current medicare system, we, in essence, hand health care providers a blank check to fill in—after the care has been provided. My bill would change this by offering incentives to set up a prospective reimbursement system.

We know this kind of a system works because States which use prospective reimbursement programs report a 2- to 4-percent decrease in health care costs. For example, the State of Maryland alone saved the American taxpayers $33 million in 1978 by employing prospective reimbursement.

And we know this kind of a system is needed because of what skyrocketing health care costs have done to medicare and medicaid—the programs which currently foot the bill for one-third of our Nation's health care. In 1967, the cost of medicare and medicaid was $6 billion. Today those programs cost the Federal and State Governments a staggering $60 billion—and, as a result, are hanging by a thin thread.

In fact, although the problems of social security's old age and survivors fund seem to get the most ink, medicare appears to be in equally serious straits.

One of the key factors behind the astronomical medicare and medicare cost increases? Rising hopital costs.

Hospital expenditures this year hit an all-time high of $99.6 billion, reflecting a rate increase of 16.2 percent between 1979 and 1980. This year the figures are even more alarming. Increases this year over last are hovering near 20 percent. A patient can now expect to pay an average daily rate of $217—just for room and board. This compares to a rate of $94 just 8 years ago.

In my own State of Oregon similar trends are evident. Oregon ranked 11th in the Nation in increase in total hospital expenses from 1975-79, with

an annual increase of 16.8 percent. The U.S. average was 14.1.

And although the rapid population growth in Oregon is partially responsible for the cost increase, it is not the sole factor. Discounting the population increase, Oregon would still rank in middle for cost hikes.

This is not to say that hospitals are the villains. They are not. Most of our Nation's 7,000 hospitals are operating on exceedingly slim margins. Many actually operate at a loss. If anything, hospitals—like the consumers—have been victims of the system.

And it is unfair to assume that the steep hike in hospital costs is due entirely to extravagance, waste or fraud. There are many reasons hospital rates increase: Catchup labor costs, new technology, change in acuity or utilization, and increased Government regulation.

Mr. Speaker, I would like to take a moment now to explain the historical precedents behind introduction of my bill. Then I will detail just how this legislation will insure the integrity of medicare and medicaid funds—and yet still recognize the plight faced by hospitals caught in an economic crunch and provide them with incentives to better their lot and that of consumers and taxpayers who pay for their services.

HISTORY OF COST CONTAINMENT

In the past, Congress attempted to place a lid on rapidly rising health care costs through top-down regulation. As a counter, hospitals entered into a voluntary effort to achieve the same goal. Both failed. The latest attack is something which is loosely called competition, and which might include such elements as vouchers and a change in tax policy.

While I laud the principle behind this approach—namely, that the American consumer should be allowed to make choices—and pay for them, I question whether any of these proposals by themselves will have any immediate positive effect on runaway health care costs. Furthermore, I question whether any of these proposals address the single most inflationary aspect of medicare—retrospective cost-based reimbursement.

COST-BASED REIMBURSEMENT

The Federal Government which currently picks up the tab for 40 percent of all hospital bills, reimburses through medicare on the basis of reasonable costs. This means a hospital is paid for the number of tests performed, physician visits recorded, injections given, or medication prescribed. In other words, cost-based reimbursement is retrospective payment for services or goods consumed.

However, as any hospital will quickly point out, medicare and medicaid reasonable costs do not pay all costs associated with hospitalization. Instead, these disallowd costs are shifted to the private-pay patient or absorbed through other programs.

Medicare/medicaid cost-based reimbursement neither pays hospitals their true costs nor provides incentives to the doctor or the hospital to increase efficiency by using less goods or performing services in a more cost-effective manner.

My legislation would encourage hospitals to behave differently—to lower hospital costs through efficiency. There would be an incentive, for example, to control overuse of ancillary services and overly long lengths of stay. There would be an incentive to make cost-effective decisions regarding new programs, equipment and services. There would be an incentive to share services with other hospitals and to develop more outpatient services.

The current medicare reimbursement system cannot encourage such efficiencies. If a hospital uses less ancillary services, it is paid less by medicare. If it uses fewer days in the hospital, it gets paid less by medicare. In other words, the more efficient a hospital becomes, the less it is rewarded by medicare.

THE VOLUNTARY EFFORT

In 1972, the medical community launched a much heralded private initiative to contain runaway medical costs—the voluntary effort. By anybody's yardstick, it has not proven to be the answer. Although many dedicated providers worked hard and were successful, overall, the effort was a disappointment. This year hospital rate increases will be nearly 20 percent. It is not that surprising, however, that the effort was unsuccessful. The framework was still cost-based reimbursement.

Only by changing retrospective cost-based reimbursement to something which rewards more efficient use of scarce resources in health care will there be an impetus to lower hospital rate increases. Prospective reimbursement would encourage such efficiency.

PROSPECTIVE REIMBURSEMENT

Prospective reimbursement is a simple system. It involves agreeing in advance upon an amount to be paid for specific services. It is used on a regular basis by private contractors when bidding on a project. After an agreement has been negotiated, the provider performs the task accepting the agreed upon amount as payment. If the provider is efficient, savings will accrue. If the provider is inefficient, losses will occur. This is a widely accepted business practice.

I do not wish to suggest here that health care can be marketed in exactly the same manner as a can of soup or a construction project. I am well aware of the complexities and anxieties that exist when one begins to readjust the health care financing mechanism.

However, I am also aware that there are currently nine States and several communities which have changed to a prospective reimbursement system for hospitals. The lower rates of increase in hospital costs in these States and communities is a dramatic illustration of how hospitals can react given incentives.

In 1978 the States with mandated cost-control programs averaged 9.7 percent increase in hospital revenue in contrast with a figure of 13.7 percent for the remaining States. This difference equaled a $2.5 billion savings nationwide. Maryland, alone, saved the taxpayer $15 million in medicaid and an additional $8 million in medicare.

EXPLANATION OF LEGISLATION

One. My bill recognizes the impracticality of mandating reimbursement change. It is a voluntary program.

Two. This legislation also recognizes that one community's success could be another's disaster. It does not prescribe the prospective method to be used.

Three. It further acknowledges the plight of the medicare trust funds and the straits of the medicaid program. It does this by limiting the amount of medicare/medicaid funds which could be involved in a plan to not more than what would have been expended under medicare/medicaid in the absence of the plan.

Four. Finally, my bill recognizes that most hospitals do not currently have the technical expertise to formulate such an entity. The legislation would allow for startup funding for technical assistance and planning.

PROVISIONS OF THE LEGISLATION

My legislation would allow for reimbursement under medicare and medicaid of hospitals on a prospective basis under a plan developed either by a State or by a unit of local government or a legal entity made up of—or representing—hospitals in one or more States serving the same geographical area.

An approved plan would exempt the participating hospitals from current medicare reasonable cost requirements such as limits referred to as "223" in the Social Security Act.

The plan also may apply to other hospital insurance or payment programs. Hospital participation in nongovernmental plans would be voluntary. The plan requirements are as follows:

One. In the case of a State plan, the plan must:

A. Be established by statute and operated directly by the State;

B. Assure HCFA that no more medicare and medicaid funds would be expended under the plan than would otherwise be expended.

C. Provide equitable treatment of all types of hospitals and insurers; and

D. Assure that hospitals will not change admissions practices in a manner that discontinues providing

emergency services or other critical services to indigent patients.

The State plan need not cover all hospitals in the State, and does not have to be the same for all hospitals.

Two. In the case of a plan by a local governmental unit or group of hospitals, the plan must be approved by the Secretary of HHS and must:

A. Provide for a prospective method of determining hospital payments and not apply to hospitals covered under a State plan;

B. Assure HCFA that no more medicare and medicaid funds would be expended under the plan than would otherwise be expended;

C. Either be approved by the Governor of each State in which it operates or, if not approved by a Governor, the Secretary of HHS must have determined that the Governor's disapproval was arbitrary and capricious;

D. Assure that hospitals will not change admission practices in a manner that discontinues providing emergency services or other critical services to the indigent patients;

E. Apply to a large enough hospital or a sufficient number of hospitals to assure that HCFA administrative expenses are not excessive; and

F. Have management capable of operating under such a plan.

The plans would be operated under contract with the Secretary of HHS for renewable 1-, 2-, or 3-year periods. The bill does not prescribe or provide for the Secretary of HHS to prescribe, the method to be used for prospective reimbursement of hospitals. This is left up to the State or other entity operating each plan.

The bill would provide for a one-time grant to provide technical assistance and initial administrative costs for States, units of local government, and legal entities to develop prospective hospital reimbursement plans.

Mr. Speaker, I support the goals of competition and will continue to work with my colleagues to develop legislation which would treat all parties in a way fair and equitable manner. My legislation is a necessary first step. Until the reimbursement system is changed, legislation to reorder health care packages will continue to fight a losing battle.

Clearly, the Federal Government must take immediate steps to insure the integrity of medicare trust funds, slow the growth in the medicaid drain, and, at the same time, recognize the economic plight faced by the hospitals.

My legislation does this.

While it is not the only solution for the medicare/medicaid crises, it offers concrete incentives to both providers and payors who wish to make these changes.

H.R. 5084

A bill to amend title XVIII of the Social Security Act to provide for alternative methods for payment of hospitals under the medicare program

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Medicare Hospital Reimbursement Reform Act".

ALTERNATIVE HOSPITAL REIMBURSEMENT PROGRAMS

SEC. 2. (a)(1) Section 1814(b) of the Social Security Act is amended by striking out "or" at the end of paragraph (2), by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; or", and by inserting after paragraph (3) the following new paragraph:

"(4) in the case of a hospital which is subject to an alternative hospital reimbursement system under section 1886, the amount determined in accordance with such system.".

(2) Section 1833(a)(2)(B) of such Act is amended by striking out "; and" at the end of clause (iii) and inserting in lieu thereof ", or", and by adding at the end of the following new clause:

"(iv) if such services were provided by a hospital which is subject to an alternative hospital reimbursement system under section 1886, the amount determined in accordance with such system; and".

(b) Title XVIII of such Act is amended by adding at the end the following new section:

"ALTERNATIVE HOSPITAL REIMBURSEMENT SYSTEM

"SEC. 1886. (a)(1) A State may apply to the Secretary to have all hospitals in the State reimbursed under the system described in this subsection rather than on the bases otherwise provided under this title. The Secretary shall approve the request of the State if the system meets the following requirements, unless the Secretary reports to Congress the grounds for disapproval of such system:

"(A) The system must have been established by statute and must be operated directly by the State.

"(B) The State must provide assurances satisfactory to the Secretary that under the system and for each time period (of not longer than three years, selected by the State, over which the system's performance is measured) expenditures, for hospital services (including administrative services related to such services) for hospitals covered under the system in the State—

"(i) under this title in the aggregate (or on such other basis as the Secretary may provide) will not be greater than the expenditures which would have been made for those services in the State for such period under this title if the system was not in effect, and

"(ii) under the State's plan (if any) approved under title XIX in the aggregate (or on such other basis as the Secretary may provide) will not be greater than the expenditures which would have been made for those services in the State for such period under such plan if the system was not in effect.

"(C) The State must provide assurances satisfactory to the Secretary as to the equitable treatment under the system of all public entities and programs that pay hospitals for inpatient hospital services.

"(D) The State must provide assurances that operation of the system will not result in any change in hospital admission practices which result in—

"(i) a significant reduction in the proportion of patients (receiving hospital services covered under the system) who have no third-party coverage and who are unable to pay for hospital services,

"(ii) a significant reduction in the proportion of individuals admitted to hospitals for inpatient hospital services for which payment is (or is likely to be) less than the anticipated charges for or costs of such services,

"(iii) the refusal to admit patients who would be expected to require unusually costly or prolonged treatment for reasons other than those related to the appropriateness of the care available at the hospital, or

"(iv) the refusal to provide emergency services to any person who is in need of emergency services if the hospital provides such services.

"(E) Hospitals covered under the system will make such reports (in lieu of cost and other reports, identified by the Secretary, otherwise required under this title) as the Secretary may require in order to properly monitor assurances provided under this subsection.

"(2) The Secretary shall respond to requests of States under this subsection within 60 days of the date the request is submitted to the Secretary. If the Secretary does not approve such a request of a State, the Secretary shall inform the State, and the Congress, of the reasons for denial of the request.

"(3) In the case of an application filed under this subsection which would apply to services for which reimbursement is being made in accordance with a system under subsection (b), such application may not be approved so as to take effect before the beginning of the fiscal year after the date the application is approved.

"(b) A legal entity (which conducts operations in one or more States or parts thereof and which may itself be a hospital, association of hospitals, or a unit of State or local government) may apply to the Secretary to have hospital services (whether inpatient or outpatient) provided by specified hospitals serving the same geographic area or population (and related administrative expenses otherwise payable under this title and under title XIX) reimbursed under a system submitted to (and approved by) the Secretary under this subsection rather than on the bases otherwise provided under this title and title XIX. The Secretary shall approve the request of the entity if the system meets the following requirements:

"(1) The system must provide for payment of hospitals covered under the system under a methodology (which sets forth exceptions and adjustments, as well as any method for changes in the methodology) by which rates or amounts to be paid for hospital services during a specified period are established under the system prior to the defined rate period.

"(2) Except as may be provided through a waiver under a system approved under subsection (a), the system under this subsection will not apply to a hospital which is covered under an alternative hospital reimbursement system approved under subsection (a).

"(3) The legal entity must supply to the chief executive officer of each State in which a hospital covered by the system is providing services to have the system approved for use for reimbursement for such

services for such hospital under the State plan (if any) approved under title XIX, and—

"(A) such officer must have approved such request within 90 days of the date of its submittal to such officer, or

"(B) if such officer does not approve such request, the Secretary must have determined, based on the entity's appeal to the Secretary of the officer's determination, that the officer's denial of approval was arbitrary and capricious.

For purposes of this paragraph, an entity's request of an executive officer under this paragraph shall be deemed to have been approved unless the officer denies such request within 90 days after the date of its submittal to such officer. If the Secretary makes a determination described in subparagraph (B), the Secretary shall require that State plans approved under title XIX must provide for reimbursement of the entity for covered services in accordance with the system submitted by the entity.

"(4) The entity must provide assurances satisfactory to the Secretary that under the system and for each time period (of not longer than three years, selected by the entity, over which the system's performance is measured) expenditures, for hospital services (including administrative services related to such services) for hospitals covered under the system—

"(A) under this title in the aggregate (or on such other basis as the Secretary may provide) will not be greater than the expenditures which would have been made for those services in those hospitals for such period under this title if the system was not in effect, and

"(B) under the State's plan (if any) approved under title XIX, in the aggregate (or on such other basis as the Secretary may provide) will not be greater than the expenditures which would have been made for those services in those hospitals for such period under plan if the system was not in effect.

"(5) The system must apply to such a number or proportion of hospital services in an area as to indicate that the administrative expenses under this title associated with the operation of such system will not exceed such expenses for hospital services not under such system for the same quantity of services, providers, or population served.

"(6) If the application is approved, the entity must agree to enter into a contract with the Secretary and the chief executive officer of each State in which it operates under which the contract would run for a term of one, two, or three years, automatically renewable for such a specified term of years unless notice of nonrenewal is received 60 days before such renewal date.

"(7) The entity must provide assurances that operation of the system will not result in any change in hospital admission practices which result in—

"(A) a significant reduction in the proportion of patients (receiving hospital services covered under the system) who have no third-party coverage and who are unable to pay for hospital services,

"(B) a significant reduction in the proportion of individuals admitted to hospitals for inpatient hospital services for which payment is (or is likely to be) less than the anticipated charges for or costs of such services,

"(C) the refusal to admit patients who would be expected to require unusually costly or prolonged treatment for reasons other than those related to the appropriateness of the care available at the hospital, or

"(D) the refusal to provide emergency services to any person who is in need of emergency services if the hospital provides such services.

"(8) Hospitals covered under the system will make such reports (in lieu of cost and other reports, identified by the Secretary, otherwise required under this title) as the Secretary may require in order to properly monitor assurances provided under this subsection.

"(c) Payments made to States or legal entities with systems approved under this section may include payments with respect to administrative expenses of operating such systems to the extent that the applicable assurances described in subsections (a)(1)(B) and (b)(4) continue to be met.

"(d) The Secretary, not later than 90 days after the date of the enactment of this section, shall provide for the establishment of guidelines respecting the method for determining under subsections (a)(1)(B) and (b)(4) the amount of expenditures that would (in the absence of a system approved under this section) otherwise have been made under this title or under State plans approved under title XIX of this Act. These guidelines shall provide for taking account of inflation and demonstrated changes in patient case load or case mix.

"(e)(1) States, subunits of government in the States, and other legal entities may apply to the Secretary for a one-time grant which covers technical assistance and initial administrative costs associated with the establishment of an alternative hospital reimbursement system which can be approved under this section. Any grant under this subsection to a State or other entity shall be reduced to the extent that the entity (or any entity associated with the entity) has previously received assistance under this subsection, and a State or subunit of government of a State is eligible for only one grant under this subsection.

"(2) Payments under grants made under this subsection shall be made in appropriate part from the Federal Hospital Insurance Trust Fund (established by section 1817) and the Federal Supplementary Medical Insurance Trust Fund (established by section 1841) and from the funds appropriated under title XIX. Grants may be made either in advance or by way of reimbursement, as may be determined by the Secretary, and shall be made in such installments and on such conditions as the Secretary finds necessary to carry out the purposes of this section.".●

CONGRESS SHOULD REJECT FURTHER CUTS IN MEDICARE AND MEDICAID

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

● Mr. WEISS. Mr. Speaker, medicare provides invaluable protection against the high cost of hospitalization for 28 million aged and disabled Americans. In addition, medicare covers physician and other medical services.

But in many respects, medicare is like a leaky umbrella. Important gaps in coverage still exist, including out-of-hospital prescription drugs, eyeglasses, hearing aids, dentures, and physical checkups. Medicare reimburses only 44 percent of health care expenditures for the elderly and will cover even less once the cuts passed under reconciliation are implemented. The administration wants to whittle this protection further by proposing massive cuts in medicare and medicaid, the medical assistance for the poor.

These cuts would be in addition to the more than $2 billion reductions that these two programs have already sustained during fiscal year 1982. Earlier this year, I resisted the cuts the Congress approved as part of the Reconciliation Act. And, I shall oppose any further reductions in medical programs for the elderly and disabled.

Medicare and medicaid should be improved for the aged, disabled, and poor—not cut back. Their out-of-pocket expenses have already jumped sharply as health care expenditures continue to soar. Instead of forcing the sick, disabled, and aged to shoulder a greater burden, the administration should look for ways to reduce hospital, physician, and other health care provider costs.

I am greatly disturbed by recent press reports indicating that the administration is considering cutting medicare, medicaid, and public assistance benefits by more than $9 billion in fiscal year 1983.

Some of the proposals include:

Increasing the medicare part B premium charge for medical services from $11 a month to an estimated $19 a month by 1985;

Indexing the part B deductible—the front-end charge that medicare patients must meet from their own resources, private health insurance, medicaid, or othewise—to the inflation rate;

Limiting reimbursements for hospital ancillary care, such as laboratory tests and prescription drugs;

Limiting payments to radiologists and pathologists to 80 percent of their "reasonable charges" instead of the present full amount;

Postponing the time that a person would be eligible for medicare after making an application; and

Converting the medicaid long-term component—nursing homes—into a block grant with a fixed amount of money appropriated annually.

It is indeed ironic that these proposed options surfaced less than 1 month before the White House Conference on Aging. This represents another example of the administration's insensitivity to the needs of the elderly.

This past May, the administration announced proposals to cut social security benefits by about $82 billion over a 5-year period. Thus far, the Congress, along with the American people, has rejected that unfair and unsound package. I would urge that

the Congress resist further attempts to balance the budget on the backs of our Nation's elderly, disabled, and poor by slashing these two necessary programs.●

PAYNE, OHIO FARMER SPEAKS OUT ON FARM ECONOMY AT GRASSROOTS HEARINGS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

● Mr. ST GERMAIN. Mr. Speaker, as I told the House earlier this week, the Banking, Finance and Urban Affairs Committee has heard some 259 witnesses in 4 cities as it continues its grassroots hearings on the economy.

We have heard from people from all walks of life—miners, lumbermen, owners of sporting goods stores, senior citizens, construction workers, auto workers, mill operators, farmers.

Mr. Speaker, in Chicago on November 9 we heard from three farmers, one each from Illinois, Indiana, and Ohio. Let me quote from the testimony of Virgil Thompson who operates a farm with his son near Payne, Ohio.

Mentioning that his note at the bank had jumped from a 7½ percent interest to 18½ percent on renewal, Mr. Thompson compared current economic policies to "slamming a car in reverse going 90 miles an hour. * * * We have aready torn the guts out of the transmission * * * "

He told the committee:

> Yes, I have been impacted by this complete reversal of policy. I have three sons-in-laws working for the automobile industry who have been laid off. They have little children . . . I'm just as concerned about the automobile and the tractor industry as my industry. It all is going together. They have home mortgages and skyrocketing utility bills to pay . . . I know of five families who have filed for bankruptcy in the last week, all in one farming operation alone. It is said that the sheriffs in Ohio are doing more business on the courthouse steps than the real estate people.
>
> We have 31 farm machinery dealer bankruptcies in Ohio this year. They estimated we are going to have an average of one a week when the year is through. I am not sure that your committee—and I want to emphasize this very strongly, the same thing the automobile people told you—I am not sure that your committee even has time to complete the series of hearings you have scheduled before this tidal wave of farming and business foreclosures burst upon us. . .●

STOP THE ELK CREEK DAM BOONDOGGLE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. WEAVER) is recognized for 5 minutes.

● Mr. WEAVER. Mr. Speaker, a conference committee will be convened in the next few weeks to consider H.R. 4144, the energy and water development appropriations bill. The Senate version of this bill contains an item that greatly disturbs me: The Elk Creek Lake water project is given $1.3 million for a study of hydroelectric potential and to update and continue project design, planning, and specifications. The House version contains no similar provision. There is a very good reason that the House version contains no similar provision: The Elk Creek Dam is plainly and simply no more than an unnecessary, uneconomical, and ill-advised "pork-barrel" project. It will damage—not enhance—our water resources.

The Elk Creek Dam was originally authorized in 1962. Since that time, however, several changes have occurred that have effectively eliminated the purported needs for the project. I have opposed this boondoggle since coming to Congress in 1974 and the reasons for my opposition have not changed. The current recession only serves to underscore the validity of those reasons.

First, the asserted benefits of the Elk Creek project are entirely illusory. The primary purpose of the dam is flood control; no hydroelectric or irrigation benefits are planned. But, in the 20 years since the original authorization of this project, the State of Oregon has enacted comprehensive land use planning regulations. These regulations adequately protect the public and private property located in the flood plain. Therefore, there are, in fact, no flood control benefits to be realized from the Elk Creek Dam.

The water quality and fish run enhancement claims are not only inaccurate, they are a sham. The corps' temperature turbidity model and the conclusions drawn from it remain unsubstantiated. The projections were based on data collected during a low-water year. The Rogue River's already threatened salmon and steelhead fishery would be directly affected by releases of turbid water from the Elk Creek Reservoir. These anadromous fisheries are dependent upon a healthy river with clear, cold waters. It is outrageous to even consider appropriating funds for this project when the claim that these benefits will be enhanced is dubious and unsubstantiated.

In addition, the recreation benefits are vastly overstated. The corps' projection of 500,000 visitors per year means that an average of over 1,300 people would use the site every day. But, this area is available for recreation only 6 months of the year. That means that the corps expects nearly 2,800 people to use the site every day. Even if it were possible for this area to comfortably accommodate that unusually large number of daily visitors, the environmental impact statement grossly underestimates the costs that would be associated with development and management of a recreation facility of this magnitude.

A second reason for opposing the Elk Creek project—and this is far and away the most significant—is that it simply is not cost effective. The estimated costs have risen astronomically so that the latest projections put the price of completion at $108 million. Initially, Elk Creek Dam was part of a three-dam system. The first two parts—Lost Creek and Applegate River—are already in place. Yet, the corps continues to obscure the noncost effectiveness of the Elk Creek component by evaluating it as part of the entire "system." To make matters worse, its benefits/cost ratio is based upon an antiquated 3¼ percent interest rate; a rate which is, currently set at 7⅝ percent.

Even with the use of 20-year-old economic criteria and the burial of its costs in those of a three-dam system, Elk Creek's benefits barely exceed its costs by a factor of 1.06 to 1. When Elk Creek is analyzed as an independent project, accepting the outdated interest rate of 3¼ percent, its benefit/cost ratio is only 0.80 to 1. Worse still, when the more realistic 1980 project interest rate of 7⅛ percent is used—and, I remind you that the rate is even higher now—this dam will return only $0.32 of benefits for every taxpayer dollar invested.

Since these figures come from the Corps of Engineers own calculations, I find it shocking that they continue to favor the dam's construction. In fact, the U.S. Fish and Wildlife Service, after completing its own study of the plan, concluded bluntly "that construction of the Elk Creek Dam is unwarranted." In addition, the General Accounting Office is currently conducting a separate study of this project. With the results due in early 1982, it would be extremely premature to commit new funds to the project at this time.

Finally, serious concern has been voiced by Federal land management agencies, the local timber industry, and many others in the Rogue Valley about the effects of the dam on timber production. Because of the potential turbidity, many more restrictions will undoubtedly be placed upon timber harvest operations within the Elk Creek basin. This reduction will be aggravated by the need for special visual management of the basin due to the anticipated increase in recreational use of the area. It is estimated that more than 6,500 acres of BLM and Forest Service lands would be affected, resulting in an annual timber yield reduction of 373,000 board feet.

This dam project has a negative benefit-cost ratio—even when calculated using illusory benefits and understated costs. It will result in significant timber harvest reductions. Refusing to

continue funding the Elk Creek project is clearly consistent with the current administration's policies of fiscal conservatism. Appropriating this money would be inimical to the much heralded goals of reduced Government spending and a balanced Federal budget. Unless Elk Creek Dam is somehow made cost effective, I will continue to firmly oppose its construction. I ask my colleagues to join me in this effort.●

BIG GOVERNMENT SPENDING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. COLLINS) is recognized for 60 minutes.

Mr. COLLINS of Texas. Mr. Speaker, I have enjoyed very much the opportunity of listening to my colleagues on the other side of the aisle during this dinner period. It has been a refreshing evening conversation. It has been stimulating. For 2 hours they have raised many questions about the continuing budget that we have before us here in Congress and this budget certainly is the most important issue facing our entire country today.

As I listened to them, many thoughts came to my mind and I kept writing down this note, and I wrote down that note.

The first thing that is very strong in my mind is the fact that for 27 years this Congress has been controlled and been dominated, both the House and the Senate, by one political party, the Democrats. They have controlled Congress for 27 years. In fact, up until this year when we got a little relief, the Democrats controlled the House by 90 votes. With a 90-vote margin you can pass all of the bills you want to, and they did.

And they have also controlled the Senate. They controlled the Senate over there by 59 to 41 until this year.

Now they are talking here tonight about what have the Republicans in the Senate brought out to us. What have they brought before us in the way of suggestions on reducing the budget.

I listened to the gentlemen over here and they talked about what Government could do and Government could do this and Government could do that. I could not help but think about the only time that I had experience with what the Government could do for me. I enjoyed the Government for 3½ years and I wanted it. That was when I served in the Army and I wanted the opportunity to serve.

But when I went in the Army paid me $21 a month. If you talk to people on welfare today about $21 a month they will feel insulted. But they gave me a uniform and the Army gave me $21 a month. But once I was in that Army they expected me to take care of myself. I had been married for 4 months and my wife and I made out.

As they were talking here, I remembered one time when we were up against it and had it pretty tough. We were down at Tullahoma, Tenn. Most people have not heard of Tullahoma, Tenn., but I remember because that is where we staged and prepared the 1197th Engineers while we were getting ready to go and join Patton's 3d Army in Europe.

□ 1930

And I wanted Dee to be with me, but that was a little town, and we had thousands and thousands of troops, and the Government did not do anything for you. So I went down to the Baptist church and I talked to the chairman of the board, the head deacon, and I told him, I said, "I am just a Texas boy, and I do not know where to turn." And he found us a room. Some lady let us have a small room in her house. And when our outfit shipped out for Europe, Dee went back and lived with her folks in New Jersey.

You know, basically, when you get back down to the real tough situations in this world, you do not get the answer out of the Government; you get it out of your friends, you get it out of your neighbors, you get it out of your kinfolk, you get it out of good people in every community. It is not the Government that solves very much.

I heard an interesting remark this morning. My colleague, the gentleman from California, Mr. JERRY LEWIS, said, "Jim, I want to show you something that I just sent out to everybody back in my district."

I said, "What is it?"

And he showed it to me. And it was about a black woman who had absolutely nothing except pride and self-respect. She raised three boys who are all outstanding doctors in Chicago today, they have a big clinic, they have 62 people working in their clinic. She has two grandsons who are now finishing medical school. He said, "Just look what they have done."

Well, I will tell you. That woman is 95 years old. So obviously hard work did not affect her health. But the thing that really impressed me about it is that this woman did it and she did it by herself. And the reason I thought so much about that story, I had a group of people call on me yesterday. They were a real fine group of five women, who came up from Texas to tell me how we needed Government programs to take care of children and we needed this program and we needed that program to take care of children. And I told them about a survey that I saw recently, and I thought about it when he told me about this interesting lady up in Chicago.

They said, "For the needs to take care of children, we ought to have this Government group do that and that."

A few years ago they made a survey up in Harvard. They were trying to prove, as I understand it, that forced school busing would work. But they came up with another interesting conclusion, because busing will not work. But what they did find was this: They found that the greatest way to motivate children, what builds for children's success, what really builds for children's success. It is parents' love and interest, parents' motivation. That is not something that Government gives you; that is something you get from your parents in love and inspiration.

I was thinking, as they were talking about how could people make out, in fact, they were talking about college. I went to SMU. It is a school down in Texas. And when I was down there, one of the finest fellows—he is my very close friend today, one of the closest friends I ever had, old John—his dad said, "Son, I cannot give you much, but I am going to give you a name." So he named him John D., after John D. Rockefeller. Well, he was as poor as Jobe's turkey. He grew up over there in a little town named Mineola. He lived on a little old farm out from there. But he was a pretty good football player, and he came to SMU on a scholarship. Well, in those days if you did not make the team, they dropped you. And he did not make the freshmen team, so they dropped him. But that did not end it for John. John went down and got him a job down there at Ford, and he started working, and he also got a job in the dormitory working, by helping the athletes who were not too smart on their grades. Between helping with tutoring and helping out there, he made it. And then after he had been at Ford a while he got him a better job with a company called Core Laboratory. It was a little company analyzing oil wells. He went to work for them. Well, it is interesting about John. He worked his way completely through college. His daddy was dead when he was there, when he was trying to go through college, and he helped his mother out. He paid all of his expenses through college, he paid everything there was for an education. But working through college turned out to be a blessing, because after he got through doing 4 years in the submarines of the U.S. Navy, he came back and went to work for that same company, and today John is president of the Core Laboratories, which is the biggest oil research company in the world. They know more about geology and they do more petroleum geology work than any oil company in the world. John Wisenbaker is president of the company. And nobody gave

John any advantage. He just made it. He made it through hard work.

In fact, when we were in college back in SMU—we talk about all of these things we are going to do for kids today in college. The best thing we could do would be to give them an opportunity to work their way through college. When I was in college, half of my classmates there were making their way through college, and they were being paid 50 cents an hour if they were lucky.

There is nothing wrong with work. The Government cannot do much for you. It cannot do everything. There is not as much that the Government can do that the private citizen cannot do better.

I was interested in one other thing. It is about sewers. I thought about all the time I was in the Army. If you were ever in the service, you know that you did not have much inside plumbing. I remember that the healthiest I ever was in my life was the time I served under the 3d Army, General Patton. I slept outdoors, I slept in the rain, I slept in the mud, the snow, the ice, and I never had any of this modern sewer system which they keep worrying about. But what I thought about, as they talked about it, was a fellow named Tiger Teague. And the gentleman from Wisconsin sitting over there would remember Tiger Teague because there never was a finer man that ever served in Congress. He served on your side of the aisle over here. He got the name "Tiger" becaused he was such a Tiger when he was with that infantry outfit in Europe, and you remember he used to limp around here with all of that shrapnel that he still carried in his leg. But one thing that Tiger told me that I remember so well, one day when were talking about sewers he said, "Jim, I never knew we had inside plumbing until I went to Texas A. & M.," and he said, "I did not feel deprived in any way." He said, "I could hold my head as high as any man who was a freshman down there, because what my family gave me, they did not give me inside plumbing, but they gave me pride and self-respect."

I thought about that as we today talk about everything the Govenment can give people, everything we can do for everybody in this congressional spending. When we go home to our districts, when we finish this continuing resolution, I hope we talk to the folks back home and talk to them about Government spending, because 9 out of 10 of them will tell you—they will tell you that we have just got to cut back on all of this Government spending.

The other day someone summed it up pretty well. The question was asked, he said, "How can big government solve the problem?"

And the answer was, "Big government cannot solve the problem. Big government is the problem."

I hope everyone realizes that. Big government is the problem.

Mr. Speaker, when we go back to our districts in America, let us talk to folks about congressional excessive Government spending.

Today the savings and loan companies are in a financial crunch because of high interest rates. As we all know, they loaned out mortgage money on 30-year loan at 7 percent to build homes. Now they are in a crisis as their saving depositors are looking for 14-percent interest which is the high rate due to inflation. You cannot lend at 7 percent and then have to pay 14 percent to get your current funds.

The home building industry is in a depression because of high interest rates. How can they build if home prospects cannot get mortgage funds. Automobile sales are lagging because of high interest rates. The average citizen cannot buy a car on monthly payments because interest is too high.

A small businessman who is trying to make a 10-percent profit cannot operate his business because he is paying a 20-percent interest rate. This 20 percent interest is more expense than he can afford on 10-percent margin and still operate a break-even business.

The cause of high interest rates is the fact that the Federal Government is spending so much of the money which should be available in the private sector. In 1970 Congress was budgeting $196 billion. Right now, eleven years later, Congress is trying to finalize a budget of $724 billion.

What is it that Congress is doing for you today that they were not doing 11 years ago, besides spending nearly four times as much money? Big spending shows itself with high interest rates, just as a high temperature reflects sickness from pneumonia.

How does the average citizen feel the effect of this excess Government spending? The Housing industry feels the impact of Government spending as it has seriously limited Americans' ability to buy homes. The Government spending-caused inflation, combined with high interest rates which are also due to the fact that the Government is spending too much money, has caused this. The average cost of a home has gone from $44,600 in 1976 to $69,800 today. In this short period, the monthly mortgage payment skyrocketed from $316 a month to where it is today, $924 a month. And that is a mortgage payment they are going to pay for 30 years.

As you buy a new car today, you can really feel the pinch of inflated costs and tight money. In 1976 the average cost of a new car was $5,414 with most people paying for it with a 3-year loan. Now cars are much smaller. You would expect a lower price, but the average cost has gone up to $8,850. And it takes a 4-year loan with much high payments in order to pay for it.

The hardest hit by Government overspending are our senior citizens who are committed to live on fixed incomes. When they go to the grocery store, they can see the purchasing power of their dollar shrinking. What you could buy for $1 in 1967, it now costs $2.79 to buy those same groceries. And that is all due to inflation. It is not just the senior citizens who are hurting.

Look at the farmers. They are hurting today. These high interest rates are hitting them hard and in terms of real dollars they have less purchasing power than they had before.

Let us take the average intermediate income of a family of four—both man and wife probably working and today that is $23,000. That same family of four in 1970 had an average income of $10,664; $23,000 sounds like a lot more money, but actually, they could buy more with that $10,000 in 1970 than they can buy with $23,000 today. Actually, they were able to buy 5 percent more goods. So you are making twice as much, but it is buying less. And that is across the board for housing, transportation, groceries and medical care.

In 1970 they were making $10,600. Now they have gone from where they made about $10,000 up to where they are making $23,000, and you would say, Oh, glory, boy are they lucky, $10,000.

Did you know that you could buy more on that $10,000 in 1970 than you can buy on that $23,000 today?

Did you know that? In 1970 you could buy more for $10,000 of good American money than you can on $23,000 of American money today. You actually can buy 5 percent more.

In other words, if you are making $23,000 today and you made $10,000 you are 5 percent worse off. So do not kid yourselves. You are making more and you are buying less. That is the truth. You are making more. Why is it? Remember this, for 27 years you have had this country up here run by the Democrats. For 27 years they have been doing it and now President Reagan, the greatest man of courage that Washington has ever seen, and over in the other body, the U.S. Senate, which is now controlled by the Republicans, they are saying, cut that budget, cut that spending. They are so right.

I will tell you one thing that interested me the other day. I am a trustee of SMU now and they had Professor Slocum who quoted a survey by a man named Yankevitch. Mr. Yankevitch made a study about whether we are getting fulfillment out of our jobs today. Do you really get job satisfaction? He said they made that survey in

1960 and 50 percent of the people said, "We get job satisfaction. We enjoy what we are doing."

Well, today, people are better trained, people are better educated, we have better facilities, the office is air conditioned, everything is much better equipped. I could hardly wait to see what the job satisfaction was today.

Today, 25 percent of the people get job fulfillment. In other words, only 1 out of 4 people today are getting job fulfillment. Half of what it was before. So whatever it is, we are not doing something right.

Let me tell you something about this spending of the Government, which is a story which describes it better to me than everything I have ever heard. It is a story of the frog. Maybe you have heard the story of the frog. You can take a frog and just gently take that frog and very gently put it in a pan of very luke warm water, just luke warm, warm water, put the frog right there. Then take that pan of water and put it over on the stove and gradually turn up the heat, just do it gradually and that frog will just sit there and sit there and you could boil him alive.

Now I wonder if we have learned a lesson from the frog? I wonder how many of us have learned a lesson from that frog?

We are just sitting there on that pot and they are gradually turning up the heat on us. I am talking about all America and gradually they are burning you alive.

One time, when I was in history my teacher said something that has stuck with me all my life. She said, "James, I want you to remember this. Learn your history because history will repeat itself." I will tell you, she is right. She is right.

Let us not repeat the experience of the Continental Congress. During those days, the Government was faced with pressures for more spending. It is understandable because those were the days of the revolution between 1776 and 1781. During that 5-year period, the Continental Congress printed money to pay for the needed expenditures for carrying on the War for Independence. And they took in revenues from taxation of different types. But there was always so much pressure for spending money and the income to the Treasury kept lagging behind. No one fully realized what was happening but inflation kept growing. As we all know, when you print more paper money, money gradually loses its value. Finally, in 5 years the Continental Congress faced up to the startling realization that the Continental dollar had dropped in value to where it was worth only 1 cent. And that is where we got the old expression, "It isn't worth a Continental dollar." And even today you hear people shorten the statement so it will not reflect on the dollar and they say "It isn't worth a Continental." They are talking about a Congress that lacked the courage and let the dollar drop all the way to one cent.

□ 1940

If Congress continues this policy of free spending, not balancing the budget, issuing paper money, this policy will first bankrupt every savings and loan company. You will also ruin the tremendous automobile industry in our Nation, you will devastate the home building industry. With cash loan value established on insurance policies of 6 percent and the current interest rate being 15 percent, we will see people cashing out the insurance policies of America. And with the dollar declining in value you will see more and more pressure on our Nation's banks.

Five years ago Congress operated this country on a $360 billion budget. Right now we are talking about a $724 billion budget. That means we have doubled the spending in just 5 years.

Let's look at where the money should be going in this country. It needs to be going into jobs. We know that social security is on a cash flow basis which means the reserves have been exhausted. Social security payments depend upon people working and through their job salaries providing the income. Remember, that 7 percent of a workers salary is paid toward social security and his employer matches this and pays 7 percent of his salary toward social security. This means that when a person is working on a job that 14 percent of his salary is going into social security funding. We cannot let people lose jobs because America needs that 14 percent to be going into the social security fund to pay for social security.

But how can businessmen meet foreign competition if they do not have modern machinery and equipment. Because of congressional overspending, business is not able to keep up.

But you cannot keep jobs if you do not keep America prosperous, if you do not keep American business strong. What counts is to keep jobs, jobs, jobs.

One time this GM executive said, "What's good for General Motors is good for the country." Well, we could say that about every good company in the U.S.A. What is good to keep people in jobs is good for this United States.

I will tell you, we have got to make sure that people have jobs and that means keep business strong. I mentioned General Motors. I want to say something about Chrysler here. We reviewed the Chrysler situation a few years ago and we were all very concerned because Chrysler was in financial trouble. Now they all are, General Motors, what did they lose, some $400 million the third quarter; Ford had a working capital, I think of $300 million and a year ago they had over $1 billion.

Recently, when we reviewed the Chrysler automobile situation, we compared them to Japanese car manufacturers. Due to the taxes and cost pressure on Chrysler, they did not have the money in industry to pay for new machinery that they needed. Yet, every year the Japanese car makers were putting 60 percent more than Chrysler, in money spent for new machinery, new plants and new equipment.

We want our American automobilemakers to be strong, because their strength is essential to the strength of America. When we studied Chrysler, I wondered why does Chyrsler have a problem? Why is it that the Japanese competition is so strong? I will tell you, do not underestimate that Japanese competition. I was talking to a friend of mine that is a Chevrolet dealer down in Georgia. He told me, he said, "Jim, in our town the two Chevrolet dealers and the Ford dealer, our three combined sales, are less than the Toyota dealer." Boy, that shook me up. Did you hear that? Two Chevrolet dealers and one Ford dealer in this town could not sell as many cars as the one Toyota dealer.

When the Japanese automakers put in 60 percent more in 1 year it gave them an advantage. But when they put it in the next year and the next year and for 10 straight years, they put in 60 percent more each year, they have more modern production equipment than our automakers have. When the Government takes so much of the money, it makes it impossible for business to have captial to keep up with foreign competition.

Do you have any idea of how congressional overspending is putting the pressure on by limiting money available for private industry. I just sat down in my office and scratched down these basic figures. Our national debt is over $1 trillion. But this national debt is not being refinanced on 20-year loans. People want their money back quick on Government paper. So the average turnover of the Government debt is 2½ years. So to start with, $400 billion is needed each year to refinance the debt. Then we need to pay the interest on the debt each year, which takes another $125 billion. Then we are running this Government at the fast-spending pace of $724 billion. And remember $100 billion of that budget is an increase in the debt. Again this year Congress has a deficit budget. Add up that $724 billion with the $400 billion that the Treasury needs to refinance the debt and we are up to $1,124 billion. Then we have all of these guarantees that Congress has made which leave us with additional contingency liabilities. In addition, Congress adds many of these off-the-

budget items that are never shown, but just pass on to the national debt. If all the gobbledygook was put together and all the fancy refinance deals boiled down, the Government today is spending about half of the money that is available.

Who pays for the Government? It is the good people out there who are working for a living. We expect them to earn a living, provide for business modernization, support their families, and take care of the financial burdens of this country. Every working person in this country is carrying an overload on his aching back. And that overload is because we have too much Government and too much congressional spending.

Then what happens is we run this country at $724 billion. I hope everybody understands that this so-called continuing resolution we have got and so-called budget cuts, they are not budget cuts. What we are trying to do is to cut back on the amount of the increase. Last year the Democrats over here, it was an election year in 1980 and it was their budget, because we said it was not right, but they said $614 billion is the budget. They said that we are going to have a balanced budget in 1980. They said that we are going to take in $616 billion. We are going to spend $614 billion. That is a balanced budget.

Shucks, you read the national debt and you will see the national debt went up $100 billion last year.

I wrote a letter yesterday to a fellow that 20 years ago arrived in my hometown from Spain. He is now president of Frymire Engineering Co. He started in as a hand out in the field. Now he is president of the company, a big company, 900 employees. What he says about the opportunities in this country is that hard work pays off in America.

I just hope we have the same opportunities for the young men and women today who want to know where they are going to be 20 years from now. He did not do it with the help of the Government. He did not do it with the help of anybody but himself. People have got to help themselves.

What we want to do, we have got to take care of social security. We have got to take care of the people who are infirm and sick. That is our responsibility. We need to take care of the people who temporarily have lost their jobs. You know those situations we need to help.

I would like to summarize the way I began. When the fellow asked how could big government solve the problem, the answer was big government cannot solve the problem—big government is the problem. Let us take a step forward and let Congress cut the budget and cut the budget and give America the momentum to move forward again.

□ 2000

PRESIDENT REAGAN'S ARMS CONTROL INITIATIVES—FIRST STEP ON A DIFFICULT ROAD

The SPEAKER pro tempore (Mr. BENNETT). Under a previous order of the House, the gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 15 minutes.

Mr. ZABLOCKI. Mr. Speaker, the arms control initiatives announced by President Reagan in his speech before the National Press Club on November 18 deserve commendation and support. Most importantly, they reflect the President's personal commitment to arms reductions—a commitment long shared by all Americans. Yesterday the Congress overwhelmingly endorsed the President's initiative.

As one who has been calling for such a personal commitment by the President, I wholeheartedly welcome the President's initiatives.

Taking the negotiating high ground after nearly a year of uncertainty about U.S. seriousness regarding arms control is an essential step. The new proposals should help to dispel the growing perception among our European allies that the United States had only a passing interest in arms control. The American proposals should also have the honest effect of putting the onus of arms control intentions on the Soviet Union.

These encouraging developments warrant a guarded sense of optimism about the future of arms control for the first time since the signing of the SALT II Treaty in June 1979. But in welcoming such optimism, I must also temper those feelings with a sense of realism about the road ahead.

The theater nuclear force (TNF) negotiations that will begin in Geneva on November 30 will be extraordinarily complex and difficult. The two superpowers approach that meeting with significant disagreements. They differ not only about what should be negotiated but about what should be reduced.

The United States and our NATO allies will argue that only the planned TNF improvements on the Western side; that is, 572 ground launched cruise missiles and Pershing II missiles, and Soviet SS-4, -5, and -20 missiles should be the basis for negotiation.

The Soviet Union will argue that all American systems capable of striking Soviet territory from European bases, such as U.S. FB-111 bombers stationed in the United Kingdom or from aircraft carriers in the European region, as well as U.S. submarines deployed in European waters, should be included in the negotiations.

Compounding this problem are the differing perceptions on each side about the balance of theater nuclear forces in Europe. President Reagan eloquently presented the Western case. He made it clear that the continuing deployment of Soviet SS-20's has shifted that balance increasingly in favor of the Soviet Union. By contrast, President Brezhnev, looking at both sides' stockpiles of nuclear warheads in Europe, not just theater nuclear missiles, sees an approximate parity between the two sides.

What all this points up is that commendable though the President's proposal is, it will face certain Soviet rejection and counterproposals from Moscow that the United States will likely find unacceptable. Such a likely course of events indicates a protracted, difficult negotiation which will require the continued cooperation and support of our European allies. Considering the perception, confusion, and frustration on the part of our friends in Europe as a result of the lack of a clear U.S. policy, the necessary cooperation on the part of our allies may be hard and long in coming.

Regrettably, another failure on the part of the United States is to address an issue with which this administration has still not come to grips. That issue is the relationship between the TNF negotiations and strategic arms negotiations. Until that issue is accounted for in a totally integrated and comprehensive U.S. arms control and reduction policy, I fear that the TNF arms control discussions will be a nonstarter.

TNF arms control cannot be considered in a vacuum. These weapons in my opinion must be intrinsically linked, politically and militarily, to the strategic forces of the two superpowers. Soviet leaders insist that all weapons aimed at their territory as strategic regardless of where they are deployed. In addition, NATO strategy insists on a coupling of strategic and theater nuclear weapons to better insure deterrence against Soviet attack.

In short, it makes no sense to talk about TNF arms control without considering its ultimate dependence on progress in arms control efforts at the strategic level. Ironically, the Reagan administration itself has acknowledged this in agreeing to the TNF discussions, and has assured the NATO allies that such discussions will take place within the SALT framework.

In view of this fundamental linkage, what is a shortcoming in the President's speech is that it lacks any clear-cut indication of the future direction of our strategic arms control efforts and how the TNF discussions will be integrated with those efforts.

Such uncertainty was not necessary. Had the SALT II Treaty been ratified—which the NATO allies firmly supported—the TNF discussions would have been a part of SALT III. The linkage between TNF arms control

and strategic arms control would have been evident, and talks on both issues would have proceeded more smoothly.

In fact, this is what the NATO allies intended all along when they agreed to modernize theater nuclear weapons in December 1979. Sadly, the Reagan administration has rejected the SALT II Treaty, even though it has put nothing in its place and has stated it intends to abide by the treaty's terms.

And so, short of the President's statement that he will seek strategic arms reductions and will give the SALT process a new name, we have no indication that an overarching policy framework is being developed to integrate strategic and theater arms control efforts. Amid the optimism of the day, it must be said that far more questions than answers remain about U.S. arms control policy.

How will the administration link its TNF negotiating position to strategic arms discussions? When will the renegotiations for SALT/START II begin? Will the administration seek a total renegotiation of SALT II or will it merely attempt to fine tune a few of its elements? Will the United States continue to abide by SALT II even as it is being renegotiated, with the likely prospect being that the treaty will expire in 1985 before renegotiations are complete? How will this impact on key defense deployment decisions affecte SALT II? These are questions which require answers.

Mr. Speaker, as chairman of the Committee on Foreign Affairs, I pledge my willingness to assist the Reagan administration in moving toward the development of concrete answers to these key questions. The Committee on Foreign Affairs intends to exercise vigorous oversight on these important issues, in order to help bring about a coherent, comprehensive arms control policy that enhances U.S. national security and world peace.

When the key questions about strategic arms control policy are answered, the Reagan administration will have created the conditions for the realization of effective, meaningful, and verifiable arms control agreements that enhance U.S. national security. To date, these questions remain unanswered, and threaten to render meaningless the important momentum created by President Reagan's arms control initiatives. Nevertheless, we hope and pray the President's efforts in strategic arms reduction will succeed and we all support him in these difficult negotiations.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to: Mr. AUCOIN (at the request of Mr. WRIGHT), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

The following Member (at his own request) to revise and extend his remarks:

Mr. ZABLOCKI, for 15 minutes, today.

(The following Members (at the request of Mr. TAUKE) to revise and extend their remarks and include extraneous material:)

Mr. REGULA, for 10 minutes, today.

Mr. COLLINS of Texas, for 1 hour, today.

Mr. GILMAN, for 5 minutes, today.

(The following Members (at the request of Mr. DYSON) to revise and extend their remarks and include extraneous material:)

Mr. ALEXANDER, for 60 minutes, today.

Mr. OBEY, for 60 minutes, today.

Ms. FERRARO, for 30 minutes, today.

Mr. GLICKMAN, for 10 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. LAFALCE, for 10 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

Mr. WYDEN, for 5 minutes, today.

Mr. WEISS, for 5 minutes, today.

Mr. ST GERMAIN, for 5 minutes, today.

Mr. WEAVER. for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. OBEY.

Mr. HEFNER, in support of H.R. 3046 in Committee of the Whole today.

Mr. CORRADA, on the Andrews amendment to H.R. 3046, to make the senior opportunity service program an eligible activity under the Older Americans Act.

Mr. OBEY, to revise and extend his remarks and include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,680.

Mr. OBEY, to revise and extend his remarks in the RECORD today on chemicals and cancer.

(The following Members (at the request of Mr. TAUKE) and to include extraneous matter:)

Mr. PARRIS.

Mr. MCCLORY in two instances.

Mr. CONABLE.

Mr. JEFFORDS.

Mrs. HECKLER in two instances.

Mr. LEWIS in two instances.

Mr. ROUSSELOT in two instances.

Mr. COLLINS of Texas.

Mr. ATKINSON in five instances.

Mr. RAILSBACK.

Mr. HYDE.

Mr. WOLF.

Mr. BENEDICT.

Mr. GILMAN in two instances.

Mr. DAVIS in two instances.

Mr. COURTER.

Mr. EVANS of Delaware.

Mr. ROBERTS of South Dakota.

Mr. MARRIOTT.

Mr. GINGRICH.

Mr. DREIER in two instances.

Mr. KEMP in two instances.

Mr. JOHNSTON.

Mr. DOUGHERTY.

(The following Members (at the request of Mr. DYSON) and to include extraneous matter:)

Mr. LELAND.

Mr. MOFFETT in two instances.

Mrs. CHISHOLM.

Mr. RATCHFORD.

Mr. HAMILTON.

Mr. YATRON.

Ms. MIKULSKI.

Mr. HUBBARD.

Mr. LAFALCE in two instances.

Mr. SCHUMER in two instances.

Mr. SKELTON in two instances.

Mr. FITHIAN.

Mr. SHAMANSKY.

Mr. WYDEN.

Mr. MCDONALD in five instances.

Mr. BARNARD.

Mr. PEPPER.

Mr. BONKER.

Mr. OBERSTAR in three instances.

Mr. ST GERMAIN.

Mr. WEAVER.

ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 3413. An act to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes; and

H.R. 4522. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes.

RECESS

The SPEAKER pro tempore (Mr. BENNETT). Pursuant to the order of the House of November 19, 1981, the Chair declares the House in recess until 10 a.m. tomorrow, Saturday, November 21, 1981.

Accordingly (at 8 o'clock and 5 minutes p.m.), the House stood in recess until 10 a.m., Saturday, November 21, 1981.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2560. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance of the office equipment maintenance and repair function at the Marine Corps Base, Camp Lejeune, N.C., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2561. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's intention to enter into a contract without a cost-comparison analysis for certain civilian medical services at the Naval Submarine Medical Center, Groton, Conn., pursuant to section 502 of Public Law 96-342; to the Committee on Armed Services.

2562. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's intention to enter into a contract without a cost-comparison analysis for aircraft maintenance services at the Naval Air Test Center, Patuxent River, Md., pursuant to section 502 of Public Law 96-342; to the Committee on Armed Services.

2563. A letter from the Director, Defense Security Assistance Agency, transmitting a report that the Defense Department has provided certain defense articles, services, and training to El Salvador under the authority of Presidential Determinations 81-2 and 81-4, pursuant to section 506(b)(2) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

2564. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of proposed changes in an existing records system for the Army, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2565. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of a proposed new records system for the Navy, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2566. A letter from the Assistant Attorney General for Legislative Affairs, transmitting a draft of proposed legislation to protect the confidentiality of information filed by individual taxpayers with the Internal Revenue Service, to promote the effective enforcement of Federal and State criminal laws, to facilitate judicial resolution of challenges to Internal Revenue Service summonses, and for other purposes; to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4001. A bill to authorize the exchange of certain land held in trust by the United States for the Navajo Tribe, and for other purposes; with amendments (Rept. No. 97-346). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4364. A bill to declare that the United States holds in trust for the Pascua Yaqui Tribe of Arizona certain land in Pima County, Ariz.; with an amendment (Rept. No. 97-347). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4894. A bill to authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, and for other purposes; with amendments (Rept. No. 97-348). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. House Joint Resolution 341. Joint resolution providing for a waiver of law pursuant to the Alaska Natural Gas Transportation Act (Rept. No. 97-350, Pt. I). And ordered to be printed.

ADVERSE REPORTS

Under clause 2 of rule XIII,

Ms. FERRARO: Committee on Post Office and Civil Service. H.R. 4448. A bill to amend title 10, United States Code, to increase the number of Assistant Secretaries in the Department of Defense, and for other purposes (Rept. No. 97-300, Pt. III). Referred to the Committee of the Whole House on the State of the Union.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. MITCHELL of Maryland: Committee on Small Business. H.R. 4326. A bill to amend the Small Business Act to strengthen the role of the small, innovative firms in federally funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy; with an amendment; referred to the Committee on Armed Services, to the Committee on Energy and Commerce, and to the Committee on Science and Technology for a period ending not later than March 1, 1982, for consideration of such portions of the bill and amendment as fall within the jurisdictions of those committees under clause 1(c), 1(h) and 1(r), rule X respectively (Rept. No. 97-349, Pt. I). And ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. PATMAN:

H.R. 5063. A bill to provide that certain amounts of the revenues received by the United States under leases on the Outer Continental Shelf shall be used to acquire petroleum products for the strategic petroleum reserve and strategic and critical materials for the national defense stockpile; jointly, to the Committees on Interior and Insular Affairs, Energy and Commerce, Armed Services, and Rules.

By Mr. ALBOSTA:

H.R. 5064. A bill to amend title 49, United States Code, to insure that foreign countries grant entry to U.S. motor common carriers of property on substantially the same standards as foreign countries grant entry to their own motor common carriers of property; to the Committee on Public Works and Transportation.

By Mr. JOHN L. BURTON (for himself, Mr. FAZIO, Mr. STARK, Mr. PEPPER, Mr. WYDEN, Mr. BIAGGI, Mr. ROYBAL, Mr. VENTO, Mr. DOWNEY, Ms. FERRARO, Mr. EVANS of Indiana, Mr. SYNAR, and Ms. OAKAR):

H.R. 5065. A bill to protect retired and disabled persons by preserving the integrity of the Consumer Price Index; to the Committee on Education and Labor.

By Mr. CONYERS:

H.R. 5066. A bill to amend the Federal Reserve Act to provide for the increased responsiveness and accountability of the Federal Reserve System to Congress and citizens, to amend the Congressional Budget Act of 1974 to provide for the establishment of annual discount rate, interest rate, and monetary growth rate targets, and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs and Rules.

By Mr. CONABLE (for himself and Mr. WRIGHT:)

H.R. 5067. A bill to amend sections 403(b)(2) and 403(b)(3) of the Internal Revenue Code of 1954 with respect to computation of the exclusion allowance for ministers and lay employees of a church; to add a new section 403(b)(9) to clarify that a section 403(b) annuity contract includes an annuity contract of a church, including a church pension board; to conform section 403(c) with recent amendments to section 402(a)(1); to amend section 415(c)(4) to extend the special elections for section 403(b) annuity contracts to employees of churches or conventions or associations of churches and their agencies; to add a new section 415(c)(8) to permit a de minimis contribution amount in lieu of such elections; and to make a clarifying amendment to section 415(c) by adding a new paragraph (9) and conforming amendments to sections 415(d)(1), 415(d)(2), and 403(b)(2)(B); to the Committee on Ways and Means.

By Mr. DORNAN:

H.R. 5068. A bill to amend the Internal Revenue Code of 1954 to allow individuals a refundable credit against income tax for security devices installed on their residences; to the Committee on Ways and Means.

By Mr. DREIER (for himself, Mr. CONTE, Mr. DOWNEY, Mr. FOGLIETTA, Mr. KEMP, and Mr. MARKEY):

H.R. 5069. A bill to impose an embargo on trade between Libya and the United States; jointly, to the Committees on Foreign Affairs and Ways and Means.

By Mr. FASCELL:

H.R. 5070. A bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing children; to the Committee on the Judiciary.

By Mr. FOLEY:

H.R. 5071. A bill to provide coverage under the Federal old-age, survivors, and disability insurance system for all Members of Congress and other officers and employees in the legislative branch of the Govern-

ment; to the Committee on Ways and Means.

By Mrs. HOLT:

H.R. 5072. A bill to change from level IV to level III of the Executive Schedule the position of Special Representative for Arms Control and Disarmament Negotiations of the Arms Control and Disarmament Agency; to the Committee on Post Office and Civil Service.

By Mr. HOWARD (for himself and Mr. CLAUSEN) (by request):

H.R. 5073. A bill to require recovery of certain expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction of deep draft channels and ocean and Great Lakes ports of the United States and to authorize such construction in specified circumstances; to the Committee on Public Works and Transportation.

By Mr. JONES of North Carolina (for himself, Mr. SNYDER, Mr. BREAUX, and Mr. FORSYTHE) (by request):

H.R. 5074. A bill to give effect to the Protocol Amending the Convention for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea, signed at Washington, March 29, 1979; to the Committee on Merchant Marine and Fisheries.

By Mr. LAFALCE:

H.R. 5075. A bill to amend the Small Business Act to require the payment of interest by the Federal Government on any amount due for more than 30 days to any small business concern under the terms of a contract entered into by the Federal Government and such small business concern, and to require the Federal Government to take early payment discounts only when payment is timely made, and for other purposes; to the Committee on Small Business.

By Mr. LIVINGSTON (for himself, Mr. BEVILL, Mr. CORRADA, Mr. DAVIS, Mr. FIELDS, Mr. FOGLIETTA, Mr. FORSYTHE, Mr. SAM B. HALL, JR., Mr. HILER, Mr. HUGHES, Mr. LAGOMARSINO, Mrs. MARTIN of Illinois, Mr. NAPIER, Mr. PEPPER, Mr. PORTER, Mr. RINALDO, Mr. ROE, Mr. SHUMWAY, Mr. SMITH of Pennsylvania, Mr. WALKER, and Mr. WINN):

H.R. 5076. A bill to amend title II of the Social Security Act to insure that the Secretary of Health and Human Services is provided adequate information concerning the death of individuals necessary for determining benefits under such title; to the Committee on Ways and Means.

By Mr. LOWERY of California:

H.R. 5077. A bill to amend chapter 44 of title 18 of the United States Code to extend and strengthen the mandatory penalty feature of the prohibition against the use of firearms in Federal felonies, and for other purposes; to the Committee on the Judiciary.

By Mr. MARRIOTT (for himself, Mr. NOWAK, Mr. MCDADE, Mr. CONTE, Mr. WILLIAMS of Ohio, Mrs. SNOWE, Mr. EVANS of Georgia, Mr. ROEMER, Mr. LOTT, Mr. GINGRICH, Mr. BADHAM, Mr. DE LA GARZA, Mr. WILSON, Mr. DANIEL B. CRANE, Mr. STATON of West Virginia, Mr. DAUB, Mr. WEBER of Ohio, Mr. DREIER, Mr. HANSEN of Utah, Mr. BAFALIS, Mr. NEAL, Mr. FORSYTHE, Mr. ROTH, Mr. JEFFRIES, and Mr. MCEWEN):

H.R. 5078. a bill to amend the Small Business Investment Act of 1958, to provide incentives for investments in small business through small business participating loans, and for other purposes; jointly, to the Committees on Small Business and Ways and Means.

By Mr. MOTTL:

H.R. 5079. A bill to amend title 28, United States Code, to provide for the establishment of an arbitration system for the settlement of grievances resulting from violent conduct which occurs during certain professional sports events; jointly, to the Committees on Education and Labor and the Judiciary.

By Mr. RATCHFORD:

H.R. 5080. A bill to extend duty-free treatment to button blanks of casein; to the Committee on Ways and Means.

By Mr. SANTINI:

H.R. 5081. A bill to declare that the United States holds certain lands in trust for the Washoe Tribe of Nevada and California and to transfer certain other lands to the administration of the U.S. Forest Service; to the Committee on Interior and Insular Affairs.

By Mr. SMITH of New Jersey:

H.R. 5082. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income dividends and interest received by individuals who have attained age 62; to the Committee on Ways and Means.

By Mr. WON PAT:

H.R. 5083. A bill to authorize the appropriation of funds as an annual Federal payment to Guam; to the Committee on Interior and Insular Affairs.

By Mr. WYDEN:

H.R. 5084. A bill to amend title XVIII of the Social Security Act to provide for alternative methods for payment of hospitals under the medicare program; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. PARRIS (for himself, Mr. WAMPLER, Mr. ROBINSON, Mr. TRIBLE, Mr. BLILEY, Mr. BUTLER, Mr. ROBERT W. DANIEL, JR., Mr. DAN DANIEL, Mr. WHITEHURST, and Mr. WOLF):

H.J. Res. 364. Joint resolution designating February 22, 1982, the 250th anniversary of the birth of George Washington, a "Day of National Celebration"; to the Committee on Post Office and Civil Service.

By Mr. REUSS (for himself, Mr. ST GERMAIN, Mr. FAUNTROY, and Mr. D'AMOURS):

H.J. Res. 365. Joint resolution resolving that current economic policies must be reconsidered to bring and keep interest rates down, that the President and the administration and the Board of Governors of the Federal Reserve System shall discourage speculative lending, the Board of Governors of the Federal Reserve System shall reconsider its tentative decisions to reduce the targets for growth in money supply for 1982, and that the President shall comply with section 10 of the Federal Reserve Act; to the Committee on Banking, Finance and Urban Affairs.

By Mr. WATKINS (for himself, Mr. EDWARDS of Oklahoma, Mr. ENGLISH, Mr. JONES of Oklahoma, Mr. MCCURDY, and Mr. SYNAR):

H. Res. 283. Resolution to congratulate the State of Oklahoma on the celebration of its diamond jubilee; to the Committee on Post Office and Civil Service.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 4930: Mr. PETRI.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

290. By the SPEAKER: Petition of the Common Council, Buffalo, N.Y., relative to the Head Start program; to the Committee on Education and Labor.

291. Also, petition of the Grande Voiture du California, Societe des Quarante Hommes et Huit Chevaux, Stockton, Calif., relative to veterans' benefits; to the Committee on Veterans' Affairs.

EXTENSIONS OF REMARKS

AMEND INTERNAL REVENUE CODE

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. CONABLE. Mr. Speaker, with my distinguished colleague, JAMES C. WRIGHT, of Texas, I today reintroduce legislation to amend several provisions of the Internal Revenue Code that unfairly deny reasonable retirement benefits to the majority of clergymen and lay employees of our Nation's churches. Victims of an unfortunate oversight in our tax laws, these church servants are inexplicably ignored by Internal Revenue Code provisions that permit reasonable contributions to the retirement annuities of certain other categories of employees who historically are also not well compensated. The bill corrects this omission by granting ministers and lay employees the same right of contribution to their retirement annuities now enjoyed by these other classes of poorly compensate pensions. It represents a large step toward assuring our ministers and lay employess of adequate retirement allowances. We invite our colleagues to join with us in sponsoring this legislation.

Our ministers and lay employees depend heavily on annuities described in section 403(b) of the Code for their retirement benefits. Our churches believe such annuity programs are perfect retirement systems. Most denominations have used them for decades—some for over a century. They are completely portable and let church workers move freely within their denominations without losing retirement benefits.

Some of the section 403(b) annuity arrangements of the churches are defined contribution programs, while others are defined programs. Section 403(b) imposes no requirement that the arrangement be of either kind. Most churches do not purchase retirement annuities from insurance companies. They administer and fund their own annuity programs. Some denominations fund their retirement annuities internally. But most have formed organizations called pension boards to administer and fund their annuity programs. These pension boards are usually separately incorporated to protect pension assets. Whether the provider of pension benefits is separately incorporated or not, it fulfills the functions of the church with which it is associated in providing retirement benefits for its ministers and lay employees and is, thus, entitled to classification as an integral and inseparable part of the church.

Since 1958, the "exclusion allowance" in section 403(b)(2) has limited the amount that an employer can contribute to an annuity for an employee under this section without income tax consequences. That amount is the excess of (1) 20 percent of the employee's includible compensation for the year times the employee's years of service with his or her employer over (2) the aggregate amounts contributed in prior years that have been excluded from income. Before the exclusion allowance, there were no limitations on contributions to section 403(b) annuities. The exclusion allowance was designed to prevent then-existing abuses by certain part-time employees. Senate Report No. 1983, 85th Congress, 2d session 36 (1958). The exclusion allowance was also designed to permit larger-than-usual retirement annuity contributions late in the employee's career to compensate for the years when contributions were low or not made at all. These are called "catchup" contributions. The capacity to make catchup contributions is extremely important to persons who are poorly compensated.

In 1974, we added a further, and perhaps unnecessary, limitation on contributions to section 403(b) annuities by enacting section 415. We arbitrarily classified section 403(b) annuities as defined contribution plans, whether or not they fit that description, and required that contributions be no greater than the limits under section 415(c)(1). This further limitation on employer contributions to section 403(b) annuities is the lesser of $25,000 (adjusted by the increases in the cost of living) or 25 percent of the participant's compensation. When we imposed those limitations, we realized that the 25-percent-of-compensation limitation would seriously hinder the ability of poorly compensated employees to make catchup contributions. So we devised in section 415(c)(4) certain elections a participant could make to override the 25-percent ceiling, except in the instance of the "(C)" election in section 415(c)(4), which substitutes the $25,000-25-percent limitation for the exclusion allowance. The elections permit relatively high contributions late in the career of an employee who typically has a pattern of low contributions in the early stages of his career. Joint Conference Report No. 93-1280, 93d Congress, 2d session 345 (1974). We made these elections available to employees of educational organizations, hospitals, and home health service agencies but completely ignored churches. We failed to realize that churches also use section 403(b) annuities extensively. We believe church employees need the elections as much as those classes of employees who now use them. It would be unfair to lock out the very kinds of people the law was designed to protect.

Few people are more poorly compensated than ministers and lay employees. A minister begins his career at a salary of only $5,000 to $10,000. Rarely will his salary exceed $15,000, or $20,000—and then only at the end of his career. Lay employees generally earn even less. Missionaries also receive low salaries.

A typical pension of a minister is only $2,000 to $3,000 a year. Lay employees retire on less. These inadequate pensions will continue if we do not amend the limitations we enacted in 1974.

Sections 403(b) and 415 create many problems for church employees. The compensation of many of them, particularly foreign missionaries, is so low that even the exclusion allowance makes worthwhile contributions impossible. They spend their lives in the mission field and expect to retire in the United States. But the combination of the exclusion allowance based on compensation and the high cost of living here makes retirement very difficult for these persons.

Second, because ministers and lay employees are so poorly compensated, catchup contributions are vital if they are to be assured adequate retirement benefits. But the 25-percent limitation renders adequate catchup contributions impossible. During the first years of a minister's career, contributions may be a function of salary and, hence be very small. The minister may be employed by a new or struggling church or church agency that cannot afford any plan contributions. Under section 403(b), the minister may take a reduction in salary to permit his employer to purchase annuity benefits. But salary reduction is usually impractical because for many years he will need every penny he earns to feed and clothe his family, and educate his children. When a minister has reached age 50 or so, his compensation may increase enough for him to purchase additional annuity benefits. Only then may his personal and family expenses have declined enough for him to use part of his salary to supplement his retirement annuity. A minister's church

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

79-059 O-85-5 (Pt. 22)

may also recognize that he is about to retire with a poor retirement income and, with help from the congregation, may contribute more funds to raise his annuity to an acceptable level. But because the 25-percent limitation of section 415(c)(1) is based on an extremely low salary, it frustrates any effort, by salary reduction or otherwise, to enhance the minister's retirement benefits meaningfully. We consider unfair any rule that denies ministers and lay church employees a chance to build reasonable retirement benefits.

A third problem is that the "years-of-service" factor of the exclusion allowance is limited to years of service with the employee's present employer. In computing the exclusion allowance for any year, an employee is not given credit for any years of service with prior employers. In our hierarchical denominations, an employee may be considered employed by the denomination, even though his technical employer may be another church organization. But in our congregational denominations, each organization is a separate employer. Many ministers and lay employees move frequently from one church to another within their denomination or among agencies of the denomination during their careers. In some denominations, a minister or lay employee will change employment every 3 to 5 years. In computing the exclusion allowance, a minister or lay employee of a congregational denomination is, thus, given no credit for past service with other employers in the denomination. For any such employee with frequent job changes, this rule severely reduces the exclusion allowance and the ability to make catchup contributions.

A fourth problem is an emerging policy in the Internal Revenue Service that only licensed insurance companies may provide annuity contracts described in section 403(b). No provision in section 403(b) limits the provider of annuity contracts described in that section to licensed insurance companies. The Service has agreed with this conclusion in published revenue rulings and private letter rulings to church denominations. Yet a growing judgment in the Service contends that churches and church pension boards should not be permitted to provide section 403(b) annuity contracts as they have for many years. We see no reason in logic or equity for denying churches the right to provide section 403(b) annuities for their workers.

A fifth problem is technical. Like many secular plans, some church plans condition the nonforfeitability of rights on a factor such as continued service for a period of time. Nonetheless, contributions are made to the plan on behalf of the participants during the period of forfeitability. In the case of a qualified annuity plan, it is clear in section 415(c)(1) that annual additions to a participant's account occur in the year to which a contribution is attributed, rather than lumped in the year in which the annuity contract becomes nonforfeitable. Similar treatment seems appropriate in the case of a section 403(b) annuity. However, in the case of a section 403(b) annuity, it is not clear whether the same rule would apply. It would be unfortunate if several years of contributions were deemed made in the year the annuity became nonforfeitable because of the likelihood the section 415(c)(1) limitations would be exceeded.

It is also unclear whether participants in such plans would have the right to the elections in section 415(c)(4) and the right to contribute the de minimis amount already discussed. We believe the law should be clarified in favor of giving such participants these rights.

Mr. Speaker, an important feature of our bill is that a minimum includable compensation is deemed for church employees. This is related to the income poverty guideline calculated yearly by the Office of Management and Budget for an average family size. This provision insures that a minimum exclusion allowance will be available for a church employee even though his actual includable compensation does not produce one under the present formula.

Our legislation corrects the inequity of the 25-percent limitation by extending the right to make the elections in section 415(c)(4) to employees of church denominations and their agencies. We believe these persons should have the same right to make the elections as employees of educational organizations, hospitals, and home health service agencies. This legislation also provides a de minimis amount of $10,000, which may be contributed without having to consider either the 25-percent limitation or the section 415(c)(4) elections. This de minimis amount is parallel to the de minimis amount for defined benefit plans in section 415(b)(4). Like other limiting figures in section 415, it is subject to adjustment for increases in the cost of living commencing with the calendar quarter beginning October 1, 1974. The de minimis amount will have a simplifying effect on the Code because the elections are difficult to understand and administer. It is intended that all limitations provided in section 415(c), including the de minimis amount, be subject to the further limitations of section 403(b)(2). Thus, under this bill an employee could not make a "(C)" election under section 415(c)(4)—which substitutes the $25,000—25-percent limitation for the exclusion allowance—and be permitted a contribution of the de minimis amount. Accordingly, the 1958 legislation establishing the exclusion allowance and subsequent legislation is in no way circumvented. The term "agency" of a church is defined in this legislation by reference to that term in section 414(e)(3)(B)(ii) and means an exempt organization either controlled by or associated with a church or a convention or association of churches.

Our legislation also would treat the service of a minister or lay employee with any church or church agency of a religious denomination as service with a single employer for purposes of computing the exclusion allowance. All years of service of a minister or lay employee for a church or a church agency, both of which must be described in section 501(c)(3), would be aggregated in determining the exclusion allowance for taxable years beginning after 1980. It would make no difference whether the years of service being aggregated occurred before or after 1980. Our legislation will enable section 403(b) annuity contributions to be made on behalf of ministers and lay employees in order to provide them with retirement benefits based on years of service with the denomination rather than with the present employer. This rule will make sure the employees of all the denominations of this country are treated equally in connection with the years-of-service factor.

This legislation also expresses in the statute the longstanding position under current law that section 403(b) annuity contracts may be provided by a church or a convention or association of churches, whether the annuity contract is provided internally by the church or by a separately incorporated entity such as a pension board. A pension board means an organization described in section 414(e)(3)(A). That is an organization, the principal purpose or function of which is the administration or funding of a plan or program for the provision of retirement or welfare benefits for the employees of a church if such organization is controlled by or associated with such church.

This legislation provides that annual additions to a forfeitable section 403(b) annuity are, for purposes of the section 415 limitations, treated like annual additions to a nonforfeitable annuity. Annual additions are, thus, deemed made for the year to which they are attributed, rather than lumped in the year the annuity contract becomes nonforfeitable. This rule is in keeping with that regarding contributions to qualified defined contribution plans before a participant's rights are fully nonforfeitable. This legislation also insures participants in a forfeitable section 403(b) annuity of the right to make the special elections and the de minimis contribution amount.

Finally, we make it clear that constructive receipt is not to apply to section 403(b) annuities by conforming section 403(c) to changes in section 402(a)(1) recently made by the Economic Recovery Tax Act of 1981. By removing the words "or made available" in section 403(c), we eliminate the unnecessary constructive receipt problems caused by them.

Mr. Speaker, we hope our colleagues will support this bill.●

THANKSGIVING: A TIME TO CELEBRATE THE SPIRIT OF AMERICA

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. LEWIS. Mr. Speaker and my colleagues, I have never before placed a column from my office in the RECORD but the following is the inspiration of my press director, Sue Turbes, and I believe it may be of special interest to my colleagues as we share Thanksgiving.

A few months ago the President addressed the Nation to give us a progress report on his four-part plan for the economy. At the end of his speech he spoke about the spirit of America and a people that has developed a proud tradition of generosity and courage. He said:

I believe the spirit of volunteerism still lives in America. We see examples of it on every hand—the community charity drive, support of hospitals and all manner of nonprofit institutions, the rallying around when disaster or tragedy strikes.

Thanksgiving is the day we recognize and pay tribute to the early Pilgrims who founded this country in a spirit of independence and pride that have become a part of each American citizen. Through generation after generation Americans have persevered and found much to give thanks for, just as did our Pilgrim forebears.

As we give thanks for the continuing spirit of our people I thought it would be interesting to look at an individual story—one of determination that exemplifies why our country is the greatest in the world. It is the story of Clara Williams, a 95-year-old black woman in Chicago who had a philosophy reflecting those early Americans.

Her memories are of an all white college, a husband, of hard times on a dusty farm in New Mexico, and three children who were all taught to be special. Clara says of her children:

They were all going to be something. None of them were going to be standing on the corner begging and none would be lazy.

Her zeal and drive were instilled in all three sons, Charles Williams, James Williams, and Jasper Williams—today all doctors. Charles credits his mother for much of his success. He said that she taught them how to work, how to study, and always encouraged them to keep trying because the sky's the limit if you try hard enough.

One by one, all three brothers moved to Chicago. In 1961, on the south side of Chicago a medical clinic was opened which now is staffed by 62 people. The person who guided its conception was Clara Williams. But the Williams Clinic is more than just the symbol of a mother's influence on her children. The legacy she established continues on with her grandchildren and a new generation—Jasper Williams, Jr., and Charles Williams, Jr.—both in medical school.

As for Clara, she received an honorary doctorate degree from her alma mater, New Mexico State University. And, at last a ceremony to go with it, one she did not have when she graduated back in 1937.

Although this story was originally aired on the NBC Today Show for Mothers Day, it is also a story of what has made America the greatest country in the world—the spirit of our people. The promise of opportunity continues to exist today and individuals like Clara Williams continue to achieve the American dream. That indeed, is something for which we, as a Nation, should be thankful.●

THE PLIGHT OF VLADIMIR TSUKERMAN

HON. FLOYD J. FITHIAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. FITHIAN. Mr. Speaker, I join my colleagues in expressing frustration and anger regarding the plight of Vladimir Tsukerman, a Soviet citizen who has recently been sentenced to 3 years in a Soviet labor camp for peacefully seeking permission to join his wife and son in Israel. I am disturbed by the increasingly stringent Soviet response to individuals who seek exit visas. And I am concerned for those Soviet citizens who endure harassment and persecution by their neighbors and their government because they choose to practice their religious faith or seek to emigrate from the Soviet Union.

Particularly now, as Thanksgiving and the holiday season approach, many of us think of counting our blessings and giving thanks for all that we have. As Americans, we enjoy freedoms which most people around the world can only dream of. The freedom of worship and the right to emigrate freely are especially precious. I call upon the Soviet Union to honor its commitment to these principles as embodied in the Helsinki accords, and to cease its violation of the human rights of individuals such as Vladimir Tsukerman.●

DUTY-FREE TREATMENT FOR IMPORTS

HON. WILLIAM R. RATCHFORD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. RATCHFORD. Mr. Speaker, today I have introduced legislation to provide duty-free treatment for imports of casein button blanks. It is essential that this House take such action to eliminate a gross inequity for U.S. producers of casein buttons that has resulted in extensive layoffs and financial hardship for the very few American manufacturers that remain.

Because there has been no domestic production of casein button blanks in this country since 1979, American producers of finished casein buttons have been forced to import casein button blanks primarily from three nations: Holland, Germany, and Italy. Finished casein buttons are then produced by machining, drilling, and finishing the imported blanks. Three northeastern firms, which account for roughly 95 percent of the total annual domestic production of casein buttons from imported casein blanks, are experiencing a tremendous competitive disadvantage with firms that only import finished casein buttons or garments with finished casein buttons since the current most-favored-nation (MFN) rate of duty on these casein buttons is 6.9 percent ad valorem, while that on casein blanks is 24.2 percent.

As a result of the Tokyo round of the multilateral trade negotiations, this same column 1 rate of duty for imported casein blanks will decrease in annual stages to 11.4 percent ad valorem at the beginning of 1987. The comparable rate of duty for finished casein buttons, however, will also decline until it reaches 4.9 percent in the same year. In other words, despite these dramatic reductions, the rate of duty for imported casein blanks will still be more than two times that of imported finished casein buttons—hardly an improvement in the competitive aspect of the market. This situation has resulted in employment terminations and a competitive pricing problem that does not bode well for the future of the domestic industry.

Such an inequity serves only to protect the firm that can import and market finished casein buttons at 30 to 35 percent less than casein buttons of comparable quality, which are domestically produced from imported casein blanks. We must act now, Mr. Speaker, to eliminate this inequity that both costs jobs in an area of the country already experiencing frightening unemployment rates and artificial-

ly drives up the price of finished casein buttons and garments with finished casein buttons. Customs revenue losses would be minimal under this legislation, and the domestic industry would receive a much needed shot in the arm. I look forward to early hearings by the Ways and Means Trade Subcommittee on this bill, and would welcome the support of my colleagues in this important matter.●

COALITION OF BLACK WOMEN GOES NATIONAL

HON. SHIRLEY CHISHOLM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mrs. CHISHOLM. Mr. Speaker, I am pleased to introduce the Coalition of 100 Black Women, a new national organization, that has existed locally for 11 years. Originating in New York, the group presently has 825 members in 14 States and the District of Columbia. The coalition's objectives are to be a collective group focusing on the needs of black women and to be a vehicle of communication for black women. The Coalition of 100 Black Women will have a national voice and will address a multitude of issues facing black women. Some of the most troublesome issues to be addressed are the Federal budget cuts, lack of housing, child care, unemployment, and transportation, along with persistent racism.

This Nation, in representing all of its people, is now privileged to hear concerns from a national organization which represents black women. The Coalition of 100 Black Women is in a position to give our Nation guidance in enhancing the rights of all of its citizens. We welcome their input. I have enclosed a recent New York Times article on the coalition for my colleagues' review.

[From the New York Times, Oct. 26, 1981]

COALITION OF BLACK WOMEN GOES NATIONAL

(By Nadine Brozan)

Repeatedly, before small groups and large ones, in a soft voice and an impassioned one, Jewell Jackson McCabe said, "We always hear that behind every great man is a woman. I say that in this world behind every great effort is a black woman going unrecognized."

Certainly that was not the case this weekend for the Coalition of 100 Black Women which, with the addition of 14 states and the District of Columbia, was marking its transition from a local to a national association, nor for Mrs. McCabe, who was elected national president. The president of the New York Coalition since 1977, Mrs. McCabe is director of government/community affairs for WNET/Channel 13. Several hundred dignitaries, including many influential members of the public and private sectors, turned out for a party given by the coalition at the Hilton Hotel Friday evening. They included Mayor Koch; City Council President Carol Bellamy; Representative Charles B. Rangel, Democrat of Manhattan; former Manhattan Borough President Percy E. Sutton; New York Secretary of State Basil A. Patterson, and James D. Robinson 3d, chairman and chief executive of the American Express Company. Mr. Robinson, along with officers of Philip Morris Inc. and other individuals, received awards for financial and moral support of the coalition.

STARTED 11 YEARS AGO

The organization had its genesis in a small band of women meeting in one another's homes 11 years ago to address a multitude of troublesome issues. They chose their name because they hoped one day to have 100 members. The tributes to the group, which now has 825 members in New York, were voluminous and enthusiastic.

As David Dinkins, New York City Clerk and a candidate for Manhattan Borough President, put it: "Influence is power, and they clearly have it. Individually these women are influential in government and business positions, so they are persuasive in the larger sphere."

And now that their boundaries extend to California, Representative Rangel said, "There is no question that this organization will have a national voice. They have become a collective force of women who did not know each other in the past."

Besides throwing a jubilant party and holding a luncheon serious with talk of the goals of black women, the more than 40 women—lawyers, judges, educators, legislators, heads of corporations, social psychologists and community activists—from a variety of geographical areas rewrote and ratified a constitution, composed a resolution stating their mission and elected officers and a board.

Emphasizing that the women fully recognized the achievements of other black organizations, Mrs. McCabe explained the need for the national coalition. "Our biggest problem is that we have no forum; no one speaks specifically on our behalf. The women's movement defines itself by its achievers; why are we defined as domestic workers?"

In fact, when the representatives from each of the states joining the coalition were asked at a discussion to describe the most pressing problems for women in their states, they cited unemployment, Federal budget cuts, lack of housing, transportation and child care, along with persistent racism. But threaded through the problems specific to particular regions was a sense that black women lacked an effective vehicle of communication with one another.

Jatrice Gator, a lawyer and planning associate with the Community Service Council of Metropolitan Indianapolis, said, "Before black women can begin to address issues, they must overcome complacency, lack of organizational skills and conceptualize what things can be done. Legislation for battered women was written in our state by a black woman, but then there was no support expressed for it by black women. We must become aware that we can speak out."

Etrula R. Trotter, partner in a Memphis law firm, said, "There is simply a lack of unity. The only unity that exists in Tennessee is that of ignorant, apthetic, rural white males."

Edith B. King, supervisor of employee development and training for the Gulf Oil Corporation, said, "In Texas black women are auxiliarized to the extent that they are totally ineffective. Forums are needed to strengthen them, to help them break out. We could have power, but we have no forum to help us move into power."

Her colleague, Judge Gabrielle K. McDonald of the United States District Court of Southern Texas, who said she was the second black judge of either sex to be appointed to a Federal seat in the South, elaborated: "In Houston, there's a vacuum of women involved in anything but auxiliaries."

"The feminist movement hasn't hit black women in Texas," in part, she speculated, "because there is still the black-white problem, that keeps women intent on helping their men. They don't realize that you can both act. It's dumb to say that adult women should have role models but that's exactly what we need."

Delia Young, who heads her own public relations firm in Kansas City, Mo., said, "At last we will be structured for action. Until now we've had nothing. It's fine to have prophets; we have an abundance of those, but we need architects, too."

In the view of Yvonne Brathwaite Burke, a former United States Representative from California, who is now a partner in a law firm and was elected to the coalition's national board, the architects must turn their attention to economic advancement. "We are seeing black women move into political power," she said, "but they're missing in the corporate world. With all the outstanding black women, we simply don't have them in high places in private industry."

In fact, she continued, "Economic power has become even more elusive than it was 20 years ago for all blacks. For example, when white insurance companies wouldn't insure blacks, they formed their own companies, but when the white companies did, the black ones lost strength. Meanwhile the white companies haven't brought us in with any impact."

The possibility that budget cutbacks and Federal policies easing antidiscriminatory regulations would indisputably affect the black community was so taken for granted that it was rarely discussed at the meeting. But Mrs. Burke did attack the Reagan Administration strongly in her luncheon address Saturday.

Still the event ended in an optimistic mood that may be typical of the beginning of a mission in which strangers become allies. Evelyn Cunningham, who was director of the women's unit in the office of Gov. Nelson A. Rockefeller and is now senior editor of Elan, a monthly magazine that will be introduced in January, was supposed to describe the structure of the coalition for the closing luncheon audience. But when she rose to speak, she said simply, "Nobody is going to want to hear about committees and structure and budgets. This is simply a day of joy."●

AGAINST IMPORTED SOVIET AUTOMOBILES

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. SKELTON. Mr. Speaker, I rise today to urge the President to take immediate action to prevent the importing of Soviet vehicles. Our auto industry is experiencing the worst recession

in its history. The devastating effects of imported cars and trucks as well as skyrocketing costs have eliminated many American jobs and forced more American workers to be laid off. Incredibly, however, at what must be the worst possible time, certification procedures are being completed to permit Russian-built trucks to be imported and sold in the United States.

The Soviet Union continues to occupy Afghanistan and continues to take other actions which heighten world tension. I cannot believe that it is in our best interest to reward such behavior by making Soviet workers and the Soviet economy the beneficiaries of our generous, open market policy. Furthermore, we have been working for the past few years with our allies to establish an acceptable policy which curtails their exports to the United States. We cannot, in good faith, turn around now and open a completely new market for Russia.

We must insist that American jobs be protected from Russian imports and I call on my colleagues to join me in requesting that the President take the necessary action to prevent it.●

SPEAKER O'NEILL IS PREVENTING ACTION TO SAVE SOCIAL SECURITY

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. ROUSSELOT. Mr. Speaker, I would like to bring to the attention of the Members of the House of Representatives the November 6, 1981, Baltimore Sun editorial which highlights the politics that Speaker TIP O'NEILL is playing with the social security program.

As the editorial points out, the Speaker does not want to move on legislation which would help salvage the system. In reaction to a bipartisan amendment offered by Social Security Subcommittee Chairman J. J. PICKLE and ranking minority Member BARBER CONABLE which would begin to address the long-range financial problems of the social security system, the Speaker stated, "I do not think we ought to move hog wild." This is in light of the fact that the social security program has been operating in the red since 1975 and continues to lose $12,000 every single minute. Furthermore, recent information from the social security actuaries shows that with interfund borrowing the medicare fund will be exhausted as early as the end of 1983.

A November 5 Washington Post article on the Ways and Means Committee action suggested that the Speaker was determined to prohibit any House consideration of a comprehensive social security reform bill. The story indicated that Speaker O'NEILL and other Democratic leaders had warned Chairman PICKLE that even if the Pickle/Conable amendment was to succeed in committee, it would never be allowed to reach the House floor.

It should be noted that this is not the first time that the Speaker has stopped the consideration of a social security bill to save the system. Members will recall that at the end of the summer Speaker O'NEILL told Chairman PICKLE not to hold any further Social Security Subcommittee meetings on comprehensive reform legislation unless it dealt solely with interfund borrowing. This was after the subcommittee had been working since June in a bipartisan manner, under the leadership of Chairman PICKLE, to act favorably on social security reform legislation.

In light of these actions, it is all to clear that the Speaker and the Democratic leadership do not want to act to save social security program but rather they prefer to hold the social security program on the back burner as a hot political issue.

There is no doubt that some changes in the system will have to be made. But it is imperative that these changes result from bipartisan instead of partisan action. No political brownie points should be sought if it is at the expense of the social security program. We have several alternatives to choose from for social security reform. One can readily see that in the House of Representatives what is preventing any comprehensive reform of the social security system, not to mention any meaningful discussion, are the Speaker of the House and the Democratic leadership. For the sake of the system, I call upon the Speaker to allow that deliberation to occur.

The Baltimore Sun editorial follows:

O'NEILL'S IDEA OF HOG WILD

No stopgap measure involving inter-fund borrowing or the like is going to help the Social Security system out of its current difficulties. What is needed, and needed soon, is a commitment to make the system sound far into the future. A total overhaul of the Social Security system may not be needed, but sensible and modest changes are a must.

What we have in mind is something like the proposal that Representative J. J. Pickle (D, Texas) and Barber Conable (R, N.Y.) put before the House Ways and Means Committee day before yesterday. The central feature is to begin in 1990 to raise gradually the retirement age from 65 to 67, offer workers inducements to stay employed after that and reduce slightly future benefits. These changes would provide an estimated average of $20 billion annually for the retirement fund for the next 75 years.

That is the sort of medicine a patient like Social Security needs. It won't taste too bad and it will restore health. It would cause present and future retirees nothing like the abrupt distress the Reagan proposals earlier this year would have caused. It would cause almost no distress, in fact. But 18 of the 21 Democrats on the Ways and Means Committee followed the wishes of Speaker Thomas P. (Tip) O'Neill, Jr., and voted against it. It lost 14-18.

"I don't think we ought to move hog wild." Mr. O'Neill said. He said he favored setting up a study commission. Hog wild! More study! Somebody's been spiking his Geritol.

There has been more than enough study for this very modest change to be implemented. As Dwight Bartlett said after resigning as chief actuary of the Social Security Administration in September, "We don't need another study group. It's time to fish or cut bait on this issue." If the Democrats don't like the specifics of the Pickle-Conable approach, the responsible thing is to propose alternative changes now, not say let's wait till another study group can come up with recommendations—after the 1982 elections. Congress ducked the issue in 1980 because there was an election ahead, and 1984 will be ahead after a study commission report is digested.

There will never be an easy time to deal with Social Security's problems. The longer Congress waits, the harder it will be. The public sorely needs some peace of mind on this issue, and that is only going to come after a decision is finally made.●

H.R. 5066

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. CONYERS. Mr. Speaker, today I have introduced legislation—H.R. 5066—to make the Federal Reserve Board more accountable to the Congress and the public in its policy and operations. This bill is the most comprehensive and far reaching of many proposals which have been introduced this session to change the nature of the Fed.

The tight-money, high-interest policy of the Fed has caused substantial dislocation and hardship in key sectors of our economy. Dun & Bradstreet report that the bankruptcy rate is up 42 percent from last year, and if the current rate continues, more small businesses will go under in 1981 than in any single year but one since the Great Depression.

The automobile and housing industries, among others, have been devastated. Third quarter losses for the auto industry totaled $970 million, including a $468 million loss by General Motors. The Congressional Research Service has estimated that a 3-percent rise in the average financing rate is associated with a decline in sales of 1 million units. The average financing rate is currently 17.4 percent and there is no end in sight to the auto sales slump. Presently there are 170,000 autoworkers on indefinite layoff. In housing, it has been estimated that each 1 percent rise in the interest rate has placed 860,000 families out of the market for a medium-priced

home. Housing starts for single-family homes dropped to a historic low in October, while total housing starts dropped to a 15-year low. The official unemployment rate in the construction industry is now 16.3 percent. Current monetary policy has, in large part, created the crisis in the automobile, housing, and small business sector.

Monetary policy should be in the domain of elected representatives because it determines, to a great extent, the state of our economy. Citizens are demanding accountability and responsibility for the policies which affect them. It is timely for Congress to participate fully in monetary, as well as fiscal, policy.

This legislation will accomplish the following goals: First, coordinate and integrate monetary, fiscal, and budget policy through the budget resolutions; second, render Congress responsible for monetary as well as fiscal policy, along with the President and the Governors of the Federal Reserve Board, and provide Congress with powers to review and veto major changes in monetary policy; third, require that the Federal Reserve Board seek appropriations from Congress; fourth, require the Federal Reserve Board to furnish Congress with the data it employs to make policy and report semiannually on the economic impacts of monetary policies by sector and in the aggregate; fifth, reduce the tenures of Governors of the Federal Reserve Board to 5 years and make the term of Chairman more coterminous with the Presidential term; sixth, require a full and complete audit of the Federal Reserve Board and Open Market Committee by the General Accounting Office.●

THE CHILDREN NOBODY WANTED

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. SKELTON. Mr. Speaker, last night, my wife, Susie, and I had the privilege of hosting the premiere of a new television movie, "The Children Nobody Wanted." This is a true story about one young man and the children he helped. As a freshman attending Missouri Valley College in Marshall, Mo., Tom Butterfield discovered the problems of fosterlings, who have nowhere to go, and for whom the law makes few, if any, provisions. Boy by boy, he made a life for these homeless youngsters. Led only by his heart and an idea that he could help, Tom fought increasing odds, from the lack of money to outdated laws. Tom Butterfield became the first bachelor and the youngest single adult to become a legal foster parent in the State of Missouri. He and his boys rented a beat up old country club and, in time, turned it into their ranch—a refuge for homeless children. Today, there are four ranches, giving a homelife to over 100 youngsters.

All of us can learn from the perseverance of Tom Butterfield, the encouragement of those who helped him build his dream every day, and the generosity of the town of Marshall. It is a privilege for me to represent this man and this community in Congress.

"The Children Nobody Wanted," is to be televised December 5, at 9 p.m. eastern standard time, on CBS.●

SUPPORT THE U.S. COMMISSION ON CIVIL RIGHTS

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUTT

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. MOFFETT. Mr. Speaker, I rise to draw my colleagues' attention to a bit of unfinished business, before we adjourn for the Thanksgiving vacation. Hopefully, we will be considering the U.S. Commission on Civil Rights authorization when we return. With the myriad executive actions to water down civil rights enforcement, I think it very important that we demonstrate strong support for the Commission and its efforts on behalf of basic human rights.

The Commission serves as our conscience when we assess the state of civil rights in this country. If there was ever a time in recent history when such a conscience was needed, it is today. Voting rights, affirmative action, access for the handicapped, and other fundamental civil rights policies are currently under review by Congress and the administration. We need to continue to hear from our conscience—the Commission—so that our pursuit of social justice remains unimpeded. I urge, therefore, that you all join me in strong support for the U.S. Commission on Civil Rights.

There is a growing concern across the land that the Federal Government is about to bring the wheels of progress on civil rights to a screeching halt. The administration is reviewing vital civil rights regulations and revising vital civil rights laws. Many fear that it will be reneging on the Government's promise to act as guarantor of these vitally precious rights. The issue of a color blind Constitution has been raised as a guiding spirit for insuring these rights. This would be an ideal solution, but it is woefully misguided. The realities of this world require a more aggressive response to centuries of discrimination.

We must see that the Government retains its efforts as watchdog and protector, that it continues systematically to attack discrimination through the adherence to and enforcement of current civil rights policy. We have a voting rights law and affirmative action regulations, which have benefited countless numbers of minorities and women, because the Federal Government responded with more than a bromide to genuine violations of constitutional rights. Past administrations and Supreme Court decisions have determined that when fundamental rights are violated, appropriate remedies must be engaged, including such measures as affirmative action and the busing of schoolchildren.

As the Civil Rights Commission's Chairman, Arthur S. Flemming, stated at recent hearings:

> Discrimination is a self-sustaining process that will persist even in the absence of intentionally discriminatory conduct unless systematically attacked. Discrimination is more than just individual prejudice. Although discrimination is maintained by individual actions, neither individual prejudices nor random chance can fully explain the persistence of national patterns of inequality.

The remedies which have been implemented to fight these patterns of inequality must be maintained, for without them, we will allow the Government's beacon of protection to dim. And, we are not yet out of the dark of social injustice.

Opponents of renewal or continuance of current civil rights policy point at statistics of progress on the parts of women and minorities in areas where they had been previously disenfranchised. The gains in such areas as employment, education, and political participation are remarkable, certainly. But we cannot let up now.

The poet Paul Laurence Dunbar stated, over 80 years ago, that black life in America is a promise and not a fulfillment. We still have an unfulfilled social agenda for minority and women's rights from which we cannot back away. The short time that we have had a civil rights legislation on the books is dwarfed by the centuries during which this Nation suffered legal bondage and legally sanctioned prejudice. Today, we must do more than give lip service to the concept of civil rights for all Americans. We must demonstrate our commitment to that concept by maintaining the teeth in civil rights law, regulation, and enforcement.

We were recently given the opportunity to show that commitment by overwhelmingly approving the Voting Rights Act reauthorization. Let us again display our support for social equality by approving, without weakening amendments, the U.S. Commission on Civil Rights authorization now before us.●

PARRIS INTRODUCES WASHINGTON COMMEMORATIVE

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. PARRIS. Mr. Speaker, today I am introducing legislation which proclaims February 22, 1982, a national day of celebration in honor of the 250th anniversary of George Washington's birth. George Washington was one of America's greatest leaders and who indeed set this Nation on a course of political stability unrivaled in the history of civilization. Each American, in fact, looks to this great Virginian as "the father of our country."

In 1932, the U.S. Commission on the Bicentennial for George Washington's birthday commemorated Washington's 200th birthday by a national celebration. The Mount Vernon Citizen's Association has observed Washington's birthday by sponsoring a ball in his honor for each of the past 35 years and every year the city of Alexandria recognizes his birthday by parades and various celebrations.

Senator WARNER and Senator BYRD are jointly introducing an identical resolution today in the Senate and I am being joined by the entire Virginia delegation in the House in sponsoring this legislation.

I urge my colleagues to join us in supporting this resolution so that we can insure a proper birthday commemoration throughout this Nation for this great man.●

MINIMUM BENEFIT CONFERENCE

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. PICKLE. Mr. Speaker, the President, the House and the Senate have all gone on record in favor of restoring the minimum social security benefit, at least to some degree.

But the fact is that this benefit has not been restored. The law is that this benefit be eliminated for new recipients right now, and for current recipients next April.

Furthermore, as of today we have not made progress toward restoring this benefit. The Senate has been slow to call meetings of the Conference Committee and has insisted on replacing this one misbegotten benefit cut with another.

Meanwhile, the law stays in effect and the conference agreement on reconciliation stipulates clearly that on December 3, three million current minimum beneficiaries are to receive notice that their benefits might be reduced next March. The notice, according to the agreement, is to read as follows:

This is to inform you that as a result of the elimination of the minimum benefit; your benefit may be reduced to some degree beginning with your April check. To determine the extent of the reduction, if any, and your possible eligibility for SSI and other assistance programs you may contact your local social security office.

Now I am told the Social Security Administration does not intend to send out these notices at all in December.

If we had some confidence of prompt action, that might be a humane and rational decision. But given the attitude of the Senate in this conference, I do not have that confidence.

Meanwhile, every old person receiving a small social security check who has heard a newscast, read a newspaper, or talked to a friend knows the minimum benefit was supposed to be eliminated by the Reconciliation Act.

Now they are left in limbo. They have no notice—and they have no action. How long will this go on?

Again and again I have said to this Congress, the worst thing we can do in social security is do nothing. Here is one more example of that fact. No civilization ought to subject its elderly and near elderly to the uncertainty that we have inflicted on ours by inaction in this vital area. What a thankless Thanksgiving and a cheerless Christmas our elderly must look forward to because we do nothing.●

THE UKRAINIAN ASSOCIATION OF MARYLAND, INC.

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Ms. MIKULSKI. Mr. Speaker, I am pleased to take this opportunity to say a few words about a dedicated group of people and a book they have written which I feel deserves recognition. The book is "The Ukrainians of Maryland" and the group is the Ukrainian Association of Maryland, Inc. Long hours of planning, fundraising, and writing went into this entirely voluntary effort and the result is a significant contribution to the pluralistic heritage of our Nation.

As a second generation Polish American, I feel that books such as these are especially valuable to aid us in understanding the sociology of ethnic groups' experiences in this society. This informative book broadens our knowledge of the contributions of millions of East Europeans in the United States. It is an important scholarly achievement in the history of our culture, and is a worthy model for other areas and people.

The Ukrainian Association of Maryland, Inc., led by Paul Fenchak, is now approaching its 10th year of existence. Other outstanding accomplishments of this organization include persuading the Maryland Bicentennial Commission to place ethnic activities on their agenda and, in concert with the Polish Heritage Association of Maryland, working to bring to Maryland three Slavic Conferences in which dozens of recognized scholars of various disciplines and heritages participated.

I know that you will join me in applauding and supporting this association and others similar to it, in their efforts to bring greater awareness of ethnic contributions to this richly diverse country.●

AVERELL HARRIMAN

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. HUGHES. Mr. Speaker, it gives me great pleasure to pay tribute to a partriotic American and a champion of constitutional government, former Governor Averell Harriman, He has served and advised American Presidents for nearly half a century. I can say unequivocally that I know of no other American who has served the Republic with more patriotism, wisdom, and honor. The Governor is indeed an exemplar of courageous public service based on honest convictions. Personal experience has taught him the futility of war, but also the urgency and wisdom of being constantly prepared for war so that it can be prevented. He knows that our strength and the maintenance of peace go hand and glove together. Over the years, the Governor has made a tremendous contribution to the welfare and security of our great country.

The Governor is a fine statesman, a man of singular characteristics—great ability, independent mind, and deep convictions—whose talents have been prized by American Presidents for nearly 50 years.

He has served his country well during his tenure as a State and Federal official. He has worked tirelessly and continues to do so, and now works even harder toward a strong democracy and free America.

I feel honored to be able to state that the Governor is my personal friend. He is a dedicated public servant and a sincere man of strong character, intense convictions, and great tenacity in pursuit of those convictions.

I wish him continued good health, happiness, and success over the years ahead, and a very, very happy birthday!●

SMALL BUSINESS INNOVATION ACT COSPONSORS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. LaFALCE. Mr. Speaker, I am pleased to announce that H.R. 4326, the Small Business Innovation Development Act of 1981, now has over 100 cosponsors. Today, the number stands at 117. I am gratified to see such widespread support for this bill that would stimulate the growing small science and high-technology sector of our economy. I would like to urge all Members who have not yet cosponsored H.R. 4326 to do so. Moreover, I would urge them to read the committee report on the bill which is expected to be filed with the House today.

Those Members who have already joined as cosponsors of this important bill deserve special recognition. I want to extend a special appreciation to my colleagues on the House Small Business Committee for their strong support of H.R. 4326. Following is a list of the cosponsors of H.R. 4326:

1. Parren J. Mitchell, Maryland
2. Neal Smith, Iowa
3. Joseph P. Addabbo, New York
4. Henry B. Gonzalez, Texas
5. Berkley Bedell, Iowa
6. Frederick Richmond, New York
7. Henry J. Nowak, New York
8. Thomas A. Luken, Ohio
9. Andy Ireland, Florida
10. Ike Skelton, Missouri
11. Billy Lee Evans, Georgia
12. Charles W. Stenholm, Texas
13. Romano L. Mazzoli, Kentucky
14. Nicholas Mavroules, Massachusetts
15. George Crockett, Jr., Michigan
16. Charles Hatcher, Georgia
17. Ron Wyden, Oregon
18. Dennis E. Eckart, Ohio
19. Byron L. Dorgan, North Dakota
20. Gus Savage, Illinois
21. Buddy Roemer, Louisiana
22. John G. Fary, Illinois
23. Joseph M. McDade, Pennsylvania
24. Silvio O. Conte, Massachusetts
25. J. William Stanton, Ohio
26. William S. Broomfield, Michigan
27. Dan Marriott, Utah
28. Lyle Williams, Ohio
29. Olympia J. Snowe, Maine
30. Daniel B. Crane, Illinois
31. John Hiler, Indiana
32. David M. Staton, West Virginia
33. Vin Weber, Minnesota
34. Hal Daub, Nebraska
35. Christopher H. Smith, New Jersey
36. Ed Weber, Ohio
37. David Dreier, California
38. Guy V. Molinari, New York
39. Mark D. Siljander, Michigan
40. Daniel Akaka, Hawaii
41. Eugene Atkinson, Pennsylvania
42. Doug Barnard, Georgia
43. Michael Barnes, Maryland
44. Tom Bevill, Alabama
45. Don Bonker, Washington
46. David Bowen, Mississippi
47. Clarence Brown, Ohio
48. William Clay, Missouri
49. William Clinger, Pennsylvania
50. Tony Coelho, California
51. Baltasar Corrado, Puerto Rico
52. Norman D'Amours, New Hampshire
53. Thomas Daschle, South Dakota
54. Julian Dixon, California
55. Jim Dunn, Michigan
56. Bernard Dwyer, New Jersey
57. Bob Edgar, Pennsylvania
58. Walter Fauntroy (D.C.)
59. Geraldine Ferraro, New York
60. Hamilton Fish, New York
61. Thomas Foglietta, Pennsylvania
62. Harold Ford, Tennessee
63. Barney Frank, Massachusetts
64. Sam Gejdenson, Connecticut
65. Newt Gingrich, Georgia
66. Dan Glickman, Kansas
67. Bill Green, New York
68. James Hansen, Utah
69. Frank Horton, New York
70. Steny Hoyer, Maryland
71. William Hughes, New Jersey
72. Dale Kildee, Michigan
73. Ray Kogovsek, Colorado
74. Tom Lantos, California
75. Jim Leach, Iowa
76. Jerry Lewis, California
77. Bill Lowery, California
78. Stan Lundine, New York
79. Matthew McHugh, New York
80. Stewart McKinney, Connecticut
81. Edward Madigan, Illinois
82. Edward Markey, Massachusetts
83. Marc Marks, Pennsylvania
84. David Martin, New York
85. Lynn Martin, Illinois
86. Dan Mica, Florida
87. Barbara Mikulski, Maryland
88. G. V. Montgomery, Mississippi
89. Austin Murphy, Pennsylvania
90. Stephen Neal, North Carolina
91. James Nelligan, Pennsylvania
92. Jerry Patterson, California
93. John Porter, Illinois
94. Joel Pritchard, Washington
95. Nick Rahall, West Virginia
96. Tom Railsback, Illinois
97. Peter Rodino, New Jersey
98. Robert Roe, New Jersey
99. Toby Roth, Wisconsin
100. John Seiberling, Ohio
101. Gerald Solomon, New York
102. Arlan Stangeland, Minnesota
103. Fofo Sunia, American Samoa
104. Bruce Vento, Minnesota
105. James Weaver, Oregon
106. Charles Wilson, Texas
107. Timothy Wirth, Colorado
108. Howard Wolpe, Michigan
109. Antonio Won Pat, Guam
110. George Wortley, New York
111. Cardiss Collins, Illinois
112. Vic Fazio, California
113. Donald Mitchell, New York
114. Roy Dyson, Maryland
115. Louis Stokes, Ohio
116. John Myers, Indiana
117. Dan Coats, Indiana●

BEING TREATED UNFAIRLY

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. HUBBARD. Mr. Speaker, many people have written to me questioning how the President can reduce or delay social security and other entitlement benefits as a way to help balance the Federal budget. One of those who has written to me on this important matter is Leona Campbell of Marion, Ky. I feel that her very thoughtful letter is one which should be shared with my colleagues, and I wish to do so at this time. The letter follows:

DEAR CONGRESSMAN HUBBARD: I am writing you in regard to President Reagan's program for cutting the budget. I, for one, certainly do not approve of his plans to cut the checks of the people on fixed incomes like myself. We can barely keep our heads above water now.

I have worked hard all my life—66 years. I have always been honest and more than fair in all dealings. I try to treat everyone the way I would like to be treated. I do not think I am being treated fairly in this matter.

It is plain to see his program is geared to help the rich get richer and the poor get poorer.

Congressman, don't you think we (the poor) have the right to a decent standard of living?

I get my social security check in the amount of $284.00 a month. I don't see how I can survive much longer at this rate of inflation. Take my word, it is very depressing.

I hope you can understand my circumstances and will be ready to stand up for us on this matter.

Thank you for taking the time to read this.

I remain respectfully yours,

LEONA CAMPBELL.●

IN PRAISE OF CARL GARRITANI

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. SCHUMER. Mr. Speaker, I am proud to have the opportunity to honor an individual who has devoted himself to the betterment of his community: Carl Garritani. Mr. Garritani is that special kind of individual whose service to his fellow citizens in my district in Brooklyn has been matched by few. His contributions to the people of Brooklyn have stretched over many years, and range from fighting crime to serving as a State committeeman.

Carl's concern for his family and for all the citizens living in the community led him to establish the United Community Association of Flatlands, an umbrella group of 40 block associations involving 3,000 families. Carl has worked for our youth in establishing the night youth center and the summer youth employment program; he has worked for our senior citizens by creating the outreach program for senior citizens, which serves the entire Brooklyn area. Carl also established the United Community Association of Flatlands real estate program, which provides free real estate services to prospective buyers. In addition, he is a member of community board No. 18, and serves on the advisory board for Community School District No. 22.

In 1978, Carl was elected to the postion of State committeeman. He has served as a full-time committeeman, and has gained the respect of civic and community leaders throughout the city.

As a police officer and detective, Carl has worked actively toward solving problems of crime in our Brooklyn neighborhoods. He has receive 24 medals for bravery, including two exceptional merit citations.

In spite of all the time Carl Garritani has devoted to his community, he is a model family man, dedicated to his wife, Amelia, and his children, Carl Anthony and Gina.

On behalf of all of those whose lives have been touched, and improved, by his selfless generosity, I would like to take this opportunity to salute Carl Garritani. Be it as a police officer, community activist, or district leader, Carl has always risen to the top of his field. We in Brooklyn are proud to call him one of our own.●

AVERELL HARRIMAN

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. PEYSER. Mr. Speaker, it is a great privilege to honor a fellow New Yorker and an outstanding American—W. Averell Harriman. For over six decades, Governor Harriman has served his beloved country and State of New York during an unprecendented career as a statesman and public servant.

To articulate the one greatest achievement of this man's life would be difficult. Yet, the most noble may simply be his decision as a young man to dedicate his life to public service.

Since the 1930's, "The Governor" has served with highest distinction every American President both at home and around the globe. In 1954, he won the Democratic nomination for Governor of New York. In this capacity, he tackled the problems of New York with the same wisdom and insight he possessed with national and international affairs. Governor Harriman was a rare man in that he constantly sought new, innovative ideas instead of being complacent with the status quo.

Mr. Harriman has served his country as Ambassador to Russia and to Great Britain, Secretary of Commerce, Undersecretary of State, Governor of New York, and adviser to five Presidents. This list continues to grow. As President Kennedy aptly stated: "He has held as many important jobs as any American in our history, with the possible exception of John Quincy Adams."

It is difficult to express a fitting tribute to this extraordinary man. As in so many other instances, my best guidance comes from Ambassador Harriman himself, who once said: "In our short time on Earth, we have a choice about the kind of world we leave behind." To apply this to Mr. Harriman's 90 short years, he has given us a sense of patriotism, a standard of excellence for public service, and sense of a world at peace. In short, Mr. Speaker, he enkindled within this Nation a dedication to achievement, achievement of a better world.●

NAMIBIA

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to insert my foreign affairs newsletter for the month of November into the CONGRESSIONAL RECORD:

NAMIBIA

The protracted effort to bring independence to Namibia (South-West Africa) has moved forward after years of stalemate. Although there is reason for pessimism about a settlement in one of Africa's longest struggles for independence, there is also hope.

South Africa has ruled Namibia since 1920 when the League of Nations granted it a mandate to govern the former German colony. South Africa extended its domestic policy of apartheid to the territory, and that policy has become increasingly restrictive. Namibia has one milion black inhabitants and 100,000 whites, yet political, economic, and social power remains in white hands. Hospitals and schools are largely segregated. The government budget for white schooling and health is ten times higher than that for blacks. South Africa has established a system of homelands in Namibia which separates the races and confines large numbers of blacks to small areas of poor, arid land. Due to the system of contract labor that South Africa has imposed, the ratio of white to black wages is 12 to 1.

In large measure because of such policies, the United Nations General Assembly revoked South Africa's mandate in 1966 and established the U.N. Council for Namibia to administer the territory until independence. South Africa ignored the action, stayed in Namibia, and refused to let members of the council into the territory. In response to South Africa's refusal to leave Namibia, Africans organized themselves into political parties, the most important of which is the Southwest African People's Organization (SWAPO). SWAPO began armed action in 1966, and today it has more than 5,000 troops in the field. South Africa, however, has some 40,000 troops in Namibia.

A 1971 advisory opinion of the International Court of Justice held South Africa's occupation of Namibia illegal. In 1976, the U.N. Security Council demanded a U.N.-supervised election in the territory. The United States has supported the actions of the U.N. and the court. South Africa countered these moves in 1977 with the Turnhalle Plan, a constitution drawn up by selected ethnic groups in the area, but which excluded the participation of SWAPO. The Turnhalle Plan was rejected by the U.S., Great Britain, France, West Germany and Canada, who believed that a lasting settlement could not be secured without the agreement of South Africa and SWAPO, the two parties engaged in armed conflict. Progress seemed to be possible when South Africa and SWAPO accepted a western proposal which included an election under U.N. supervision, a ceasefire, phased withdrawal of South African troops, and restriction of SWAPO forces to their bases. South Africa later balked at the plan of implementation while SWAPO and the other Namibian political parties accepted it. Current efforts of the five-nation group have focused heavily on creating new movement toward implementation of their proposal.

The present atmosphere for a settlement is as positive as it has been at any time during the years of tangled negotiations. The western five have put forward "constitutional principles" to protect white inhabitants and property rights. South Africa and the internal parties it supports are on one side while SWAPO and its African supporters face them on the other. The western group seeks agreement on constitutional principles, various transitional arrangements, and a date for the election; but even under ideal conditions an election could not take place until 1983. Moreover, the extent of white and South African resistance is not yet clear. Although both sides have agreed in principle to a ceasefire and an election, implementation would be difficult because they disagree about the size and function of a U.N. peacekeeping force and the details of the election. South Africa's objection to what it regards as U.N. bias remains a serious obstacle, as does the disposition of Walvis Bay, a port critical to the economic well-being of Namibia.

Our involvement in the negotiations is significant. The U.S. has important interests in southern Africa. It wants to prevent the further expansion of Soviet influence in the area. Large deposits of key minerals are located there, and oil from the Middle East is transported around the Cape of Good Hope. Because of the importance it attaches to the region, the U.S. has also taken the lead in the search for a peaceful resolution to the Namibian conflict. It has discouraged investment in Namibia, and provides no aid for it. An important element in our policy has been the attempt to maintain improved relations with black-ruled African states which strongly support Namibian independence.

The U.S. has not recognized Angola. It argues that The Angolan government lacks effective control of the country and allows 20,000 Cubans to remain there. As one of the "frontline" countries where SWAPO bases are located, Angola has said it cannot reduce the Cuban presence as long as it is threatened by South African invasion and by South African support of UNITA, the main opposition to the Angolan government. The U.S. has dropped its demand for withdrawal of the Cuban troops from Angola as a part of the settlement, but it does say that it would facilitate a settlement.

The reason for some optimism at the moment is that no party appears to desire a breakdown of negotiations on constitutional questions. South Africa's willingness to negotiate in order to reach a settlement remains unclear. Many observers think that South Africa may simply be maneuvering for time, expecting rewards from the Reagan Administration in nuclear and military cooperation, while never intending to relinquish Namibia to African nationalists.

The U.S. can play a constructive role by fostering momentum in the negotiations and pressing for a final settlement.●

CONNECTICUT FAMILIES AND THE REAGAN BUDGET

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. MOFFETT. Mr. Speaker, this morning's Wall Street Journal provides compelling human testimony about the effects of the administration's economic program on family life in Hartford, Conn.

"Thank God my parents got divorced," says Holly Koch, a student from the University of Hartford. She recognizes that she could not receive the same level of financial aid if her parents were still married.

Danny Salb aspires to be a veterinarian. Now, he is in the ninth grade. A year earlier, he nearly flunked out of school. But, he was saved by the financial and personal rewards that flowed from his part-time CETA job. His work improved markedly after entering the "work experience" program with a job at the town of Vernon dog pound. His job has been terminated by the CETA cuts.

Evangie Bernal is a disabled, former practical nurse who has been told that she must vacate her apartment by its new owners. Although she desired to contest this action, the Legal Services budget has been so savaged that tenant eviction cases have been discontinued.

These case studies demonstrate the inhumane consequences of the administration's decision to cut programs regardless of their value to society and to the people served by them. Instead of useful benefits—benefits which merely keep these individuals in the ballgame instead of having them fall through the cracks—these people are asked to settle for promises. These promises include asking these citizens to wait until some indeterminate time in the future when the Reagan economic magic will take effect.

In the interim, the New England winter is approaching; the budget director admits the program is seriously defective; and, these Hartford citizens are asked simply to wait.

The article follows:

BUDGET CASUALTIES: IN HARTFORD, THE POOR ALREADY FEEL EFFECTS OF THE REAGAN BUDGET: BOY LOSES JOB, AND A MOTHER WAITS LONGER FOR HOME; THE WORST IS YET TO COME

PRESIDENT ATTACKED, PRAISED

(By Timothy D. Schellhardt and Burt Schorr)

HARTFORD, Conn.—Nationwide, President Reagan's budget cuts add up to a great deal of money—$1 billion less for welfare, $1.3 billion less for food stamps, $6 billion less for job training, and so on. They also add up to a great deal of difficulty for countless individuals.

In and around this capital city, budget cutting in Washington means that:

15-year-old Danny Salb has lost his $3.37-an-hour job feeding homeless dogs at the pound.

Cynthia Huff and her two children, living for the past four years with her sister's family in a cramped cottage, will have to wait three more years, at least, before thay can get a government-subsidized apartment.

College junior Holly Koch must work five hours more a week to earn the extra money needed to stay in school.

59-year-old Evangie Bernal, practically crippled from a bone disease and living on a low income, can't get free legal aid to try to avoid eviction from her apartment.

Former welfare recipients Sixto Moreles, Jessie Arrington and Arsula Little face unemployment again because the furniture-manufacturing company where they work has lost its federal funds and will close at the end of this month.

EASY TO FORGET

"Sometimes it's easy to forget that the budget-cut casualties are people, not simply programs," says Flora Parisky, an urban-policy consultant here. It has been only seven weeks since Mr. Reagan's fiscal-1982 budget ax began falling, but the casualties already are piling up here.

There aren't any firm estimates of how many Hartford's 136,400 residents—30% of whom get some kind of federal assistance, including Social Security benefits—are being hurt by budget reductions. But local and state officials believe they number in the thousands. Miss Parisky estimates, for example, that more than 10,000 youngsters under age 18 have been affected by cuts in child-assistance, job-training and other programs.

For most of this city's middle-class families, which make up the majority, the effects of the federal budget reductions aren't yet easily discernible. Gone, to be sure, is the 12:01 a.m. Amtrak to New Haven, forcing night travelers to catch the 8:41 p.m. train or wait until 3:52 a.m. Nine other trains also stop here no longer. And those who pay for school lunch are being charged a nickel more for it by public schools as officials try to make up for a cut in federal funds. But the main budget casualties are the poor.

SOFTENING THE BLOW

Even for them, local and state authorities say, the full effect won't be felt in Greater Hartford for several months. Officials have been able to make up for some of the cutbacks—somewhat softening, for instance, the blow to programs for expectant low-income mothers. At Martin Luther King Jr. Elementary School, principal Harold Barrow used $131.20 from his school's activity fund to pay for lunches of youngsters who have been removed from the free-lunch list or required to pay more for reduced-price meal tickets under the Reagan program.

But those resources are drying up fast. "People are going to get less service, and less people are going to be eligible for help," says Stephen Heintz, a state planning official. Echoing him is Marlene Berg, an official of the local United Way organization, which finances 65 Hartford-area agencies. She says: "There's going to be a cold, cold time for social-service agencies."

For many, the cold times are already here, and many of those who have been hurt are bitter and upset with President Reagan for slashing programs that aid them.

AN ANGRY MOTHER

"There are other things he should be doing instead of cutting able-bodied people who want to work," says Cynthia Huff. The 30-year-old Mrs. Huff, a welfare mother until she took a job as a school-bus attendant, finds her food stamp allotment has been pared by $22 a month and other federal benefits cut by $54 a month because of new, higher federal-aid standards.

But not all the budget victims blame the President. Some say the efforts to balance the federal budget are essential to the nation's economic vitality.

"It's got to be done. If Reagan had continued to go along the same old path, the results would have been disastrous," says J. James Asbeck, the President of Maverick Corp., a furniture producer that serves primarily as a job-training employer. Since 1975, Maverick has found other jobs in the area for 650 ex-convicts, welfare mothers and workers financed under the Comprehensive Employment and Training Act, or CETA. A $1.7 million cutback in its job-training and other federal funds is forcing Maverick to close Nov. 30, even though its sturdy pine bunk beds and accessories "are selling like hot cakes," grossing more than $525,000 in the first nine months of this year.

Whether cutbacks are necessary is beside the point to those—such as Maverick's Sixto Moreles, Jessie Arrington and Arsula Little—who are ultimately hurt by them. A $150,000 cutback in federal housing funds in Hartford, theoretically justified or not, means that fewer rent-subsidized apartments will be built here. The waiting list for such apartments already exceeds 5,000.

Ineffie Sargent, a Hartford caseworker, says that the federal cuts, or the fear of reductions, have increased "stress and depression" among her low-income clients. The number of mothers asking to have their children placed in foster homes has risen sharply, she says. Turning the pages of her notebook, she counts 23 children whom she herself placed in the past three months. A year ago, she says, her placements averaged only one a month. Reported cases of child abuse in Connecticut, which dropped to a three year low last April, have climbed in recent months.

The federal cutbacks, says Marlene Berg of United Way, have trimmed the staffs at many social agencies, reducing Hartford's ability to measure "internal domestic violence that could become street violence." For example, there is no one to answer the telephone anymore between midnight and 8:30 a.m. for people who call North central Infoline, the special state and United Way emergency number serving Hartford and surrounding communities. Infoline's callers have numbered 31,000 a year and the late-night callers often are potential suicides, runaway teen-agers, people who have overdosed on drugs and those needing emergency shelter. "We don't know how they're getting help," says Cheryl Berger, Infoline's assistant director.

Many Hartford residents no longer are getting the help they once counted on. Here is how the federal budget cuts have affected some of them.

THE JOBLESS TEENAGER

Danny Salb wants to be a veterinarian. That may be more fantasy than reality for a ninth-grade youngster from a welfare home,

but when the soft-spoken, bantam-sized boy says it, you believe him.

Danny's favorite school subjects these days are algebra and earth sciences, and he is doing well in them. Last fall, in the eighth grade, it was a different story. "I was flunking everything," Danny remembers.

One person who worried about Danny's future was his mother, who with her four children lives in an uninsulated rented house where the furnace remains off this chilly Connecticut autumn for lack of oil money. Danny's poor schoolwork, she believes, reflected his "frustration and anger" at being unable to earn money for his family. He was stymied by his inability to find work on his own.

It was Uncle Sam who offered Danny his first paying job. A local community-service agency, with a $32,000 Labor Department CETA grant, created a "work experience" program for low-income or handicapped people ages 14 to 21. Danny worked two hours a day after school, five hours a day during summer vacation, at the Town of Vernon dog pound.

John Cagianello, a high-school teacher hired to run the project, noted after a few weeks that "Danny felt better about himself." It spilled over to his schoolwork, He saved $320 from his earnings, giving money to his mother for groceries and using the rest to buy clothes for himself.

Danny knew from watching television news and talking with his mother that President Reagan intended to cut the federal budget. But he didn't connect that with his own life until a few weeks ago when Mr. Cagianello confirmed school rumors that the CETA jobs had been axed. "I was pretty upset," Danny recalls. His mother says he had counted on the income to buy the shoes he needs for this winter.

THE BUSINESSMAN

Teofilio Babun Jr. seems just the sort of voter President Reagan expected to please when he pushed his budget cutbacks through Congress. And the Cuban-born electrical engineer, at 33 well up the American business ladder, indeed thinks that the cuts were a swell idea—except for their effect on his life. That, he says, "was something I needed like a hole in the head."

When Mr. Reagan took office last January, Mr. Babun was pulling down over $40,000 a year as a marketing manager for Crouse-Hinds Co.'s Arrow Hart division here, which makes electrical switches. But he had bigger plans. Together with two partners, he was negotiating to buy a small electrical relay plant owned by a local unit of Western Pacific Industries Inc.

All he needed was a 90 percent guarantee from the Economic Development Administration for an $850,000 loan that a Hartford bank had agreed to make to finance the purchase. The federal agency appeared interested. It sent Mr. Babun the first draft of a proposed loan-guarantee pact and followed up with oral assurances of the application's ultimate success. In February, with the closing only weeks off, Mr. Babun gave notice at Arrow Hart.

Then came the bad news: Under White House orders, the EDA had frozen its business-aid programs, including loan guarantees. After unsuccessful appeals to Washington, Mr. Babun's only chance to save the deal was to line up his own financing, which he did—but at a price.

Instead of a single bank, he had four separate lenders to deal with and a variable interest rate that has ranged above 22 percent. (An interest rate on the single-bank loan hadn't been set but undoubtedly, with the federal guarantee, would have been far lower.) Things are working out okay, for now, with sales running about 250 percent higher than a year earlier. But the four separate loans, which require quarterly reports to each lender, "are expensive and confusing," say Mr. Babun. Looking ahead, he sees complex negotiations with the lenders over additional financing. Looking back, he wonders, "Can you trust your own government?"

THE TENANT

Evangie Bernal, the disabled former practical nurse, has been told she must vacate her two-bedroom $180-a-month apartment by Dec. 1. A new owner has purchased the house in which Mrs. Bernal lives and wants to raise the rent to $350 a month, which Mrs. Bernal is unable to pay. The owner says that her own $891 monthly mortgage and tax payment on the house requires the higher rental income.

Mrs. Bernal asked Neighborhood Legal Services for help, but a 30 percent reduction in the agency's $600,000-a-year federal funds forced it to stop handling tenant-eviction cases, effective Oct. 15. Mrs. Bernal applied after the cutoff date. She has submitted her case to Hartford's Fair Rent Commission, but the eviction threat remains. A neighborhood Legal Services attorney doubts that Mrs. Bernal, who is somewhat confused by her rent problem, would be able to represent herself effectively in court. Meanwhile, Mrs. Bernal has stopped going out of her apartment for fear that her landlord, who lives upstairs, "might lock me out."

THE WELFARE MOTHER

Bernice Roberts says that these days "all I do is cry." Seated at her dining-room table, the 37-year-old mother of eight sons fingers the letter she received recently from the state welfare agency. "You have been informed," the letter begins, that her public-assistance check this month will be slashed to $291.12 from $499.63 because her outside earnings have risen somewhat, thus reducing her federal benefits, and because federal eligibility standards have been raised to cut welfare costs.

Since April, Mrs. Roberts has worked as a home health aide, helping an invalid four hours a day, seven days a week. For that, she earns about $300 a month. Her welfare check and her salary barely cover her $220-a-month rent and heat bill, her grocery bill and the cost of her other essentials. "I have $14 in the bank," she says. The reduced welfare benefits, she says, will mean "there might not be any Christmas." She pauses, then adds: "There might not be a Thanksgiving, either."

THE COLLEGE STUDENT

"Thank God my parents got divorced," exclaims Holly Koch, a junior at the University of Hartford. Miss Koch, a business major, thinks that if her father's income had been considered in weighing her financial-aid request, she wouldn't have gotten the assistance she needs.

Because of federal cuts, Miss Koch's annual basic-aid grant has declined $50, to $996, and her work-study grant has been chopped in half, to $500 from $1,000, even though her university costs have increased by $1,530 this year. As a result, she works 15 hours a week in the university's financial-aid office this year instead of the 10 hours or so she averaged last year. "That increase doesn't sound like much," she says, "but it is when you're carrying a full load of courses."

Of the federal budget cuts, Miss Koch says President Reagan "has good intentions. I don't know what else he could have done." She adds, "We're all willing to scrimp a little around here, but if there's any more, forget it." If she could plan her college career over again, she says, "I'd go two years to community college" because it's cheaper.●

RINALDO AMENDMENT IMPROVES RIGHTS OF BOARDING HOME RESIDENTS

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. PEPPER. Mr. Speaker, I would like to take this opportunity to commend the distinguished ranking Republican member of the House Select Committee on Aging, Mr. RINALDO, for his excellent amendment to the Older Americans Act which has the effect of extending to boarding home residents protections in Federal law which were previously available only to nursing home residents.

Boarding homes are the newest class of institutional occupancy. They were created in effect by enactment of the supplementary security income program in 1972. Even though the Federal SSI provides the lion's share of the funds received by these facilities there are no Federal minimum standards which are applicable to them. The problem has become severe as every State in the Union launched an aggressive campaign to empty their State mental and other institutions and place residents in facilities which offered only board and room with SSI paying the bill.

Our committee has held numerous hearings on this topic. Our early hearings in 1975 and 1976 indicated significant poor care and abuse. Other hearings traced the movement of mental patients and the retarded into boarding homes where they often did not receive the care, services, and therapy that they needed.

In 1978 we held hearings which exposed other examples of physical abuse and neglect. A year later we began to investigate a series of boarding home fires. Some 130 people have lost their lives in such fires in 1979–81. In 1981 we began to focus on the financial abuse which takes place in some boarding homes. The U.S. General Accounting Office helped us document that there is widespread fraud and theft of patients' funds in many boarding homes because of a general lack of accountability.

As a result of these hearings our committee is currently considering legislative initiatives. Some time ago, I introduced legislation to require board-

ing homes to meet certain Federal minimum standards particularly relating to fire safety. We are also working on a proposal to require boarding home residents to file CPA audited cost statements with the Government in order to account for their use of Federal dollars. While this legislation waits for consideration in other committees of the Congress, Mr. RINALDO has found something that we can do which will have an immediate effect on improving the quality of life for residents in boarding homes. His amendment would extend the protections of the federally financed nursing home ombudsman program to boarding homes.

I cannot say enough about the importance of Mr. RINALDO's amendment. Even though the genesis of boarding homes is recent, there are already four times as many boarding homes as there are nursing homes and there are more people in boarding homes than in nursing homes. I would also emphasize that the States are moving the mentally retarded and children with developmental diseases and the handicapped into boarding homes at a rapid rate so that the protections offered in Mr. RINALDO's amendment have application well beyond the elderly.

I anticipated tremendous improvement in the quality of care offered in boarding homes as a consequence of the Rinaldo amendment. What this means is that for the first time a federally funded advocate will be on guard to protect the rights of the disadvantaged. This cannot but have a salutary effect.

Once again, Mr. Speaker, I would like to commend Mr. RINALDO and would like to make it known that I am strongly in support of his amendment. Mr. RINALDO is an extremely valuable member of our committee.●

VINCENNES UNIVERSITY

HON. JOEL DECKARD

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. DECKARD. Mr. Speaker, next Sunday, November 29, Vincennes University will commemorate a landmark in the history of the State of Indiana and of the old Northwest Territory. On that date 175 years ago, the first General Assembly of the Indiana Territory, meeting in the territorial capitol in Vincennes, granted a charter to a small frontier school founded 5 years earlier by William Henry Harrison, the first Governor of the Indiana Territory and the ninth President of the United States. That school, known from its founding in 1801 as the Jefferson Academy and from its chartering 5 years later as Vincennes University, would survive to become the first institution of higher learning in the State of Indiana and one of the first west of the Appalachians.

By the turn of the century, Vincennes University had emerged as the first junior college in the United States. It has since earned a high reputation for its imaginative and innovative approach to its educational mission, for the energy and efficiency of its administration, and for the quality of its programs. This is a tribute to the leadership of the college, from its first president of the board, William Henry Harrison, through the long and progressive presidency of Dr. Isaac Beckes, to today's president, Dr. Philip Summers. It is a tribute to the labor of dedicated and loyal faculty and staff and to the support of the people of Knox County. It reflects, finally, the energies and talents of Vincennes University's student body, whose success is the truest measure of the college.●

PAYMENT IN LIEU OF TAX FOR GUAM LANDS

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. WON PAT. Mr. Speaker, I am today introducing legislation which seeks to correct a situation whereby the U.S. Government has locked up a third of Guam from commercial development and, in the process, denied the local Government valuable tax revenues.

The measure I introduce today will correct this condition by providing for an annual Federal payment to the government of Guam which can be considered in lieu of taxes that normally would be gained from such property.

I have given this problem great attention. We, on Guam, are proud to have major U.S. military facilities on our island and we want them to feel free to use the land presently under Federal control for this Nation's defense. It must be noted, however, that Guam is a small island. We have a total area of less than 212 square miles. The United States owns 31.5 percent, or roughly 42,750 acres of land, on Guam. Much of Guam's most useful land is in Federal hands, as is our only major source of fresh water, our harbor, and most of our flat arable lands. Our inability to utilize these areas for commercial development has badly hindered the island's economic development. We are further constrained by Federal laws and regulations, some of which arise from the presence of military bases on the island, which also hamper our ability to generate local taxes.

My bill offers a solution to this problem by calling for payment of $3.5 million next year and thereafter to Guam. This money is essentially going to offset the lack of tax revenue from the sizable Federal presence much in the same way that the United States provides the District of Columbia with over $300 million each year.

Several years ago, I was pleased to cosponsor legislation which provided States and the territories with a payment in lieu of taxes for tax-exempt Federal lands within their boundries. Guam received only $230 for fiscal year 1981, hardly an amount sufficient to offset the loss of revenues from federally owned tax-exempt property.

While we welcome the Federal Government as our neighbor, we want Washington to recognize that good neighbors do their fair share of maintaining roads, schools, and other facilities. This is not currently the case. It is unfair for the Federal Government to tie up thousands of acres of valuable lands and not expect to compensate the local government in any way. This measure is an important step in this direction and I hope that it will receive fair consideration by the Congress.

Thank you.●

FIRST AMENDMENT RIGHTS ARE THREATENED BY ABUSES

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. McCLORY. Mr. Speaker, there are increasing evidences of abuse of first amendment rights. Indeed, it appears that many misrepresentations projected by the media are known to be false and misleading.

A straightforward and courageous statement of the dilemma the media seems to have created for itself is set forth in a commentary by Mike McClory which appeared in the November issue of the Hill Rag. Mr. Speaker, I am pleased to attach Mike McClory's article "And Now the Noose." I believe his hard-hitting and eloquent words should arouse the media to a greater sense of responsibility at the risk of jeopardizing first amendment rights by reason of deliberate and egregious abuse.

AND NOW THE NOOSE

(By Mike McClory)

Political commentator Jack Anderson, contrary to what some people say, is not the biggest liar in America. But you might have a hard time explaining that to Senators Ted Stevens (R-Alaska) and Mark Hatfield (R-Oregon).

On ABC's "Good Morning, America" the other day, Anderson accused Senators Stevens and Hatfield of "conspiring" against President Reagan. "Conspiring" means "planning secretly with other to do something unlawful or wrong"—like committing a crime. Historically, the most famous con-

spirators were Senators Cassius and Brutus. Thus the term "conspiring" has particularly ugly connotations.

The truth, of course, is that both Stevens and Hatfield, along with many other senators who question some of President Reagan's defense-spending plans, are communicating quietly and reasonably with one another rather than spouting irresponsible rhetoric on network television.

Words can be weapons, and the word "conspiring" jumped out of Anderson's mouth as quick as a slug from a Saturday night special. According to Dwight Dyer, Staff Director of the Senate Defense Appropriations Subcommittee, "The senators agree on some points, disagree on others. Anderson's report is 100 percent false."

All lies are made of words, and the way that words are manipulated can lead people to believe all kinds of nonsense.

One popular nonsense word is "radical." The Washington Post printed a story a while ago saying that Cuba was trying to sway certain countries in a more "radical" direction, meaning toward the Soviet Union. The next day, the Post and all three networks reported that Polish union leader Lech Walesa was elected president of Solidarity over three candidates who were more "radical," meaning against the Soviet Union. Clearly, "radical" cannot carry both meanings.

Distorting the meaning of "radical," and its cousins "left-wing" and "revolutionary," has been common practice within the American media establishment for a long time. The predictable result is that most of the American public is utterly confused about what is really going on in the world.

"Radical" is generally associated with communism, which in its idealized form is supposed to place the means of production in the hands of the proletariat—the working people. Thus, "radical," "left-wing," and "revolutionary" societies should be those in which people enjoy the opportunity to oppose, and collectively replace, an unpopular government. Unfortunately, precisely the opposite is true.

In the Communist countries—most obviously the Soviet Union and Cuba—people become property. The communist governments operate more like fascist dictatorships or absolute monarchies than the perfect societies Karl Marx envisioned. They are, in fact, no more than self-perpetuating, tyrannical bureaucracies—that is, "right-wing."

In many circles "radical" and "left-wing" have become terms of intellectual approval. Those persons who want to appear enlightened, and who feel that "liberal" has come to mean simply following the political line of the AFL-CIO, will describe their politics as being "somewhat radical" or "leaning to the left." What they actually mean is that their views are "advanced," and "good."

Good guys "lean to the left" and feel sympathy for radical causes. Terrorists throughout the world figured out this "good guy" syndrome a long time ago. Wanton murder in the name of "radical opposition to oppression" is translated into legitimate political activity, and psychopathic criminals become idealistic political revolutionaries.

The good guys actively supported or went along with the "radicals" who overthrew the shah of Iran and formed a "revolutionary" government. Even now, when it is obvious that Khomeini's cruel, ayatollah-controlled government is trying to force upon that nation a hopelessly reactionary medievalism, news reports constantly refer to Iran's "revolutionary this" and "revolutionary that."

Distorting the meaning of words is a subtle form of disinformation—the art, long practiced by Soviet propagandists, of portraying the opposite of what is true. But propaganda is only one reason for reporting disinformation. It may also be done for profit. The Washington Post, for instance, recently—and reluctantly—apologized for publishing disinformation about former President Carter's bugging activities.

Jack Anderson's "conspiring" remark is clearly disinformation of a very low order. Now, what do you think the chances are that either Ted Stevens or Mark Hatfield will hear words of apology from ABC?●

VIEWS ON THE DEPARTMENT OF DEFENSE APPROPRIATIONS BILL

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. RAILSBACK. Mr. Speaker, I appreciate the opportunity to discuss my views about defense spending, especially in regard to the MX missile system and the B-1B bomber. While I believe we must support a strong defense and maintain nuclear parity with the Soviet Union, I am concerned about excessive increases in defense programs when important social programs are being cut.

Granted, we are not adequately prepared for either a conventional or nuclear war. However, rather than hoping an increase in spending will help solve the problem, we should encourage wise decisionmaking and procurement policies. Our forces are in need of spare parts and a generally upgraded conventional weapons system. Yet, I often feel the Pentagon puts too much emphasis on very complex and costly weapons. That is why I voted for an amendment to the Department of Defense appropriations bill which sought to reduce funding for military procurement and research and development (R. & D.) by 2 percent, while maintaining funding levels for spare and repair parts and ammunition.

Two items in the appropriations bill are of particular concern to me; namely, the MX missile system and the B-1B bomber:

MX missile: In the past few years, I have had serious doubts about the wisdom of basing MX missiles in a multiple protective structures (MPS) system that could become obsolete if the Soviets add enough missile warheads to destroy all shelters. So, I have consistently supported efforts to require a study of alternative basing modes rather than placing all research and development (R. & D.) money into one. The President is proposing a temporary plan to superharden 100 Titan silos to house MX missiles, while studies of basing modes are conducted. I agree with this approach and therefore voted against the amendment to delete $1,913,200,000 for MX R. & D.

B-1B bomber: The B-1B bomber is costly and may not give us enough advantage over the B-52 to warrant the cost. I understand that a CIA analyst indicated during hearings that the B-52 could penetrate Soviet air space until 1991 and, at another time, Defense Secretary Weinberger stated that flying a B-1B into the Soviet Union as early as 1990 would be suicidal. When I consider the fact that the first 12 B-1B's will not be ready until 1986 at the earliest and that the "Stealth" advanced technology bomber could be ready by 1989, I question the need for producing 100 bombers that may eventually be used only to carry cruise missiles and conventional weapons, a mission that could be carried out by the B-52's.

The B-1B's are expensive. In July, the Air Force estimated a cost of around $20 billion for the program, but I understand inflation could bring the figure close to $30 billion. That is $300 million for each plane—almost enough to fully fund the Legal Services Corporation. The House recently cut the budget for Legal Services from $341 million to $241 million. At a time when social programs are being cut dramatically, I do not feel a bomber that may only be used at its optimum for a short time should be built. So, I supported the amendment to delete $1.8 billion for B-1B procurement while maintaining $292 million for R. & D.●

FIFTH ANNIVERSARY OF THE UKRAINIAN HELSINKI GROUP

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. ECKART. Mr. Speaker, once again the anniversary of the Ukrainian Public Group to Promote the Implementation of the Helsinki Accords is passing by with the hopes of the group's leaders unrealized. While the express purpose of this admirable family has been undermined by the enemies of human rights, the group and its message are certainly not passing unnoticed.

In the free world, the heroic efforts and sacrifices of the Ukrainian group are an example we must remember. Our efforts must reflect their dedication. We must not condone the injustices of Soviet human rights violations through the silence of Congress, the collective voice of the United States. Certainly, the Soviet oppression of Ukrainians, Soviet Jews, Lithuanians, Afgans, and others is shocking, although the Soviet's actions, however

perverse, are not particularly surprising. Constant oppression is a fact of life for dissidents and their families.

Even in the Soviet Union, the efforts and ideas of the Ukrainian group are commanding attention. This fact is apparent in the continuous and diversified attempts to subvert the group's motives. The Soviet leaders must be confounded at the resilience of those under their heavy hand. To those of us whose ancestors and immediate families fought for natural rights, though, the spirit's strength is indomitable.

Mr. Speaker, I am honored to be able to speak for the rights of the people of the Soviet Union. I am even more honored to actively aid in the fight being waged by the members of the Ad Hoc Committee on the Baltic States and Ukraine.●

HUD MISMANAGEMENT IN THE ATLANTA AREA

HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. BARNARD. Mr. Speaker, for some time, I have been concerned about the vast amount of waste in many Federal projects. In one area in particular, my collegue, ELLIOTT LEVITAS, has been trying to end poor construction practices in HUD projects in the Atlanta area.

Several years ago, he made a major effort to end this shoddy work in a project in Rockdale County. This work was so poorly done that although it cost over $5 million by the time it was completed in 1972, it had to be torn down in 1976 because it was unsafe.

After a congressional investigation and a report by the HUD Inspector General, the Department agreed that it has been wrong, and promised to correct the policies. Now, I understand that a new report has been issued that shows few if any improvements, even though over 3 years have passed.

I want to congratulate my colleague on his continued efforts to eliminate Federal waste in Government, and to join his call for a complete investigation and the correction of these abuses.

The following article from the Atlanta Journal of November 5 details some of this controversy, and I would like to bring it to the attention of my colleagues.

[From the Atlanta Journal, Nov. 5, 1981]

LEVITAS' BATTLE WITH HUD

(By Durwood McAlister)

Fourth district Congressman Elliott Levitas is no babe in the woods when it comes to dealing with government agencies; he knows as well as anyone their capacity to resist change.

But even Levitas is astounded by the mule-headed refusal of the Department of Housing and Urban Development to do something about its gross mismanagement of public housing construction.

Levitas thought he had brought HUD to heel three years ago.

Armed with a "spectacular example of mismanagement" of a multifamily housing project, he had requested an Inspector General's investigation which resulted in a full hearing of the Subcommittee on Housing and Community Development.

That hearing detailed the almost unbelievable story of the Rockdale apartment project in Rockdale County. Almost $5 million of taxpayer dollars went down the drain because of HUD's failure to perform.

The project, completed and occupied in 1972, lasted only four years. It was totally demolished in 1976, under HUD's order, because it was no longer safe for occupancy.

Investigators told the subcommittee that they found faulty work by construction contractors, inadequate performance by the supervisory architect and improper approval of construction change orders.

All of those deficiencies could have been corrected if HUD inspectors and their supervisors had done their job; but the investigators reported that the inspectors failed to perform.

Stung by the Rockdale case, and by the Inspector General's report indicating that the project was not an isolated case but was indicative of a nationwide problem, HUD acknowledged its failure and promised to correct the situation.

That was more than three years ago. Now, there is a new report from the Inspector General's office and a disillusioned Elliott Levitas is hopping mad.

"We find to our disgust," he said, "that the new report yet again reveals serious mismanagement of funds in the construction and administration of housing projects."

He added, "What makes this situation so outrageous is the fact that HUD has had more than three years to correct these problems in oversight and management, yet has apparently done little or nothing to solve them. The problems were those identified three years ago, which HUD acknowledged and promised to correct, and, yet, the same abuse is still going on."

Levitas has called for new hearings by the Subcommittee on Housing and Community Development to air charges by the Inspector General that 16 housing projects in the Atlanta area have been plagued with more than 600 construction deficiencies.

More than 100 of those are considered serious enough to "adversely affect the health and safety of the residents," according to Levitas.

It is apparent by now that in trying to move HUD to change its ways Levitas is mud-wrestling with a hippopotamus in a gumbo swamp, but he is determined to stick with it.

He deserves all the help he can get.

Those who are profiteering at taxpayer expense and foisting their shoddy failures off on the poor ought to be punished.

And the HUD inspectors who, through carelessness or criminal neglect, have allowed abuses to occur should be fired and prosecuted for their dereliction of duty.●

LEGISLATIVE NEEDS AND USES OF TOXICOLOGICAL INFORMATION

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. WALGREN. Mr. Speaker, the Subcommittee on Science, Research and Technology has a great interest in the use of modern information technology in health and environmental monitoring. I would like to bring to the attention of the House a recent paper, "Legislative Needs and Uses of Toxicological Information," which is very informative on this matter. This paper was presented on September 17 at a National Library of Medicine Symposium on Information Transfer in Toxicology by Gilbert Gude, Director of the Congressional Research Service. Mr. Gude's paper not only reinforces the need for the best available information in the field of toxicology as well as other fields, but also the key role which professional researchers and information specialists play in making subject material most usable to all of us who work in the legislative branch.

There are vast resources of technical and research information available in every field, but its existence does not guarantee it will be used to best advantage, if properly used at all. Congress must have expert help in extracting what is significant and pertinent in every area.

LEGISLATIVE NEEDS AND USES OF TOXICOLOGICAL INFORMATION

(By Gilbert Gude)

The Congressional Research Service, one of four congressional support agencies, works exclusively for Congress—for all the Members and all the committees; and CRS work—information, reference and research—covers all subject areas of congressional interest. The inquiries from Members and staff—by phone, letter or in person—exceed 310,000 a year and the number of requests has increased at an average rate of 8.9% each year over the past decade. As in so many areas of domestic and international concern, Congress also has a substantial and growing interest in toxicological information and research.

Responses to congressional inquiries in this subject area are handled primarily by four units: the Reference Division, the Science Policy Research Division, the Environment and Natural Resources Policy Division; and the American Law Division. In addition, the Library Services Division receives some congressional inquiries for bibliographic information, but largely provides bibliographic support to all research and reference divisions and congressional offices through on-going programs.

Requests from the Hill for information on specific toxic materials or situations involving toxic materials can be handled by a reference librarian in one of four Reference Centers, by a telephone discussion with an analyst or by a several page memo prepared in one of the three indicated research divi-

sions; more complex requests requiring professional analysis and some hours, days or even weeks of research time would be assigned to a research division.

The CRS Reference Division handles the majority of inquiries and in most instances responds to the Member or committee office in less than twenty-four hours. A typical request recently received from a Senator's office and assigned to the Reference Division asked for "the official report of the studies made on polycarbonate resin." The question involved one of the Senator's constituents who was concerned that chemicals used in the manufacture of containers were migrating into the beverage. A reference librarian on the Science and Environment Team searched several data bases, including Chemical Abstracts, Scisearch, Enviroline, and Chemname; these searches were fruitless, so the staffer consulted the Food and Drug Administration. FDA staff indicated that the problem had been treated in a Federal Register report on chemical migration contaminating beverages in acrylonitrile plastic bottles.

CRS endeavors to respond to a repetitive number of similar questions with two types of publications—the Issue Brief and the CRS Report—and by means of the data base retrieval system, SCORPIO. Currently, the Service has eleven out of approximately 350 Issue Briefs which deal with particular toxic substances or toxic substance pollution problems.

A typical Issue Brief, "Agent Orange: Veterans' Complaints Concerning Exposure to Herbicides in South Vietnam," was first entered into the Issue Brief System on September 6, 1979; in addition to hard copy distribution, the pages of Agent Orange, like all Issue Briefs, can be scanned individually through the SCORPIO video consoles which are part of the equipment in more than half of the Member and committee offices. Issue Briefs are updated daily, if necessary, to reflect developments, new data, recent congressional activity and any other factors of importance. Agent Orange has been updated altogether sixteen times—the most recent updating was August 3rd of this year.

The Brief provides a detailed definition of the Agent Orange issue and the basis for congressional interest. Following the Issue Definition, a Background and Policy Analysis provides a history of the problems associated with Agent Orange and its toxic contaminant, dioxin (TCDD). The history begins with the summer of 1969 when the first reports of human birth defects allegedly attributed to Agent Orange exposure appeared in Vietnamese newspapers. It continues with the growing awareness of the problems associated with TCDD, and provides toxicity data on the substance for both animals and humans. The analysis also includes in tabular form, by site or location, data on workers who have been exposed to phenoxyacetic acids and their contaminants. The Background and Policy Analysis continues with the history of Agent Orange use in Vietnam with details as to the amounts of TCDD possibly released as a contaminant in various missions and the amount of land area treated by the defoliating herbicides. Included is a discussion of the number of personnel possibly exposed to the herbicide and an analysis of the Department of Defense and Veterans Administration efforts to deal with the problems of military personnel who were exposed or allegedly exposed to the material. The Policy Analysis ends with a succinct series of questions which highlights the issues confronting the Members of Congress when they consider policy options relating to this toxic substance.

The Issue Brief itself concludes with a summary of congressional action in the 96th Congress and the citation of specific legislation introduced in the 97th Congress to deal with Agent Orange problems; a list of congressional hearings, reports and congressional documents; and finally, a short list of additional reference material. Altogether the Agent Orange Issue Brief is only 25 pages in length, but it provides a legislative assistant or a Member of Congress, in just a few minutes reading, a good overview of a complex subject. As is the case with all CRS work the author or reference librarian who prepares the material is always cited so a Member or staffer can make easy contact with a knowledgeable source of information.

The CRS Reports, like the Issue Briefs, also deal with subjects of some general congressional concern or interest. Reports are produced in hard copy but are not available through the SCORPIO system; the subject matter is of such a nature that only occasionally are they revised. They generally examine one aspect of an issue or problem in greater depth than an Issue Brief and they do not have a structured format with such items as legislative histories and bibliographies. Reports may run from 15 to as high as 300 pages in length.

The Report, "Food Safety Policy Issues"—made available to Congress this last June—is typical of this type of CRS product; it deals in part with toxic substances. It was authored by two analysts—one from the Science Policy Research Division and one from Environment and Natural Resources Policy Division—and a Congressional Science Fellow working in the Science Policy Division. In addition to food regulations and laws and the administrative structure of Federal food agencies, the report also deals with toxic contamination of food. The document examines matters dealing with setting tolerance levels for animal drugs, pesticide residues, and environmental contaminants in food, and discusses the detection of violations and enforcement of standards. The section dealing with toxic contamination also provides the reader with an excellent overview of matters or questions concerning the food safety issues upon which Congress might legislate, or about which constituents might contact their Members.

For issues or subjects of intense congressional interest or public concern, the Reference Division often combines Issue Briefs and/or CRS Reports with other relevant material in a kit called an Info Pack. Currently the Reference Division maintains approximately 110 infopacks; eleven of these pertain to toxic substances or related problems. For example, the Air Pollution Info Pack includes the Issue Brief, "Clean Air Act: An Overview;" a committee print on the progress against air pollution; a League of Women Voters report—"Blueprint for Clean Air"—and a concise bibliography on air pollution. Research and Reference Division staff work together to assemble the highest quality, most pertinent, and most succinct material so that the Info Pack which CFS provides give a balanced and comprehensive picture of the subject matter.

The Service distributes CRS Reports, Issue Briefs and Infopacks only to its congressional clients but Members use these CRS products in performing part of their representative function—providing information requested by their constituents. However, a substantial amount of Congressional Research Service information and research work enters the public domain when published by the Government Printing Office as committee print reports, or as documents of the Congress. This activity is usually carried out by Service analysts and researchers who work very closely in conjunction with the staff of congressional committees. CRS staff often support committees in organizing hearings; they may assist in selecting appropriate witnesses, providing background material on the subject to be examined, drafting questions for the various witnesses and finally preparing the committee report.

CRS staff can be involved in the production of other types of committee publications which are designed to provide information or direction without benefit of a hearing. For example, "An Overview of Research in Biogeochemistry and Environmental Health" provides a comprehensive view of these science activities and makes recommendations as to executive department action. Published in March of 1979, the report was prepared for the Subcommittee on Science, Research and Technology of the House Committee on Science and Technology. A CRS senior specialist, an assistant chief of the Science Policy Division, a CRS visiting scholar, and two analysts of the Science Policy Research Division were involved in the preparation and review. The overall study was directed to the influences of the biogeochemical environment on human health and disease; it was to provide information background on the field of biogeochemistry, a summary of Federal research in biogeochemistry, an analysis of major unresolved problems, and an identification of the non-Federal agencies which provide funding for biogeochemical research. The report also provided a preliminary discussion of research objectives and priorities which the Subcommittee might appropriately examine.

In examining biogeochemistry and environmental health research, the report looks at the question of toxic effects of biogeochemical agents, particularly as to their role in disease causation and toxicological, mutagenic, teratogenic, carcinogenic, and genetic effects, The study concludes that there is less national coordination and emphasis being placed upon research in methodology and epidemiology in biogeochemistry than in biology, toxicology and nutrition. In particular, the conclusion notes, there seems to be little cooperation at the national level of the priority process determination and a potential for interdepartmental cooperation in project findings, particularly in ecology, biology and toxicology.

An example of another type of committee publication, designed for use in reference to pending legislation, was the report: "Six Case Studies of Compensation for Toxic Substances Pollution: Alabama, California, Michigan, Missouri, New Jersey, and Texas." This report was to provide information in connection with proposals dealing with the compensation of victims of toxic substance pollution and was prepared by the Washington D.C. Environmental Law Institute under a contract with CRS. Three CRS divisions suggested the analytical framework of the report and reviewed the final product. Specifically, the research was directed to achieve the Committee's objective by examining several incidents of toxic substance pollution and the adequacy of the legal framework. In each instance the study

delineates the existing State legal mechanisms which provides compensation to victims in the incidents; shows whether the parties that caused the incidents were held or could readily have been held liable for damages sustained; assesses the adequacy of compensation obtained; and identifies some legal and non-legal barriers to recovery in the cases reviewed. The toxic substances covered in the report include mercury; PCB's; pesticides such as DBCP, alpha-BHC and Lindane; radioactivity in ground water; chlorine; toxic chlorinated hydrocarbons; dioxin tainted oil; lead; and kepone.

Although a substantial segment of Congressional Research Service work goes into several types of publications—tailored to the various needs of Members, committees and their staff—a large amount of information and research transfer is carried on in a verbal mode. Researchers and analysts may provide the necessary information in telephone conversations, or briefings of Members and staff on a personal one-to-one basis. More formal oral information transfer takes place at CRS-organized workshops and seminars. Seminars and workshops are tailored to the varying needs of Members and committees and the breadth of the subject matter involved. Good examples are seen in two seminars which took place earlier this year—one on acid rain and one on perspectives on current food safety policy. Members and legislative staff are invited to these seminars, usually held in CRS facilities. CRS analysts served as moderators for both of these seminars; both were scheduled for three morning hours and employed panels of outside experts. Panelists in the Food Safety Policy program included officers or representatives of the Food and Drug Administration, the Department of Agriculture, the Community Nutrition Institute, the Grocery Manufacturers of America, and a law firm engaged in practice involving food safety laws and regulations. The acid rain seminar included distinguished experts from EPA, the Department of Agriculture, NOAA, and CEQ. Seminar presentations always have questions and answer periods and the opportunity for Members and staff to obtain other Reports, Issue Briefs, committee prints and materials on the subject area. Some seminars are open to Members only; they are scheduled either as breakfast events or dinner events, depending on the pace of business on the Hill.

On occasion seminar or workshop formats are opportunities for the preparation of TV or audio cassette presentations which can be utilized by Members and Hill staff. For example, one CRS audio cassette involves a 30-minute discussion of the background and present level of knowledge concerning the acid rain problem. These audio tapes can be played over the House closed circuit system or made available for Members or staff to play on home cassette players.

In supporting Congress with reference and information materials and research, the Congressional Research Service maintains a unique role in the interface between the world of information and research and the legislative milieu of Congress.●

PERSONAL EXPLANATION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. McDONALD. Mr. Speaker, during the past 2 weeks I had the privilege to tour 19 cities in my State as a participant of the Georgia Chamber of Commerce's Prelegislative Forum. Because of this commitment, which was made when the House originally intended to adjourn the first of November, I regrettably missed various votes. I was paired on each vote but failed to receive a live pair on each vote. Therefore, in order to set the record straight, I would like to take this opportunity to explain how I would have voted had I been present.

"Yes" on rollcall No. 297, a motion to recommit the conference report on H.R. 4035, Interior and related agencies appropriations for fiscal year 1982, to the committee of conference. A live pair was received.

"No" on rollcall No. 299, ordering the previous question on the rule, House Resolution 271, to House Joint Resolution 357, making further continuing appropriations for fiscal year 1982. A live pair was received.

"No" on rollcall No. 300, the rule, House Resolution 271, to House Joint Resolution 357, making further continuing appropriations for fiscal year 1982. A live pair was received.

"Yes" on rollcall No. 305, committee amendments to H.R. 1797, authorization of coastwise trading privileges to the vessel *Capt. Tom.*

"Yes" on rollcall No. 309, the conference report to S. 815, the Department of Defense Authorization Act of 1982.

"No" on rollcall No. 310, passage of H.R. 4482, to establish a U.S. circuit appeals court and a U.S. claims court. A live pair was received.

"Yes" on rollcall No. 311, the conference report to H.R. 3454, the Intelligence Authorization Act.

"No" on rollcall No. 312, the conference report to H.R. 4522, District of Columbia appropriations. A live pair was received.

"No" on rollcall No. 313, a motion offered to the conference report on H.R. 4522 that the House recede from its disagreement and concur, with an amendment, to Senate amendment No. 42. A live pair was received.

"Yes" on rollcall No. 314, the rule, House Resolution 275, to H.R. 4995, Defense appropriations for fiscal year 1982.

"No" on rollcall No. 315, an amendment to H.R. 4995, to delete $1.79 billion in funding for Air Force aircraft procurement.

"No" on rollcall No. 316, an amendment to H.R. 4995 to delete $1.8 billion in funding for the B-1 bomber. A live pair was received.

"No" on rollcall No. 317, an amendment to H.R. 4995 to delete $1.9 billion in funding for the MX missile and its basing mode. A live pair was received.

"No" on rollcall No. 318, an amendment to H.R. 4995 to reduce by 2 percent funding for military procurement and research and development, excepting spare parts. A live pair was received.

"No" on rollcall No. 319, an amendment to H.R. 4995 to reduce by 2 percent funding for military procurement and research and development, excepting spare parts, repair parts, or ammunition. A live pair was received.

"Yes" on rollcall No. 320, passage of H.R. 4995, Defense appropriations for fiscal year 1982. A live pair was received.

"Yes" on rollcall No. 321, House Concurrent Resolution 224, expressing the support of the Congress for the President's initiatives for peace.

"Yes" on rollcall No. 322, the conference report to H.R. 3413, Department of Energy national security programs authorization for fiscal year 1982.

"No." on rollcall No 323, House Resolution 280, the rule to H.R. 3663, Bus Regulatory Reform Act of 1981. A live pair was received.

"No" on rollcall No. 325, passage of H.R. 3663, Bus Regulatory Reform Act of 1981. A live pair was received.

"No" on rollcall No. 326, House Joint Resolution 349, authorizing United States participation in implementation of the Egypt-Israel Peace Treaty. A live pair was received.●

NEW BREED OF ACTIVIST BUSINESSMEN

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1980

● Mr. HYDE. Mr. Speaker, there is an ever increasing role that businessmen are playing in helping shape not only our economy, but our political institutions as well. This role has heretofore confined to labor leaders and academics and the differing perspectives of businessmen are providing a needed balance to this important area. I share with my colleagues an excellent article by Columnist Bob Wiedrich, in the November 8 Chicago Tribune, dealing with this new development:

UNION DECLINE OPENS DOOR FOR BUSINESSMEN TO TAKE OVER

The declining membership and political clout of American unions are creating a new breed of activist businessmen.

Instead of waiting around for somebody else to make things happen, they are moving to make things happen themselves. Instead of serving as docile whipping boys for many of the nation's economic ills, they are starting to fight back.

If ever the day comes that politicians treat businessmen at least as equals with

labor leaders, prosperity may be just around the corner.

That is the message being spread by Calvin A. Campbell Jr. president of Goodman Equipment Co., a heavy mining machinery manufacturer on the South Side.

He is advising fellow private enterprise practitioners to stand up and be counted instead of cowing in the face of unionized political power, which he contends is rapidly becoming a myth.

Campbell said union workers have declined by 19 per cent in the last decade. There are fewer strikes than in recent years. There are more union decertification elections and more are being sustained.

"That's a trend," Campbell asserted, "and without the public worker unions, that percentage would be even dramatically less. . . .

"Further, there is a lot of union-breaking going on. There are private consultants to advise businessmen on how to prevent unions from being formed and how to get rid of them.

"The consultants put on seminars. They are flourishing. And the unions know it. So I'm suggesting that unions should change to prevent further erosion of their membership and strength.

"The thing that amazes me is that politicians, particularly liberal and Democratic Party politicians, continue to hold on to the view that unions have as much political clout as they once did. I don't think they do. And I don't think they'll hold on to what they have unless they reform.

"Coincidentally, the three industries that have had the toughest and most powerful unions are the industries in the greatest economic trouble today—the automotive, steel, and rubber industries."

Campbell maintains that he is not antiunion. He said his firm has good relations with the United Radio and Electrical Workers of America that represents more than 300 of his 500 employes.

Campbell believes unions have done much good for American workers and will continue to do so. But, he argued, union leaders and politicians must change their attitudes if the nation is to emerge from its economic morass.

"They have to recognize that businessmen are the people who create jobs," he said. "They have to recognize that if a businessman is successful, these jobs will become more secure and higher paying and will increase in number.

"That's why I believe the businessman will emerge as a stronger political force in relation to labor leaders. In the past, businessmen have commanded few votes. Now, the businessman will become a political activist.

"I see him advising his employes how to vote on certain issues that are in their best interest. He will speak out in behalf of his company and industry.

"In the last 30 years, the businessman has not contributed much politically. He has sat back and let labor leaders be vocal. He has been afraid of customers, employes, stockholders, and organized labor. Now, I believe the businessman recognizes he is the primary source of job creation.

"Labor has a role to play that is equally important. That's why I am not antiunion. And that role is teamwork and cooperation while still pursuing the goals of unionism.

"Let's assume I want to build a plant. Unions have to start promoting causes that will permit me to build that plant and create jobs. In years past, unions have supported a lot of causes that have worked to the detriment of business, tough occupational safety and health and environmental regulations that have stifled the desirability and profitability of building or expanding a business.

"Unions should assist in promoting the need for such expansion. I'm not asking them to compromise principle.

"I don't believe wages should be scaled back. What needs to be given up are certain job descriptions, the numbers of people assigned to certain jobs, as well as time worked and work rules. Job pay should be given up only when economics demands it for survival.

"What I'm talking about is things that inhibit cost-effective operation and bloat payrolls, which decrease productivity and destroy competitiveness.

"Labor leaders have to recognize that these changes have to be made. I believe many workers already recognize that reality. But the union leadership has to support these changes if American industry is to be competitive with itself and the rest of the world."●

THE MUSEUM FOR THE BOROUGH OF BROOKLYN, SHELLY MEHLMAN DINHOFER, DIRECTOR

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. SCHUMER. Mr. Speaker, I rise today to pay tribute to the newly developed Museum of the Borough of Brooklyn at Brooklyn College.

The museum and its archives will be devoted to the cultural and visual history of Brooklyn, to the preservation, conservation, and exhibition of works of arts relating to its past as a flourishing art center as well as its growing relationship to the contemporary art scene. The museum will no doubt become a cultural landmark serving students, professionals, the community, and all of Brooklyn.

The recent success of the museum's first show, "Erie Basin: Turney's View and Today" which focuses on the early work of artist, Winthrop Duthie Turney, can be attributed to the outstanding efforts of Shelly Mehlman Dinhofer. Shelly, an art historian and collector, as well as a devoted resident of Brooklyn, has excelled in her role as coordinator of Brooklyn College's Museum of Brooklyn.

The cultural flavor and ethnic diversity provided by the museum will go unmatched for years to come. Shelly's success in producing the Turney show and in coordinating the museum's programs and studies has already favorably affected the community. It is easy to foresee an extremely important exchange between local artists, historians, and students.

We in Brooklyn, welcome the Museum of the Borough of Brooklyn and commend Shelly Mehlman Dinhofer for her outstanding efforts.●

THE INTRODUCTION OF H.R. 5012 "THE EMERGENCY TIMBER SALE ACT OF 1981"

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. WEAVER. Mr. Speaker, high priced Forest Service and BLM timber keeps the western Oregon timber industry from competing in lumber markets, curtailing their operations, and adding drastically to the unemployment of mill workers, loggers, truckers, tree planters, and others.

I believe it is essential that existing high priced Forest Service and BLM timber sale contracts be terminated at the timber sale holders' option, and that these sales be placed up for sale immediately, under terms that would require their prompt harvest.

I am introducing a bill to accomplish this. As chairman of the House Forests Subcommittee, I will call a hearing immediately and will push for fast enactment. While BLM timber is not mentioned in the bill, I intend to add the BLM to the bill in a later stage of the legislative process. The bill reads as follows:

Any U.S. Forest Service timber sale contract holder may elect to terminate such contract without prejudice or damage, by notifying the Forest Service within 40 days of the enactment of this act.

The Forest Service shall expeditiously offer for resale by auction all such terminated contracts, and under terms which require prompt sale completion and harvest of the timber.

I will place in the committee report of the bill the following directions to the Forest Service.

First, that steps be taken to reform the bidding process to disqualify speculators.

Second, that terminated small business set a-side sales be replaced as small business set a-side sales.

Third, that sales processing costs be charged to any purchaser whose sale is terminated up to $10,000.

Fourth, that bidding procedures be reformed to require substantial guarantees of performance on future contracts.●

A TRIBUTE TO JOHN RAKER

HON. EUGENE JOHNSTON

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. JOHNSTON. Mr. Speaker, I want to take this opportunity to salute the great spirit and contributions of one of the outstanding citizens of Davidson County—Mr. John Raker. Mr. Raker was born in Davidson County, and in over 80 years as a resident, he

has truly made a special mark on that community.

Mr. Raker's love of country and dedication to his community are total, and his involvement in local affairs prove this beyond a doubt.

As a businessman, John Raker has taken time away from his business to serve his community as a member of the Civitan Club, the Royal Order of Red Men, the Oasis Shrine, the Masons, and the Junior Order.

After joining the First Reformed Church in 1907, Mr. Raker has served as an elder and deacon of that church, which is now the United Church of Lexington.

In addition to his commitment to the community and his religious principles, Mr. Raker is one of America's great patriots. His steadfast belief in a strong government has been demonstrated time and time again by the fact that Mr. Raker has not missed a State or county convention since 1920.

Mr. Raker has worked tirelessly to enrich his community, his State, and his country. I would like to honor him for his outstanding achievements and inspiring contributions to Davidson County.●

REAGAN'S FRIENDS?

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. GINGRICH. Mr. Speaker, columnist Louis Rukeyser recently wrote an open letter to President Reagan about the Reagan economic program. Rukeyser's advice to the President is this: Rally your troops and stick to your guns, Mr. President.

I insert in the RECORD Rukeyser's column, "Reagan's Friends Doing Him In?", from the Atlanta Constitution of November 16, 1981.

The column follows:

REAGAN'S FRIENDS DOING HIM IN?

(By Louis Rukeyser)

An open letter to Ronald Reagan:

DEAR MR. PRESIDENT: You did a characteristically splendid job this past week of lambasting the opponents of your economic recovery program. Now do you think you could get your supporters behind it, too?

For the discomforting truth is that your greatest problem right now may be with those who are supposed to be on your own team, but whose display of disarray and pusillanimity threatens to shoot your program in the legs before it gets 12 inches from the starting line.

For example:

It might be well for everyone in your administration to be handed a nice old fashioned sampler, suitable for framing, bearing the words: "A tax increase is a tax increase is a tax increase."

Admittedly, it won't exactly replace Gertrude Stein, but it would be a useful reminder the next time somebody tries to con the American people into believing that a tax increase is suddenly not a tax increase if you call it something else, such as "loophole closing" or "revenue enhancement."

If money is transferred from the private sector to the government, that's a tax increase. And that's all she wrote. As you yourself have acknowledged, your initial tax-cut program barely offsets the impact of inflation and previously legislated tax increases over the next three years. Any attempt to play games with "revenue enhancement," now or next year, thus leaves the Reagan administration—despite all its fine words—in the position of having imposed one more net tax increase on the overburdened U.S. economy.

And if that prospect makes you more than a little uncomfortable, Mr. President, the time to call a halt is now.

The message to your budget team should be short and unsweet: Your assignment was to reduce the federal government's share of U.S. gross national product from 23 percent to 19 percent—not to alibi your failure to do so—and certainly not to make proposals that would enlarge the government's take even further. Please go back to your offices and get on with your assigned job.

Quick, before it's too late, break the word to the "leaders" in the Republican-controlled Senate that they are in danger of leading you, and themselves, into a political and economic quagmire.

Have a quiet word with Howard Baker about the perils of terming your economic program "a riverboat gamble," announcing in advance that your budget-cut requests can't be met—and, of course, periodically blaming it all on those nasty guys in Wall Street.

That kind of stuff might confuse people as to which party is running the Senate—or should.

Tell the White House staff that, while others may be wavering with each passing wind, you are still a Reaganite.

That means you still want to balance the budget as rapidly as possible, and to do so by reducing spending rather than raising taxes. (You might start by getting to the staffer who recently described would-be budget balances as "Neanderthals.") And that means a much greater, across-the-board assault on federal spending in the budget you will submit in January.

And if anyone who's supposed to be on your team still thinks the way to save the country is to adopt a moralistic posture toward alleged tax "loopholes," I suggest you send him out promptly—for a three-martini lunch.

Your worried friend,

LOUIS RUKEYSER.●

IN OBSERVANCE OF THE 100TH ANNIVERSARY OF RHODE ISLAND'S BLACKSTONE VALLEY CHAMBER OF COMMERCE

HON. FERNAND J. ST GERMAIN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. ST GERMAIN. Mr. Speaker, let it be known that the Blackstone Valley Chamber of Commerce will mark its 100th year on the 23d day of November 1981. In observance of this milestone, the chamber will hold a gala anniversary dinner on this evening, said dinner being the culmination of events held over the past several months which have mirrored the days of yore when the chamber was first initiated.

The Blackstone Valley Chamber of Commerce is among the oldest and most respected chambers in the country. Far from being antiquated, the chamber has long been known for its quality service and for its advocacy of Rhode Island business and professional communities as well as the public at large.

Included in its long list of accomplishments is the creation and development of two industrial parks in Rhode Island which house 27 firms and have spawned thousands of jobs. The chamber also is responsible for much of the leg work involved in the construction of the Davies Vocational Technical School in Lincoln and also operates the first regional Crime Prevention Bureau ever to be instituted and run by any chamber of commerce in the Nation. All in all, the Blackstone Chamber of Commerce has added significantly to the economic, cultural and civic well-being of Rhode Island, operating both on the State and national level.

The celebration promises to combine aspects of the past, such as a salute to area organizations and businesses which have been in existence since the turn of the century, as well as a look to the future with the sealing of a time capsule, slated for opening in 99 years. The festivities commence at 6 and will be held at Providence's Biltmore Plaza Hotel. We congratulate our colleagues at the Blackstone Valley Chamber of Commerce and look forward to many more years of five-star service.●

AMERICA'S RACE AGAINST ITSELF

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. McDONALD. Mr. Speaker, there is a strange thread that runs through our relations with the Soviet Union. When forced collectivization and the ravages of war and civil war ruined the Soviet farmland, the United States stepped in and saved millions of Soviet citizens with food supplied by the Hoover relief mission. When the Soviet economy started to falter in the 1930's, we recognized their government and opened up trade which resulted in a giant boost for their industry. In World War II when the Soviets had their backs to the wall fighting off Hitler's armies, we supplied raw materials, ships, planes, trucks, jeeps, and food that helped to stave off disaster. Again, in recent years, the United States has supplied

technology to help modernize a faltering Soviet economy as well as food to feed a nation still carrying a badly producing farm sector. As the number one capitalist nation in the world, we have been and still remain enemy number one on the Politburo's list. In effect, we have been working against ourselves. Mr. M. Stanton Evans very precisely described this situation in recent times for the American Legion, October 1981. I commend this article to the attention of my colleagues. Will we ever learn?

[From the American Legion, October 1981]

AMERICAN'S ARMS RACE AGAINST ITSELF

(By Stanton Evans)

In one of the most incredible stories in the annals of diplomacy, the United States for upwards of a decade has been conducting a lethal arms race against itself.

Evidence accumulated by Congressional investigators makes it increasingly plain that the Soviet Union's recent military build-up, seen as threatening our strategic deterrent and survival, has been powerfully aided by U.S. industry. Numerous elements needed to build be Soviet war machine have been obtained, it now appears, from American and other Western business firms—with the approval of our government.

Among the most vivid examples of this process was the Soviet invasion of Afghanistan in December 1979. When Soviet troops rolled into Kabul to subjugate that hapless nation, they did so in vehicles produced at the enormous Kama River truck plant, built for the Kremlin with the help of 80 U.S. firms and an estimated $350 million worth of our technology.

When completed, Kama River will be the largest truck factory in the world, capable of producing 250,000 heavy-duty trucks annually (larger than the output of the entire U.S. truck industry), plus 100,000 diesel engines suitable for use in tanks. The plant is being built by free world firms as a result of "peaceful" trade between the East and West.

The Afghan invasion focused attention on something previously known to U.S. intelligence, but usually passed over in public debate: Kama River has been systematically used for military purposes. Six months prior to the invasion, it was known that a substantial part of the 50,000-a-year engine production was being installed in Soviet military trucks, armored personnel carriers and assult vehicles, and that Kama products were on line with Soviet military formations in Eastern Europe.

Kama River is one of dozens of examples of supposedly peaceful trade from U.S. and other Western firms being diverted to military purposes by the Soviets. Such diversion has a long history going back to the 1920s. In his monumental study, "Western Technology and Soviet Economic Development," Antony Sutton estimates that 90 percent of the advanced technology needed by the Soviets to pursue their military goals has come from the United States and its allies.

In the past decade, this process has vastly accelerated as U.S. administrations have pursued the notions of detente and bridge building with the Soviets. As a result, the United States and other Western nations have been systematically transferring to the Soviets the advanced technology that once provided the West its military "edge" essential to modern warfare.

Miles Costick, president of the Institute for Strategic Trade, which closely monitors such developments, sums up the process this way: "During the past decade the free world has been the source of much of the Soviet Union's electronic and computer technology and manufacturing 'know how.' Further, the West has supplied the Soviet industrial sector with over $50 billion worth of efficient machine tools, transfer lines, chemical plants, precise instruments and associated technologies . . . Seldom if ever has a country been able, as the Soviet Union has, to persuade the coutries against whom most of its military build-up is directed to finance so much of such a build-up."

Among the items traded to Moscow in this span have been laser technology, high-speed computers, semiconductors, jet-engine technology, advanced radar systems, inertial guidance technology and numerous other items needed to construct a modern military force. Far from applying these to peaceful commercial purposed, the Soviets have systematically used them to build their war-making potential—a situation that has set alarm bells ringing in Congress and caused Senators Jake Garn (R-UT), William Cohen (R-ME) and Henry Jackson (D-WA) to demand corrective action.

A foremost object of Congressional concern is the Soviets' gigantic SS-18 missile. According to U.S. intelligence, this missile comes equipped with 12 independently targetable warheads (MIRV), accurate enough to seek out and hit our fixed-base Minutemen. If true, this means the SS-18s can destroy a major component of our strategic arsenal.

Considering the fact that the Soviets have historically been backward in the technological areas needed for such weaponry, including computers and miniaturization, how could they have devised such an advanced system? The answer is that we provided it to them. Over the strenuous objections of the Pentagon, we permitted the sale of 164 precision ball-bearing grinders needed to manufacture gyros used in MIRVing—machinery capable of tolerances to a 25th millionth of an inch, far beyond the state of the art available to Moscow or anywhere alse outside America. As a result, says Garn:

"Not only have Soviet-MIRVed ICBM's reached accuracies previously undreamed of by U.S. strategic analysts, but all Soviet military systems and equipment requiring precision inertial guidance have also reached a new level of accuracy and sophistication. According to official U.S. government sources, we can expect Soviet advances in other areas as a result of the end products of this ill-fated sale that could be most crucial to the strategic balance, including advances in Cruise missiles and ABM technology . . ."

While the SS-18 is the most formidable of military devices apparently made available to the Soviets through technology transfer, there are many other developments in a similar vein injurious to our security interests. While many aspects of this subject have been mantled in official secrecy, transactions that have come to public view include the following:

A corporation in the Southwest has sold, either directly or through foreign subsidiaries, 36 array transform processor systems, needed for the development of advanced submarine detection. According to Costick, these systems are now being installed in Soviet ships used in anti-submarine missions and, along with other technologies provided by U.S. firms, are capable of threatening the Trident submarine—another key component of our strategic deterrent.

Between 1975 and '79, on the estimate of defense specialist Sean Randolph, U.S. computer and electronics firms sold the Soviets $300 million worth of computer and related equipment. Computer technology is essential to ICBM guidance, ABM warfare and numerous other aspects of modern warfare. The Soviet "Ryad" system, used in its ICBM and SLBM programs, is based on IBM 360 and 370 computers illegally diverted into the USSR in the early 1970s. The Kama River truck complex contains an IBM 370 computer. In 1976, Control Data sought to sell the Soviets an even more advanced computer—a transaction halted by an outcry in Congress.

In 1974, the U.S. government approved the sale to Poland by a French consortium of integrated circuits based on U.S.-licensed technology—miniaturized systems essential to ICBM guidance. These circuits, Costick notes, are typical "dual-use technology," used in pocket calculators, digital watches and TV sets, but also in ICBM guidance and aircraft fire control systems.

In like fashion, our government approved the sale to Moscow by a Swedish firm—again using U.S. technology—of the advanced air control system at Vnukovo airport in Moscow. This highly sophisticated system employing computer-guided radar can detect any kind of airborne object and calculate its future flight path with instantaneous accuracy.

The Soviets also obtained the RB-211 engine used to power widebodied jets and well suited to long range bombers. This engine was developed with $300 million in research and development grants from the U.S. government.

In 1980, the Carter administration approved the sale to Moscow of $144 million worth of technology for developing superhardened drilling bits for deep oil well drilling, technology that not only could augment the energy potential of the USSR, but also could be transferred to such uses as making armored projectiles.

These data from a burgeoning record would seem to bear out the grim conclusion of Senator Garn that "what remains of our once-vaunted military superiority, on which our national security increasingly depends, is in part being whittled away through a wide variety of technology transfer mechanisms . . . History will show that it was during the so-called period of detente that the Soviet Union began to challenge Western interests on a global scale and mounted its drive for total military superiority over the U.S."

The alleged rationale for this transfer of technology is that it builds bridges of mutual dependence between the U.S. and the USSR, and that as such contacts grow the Soviets will become more reasonable.

In this frame of mind, Western policy makers have accepted assurances that Kama River, though capable of manufacturing military vehicles, would be used for essentially peaceful purposes. And that the advanced Cyber 76 computer, 40 times faster than the computers now being used by the Soviet military, would be applied to "weather analysis" and "earthquake studies."

Such an outlook has never conformed to the reality of Soviet behavior. That the Soviet would gladly divert "dual use" technologies to military purposes should be apparent to anyone familiar with the tenets and performance of Marxism-Leninism. As

noted by defense intelligence specialist Jack Verona, the Soviets have the world's largest R&D force—an estimated 800,000 people—working overtime to make the USSR preeminient in military power, and bent on absorbing technology and information from the West.

"The Soviet Union," says Soviet historian Roy Medvedev, "is moving in one direction—toward the strengthening of our military might . . . We are going to overtake the United States, and that is inevitable—our country is a military machine . . . They don't realize that we put everything into rocketry, that the government does not care about whether or not anything is left over for the population."

The difference in mentality between American theorists of detente and their Soviet partners may be observed in another facet of the process, the exchange of "students" between the U.S. and USSR. Americans in Russia typically study social sciences, liberal arts or cultural subjects (same topics: "the Heroine in the Russian Fairy Tale" and "Performance Practices in Russian Choral Music in the Late 19th and 20th Centuries"), Soviet "students"—whose average age is 35—come to America and study aircraft design, optics, laser technology and computers.

These "students" and other Soviet visitors to our shores, whose numbers have increased dramatically in the era of detente, show an inordinate interest in technical institutions such as MIT and Cal Tech, scientific laboratories, airplane factories, electronics labs and the like. In one memorable case, Soviet visitors to Lockheed, Boeing and McDonnell Douglas plants wore special shoes that picked up metal filings from the floor—helping them solve a nagging problem in manufacturing alloys.

"Reverse engineering" from American processes and designs is a classic Soviet technique in weapons manufacture. The famous "Strella" missile used by the Communists in Vietnam and employed by Marxist guerrillas around the world was reverse-engineered from the U.S. "Red-Eye" missile, obtained by Moscow through A Scandinavian country. Airborne missiles used in Soviet MIGs were similarly reverse-engineered from the U.S. Sidewinder missile.

In addition to the technologies and processes they can obtain through purchase and "student" exchange visits, the Soviets also secure as much as they can through outright espionage and illegal purchases. Last year, the managers of a California optical firm were indicted for exporting sophisticated laser mirrors to the Soviets, technology now being used in the USSR's hunter-killer satellite program.

Such arrests and prosecutions occur because U.S. export law requires the Commerce Department to police—and prevent—the export of materials harmful to our national security interests. The U.S. government is thus in the schizoid position of taking punitive actions against the export of some strategic materials while strenuously encouraging the export of others.

The irony of the situation was aptly symbolized in 1972 when President Nixon announced the blockade of Haiphong Harbor and intensified bombing of North Vietnam to prevent the further influx of Communist men and material into South Vietnam. In support of this action, the Department of Defense released reconnaissance photos showing the Soviet cargo ship *Michurin* steaming toward Haiphong with dozens of Soviet ZIL trucks on deck, obviously intended for duty on the Ho Chi Minh trail.

What was not stated was that both the *Michurin* and the trucks were products of U.S. technology—built for Moscow courtesy of Western industry. We were stepping up our military pressure on the Communists to prevent the use of trucks supplied to them by us. While this was going on, we were simultaneously pressing forward with the Kama River deal to give them still more trucks, later used against Afghanistan.

Illustrating the mentality that has prevailed in some official circles was a 1977 proposal to approve the export of a computer to the ZIL plant. An interagency memo unearthed by this writer spelled out the differing attitudes toward this proposal among the four government agencies that participate in reviewing exports.

"Problem is," said the memo, "that a quarter of the 200,000 trucks ZIL produces annually goes to the military, including 100 missile launchers. State and Commerce support approval, on the grounds that U.S. government has licensed exports to it several times during the 1970s, that 100 missile launchers of a 200,000 vehicles annual production is small, and that the remaining trucks for the military are basically no different from heavy duty civilian trucks. Defense and ERDA support denial on grounds that ZIL's military contribution is unacceptably high, and past export approvals should not be dispositive of the instant case."

Also suggesting the outlook that has prevailed at Commerce in recent years was the official reaction to military use of products from the Kama River truck plant. In May 1979, Lawrence J. Brady, then acting director of the Office of Export Administration, testified that Kama River products were being used for military purposes and that further exports to the plant should be suspended.

Rather than acting on this recommendation, Brady's superiors argued that the Soviets had never actually promised to use Kama River trucks for exclusively civilian purposes and that military use was therefore not "diversion." Rather than cracking down on the Soviets, Commerce cracked down on Brady, relieving him of export duties and in effect forcing him out of the department.

Even in 1980, after a supposed tightening of export controls because of the Afghanistan invasion, Commerce approved the shipment of a diesel-engine assembly line that would have greatly enhanced the productivity of the Kama River plant. As with the Cyber 76, this was halted only by a vigorous protest in Congress. Nor did Commerce make any effort, in the aftermath of the invasion, to block shipments to Eastern Europe—where they could be easily diverted to the USSR.

A standard justification for such deals—above and beyond the supposed potencies of detente—is that if we don't sell advanced products and technologies to the Soviets, somebody else will. "Foreign availability," in fact, is the main argument used by Commerce to promote relaxed restrictions on exports to the East and push through disputed sales. If the Soviets can get it somewhere else, why shouldn't American firms reap the profits instead?

Such arguments ignore the fact that there is an international structure aimed at preventing strategic exports harmful to the interests of the West that could be utilized to reduce the "foreign availability" problem. This is the Co-ordinating Committee for Multilateral Export Controls—Cocom for short—which includes the NATO allies and Japan, and which is supposed to screen technology transfers to the Eastern bloc.

Since the objection of a single Cocom member can halt a transaction, the United States obviously could use its veto power—not to mention other kinds of leverage—to prevent the flow of critical technologies from our allies to the Soviets. Rather than do this, however, we have done exactly the opposite, using our influence to break down the system of controls. Instead of trying to prevent our allies from seeking exceptions, we have led the way in seeking them ourselves; in recent years an estimated 50 percent of Cocom exemptions have been requested by our government.

With increasing Congressional sensitivity to this problem, there are signs that a change of policy is under way. In the new Commerce Department under President Reagan, Lawrence Brady has been brought back and currently is the Assistant Secretary for Trade Administration. While House national security adviser Richard Allen is known to take a tough-minded view of the issue. Senator Garn and others in Congress are pressing for a much tighter set of controls on strategic exports.

Such moves are all to the good. The evidence is overwhelming that our technology is now arrayed against us in the strategic arms race, posing a deadly threat to our security. That process must obviously be halted. By the same token, however, the fact that the Soviets are so dependent on the products of our industry provides us with potentially enormous leverage in the other direction: by denying them access to our technological advances, while continuing to make strides ourselves, we can go far toward correcting the military balance in our favor.

"The Soviets," Garn concludes, "have obtained too many of the national security sensitive technologies and commodities that have provided the U.S. with a margin of military safety over the Soviet Union. Only a dramatic change in our export policy, combined with the administrative capability to protect our national security, will be sufficient to do the job."●

PERSONAL EXPLANATION

HON. WAYNE GRISHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. GRISHAM. Mr. Speaker, during consideration of the fiscal year 1982 defense appropriations bill on November 18 and on Friday, November 19, I was unavoidably absent from the House Chamber. Had I been present, I would have voted as follows:

Rollcall 315, "no."
Rollcall 316, "no."
Rollcall 317, "no."
Rollcall 318, "no."
Rollcall 319, "no."
Rollcall 320, "yea."
Rollcall 321, "yea."
Rollcall 322, "yea."
Rollcall 323, "nay."
Rollcall 324, "no."
Rollcall 325, "yea."
Rollcall 326, "yea."●

FOREIGN INVESTMENT IN THE UNITED STATES

HON. CHARLES F. DOUGHERTY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. DOUGHERTY. Mr. Speaker, foreign investment in America is of great concern to many. Some see this business activity as a first step toward foreign control of American interests. However, the benefits from the investments of other nations in America in our country and our people are abundantly clear. Such ventures further strengthen and develop our own resources and economic well-being. And, with careful guidance we can in fact insure that foreign investments in America are beneficial to us as well as our friends and our neighbors.

I would like to share a recent address before the Pennsylvania Council of Republican Women on this subject given by Mary F. Friedman. Ms. Friedman's views give some simple, practical ways in which all Americans can help in encouraging this mutually beneficial alliance with other nations.

The address follows:

ADDRESS BY MARY F. FRIEDMAN, PEAT, MARWICK, MITCHELL AND CO.

My purpose in being here today is to have you become as excited as I am about attracting foreign investment to the United States. I'm delighted to be here to share my enthusiasm with you. My experience at Peat, Marwick has demonstrated that there are many corporations around the world interested in investing in the United States. These corporations are asking—where can we invest? Our answer should be Pennsylvania. Pennsylvania has so much to offer to foreign investors—tremendous energy resources, a skilled labor force, a strategic location, and strong communities. Foreign investors have much to offer Pennsylvania—an influx of capital; new technologies, new jobs—increased tax revenues. Foreign investors can be a source of economic development for our cities and towns, at a crucial time when the old federal programs are being redirected. You are leaders in your communities and you are dedicated to maintaining and improving the quality of life in your communities. What you and I need to do in our time together today is to dispel some common myths about foreign investment; to look at what attracts investment in a community; and to tap into the collective creativity of this group. What I intend to accomplish is to spark your interest in attracting foreign investment to Pennsylvania and to give you some ideas to take home to your communities. At the end of my talk, I'll be glad to answer any questions, and hopefully, to hear your ideas, too.

When you hear the term foreign investor, what comes to mind? If you're like many people, you imagine a rich Arab sheik making billions of dollars a day. He buys up half the real estate in Arizona and lives in a mansion with twelve wives.

The sheik symbolizes a myth about foreign investment. A myth that is perpetuated despite the facts. Let me share some facts with you—facts that may surprise you.

No OPEC nations are in the list of top-seven U.S. investor countries. A July 1980 Forbes survey of foreign investments in the U.S. showed that 80 percent of all foreign investment in the U.S. came from the following seven countries. The Netherlands (24 percent) U.K. (18 percent) Canada (13 percent) West Germany (9.6 percent) Japan (6.6 percent) Switzerland (6 percent) and France (4 percent). Investors from all OPEC nations together, accounted for less than 1 percent of the total foreign investors.

Direct foreign investment in the U.S. is not all going to the Sunbelt. The Federal Reserve Bank of Boston conducted a study in 1980 which concluded that the Mid-Atlantic and New England areas had a far higher number of foreign manufacturing plants than other areas of the country including the Sunbelt. In another study, The Conference Board, a research organization that tracks investment in U.S. manufacturing, reported that the ten states most-favored by foreign investors included New York, Connecticut, Pennsylvania, Ohio and New Jersey, as well as California, Texas, North Carolina, South Carolina and Georgia. Significantly, however, in 1980, Pennsylvania and California were equal in the number of announced manufacturing investments from abroad.

Most direct foreign investment is not in real estate. Last year, the U.S. received $52.3 billion in direct foreign investment and less than 3 percent of that was in real estate. The major areas of investment were in manufacturing and petroleum industries (exploration, extraction and transportation). Manufacturing represented $20 billion of the foreign direct investment. The types of manufacturing investments were in: chemicals, machinery, primary and fabricated metals, and food products.

What are foreign investors looking for? Why do they want to invest in the U.S.?

If you believed everything you read in the newspapers, you would think our economy is crumbling, the dollar is getting weaker each day and labor unions are destroying our industries. Comparative statistics and government studies however, clearly show two important facts.

1. Things here are not as bad as we think.
2. Things are much worse in other countries.

To foreign investors, the U.S. is very attractive for a number of reasons: let me highlight a few key points.

The cost of labor in the U.S. is very attractive to foreign investors. A recent study by Citibank analyzed the growth in hourly wage rates among manufacturing workers during 1970-1977. The analysis found that the U.S. experienced the lowest percentage increase in manufacturing wages—only 11 percent in 9 years. in other nations, the increases were enormous: Canada, 30 percent; The Netherlands, 54 percent; West Germany, 63 percent; and an unbelievable 77 percent increase in Italy.

A second key point is that the U.S. offers political stability that is unavailable in other parts of the world. Developed countries with assets and facilities in the U.S. know that there is little chance that their company will be nationalized or that repatriation of their profits will be blocked. A third important point is that in the U.S. firms have accessibility to one of the largest and most lucrative consumer markets in the world. In a political climate of increased protectionism, foreign companies see that to secure a firm position in the U.S. marketplace, they must build facilities to employ American workers. Volkswagon achieved this security through their VW Rabbit plant at New Stanton.

WHAT CAN DIRECT FOREIGN INVESTMENT MEAN TO OUR COMMUNITIES

(1) Direct foreign investment can mean more jobs for our communities. A recent study by the Department of Commerce shows that employment in foreign firms is growing faster than by U.S. firms, rising 3% per year compared with a 1.6 per cent growth rate for U.S. employers.

Also, compensation paid by foreign-based companies rose faster than at U.S. companies, growing 13.2% per year compared with the 9.9% increases by U.S. firms.

(2) Direct foreign investment can introduce new technologies, and new job skills for our workers.

(3) Direct foreign investment can increase our tax revenues which, in turn, will provide better services, education.

This all sounds terrific—but, you ask, where do we start? Can one person make a difference? The answer is yes. Personal contacts are a key ingredient of attracting foreign investments.

You need to think very systematically and realisticly about what your community's assets are. What does your community have to offer? How does your community compare with other communities which may be competing with you. Discuss these issues with local bankers, real estate leaders, government officials, business leaders. Critical variables to consider are:

Resources—land, raw materials, energy sources, climate.

Markets—population, income, transportation.

Labor—wages, unionization, education and productivity.

Quality of life—cultural facilities, education, housing, public safety.

Government—attitudes, incentives, taxation.

Once you have a realistic idea of what your community can offer to foreign investors, make certain that your community is presenting itself in the most positive way possible to potential foreign investors.

Too many cities are used to getting money from federal programs in direct proportion to how many problems they had. They talked about indices of poverty, crime rates and substandard housing. Obviously, that is not the approach likely to attract foreign investment.

Peat, Marwick currently is working with the United States conference of Mayors on a very exciting project.

Next week, in Zurich, Switzerland more than 100 American cities will be participating at the Invest in America's Cities Exposition. Mayors, business and community leaders will be traveling to the Exposition to meet with an anticipated 2-3,000 Western Europeans who are interested in investing in the U.S.

This Exposition is planned as the first of a series of similar expositions. The next one will be in the fall of 1982. I hope that you will make sure that your town is represented at the next one. I look forward to seeing all of you next year in Switzerland.●

CONTINUE FUNDING LIMITED PURPOSE AGENCIES

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. WYDEN. Mr. Speaker, I rise today to express my strong support for the technical amendment to the Older Americans Act of 1981, pertaining to the community services block grants. This amendment would make many limited-purpose agencies eligible for funding.

Under the Budget Reconciliation Act, the only entities eligible for funding are those officially designated as community action agencies or programs under the provisions of section 210 of the Economic Opportunity Act of 1964.

I consider this an oversight in the development of the reconciliation package. The agencies that serve my district in the same capacity as community action agencies, are technically defined as limited purpose agencies. These LPA's in my district, all of which provide services in the primarily low-income urban areas of Oregon, depend on funding from this source. Thus this technical amendment is critical to their existence.

The city of Portland, Oreg., technically has no community action agencies—thus without this amendment, Portland would be left without the community services provided for in the budget.

In the past, Federal funding for the LPA's has provided seed money and has stimulated acquiring other resources. I am convinced that the services provided by these agencies are needed by the residents of our neighborhoods. I urge passage of this technical amendment, which would allow for the continuation of the programs.●

PLIGHT OF VLADIMIR TSUKERMAN UNDER SPECIAL ORDERS OF HON. CHARLES DOUGHERTY

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 19, 1981

● Mr. COUGHLIN. Mr. Speaker, I join my colleagues in an expression of mutual concern on behalf of Vladimir Tsukerman, a Soviet dissident who, for 4 years, has been denied permission to emigrate to Israel.

Recently, I had the opportunity to meet with Faina Tsukerman, the wife of Vladimir Tsukerman, and was touched by her personal appeal for help. Her story was not unfamiliar to me—like so many others, Vladimir Tsukerman's desire to leave the Soviet Union is not based on political considerations but rather is a matter of family reunification, a humanitarian appeal.

Since March 1977, Vladimir Tsukerman has been applying to Soviet authorities for permission to emigrate. Although his wife and son were granted exit visas in 1978, Vladimir has received numerous refusals to his applications and has been forced to remain behind in their home town of Kishinev. Soviet authorities have based their refusals on "security" because Vladimir had served in the Soviet Navy 6 years ago.

Having been promised an exit visa in April of this year and then, only a short time later, denied that visa, Vladimir became all the more determined to demonstrate to the Soviet Government his strong desire to leave that country to join his wife and son in Israel. These efforts, although peaceful in nature, were met with a charge of "disturbing public order" and a possible sentence of 3 years imprisonment or internal exile. It is this alarming situation that has forced Faina Tsukerman to turn to the Congress of the United States for assistance.

The exceptional strain of a marriage which spans thousands of miles and the harsh realities of Soviet internal politics is abundantly clear. That Vladimir Tsukerman should be arrested for expressing his own desire to emigrate merely compounds this disturbing situation.

While it is difficult to determine the exact impact of our appeals to the Soviet Government, I firmly believe that world opinion can force the Soviet Union to abide by the 1975 Helsinki Accord and live up to the responsibilities agreed upon by all signatory nations. Indeed we, too, have an obligation—an obligation to speak out against any such blatant violations of that agreement. The lives of Faina and Vladimir Tsukerman and thousands of men and women like them depend on our efforts.●

RED CROSS CERTIFICATES OF MERIT GIVEN FOR HEROIC RESCUE

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. YATRON. Mr. Speaker, through the kindness of the American Red Cross, it has been brought to my attention that two of my constituents, Mr. Thomas Michael Muir of Bernville, Pa. and Ms. Susan M. Boltz, of Reading, Pa. have been named to receive the Red Cross Certificate of Merit and accompanying pin. This is the highest award presented by the American Red Cross to an individual who "saves or sustains a life by using skills and knowledge learned in a volunteer training program offered by the Red Cross in first aid, small craft or water safety." Presentation of the certificate, which bears the original signatures of the President of the United States, honorary chairman, and Mr. Jerome H. Holland, chairman of the American Red Cross, will be arranged by the Berks County Chapter of the American Red Cross.

Mr. Muir and Ms. Boltz will receive this commendable award for their heroic rescue which resulted in saving a life on June 9, 1981. On that date, Mr. Muir and Ms. Boltz, who are trained in Red Cross water safety, along with Ms. Beverly J. Kline, who is trained in water safety, first aid and CPR, were at a lake when they observed a man unconscious in the water. Mr. Muir rescued the victim and took him to the beach. There he was joined by Ms. Kline, who began artificial respiration after she determined that the victim was not breathing. Subsequently, the victim suffered a cardiac arrest. Mr. Muir and Ms. Kline began two-rescuer CPR and were joined by Mrs. Boltz in their efforts. they continued this procedure until an ambulance arrived. It is certain that the use of CPR by these three compassionate individuals saved the victim's life.

I think that it is indeed fitting that the meritorious action of these three individuals is brought to the attention of this body. Mr. Muir, Ms. Boltz, and Ms. Kline have demmonstrated the highest ideals of concern for the well-being of their fellowman. I know that my colleagues in Congress will join me in honoring these individuals whose contribution to humanity is truly noteworthy.●

FIFTH ANNIVERSARY OF THE UKRAINIAN HELSINKI MONITORING GROUP

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. ZABLOCKI. Mr. Speaker, I am pleased to join the Honorable BERNARD J. DWYER and the Honorable CHRISTOPHER H. SMITH, and my other colleagues in the House in this special order observing the fifth anniversary of the Ukrainian Helsinki Monitoring Group. I commend Congressmen SMITH and DWYER for sponsoring House Concurrent Resolution 205, expressing the sense of the Congress with respect to violations of human rights by the Soviet Union in the Ukraine.

The 10 founding members of the Ukrainian Public Group to Promote

the Implementation of the Helsinki Accords were joined by others and increased their ranks to 37. Now, not one of these courageous individuals is free to work toward the objective which they set for themselves. All are either imprisoned or exiled.

Today we express our support for their bravery and their commitment to the ideals of fundamental freedoms for their fellow citizens. We also commend their determined and courageous act of risking their own liberties so that basic freedoms may be enjoyed by many.

The sad fact is that the valiant struggle of the Ukrainian monitors has not as yet effected the reforms they have been seeking. Their attempts, however, are asking an impression on their persecutor—the Soviet Government. This is clearly evidenced by the Soviet efforts to muzzle their detractors by incarceration or banishment.

It is therefore, most important for us to underscore our support for the Ukrainian and other Helsinki Monitoring Groups in the Soviet Union. We must once again condemn the Soviet Union's actions in suppressing the rights of its citizens, and for violating their international legal commitments.

Mr. Speaker, the Soviets have reneged on their pledge made at the Conference on Security and Cooperation in Europe. They have contravened the United Nations Charter, the Universal Declaration of Human Rights and even the Soviet Constitution. At this time, we strongly urge the Soviet Union to cease its persecution of its citizens, and to release those who have been jailed simply for trying to defend their basic human rights.●

INTERNATIONAL TERRORISM

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. DREIER. Mr. Speaker, international terrorism remains a fundamental threat to the peace and security of the free world. There exists a global network of violent criminals, supported by the government of Libya, which seeks to undermine legitimate regimes and terrorize those individuals who oppose their pernicious designs. We must combat these forces of terrorism with the full array of weapons available to a democratic society.

It is for these reasons that I am introducing legislation today which would impose a complete trade embargo with Libya. American dollars, personnel, and expertise must not continue to bolster the economic foundation for Libya's terrorist activities.

This legislation represents a truly bipartisan effort. The supporters of this bill are from both sides of the aisle and from both ends of the ideological spectrum.

All, however, are united in the belief that the United States must take immediate action to reduce the threat of international terrorism. We are convinced that a complete trade embargo is an effective means of accomplishing this goal. I would urge my colleagues to review this legislation and join with us in meeting this very serious threat to the international community.●

ONE SPEECH IS NOT ENOUGH

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. LaFALCE. Mr. Speaker, I welcome and applaud President Reagan's first major foreign policy speech, inviting Russia and the Atlantic Alliance to join him in a quest for peace. It was an excellent speech, tackling a critical aspect of foreign affairs, and since it was long overdue, it therefore has received much attention and positive response. But, it must be emphasized, one speech is not an end in itself. It can be, however, the beginning of a process that must be aggressively pursued.

One speech does not erase all past strident statements, contradictions, and inconsistencies that have characterized this administration's foreign policy to date. Not only must we expect and demand that the President pursue the positions he has outlined, during the arms talks scheduled for November and January, with as much vigor as he gave to his own talk, he must also take steps to be certain that all other aspects of his foreign policy house are in order.

There are a whole series of other foreign policy problems awaiting solution: The Middle East, South-West Africa, El Salvador, et cetera. If there is continuing disarray in the management of our foreign policy, the credibility of the administration will continue to be questioned both at home and abroad and our ability to solve difficult problems will be impaired.

We have been making commitments that we would find extremely difficult to carry out. For instance, the President said at a news conference that we will not "permit Saudi Arabia to be an Iran. * * * There's no way that we could stand by and see that (country) taken over by anyone that would shut off that oil." But that is a commitment, made off-the-cuff, without any consultation with Congress or without any indication of how we could fail to permit an internal uprising in Saudi Arabia.

These problems and others that continue to plague the foreign policy arena are brilliantly discussed by Arthur Schlesinger, Jr., in the November 18, 1981, Wall Street Journal.

I urge my colleagues to read "The Logic of Reaganomacy," which follows:

THE LOGIC OF REAGANOMACY

(By Arthur Schlesinger Jr.)

The recent performance of our agitated Secretary of State casts the most serious doubt on his judgment—and therefore on his suitability for a job in which good judgment is the prime requisite.

In quick succession, General Haig aimed an attack through the columnist Jack Anderson on unnamed enemies in the White House, phoned the White House to tell the national security adviser that he did not mean him, phoned the President to get him to call Anderson and stop a column suggesting that the Secretary was on the skids, told the Pentagon to prepare for American military intervention in Central America and told a Senate committee that NATO contingency plans contemplated the explosion of a nuclear bomb in the event of conventional war in Europe.

Having put on this extraordinary display of a man who had totally lost his own cool, our irrepressible Secretary of State then sent a message to the pre-eminently cool British Foreign Secretary, Lord Carrington, to "cool it"—that is, his effort to seek a resolution of the Palestinian problem in the Middle East.

The Reagan administration took the usual damage-limiting actions. The Defense Secretary rejected the idea of the nuclear explosion, and his subordinates threw cold water on the idea of sending U.S. troops into combat in El Salvador. But many people are bound to wonder whether a man who reacts so excitably to minor public issues is quite the sort of fellow we want at the helm in case of a major international crisis.

Beyond General Haig's personal aberrations lies a larger problem. The State Department is the agency in our government for the diplomatic approach to international relationships. Remembering George C. Marshall, one cannot say that generals should therefore be disqualified for appointment as Secretary of State; but Marshall was exceptional among generals (or any other group) in his broad understanding of human affairs. The Marshall Plan was notable, among other reasons, because it was a nonmilitary response to a situation for which lesser men were proposing a military remedy.

General Haig is a different case. He reaches instinctively for the military solution. His subordinates, if they wish to survive, must listen to their master's voice. The Defense Department is institutionally committed to the military approach. With the State Department no longer in business as the champion of diplomacy, the whole foreign policy apparatus of the government becomes dangerously out of balance.

The result is a disquieting militarization of U.S. argument and action in world affairs. The issue is not the strengthening of our military position. It is rather whether military strength exhausts our whole idea of foreign policy. The Reagan crowd, for better or worse, is well on the way to persuading the world that it regards military power as its primary instrument in the conduct of foreign relations.

ASSISTING SOVIET PROPAGANDA?

It is conventient for President Reagan to attribute the wave of antibomb, anti-American demonstrations in Europe to Soviet propaganda. But do our leaders not recognize how their own words and deeds assist the Soviet propagandists? "At a time when fears about nuclear war are proliferating in Europe," the London Sunday Times said on Nov. 8 (in an editorial entitled "Lest We Forget, America Is On Our Side"), "Mr. Reagan and his team seem hell bent on stoking the fire."

Mr. Reagan's carefree chat about limited nuclear exchanges in Europe gave Brezhnev an opportunity (that Soviet propaganda experts could never have contrived) to pose as the foe of nuclear war and the apostle of peace. If serious arms control negotiations were now taking place between the U.S. and the Soviet Union, we can be reasonably sure that half a million Europeans would not have taken to the streets the other weekend. American bravado contributes far more than Soviet deviltry to the rise of neutralism and unilateral disarmament in Europe.

Calvin Coolidge once said, "One of the first lessons a President has to learn is that every word he says weighs a ton." Mr. Reagan professes to admire Coolidge, but he has been lamentably slow to learn that particular lesson. Only the other day our genial President said that the U.S. would make sure that what happened to the shah in Iran would not happen to the feudal monarchy in Saudi Arabia.

This is an example of what Prof. Inis Claude Jr. has called the practice of "casual commitment"—the "assertion of obligation without the seriously considered resolve to perform the actions that may be required to fulfill the obligation." The Carter administration went plenty far in proposing a guarantee for the Persian Gulf that far exceeded our military capacity to discharge, but the Reagan administration seems ready to make Mr. Carter seem a piker in the field of casual commitment.

And whatever happened to the old idea that military commitments require congressional assent? Even the imperious Franklin D. Roosevelt in 1940, when pressed by the prime minister of France for American aid against the Nazi blitzkreig, replied that American supplies would continue so long as the French continued their resistance and then added, "I know that you will understand that these statements carry with them no implication of military commitments. Only the Congress can make such commitments." Has President Reagan said as much to the Saudi Arabians?

No doubt, should trouble come to Saudi Arabia, the President will haul out his Awacs argument and claim that, if Congress does not support a presidential commitment, American credibility will be undermined and we will suffer a great setback in the world. This is a self-serving Executive Branch line that, if carried much further, would render the President the dictator of foreign policy. Mr. Reagan understood this when he saw no problem about opposing President Carter on the Panama Canal and Salt II treaties.

One may wonder in addition how much it really sustains American credibility for the world to suppose that any presidential initiative, however rash and ill-considered, is final. Perhaps our foreign policy is more credible when it proceeds from mature deliberation, has a solid basis in congressional and popular consent and addresses real problems in what others will regard as a realistic way.

Thus far President Reagan has conducted foreign policy without much congressional consultation or interference. Because the administration feels more comfortable with domestic issues, and because its foreign policy figures shoot off on tangents of their own, one has the impression of policy made ad hoc rather than in response to a larger design. Yet the policy has, whether or not intended, an inner consistency. It is above all a nationalist policy. Its pervading thrust is toward the self-isolation of the U.S.

PROFOUNDLY SHAKEN OUR ALLIES

Our military preoccupation, our truculence of language and our happy-go-lucky attitude about nuclear war have profoundly shaken our NATO allies. So too has our persistence in a high-interest-rate policy that has had a devastating impact on European economies.

For a time Europeans had faith in General Haig as at least a man who understood their problems, but his recent shenanigans have created grave doubts. Nor is Mr. Reagan's budgetary assault on our educational and cultural exchange programs calculated to help the American cause in the battle of ideas.

The pattern of estrangement runs around the globe. Our clumsy effort to tell the Arabs that they should worry more about the Russians than about the problems of the Middle East has been a flop. In Latin America the tilt against human rights and in support of military dictatorship is driving our natural friends to the left. Ambassador Kirkpatrick's recent suggestion that Costa Rica, the only democracy in Central America, could best meet its problems, which are primarily economic, by reestablishing the army it proudly abolished over 30 years ago, is one more example of the administration's conviction that all problems have military solutions.

Ambassador Kirkpatrick quoted one of her predecessors at the UN as saying that "we were reduced to voting on most issues in a bloc that consisted of the United States, Chile and the Dominican Republic." Mrs. Kirkpatrick added, "Now we usually lose those two countries, too." One presumes that she is joking, but it is a belligerent joke, as if the isolation of the U.S. were proof of the wisdom of American policy.

One can only suggest that most of our objectives in foreign affairs are hard enough to attain even with the wholehearted collaboration of allies and friends—and that they will become entirely unattainable if we reduce ourselves to a party of one. And self-isolation would, of course, accomplish a major Soviet objective, which is to divest America of all its friends and allies.

I am no great fan of President Reagan's domestic policy. But, as Adam Smith used to say, "There is a lot of ruin in a nation"; and wrong-headed domestic policies, pursued too far, tend to be self-correcting, at least in a democracy. Foreign policy is different. Here mistakes, once made, are too often irretrievable. That is why foreign affairs seem to me the really scary part of the terrain ahead. Nor do General Haig and the rest of the clamorous Reagan foreign policy team strike one as reliable guides. They cannot even guide each other.

As John Kennedy used to tell us at the White House 20 years ago, "Domestic policy can only defeat us. Foreign policy can kill us."●

HOUSING START

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. DASCHLE. Mr. Speaker, I am sure that everyone in Congress is by now heartily sick of numbers. At times, we seem to have projected ourselves into a kind of futuristic fantasyland where ideas are no longer expressed by words, but by bar graphs, pie charts, and computer printouts. But every once in a while, a number jumps out at you that sets itself apart, because it brings into very clear focus the nature of the economic crisis that we are undergoing, and makes us step back and say: "Is this the road we really want to be taking?"

Such a number is the one that tells us that new housing starts nationwide are now 43 percent lower than they were at a comparable time last year. And let me remind you that last year itsef was a terrible year for the housing industry. That's a stark number, that 43 percent, but behind it is even a starker picture. It's picture of construction companies shutting their doors. It's a picture of construction workers leaving the job force to stand in the unemployment line. It's a picture of unsold appliances, furniture, and household goods. It's a picture of a self-perpetuating cycle of economic disaster and despair. And it's a picture that we won't be able to change unless we can get the Federal Reserve Board to adopt a realistic monetary policy, and this administration to live up to its promise of a balanced Federal budget.

The old saw is that a picture is worth a thousand words. In this case, a number, 43 percent is worth a thousand pictures. And none of them are very pleasant to look at.●

IN DEFENSE OF DAVE STOCKMAN

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. GINGRICH. Mr. Speaker, much has been written about the David Stockman article in the Atlantic Monthly magazine. Most of the commentary, not surprisingly, has been negative. But not all of it has been. Atlanta Journal Columist Dick Williams has written the best appraisal of the problems Stockman was grappling with at the time he granted the Greider interviews.

Williams writes:

In reading and rereading William Greider's masterful piece in the upcoming Atlantic Monthly, the result is a crushing

sadness. Not anger at either Stockman or Greider or tax cuts or defense spending. Just sadness that no one really knows how to stop the Marion Motley-Jim Brown-Herschel Walker that is the expense line of the federal budget.

Williams' masterful column appeared in the November 14, 1981, Atlanta Journal/Constitution, and I recommend it to my colleagues.

The column follows:

AN APOLOGIA FOR DAVID STOCKMAN

Sometimes things are too important to be left to the press. David Stockman, for instance. And the federal budget.

Simple things, such as President Reagan and this gang of Cabinet coyotes, or Brooke Shields or the Falcons—those things maybe we can handle.

But it's clear the press has had no real handle on Jimmy Carter and his real policies and who sank him. And the press has nary a clue so far as to Stockman and the budget fight we thought was over, but is just beginning.

We're just not good at gray, you see, and like television crime show producers, we like tidy endings. Fact is there's not a person among us who really understands the federal budget. Unless it's David Stockman or Bert Lance. And Stockman may soon meet Lance's fate. More's the pity.

In reading and rereading William Greider's masterful piece in the upcoming Atlantic Monthly, the result is a crushing sadness. Not anger at either Stockman or Greider or tax cuts or defense spending. Just sadness that no one really knows how to stop the Marion Motley-Jim Brown-Herschel Walker that is the expense line of the federal budget.

That sadness overwhelms the anger at the press for the superficiality with which it reported Greider's reporting of Stockman's ebbs and flows.

Greider is the one who should be angry. His balanced and subtle examination of the federal budget through the eyes of its chief warden has been picked apart by quote thieves on both sides of our partisan debate.

The December Atlantic Monthly ought to be required reading for every voter. It shows us not that Stockman betrayed his leader or that his leader and his cronies were cynically robbing the poor to aggrandize the rich. It shows us not that reporters burn sources.

It shows us that Congress is a self-perpetuating gang of dilletantes leading us to national bankruptcy.

Context, please.

"None of us," Stockman was widely quoted as saying, "really understands what's going on with all these numbers."

Greider's reportage is chronological. It hears the federal budget director in good moments and bad and, most importantly, of the moment. When Stockman made the remark above, he was talking not about Reagan philosophy but of the moment last spring when Democrats were offering budget alternatives to his that were based on Carter projections, congressional guesses and Kentucky windage.

Mythical beasts such as gryphons mated with the phoenix and the unicorn to produce numbers with no real base.

Even the oft-quoted "Trojan horse" description of the tax cuts is hardly a shocker in Greider's and Stockman's context. Republicans were aware that soaking the rich could not continue. And since we have no track record on "supply-side economics," the old "trickle-down theory" would be the closest analogy.

Interesting, isn't it, that when John F. Kennedy said "a rising tide lifts all boats," the nation believed? Call it "trickle-down" and it's grand larceny of the poor.

Greider and Stockman also point out that the supply-siders cared not a whit about budget cuts—only tax cuts. Both sides' positions were thus open to mauling, tied together as they were.

There isn't room here to go much further. To do so would be to continue the pillage of Greider's work and Stockman's beliefs.

But it is important to stress Stockman's continued belief that anything taken from the poor in the name of fiscal sanity would have to matched by reductions in tax benefits and subsidies for the strong. "Rejecting the weak claims of powerful clients," he calls it.

The fight and the debate aren't over yet. And all sides in it will be well served by reading the infamous article, not just the excerpts.

For as Stockman says "The budget is sort of rolling history of decisions. All kinds of decisions made five, 10, 15 years ago, are coming back to bite us unexpectedly."

He wonders if anyone can maintain the political momentum to fight the beast for the necessary three to five years. It will be a national shame if Stockman is lost to that fight.●

NORMAN W. WORTHINGTON

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. WOLF. Mr. Speaker, I want to draw to the attention of my colleagues the contribution that has been made by Mr. Norman W. Worthington to Arlington County and the entire Metropolitan area on the occasion of his retirement from the Arlington Chamber of Commerce.

Over 13 years ago, in September 1968, Norman Worthington arrived in Arlington to take on the responsibilities of the top staff position at the Arlington Chamber of Commerce. He was uniquely qualified to become executive vice president. Mr. Worthington graduated magna cum laude from the University of Miami in business administration, attended Harvard Graduate School of Business Administration and also attended New York University's School of Retailing. Before coming to the chamber, Mr. Worthington spent more than 10 years with Miller and Rhoads Department Store in Richmond.

Professional and civic participation by Mr. Worthington has included serving on the board of directors of the Newport News Merchants Association, Virginia Retail Merchants Association, Central Richmond Association, Southampton Citizens Association, executive committee of the Downtown Richmond Retail Association, Kiwanis Club of Arlington, and the Arlington Challenger's Tostmaster Club.

Norm Worthington's performance as executive vice president of the Arlington Chamber of Commerce has proven many times over that he was the right man, at the right place, at the right time. He has been an instigator, a mover and a doer, with that rare, selfless ability to spark actions for the good of the chamber's membership and Arlington's business community. His accomplishments are legion. He has been on the firing line lobbying at the Arlington County Board, the State general assembly and on Capitol Hill. He has consistently pursued legislative action that would best benefit the economic growth of Arlington and recently, on November 17, he was recognized and commended for his efforts by the Arlington County Board.

Norman Worthington's selfless devotion to his chamber of commerce responsibilities in behalf of the important county of Arlington, Virginia, neighboring our Nation's Capital, has been truly unique and deserving of this special recognition.

I want to join all of Norm's many friends in wishing him well in his future endeavors.●

SOVIET MILITARY EXPERTS WILLIAM F. AND HARRIET F. SCOTT—PART I

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. McDONALD. Mr. Speaker, Col. Bill Scott and his wife Harriet are widely recognized as two of the Nation's leading experts on the Soviet military. Their articles appear in many military and strategy publications. In addition, they have authored several books on the subject. Drawing on two tours in the U.S.S.R., plus numerous followup visits to the U.S.S.R., they keep up with their subject by participating in numerous scholarly functions as well as devouring every conceivable publication from the U.S.S.R. relating to the Soviet Armed Forces. The Scotts were interviewed by Dr. Eugene Griessman for the Atlanta Weekly on September 13, 1981, and what they had to say is very important to our Nation's future. I commend this first part of the interview to the attention of my colleagues.

WILLIAM F. SCOTT

HARRIET FAST SCOTT

(By Dr. Eugene Griessman)

Dr. William F. Scott, previously a colonel in the United States Air Force, served as senior air and defense attache at the U.S. Embassy in Moscow for two tours during the 1960's and 1970's.

"At the time of their return from the Soviet Union," a former intelligence officer said, "Dr. Scott and his wife, Harriet Fast Scott, were probably the most thoroughly informed and competent people on the military capability of the Soviet Union we have

had. There never has been a husband-wife team like them." They both speak and write Russian and they know many leaders and top advisers in the Soviet Union. "They're both very competent," an aide to Senator Sam Nunn said recently. "They're not doves, you know."

Presently Dr. Scott is a lecturer at Georgetown University; Harriet Fast Scott, like her husband, is a consultant to a number of research institutes. Their book The Armed Forces of the U.S.S.R. is used as a text at a number of universities and war colleges. The 1975 book, Soviet Military Strategy, third edition, by Marshal V. D. Sokolovsky, edited with analysis and commentary by Harriet Fast Scott, is regarded as a standard reference work on Soviet military affairs. The Scotts continue to publish regularly in major military journals.

Their assessment of Russian military capability doesn't always jibe with the government's standard line.

Do we have anything like the Soviet research institutes that study our society?

Harriet Scott: We have no equivalent of their (Soviet) Institute of the U.S.A. and Canada. Our experts are separated, under different groups, and often do not exchange data, nor do the heads of our groups have a significant place in government. If they take a governmental post, they typically relinquish their center or institute posts.

What is your opinion of the potential of the MX missile system to neutralize the capability of the Russian nuclear capacity?

Dr. Scott: It would be more survivable than what we have now. Our missiles are very old.

Is it (the MX missile) really essential?

Dr. Scott: An improved missile system is essential, whether MX or not.

Why are the Soviets so irritated about the Cruise Missile System?

Dr. Scott: They wanted to slow it down until they've got something better. They would have to build a new defense system against the Cruise Missile.

In times of military crisis, most societies choose hawks, not doves. If we adopt a threatening military posture, won't we inhibit the likelihood that more dovish leaders will come to power (in the Soviet Union)? Russian society, like ours, has the capacity to produce peace-loving men and women. It produced a Tolstoy; we produced a Thoreau.

Dr. Scott: You believe there are hawks and doves over there in high official positions? There aren't. Those men are watched and graded by their peers at all times. There are no hawks and doves in their military. In the confines of their home, they might have a different view. There are not two parties there; there is one party only. The press has created the impression that some leaders are more reasonable than others. The Russians are charming people, and when Americans meet the Russians they are disarmed.

But there has to be some diversity of thought.

Harriet Scott: In their private deliberations before reaching a decision, there is a wide spectrum of opinion. If there are 18 different members of the Politburo, there will be 18 different opinions. However, once the Politburo reaches consensus, everyone has to fall into line. The Russians don't have a system of equality in interrelations between people. One has to get the upper hand. They have a saying Ktokovo—which translated literally means "who dominates whom?" The saying expresses the question, who is the servant and who is the master? The trouble in negotiating with Russians is that we assume they use Western logic, but they don't. They don't use Western modes of thought even though they may wear Italian-designed custom suits. They have difficulty understanding that more than one view can be correct, that several views may be partially correct. They have real problems tolerating diversity. . . . Some of the intellectual currents that moved through Europe from the Reformation on missed the Russians.

Is there any point at all in negotiating with the Soviets?

Harriet Scott: This is a philosophical irreconcilability, you know; the Soviets say history is going in their direction and we can't stop it and they can't stop it . . . it's the way that they see history; they're going to win. Their society is the wave of the future and we are dinosaurs, you know, going to our doom; but they don't see any point in not having peaceful coexistence while this process is going on. They're all for that.

Dr. Scott: It would not be a waste of time if we had trained professionals negotiating with the Soviets. Too often, we will send over a new group who will be negotiating with the Soviet professionals, who have studied this country and know its military capabilities probably more thoroughly than you or I do. Their professionals will speak English. We send over people going in for the first time against the Soviets; they feel that they are supposed to come up with some treaty or some agreement. The Soviets do not feel that they have to come up with an agreement within a given time. So if we would negotiate with the Soviets from a point of view of understanding what the Soviets are doing, understanding how they work, understanding what their position is; if our negotiators were thoroughly familiar with the Soviet writings, not just what is printed by the Institute of the U.S.A. primarily for Western consumption, but what is in the Soviet Party platforms, congresses, and so on; and if our negotiators knew these things and were real professionals dealing with the Soviet professionals, I think that negotiating could well be worthwhile. We should not, however, expect to gain a lot from negotiating.

What do you think we can look for when the guard [leadership] changes in the Soviet Union? They're all old.

Dr. Scott: The leaders in the Soviet Union now were all in World War II. They understand what happened in World War II, how the United States fought as an ally with the Soviets, even though it is not often reported in their books or in their press. Many of the people in the Soviet Union are still aware of the fact that we provided them with tremendous amounts of aid, food, weapons, and did a great deal toward helping forces in France. We did the same thing in World War II. We probably had the greatest capability the world has ever known for the projection of military power, as witness—what we did in Southeast Asia, what we did in the Pacific, and then with the forces we put into the European theater.

Do we have anything in production to match the Backfire—the Soviet's long-range aviation aircraft? Do we need anything?

Dr. Scott: If we do, it is the best-kept secret in the U.S. People keep thinking we have something up our sleeves. . . . We probably have some R and D [research and development] coming along. Yes, we need them because they can be dispersed.

Do we have anything to match their S-18's, which I understand are the largest ICBM's in the world with twice the throw weight of the Titan? Do we have anything like that?

Dr. Scott: As before, it would be the best-kept secret in the. . . .

We have nothing like it? Do we have anything on the drawing board? We must.

Dr. Scott: You could talk about the MX, but that, of course, is a little different category.

Do we need to match the Soviets weapon for weapon?

Harriet Scott: No. We have different problems.

Could you elaborate?

Dr. Scott: The U.S. Army must be designed to move out of this country and fight overseas . . . that is, the U.S. Army is not designed to fight Canada or Mexico. It has to be formed, organized, and equipped so that it can move out and deploy wherever it might be needed in the world. The Soviets traditionally have been fighting either on their borders, inside the country, or immediately outside. They have a completely different problem in designing forces. They have not even thought, until fairly recently, of designing forces that could be lifted by ship or by aircraft to fight battles thousands of miles away, together with the logistical support that goes with it.

And you think, that the building of these new aircraft carriers signals a change in their thinking?

Dr. Scott: Yes. It has come out in their writings where they talk about the external role of the Soviet armed forces.

I read that the Soviet Union's heavy bomber force is small, yet it can easily be augmented by various medium-to-long-range bombers or even by cargo aircraft. The reason is simple. Soviet aircraft seeking to drop bombs in the United States do not need speed, low-altitude, or deception to counteract American air defenses because none exist. Do we have any defenses?

Dr. Scott: We have a very limited air defense. It's very limited. You will note that aircraft taking off from Latin America loaded with marijuana and cocaine and so on do not have any trouble coming into the country.

One article I've read suggests a scenario of nuclear attack different from the one I've grown up with. That scenario is that the Soviets would not wipe out large segments of the civilian population or destroy the economy. Their nuclear strike objective * * *.

* * * them survive. With the men who fought in the war—the men who are rapidly dying off now—when they see a U.S. officer, at least there is some acknowledgment that at one time we'd fought as allies. With the younger group coming up, it's different. The younger group is growing up isolated. Only a very, very few have had any contact with the West. It [the situation] could be dangerous.

Soviet consumer goods, as you well know, are often not very impressive—clumsy, bulky, not very sophisticated. What about their military hardware?

Dr. Scott: It's good.

It is as good as ours?

Dr. Scott: In many cases, yes. You can talk with Israeli officers who have fought with both U.S. equipment and Soviet equipment, and they have a very, very high regard for Soviet equipment. While we're on equipment . . . take our tanks. They have automatic shift, air conditioning, and all of the things we expect, or many of the things

we expect in a passenger car. Our tanks that fought in World War II did not have all of this gadgetry on them and they fought quite well. The Soviet tanks are simple, they are rugged and. . . .

Not air-conditioned?

Dr. Scott: Nothing fancy. If it has to be air-conditioned, it will be air-conditioned. But remember that the Soviet tanks are designed to fight in a nuclear environment and ours are not.

What do you mean by that?

Dr. Scott: Well, their tanks are lead-lined.

And ours are not?

Dr. Scott: No. The Soviets have the BMP, an armored personnel-vehicle carrier that is designed to cross chemically- and biologically-contaminated areas as well.

And we do not have anything like that?

Dr. Scott: No, we do not.

Do they have many of them?

Dr. Scott: They have a lot of them.

Well, like how many? Hundreds? Thousands?

Harriet Scott: I would say thousands.

Dr. Scott: Yes. This started in the '60's, when they began to equip their tanks to fight in a nuclear-biological-chemical environment.●

FIREFIGHTER CONTRACTING OUT

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. HUNTER. Mr. Speaker, on Wednesday, November 18, the House failed, by a division vote of 83 to 85, to adopt an amendment to the defense appropriations bill, fiscal year 1982, which would have placed a 1-year moratorium on the contracting out of firefighting and security services at military installations. I supported the amendment offered by my colleague and regret that such an important issue received so little attention during the debate.

In accordance with OMB Circular A-76, which directs the various agencies of the executive branch to use private contractors in the provision of certain goods and services, the Navy has decided to contract out firefighting functions at the various military installations around the country. Contracts for fire protection have been let at some locations and cost comparison studies are underway at many other bases. While I think the goal of OMB Circular A-76 is laudable when it states that in a free enterprise economic system, the Government shall not compete with its citizens, I do not believe that these goals apply to fire protection at Navy installations.

When a fire breaks out in a $25 million aircraft, it is not appropriate to call on the ACME Fire Co. The Navy civilian firefighters must react quickly. The current force is highly trained and can react to an emergency in less than a minute. To depend on contract personnel, which are not controllable by the base commander in such a situation is unthinkable. If a base commander has a problem with a contractor, he must operate through a contract officer who then deals with the contractor. Effective control is removed from the base commander. In an emergency situation, where quick reaction is a necessity, it is ridiculous for a base commander not to have the ability to control the firefighting personal.

The proponents of contracting out fire protection claim that to do so may well save money. Indeed, in some instances it has been shown that a private contractor can provide fire protection more cheaply than can the Navy itself. But in a situation where a private contractor might not act as quickly or as efficiently, it is quite possible that a $15 or $20 million jet aircraft could be destroyed. Indeed, if the employees of a private fire protection company were to go on strike, it is possible that millions of dollars of sophisticated equipment could be destroyed should a fire break out. Where, then, would the savings be?

Navy firefighting personnel must perform a range of tasks, some of which are inappropriate for private personnel to carry out. The mission of firefighters at the naval air station at North Island, in my district in San Diego, is representative. This fire department is required to provide support in the nuclear weapons program. They are responsible for establishing an emergency command post in the event of a nuclear accident or incident. A work force which is not under military control would clearly be detrimental to our national security.

It is my understanding that the Armed Services Committee will be conducting a thorough investigation of the contracting out of fire protection services at Navy bases around the country early next year. We must be absolutely sure that if we are going to proceed with the contracting out of fire protection, that it is done so in a rational manner which meets the objections which I have outlined above. I will be participating in the investigation to insure that superficial economics do not damage our national security.●

IN MEMORY OF AL DeFIORE

HON. JAMES A. COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. COURTER. Mr. Speaker, I would like to say a few words in memory of a man born and raised in Morris County, a man well-liked and respected by those who knew him, a man who will long be remembered by his friends and neighbors—Mr. Al DeFiore.

Al's long and dedicated career as a public servant in the New Jersey State government spanned over 50 years. During that time, he served under several distinguished legislators: former Assemblyman Joseph J. Maraziti, State Assemblyman Arthur Albohn, and State Senator John H. Dorsey.

He was a long and tireless supporter of his party as a member of the Morris County Republican Committee and as Morris Township Municipal Republican chairman. Al was known as a man whose word was his bond—and he was a man who always kept his word.

During his 40 years as an active member of the Benevolent Protective Order of Elks, Al once served as the exalted ruler of the Boonton chapter and as State vice president of the order.

Al died suddenly last October leaving his wife of 38 years, Genevieve, and his two children, Richard and Mary Ann.

I would like to extend my deepest sympathy to his family, and to those fortunate enough to have known Al DeFiore, that they may find solace in their memories of him.

Thank you, Mr. Speaker.●

SHAMANSKY CONDEMS CZECH REPRESSION

HON. BOB SHAMANSKY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. SHAMANSKY. Mr. Speaker, I am gravely concerned about the latest wave of arrests in Czechoslovakia. In recent months, Czechoslovak authorities have rounded up dozens of citizens associated with the Charter 77 movement, a group which has been pressing for compliance with the Helsinki accords. Six Catholic activists were sentenced last month, and 14 men and women are soon to be tried at what may be the largest show trial since 1972. A statement by the Committee to Defend the Unjustly Prosecuted (VONS—the Czech equivalent of "Helsinki Monitor") has just reached the West. This is one of the grimmest reports to come out of Czechoslovakia in many years. The U.S. Helsinki Watch Committee has forwarded this material to delegates to the Madrid Conference on Security and Cooperation in Europe. I would like to take this opportunity to commend to the attention of my distinguished colleagues this recent statement by the VONS Committee:

For at least a year we have been watching the steadily increasing judicial and extra-judicial repression against people in various spheres of non-conformist activity. The spectrum of those affected is unusually broad and encompasses all elements. Since May 1981, 15 people [of these, 14 will be

tried in connection with the case known as "Siklova et al." and one defendant will be prosecuted separately], 8 of whom are in pre-trial detention, have been charged with subversion of the Republic and face sentences ranging from 3 to 10 years. Last July, Jiri Gruntorad was sentenced to 4 years and Rudolf Battek to 7½ years (reduced on appeal to 5½ years by an appellate court in October). At the end of this month (September 1981), a Catholic priest, Josef Kordik, and a group of 6 Moravian Catholics will go on trial. Remanded in custody and awaiting trial are: Jan Litomisky, Frantisek Lizna and Jaroslav Duka (Fr. Kordik received a suspended sentence of one year; the 6 Moravian Catholics received sentences ranging from 10 months to 3 years.) In all these cases the judiciary tends to act with complete arbitrariness, selecting the criminal charges and the appropriate provisions of the penal code at random. Cases of brutal treatment during investigations, indiscriminate raiding of apartments, repeated and groundless detentions for 48 hours, withholding of correspondence and systematic surveillance of people by groups of policemen in civilian clothes have increased. We would like to mention some of the most serious cases: Zbynek Benisek was repeatedly beaten and throttled until he lost consciousness; Vlastimil Tresnak was tortured until he lost consciousness (he was beaten and burned with a lighter); Petr Pospichal was beaten 3 times in the fall of 1980 and last December Vaclav Maly was brutally beaten. Last week, Karel Freund was brutally beaten during interrogation. This week the police in East Bohemia detained Karel Soukup and a Catholic priest, Andrej Lukasek. Karel Soukup was systematically beaten for 4 hours and tortured in a way we have not witnessed before. We also know of a number of people beaten during questioning who are understandably afraid to make their experience public.

The indiscriminate violations of privacy of the home, the arrests of people in their homes and their detention for 48 hours have lately become so frequent that a nonconformist cannot invite a few friends over without incurring risk. Raids on apartments are usually followed by house searches and confiscation of property. There is at present no defense against such actions and on the contrary, any references to such behavior are met with cynical derision. We have reason to fear that the brutal and indiscriminate behavior of the police appears to have no bounds. At present 15 VONS members are either serving prison sentences, are in pre-trial detention, or are being prosecuted while still free. Another 8 VONS members have emigrated. In the current situation it is almost impossible for the remaining VONS members to arrange meetings. In these circumstances we do not know if and for how long we shall be able to continue our activities.

PRAGUE CZECHOSLOVAKIA, *September 20, 1981.*●

A TRIBUTE TO JAMES YAMAMOTO

HON. GLENN ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. ANDERSON. Mr. Speaker, on December 3 the Wilmington Chamber of Commerce will hold its "Harbor Holidays" dinner dance. At this function, the honorary mayor of Wilmington for 1982 will be announced. But I would like to highlight for my colleagues some of the facts about this year's honorary mayor, James Yamamoto.

James Yamamoto was born right here in the South Bay, Terminal Island to be exact. His family founded a ship chandlery in the area 50 years ago, and for 30 of those years James has been an integral part of Yamamoto Bros. as its vice president and general manager. The business was settled in Wilmington in 1959.

This company has been a contributing member to the Wilmington Chamber of Commerce for approximately 20 years, and James Yamamoto currently serves on the chamber's board of directors. Other affiliations include the Boys Club of Wilmington, which my wife Lee and I are also very involved with. Here, James also serves on the board. We have witnessed his fine service time and time again, and other recipients of his goodwill include the Japanese American Citizens League, the Long Beach Buddhist Church, and the Wilmington Rotary Club.

Last year at this time, the title of honorary mayor of Wilmington was bestowed on Jim Yamamoto, under the aegis of the Rotarians, and Jim has served the community very honorably in this capacity. As tribute is made to him for his continued record of service, my wife Lee and I would like to join the many well-wishers in saying a great big thank you to Jim for all that he has done and will surely continue to do for the residents of the entire South Bay area. We congratulate Jim and his lovely wife Ann, their children Mark and Susan, their daughter-in-law Colleen and their grandchildren, Jennifer and Markie, on this most auspicious occasion. We wish them all the best in the future, and hope that they will be among us for a very long time.●

OLDER AMERICANS ACT AMENDMENTS OF 1981

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. DASCHLE. Mr. Speaker, unfortunately I was unable to be present to vote on H.R. 3046, the Older Americans Act Amendments of 1981. If I would have been present, I would have voted in favor of final passage for this most important bill.

There are several important programs which will be reauthorized in this legislation that I wish to point out.

One is the Green Thumb program. Over 300 South Dakotans are employed in Green Thumb which targets lower income elderly Americans for public service work in their local communities. On several occasions I have had the opportunity to visit these programs in South Dakota and I have always been impressed by the dedication of these workers and their desire to perform public service work. I am most pleased that this legislation will enable existing programs and services to be maintained.

Another program which has been of considerable value in South Dakota is the retired senior volunteer program (RSVP). RSVP seeks to encourage elderly persons to perform volunteer work in their local communities. RSVP participants play an active role in working with school age children.

The Senior Companion program provides meaningful opportunities for low-income elderly persons to help other elderly persons with special needs, especially in the areas of health, education, and welfare. Senior Companions have been most valuable in helping their fellow elderly citizens in preventing or delaying institutionalization.

This 3-year reauthorization strengthened many of the programs under the act and will enable virtually all of the current services being offered to be maintained. The programs and services reauthorized in the Older Americans Act will encourage elderly citizens to remain active and in the workforce when possible. Their wisdom and experience benefits many of the less fortunate of our citizens and I am convinced that these programs are cost effective and worthy of reauthorization.●

F.B.I. USER FEE LEGISLATION

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. FISH. Mr. Speaker, although I am in strong support of the effort to cut unnecessary Government spending, I firmly believe that we should preserve and enhance the resources needed by our Federal law enforcement agencies to perform their important duties and to provide assistance to their State and local counterparts.

One of the unfortunate results of budgetary constraints has been the recent temporary suspension of certain fingerprint services by the Federal Bureau of Investigation. Under the Department of Justice Appropriation Act of 1974, the FBI may, in its discretion, make certain identification and fingerprint records available to banking institutions and, where authorized by State law and approved by the Attorney General, to officials of State and local governments for licensing

and employment purposes. Obviously, Mr. Speaker, such services must be available if we are to insure that convicted felons are not placed in sensitive banking positions or licensed by the States in violation of law. For instance, I have been contacted by constituents who are concerned that New York's gun licensing requirements will be undermined if the FBI's fingerprint services are suspended.

Mr. Speaker, I believe that our budgetary and law enforcement needs can both be met by the institution of a user's-fee system, which will pass the cost of these services on to those who benefit from them. To that end, I am today introducing legislation which would require the Attorney General to establish and collect fees for the processing of requests for identification records by banks, to promote their security, and the States and local governments, for employment and licensing purposes. My bill would also authorize appropriations to fund the implementation of this system which would reflect the fees collected.

Mr. Speaker, it has been proposed that the FBI establish a user's fee system effective October 1, 1982. Because I am deeply concerned about the potential for disastrous consequences from postponing fingerprint services for such a long period, my bill would take effect immediately upon enactment. If the Congress acts promptly, we will be able to reinstitute these important services far in advance of the FBI's projected date. I am firmly committed to that goal and I ask my colleagues to join me in this endeavor.●

CLEAN AIR ACT REVISION

HON. CLEVE BENEDICT

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. BENEDICT. Mr. Speaker, over the past 2 months I have presented my colleagues in the House of Representatives with proposals to revise the Clean Air Act. The changes I support provide the structure necessary for the further development of new industrial facilities; for cleaner plant emissions from newer equipment; and for greater employment opportunities for Americans. I have tried to make clear that constructive changes will strengthen, rather than weaken the act and that industrial growth, instead of requiring a sacrifice from our clean air goals, will help in achieving and exceeding these goals. I would once again like to bring these changes to your attention.

While I have continually supported an air quality management program at the Federal level and adherence to established standards for air quality, the current law restricting authority over setting these standards to the EPA Adminstrator does not insure the validity and scientific acceptability of the process involved. The existing, but strictly advisory, Clean Air Scientific Advisory Committee, should be expended to provide a broader base of input and review and be given decision authority equal to the Administrator's in setting air quality standards. Both the Administrator and the Committee should then maintain adequate primary health standard levels without regard to economic cost.

In meeting these standards, the existing regulatory burdens and conflicts can be eliminated. There is no need for, or benefit from, additional regulations beyond the requirements of the New Source Performance Standards. These standards are set at a level sufficient to insure progress toward cleaner air and protect public health and should remain as the basic regulation for air quality. Under the prevention of significant deterioration program in attainment areas, the additional tertiary restrictions in class II and III areas, which are not related to public health and general welfare or to visibility considerations, may be safely eliminated, along with the associated preconstruction reviews. The concern to protect pristine areas designed as class I, which include large national parks and wilderness areas, is a legitimate focus of stricter pollution control requirements. The emission increments protecting air quality in these regions should continue. Best available control technology is a suitable requirement in those cases where new source performance standards do not exist or are not applicable.

In nonattainment areas, requirements for lowest achievable emission rate technology and construction moratoriums can be eliminated to allow progress toward modernization of our industrial base and cleaner air. Since NSPS and BACT will always result in lower emissions from new, more efficient facilities, these standards should prevail.

At the State level, adequate flexibility to address air quality questions arising from local needs and concerns must be granted. Different solutions and schedules appropriate to different areas need to be viewed as acceptable as long as reasonable further progress toward attainment of ambient standards is being made. This change applies to both initial State implementation plans and subsequent revisions. To avoid delays and confusion, plans should be deemed approved if not reviewed by EPA within the time frame designated by law, and the duplication at the Federal level of the notice and public comment process should be eliminated.

These are some of the changes which are essential to a successful clean air program which will maximize protection of the public health, spur new investment, and foster economic growth. Current law is not acceptable—more suitable means are at hand to address the various concerns involved in meeting our clean air goals. Again, I urge my colleagues to move forward the consideration of needed changes. Inaction will insure a continuation of the problems which lead to economic stagnation, higher prices to consumers from utilization of imported oil rather than domestic coal, and which hinder greater progress toward cleaner air.●

FAIR TRADE WITH JAPAN

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. HUNTER. Mr. Speaker, recent discussion of United States-Japanese trade relations has focused on the growing amount of Japanese imports into the United States. Traditionally, this trade debate has centered on two rather differing points of view.

Some have advocated such overtly protectionist measures as strict import quotas on some products such as automobiles or electronic goods. Others have maintained strict principles of free trade. But recently, increasing attention, both in the United States and Europe, has focused on a problem which cuts across the lines of past trade debates. Those who support free trade and those who support protectionist measures have become aware of nontariff barriers to trade.

Just this week, in the November 23, 1981, issue of Newsweek magazine, such trade barriers received attention. The magazine article correctly states that nontariff barriers keep foreign firms out of Japanese markets without technically violating international trade agreements. For example, every automobile imported into Japan is subject to an individual inspection, instead of granting blanket permission for importing entire lines of cars as is done in the United States.

Yesterday, I introduced legislation, together with my colleague, Congressman JIM DUNN of Michigan, designed to combat these non-tariff barriers and enable American auto manufacturers to compete more fairly with the Japanese. My bill, H.R. 5050 would establish a two-way street wherein U.S. auto firms would have a fair chance to sell their products in Japan.

H.R. 5050, the Two-Way Street Act, would impose parity fees on automobiles imported from Japan in the same proportion as the fees and costs which are added to our cars sold in Japan which are due to nontariff trade barriers.

Last year, more than 1.9 million Japanese cars were imported into the United States, up 111 percent from the 1975 level. Japan's share of the U.S. auto market now approaches 25 percent, dramatically up from 9 percent in 1976. Meanwhile, our share of Japan's auto market stood at less than one half of 1 percent. All foreign made vehicles captured a meager 1.2 percent of the Japanese auto market. This year, that figure will fall to 0.9 percent.

The Japanese, of course, will tell you that poor workmanship of U.S. made vehicles explain their poor showing. They will also claim that American companies only want to sell large gas-guzzlers that Japanese consumers do not want to buy. But that does not explain the decline in sales of European automakers who have enjoyed a reputation for quality. Moreover, if the Japanese really believe that American cars cannot compete in Japan, why have they imposed such staggering import barriers on us instead of letting the marketplace take its natural course.

Let me give you one current example. The Ford Motor Co. is now marketing the new Escort model, a car that, in my opinion, can compete head on with the compact, fuel efficient Japanese models. While the Escort is off to a brisk start on European roads, competing very well against comparable European models, it is, according to Ford, stalling out in Japan. Why? Because of nontariff barriers. The price of the Escort GL model which retails for about $7,400, including options, in the United States, carriers a sticker price of about $11,700 in Japan. Only about $200 of this markup is attributable to the freight costs. The rest is due to such things as a $1,000 commodity tax, homologation costs, and other nontariff barriers.

Further barriers result from the Japanese safety and pollution standards. Every year, Ford brings a team of Japanese engineers to the United States to spend 2 months witness testing vehicles designed for the Japanese market. Even after these tests are completed, and the results certified, each car must individually undergo a rigorous inspection.

Additionally, there is the high cost of opening a dealership in Japan. Japanese custom forbids autodealers to share facilities with importers. It was just this sort of piggybacking that allowed Japanese manufacturers to get a foothold in American markets. American companies do not have a high enough volume of sales in Japan to open dealerships, but without dealerships, sales volume cannot grow. Thus this nontariff trade barrier creates a vicious circle preventing fair competition.

H.R. 5050 would establish a bipartisan Commission appointed by the President to levy a parity fee on all Japanese cars that enter the United States. This parity fee would be an amount equal to the product of a multiplier—percentage—times the average selling price of the Japanese made car when sold in Japan. The percentage, which is calculated for each class of automobiles, is an amount equal to the excess of the average selling price of the particular class of U.S. vehicle in Japan, over the average selling price of such vehicle type in the United States. In a nutshell, we are imposing Japanese taxes and costs on Japanese cars sold in this country.

The Commission will have the power to adjust, or even eliminate, this parity fee when they deem it appropriate. They may lower the parity fee in the same proportion that Japan lowers the taxes and costs it imposes on our cars. Japan, in effect, will control the amount and duration of this fee since it is to be based on the amount of the costs Japan places on U.S. cars sold in Japan.

Finally, any automobile manufacturer located in the United States may import one Japanese car free of the parity fee for each automobile manufactured in the United States.

As Japan floods our market with their cars, only a trickle of U.S. built automobiles are sold in Japan. The Japanese have created a one-way street. The flow of cars across the Pacific is one-sided. The time has come to turn the tide. The time has come to remove these nontariff barriers and initiate fairness in international trade. The time has come to create a two-way street.●

A BIRTHDAY TRIBUTE TO GOVERNOR HARRIMAN

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. GILMAN. Mr. Speaker, November 15, marks the 90th birthday of one of the truly great men of the 20th century—Gov. W. Averell Harriman. Heir to the Union Pacific railroad fortune, Governor Harriman turned to public service in 1933, joining President Franklin D. Roosevelt at the beginning of the New Deal. For the next 48 years, Governor Harriman served his nation, advising five Presidents, and fulfilling the responsibilities of numerous governmental positions, including: Ambassador to the Soviet Union, Ambassador to Great Britain, Secretary of Commerce, Undersecretary of State for Political Affairs, and Governor of the State of New York. Governor Harriman has been one of our Nation's most prominent figures in world diplomacy.

Governor Harriman's service to the cause of the Allies in World War II cannot be overstated. He was a close personal friend of Winston Churchill, and knew Josef Stalin more intimately than any other Westerner. He had a difficult task in allaying the Soviet leader's suspicion of American and British intentions in the war.

Though starting as a "confirmed optimist" about Stalin's postwar intentions, he soon realized that "our objectives and the Kremlin's objectives are irreconcilable." He stressed, however, the need to reach some type of understanding to avoid another war. This didn't mean that he favored giving in to Soviet demands. A blunt-speaking diplomat and tough negotiator, Governor Harriman fought hard for U.S. interests on the negotiating table. He cautions us today that he feels the Soviets are as dangerous as they were at the end of World War II, when he predicted that the Soviet Union would become "a world bully." In our negotiations with the Soviet Union, we would be well-advised to heed his word. Governor Harriman, who has had talks with every Soviet leader since Stalin, feels that the Soviets desire a reduction in nuclear weapons, but nevertheless are dedicated to reshaping the world after their own model of communism.

Governor Harriman's superb diplomatic skills and international reputation made him a popular choice for numerous significant roles. At an age at which most people retired, Governor Harriman continued his difficult work—he was 72 when he went to Moscow to negotiate a nuclear test ban treaty with Khrushchev in 1963; and he was 77 when he served as chief U.S. negotiator at the Paris peace talks in 1968.

Governor Harriman, said President John F. Kennedy, has held "as many important jobs as any American in our history, with the possible exception of John Quincy Adams." Governor Harriman has provided, and continues to provide, a valuable continuity for U.S. Governments. One price of our democracy is that by changing the top leadership periodically, we sacrifice the positive aspects of a continuity in leadership. Our democratic system is, however, incomparably preferable to a self-maintaining regime, and the wisdom and experience of men like Governor Harriman enable us to better protect ourselves in an often hostile environment.

A man of peace, a man of principles and truly one of the leading figures of our time—we honor Gov. W. Averell Harriman on his 90th birthday, and look forward to his enjoying many more years in the service of his beloved Nation.●

CULTURAL ENRICHMENT AT MUHLENBERG COLLEGE

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. RITTER. Mr. Speaker, I would like to share with my colleagues an experience I recently had at Muhlenberg College in Allentown, in the Lehigh Valley of Pennsylvania. This experience was a festival entitled "An Enrichment of American Culture: Russian Emigrees/American Immigrees." This month-long event celebrated two traditions: The American tradition of welcoming foreigners to our shores and the Russian tradition of intellectual and esthetic cultivation. The merger of these two traditions and cultures, as was demonstrated by this festival, results in the invigoration of the former.

The relationship between Russia and the United States has been fraught with the tension of opposing social visions, confrontations, attempts at cooperation, and competition. Most often, this relationship has been considered within the context of economics, politics, and military preparedness. The Muhlenberg College Festival shifted this emphasis to culture.

Participating in this event were a group of highly distinguished representatives of each of the major art forms being demonstrated at the festival. Such notables as Joseph Brodsky, the great poet; Alexander Godunov, the ballet star; Mark Peskanov, Olga Rostropovich, and Alexander Peskanov who are all skilled musicians. Ernst Neizvesty, the well-known painter and sculptor, had an extensive display of his artworks. In addition, work was displayed by Mikhail Chemiakin, Anatoly Krinsky, Lev Meshberg, and five other distinguished artists.

While the roster of highly distinguished artists, musicians and poets comprises a virtual "Who's Who" in the Russian emigree community, their visit and participation in the event was not solely for the entertainment of the college's students and visitors. Instead, it was to provide those who came to view the event with a firsthand encounter of the new shifts in the Russian artistic movement. It showed a distinctly Russian contemporary culture, one that somehow flourishes in spite of Soviet rule. More than that, it conveyed to the viewer the latest enrichment of our own culture, a culture which has greatly benefited from the many ethnic groups who have come to the United States to cultivate their artistic expression. The Lehigh Valley of Pennsylvania reflects many Central and East European cultures and has been enriched by all of them. How ironic that one nation's tragedy can be another's gain.

I had the distinct pleasure of attending this event and, as a result of Russian language and culture, I felt the festival did much to break down the barriers between our two people. Having lived in the Soviet Union, I had the opportunity to speak with the artists in the Russian language. I will long cherish the thoughts we shared and, even in that short time, felt kinship with them.

The festival gave the people of the Lehigh Valley a firsthand exposure to a culture that few have the opportunity to see, a culture that, in its own homeland, nonetheless achieves greatness. We had the privilege of exposure to a group of people to whom freedom is like a powerful elixir.

I am proud to represent a district in which people like Dr. John Morey, Muhlenberg College president; and Linda Weintraub, Muhlenberg College gallery director and art department lecturer, have the vision to see the world in a different light, a world where we strive for understanding through a language common to the human spirit, the language of art and creativity.●

THE MORAL IMPLICATIONS OF ENERGY

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mrs. BOUQUARD. Mr. Speaker, one of the aspects of the national debate on energy that has received little attention recently is the moral implications of energy. Historically those who have been adamantly opposed to one form of energy or another have used moral arguments to justify their position while those taking a more balanced perspective on energy issues have generally not emphasized specific moral issues in their spoken and written arguments. As a result, many people have come to believe that some forms of energy currently being used are immoral and therefore unacceptable. This is, of course, far from the truth and ignores the moral implications of a more balanced perspective. Recently a number of thoughtful and perceptive articles on this topic have been prepared from this refreshing and important perspective. These articles were presented at two symposiums of the John Lafarge Institute in 1980 and 1981 and recently appeared in the magazine Catholic Mind, October 1981.

The first of the articles that I wish to bring to the attention of my colleagues is by Dr. William G. Pollard who for many years has been both a physicist and an Episcopal priest. He was a member of the Manhattan District Project at Columbia University and in 1947 became Executive Director of the Oak Ridge Institute of Nuclear Studies, a post he held until retirement a few years ago. It was while he was at Oak Ridge that Dr. Pollard was also drawn to the services of the church culminating in his ordination in 1954 as a priest.

Dr. Pollard approaches the subject from a theological viewpoint and makes an interesting observation about the naturalness of nuclear energy in the universe as compared to other forms of energy and correctly notes that the others are all derived from it. Dr. Pollard is not blind to the destructive as well as constructive potential of nuclear energy, but notes "it is essential that we devote our best efforts to finding ways to prevent the misuse of nuclear energy. We must work tirelessly to prevent the potential curse from being realized, but a refusal of its blessings is not one of them."

I have excerpted Dr. Pollard's paper which follows and I urge my colleagues to take the time to look at this matter from a fresh moral perspective:

SOME THEOLOGICAL REFLECTIONS ON NUCLEAR POWER

(By William G. Pollard)

THE CREATOR OF ALL THAT IS

We begin this paper with the contrast between the way nuclear power appears when viewed from the vantage point of God, who sees His creation as a whole, and from the vantage point of man, who looks out upon it from that tiny speck, the earth, which he inhabits. The contrast between these two views is extreme; what is common and universal in one is extremely rare and esoteric in the other.

Consider man's view first. He thinks of wood and the fossil fuels—coal, oil and natural gas—as common and universal. They are, or at least have been, universally available on his planet earth; always there standing ready for exploitation whenever it became possible for him to use them

Nuclear power, on the other hand, was a very recent addition; the product of a technological elite which had been foisted on a natural order not intended to contain it. Its very possibility was unknown to the vast majority of mankind a short 50 years ago. Nuclear power had, moreover, the potential for destruction on an unimaginably vast scale; besides which, its potential for generating useful electricity, though it was said to be equally vast, was surely not necessary. God is good, merciful and loving; it was the exact opposite of His intention and purpose for His creature man to apply his cleverness to the development of nuclear power. Nuclear power was the ultimate in human hubris; man should forsake it and turn his talents instead to work on the natural sources of energy with which God had provided him from the earliest days.

It is my contention that these attitudes are the result of our earthbound and limited perspective. If we free ourselves from it, and view the whole of God's creation from His vantage point rather than ours, we come out with exactly the opposite conclusions. With respect to wood and fossil fuels, we realize that both they and we ourselves are particular manifestations of the phenomenon of

life. But life is the peculiar property of the earth which is but one member, and a relatively insignificant one at that, among an unimaginably vast array of astronomical objects. And in that vast array, the earth is well nigh unique. Fossil and biomass fuels are certainly extreme rarities in creation as a whole!

But if this is true of what we regard as "natural" sources of energy, the exact opposite is true of nuclear energy, which from our standpoint was so recently introduced by man into the natural order. If we were to take an imaginary space flight out among the stars, we would be totally surrounded at all times by natural nuclear power plants. It is a sobering thought that God has made more nuclear power plants than anything else! A universe from which nuclear power had been outlawed would be a dead universe, with no warmth, light or life in it; and one completely devoid of any creative potential.

Nuclear energy is the universal, common and natural kind of energy in creation as a whole. Indeed, the other forms of energy are all derived from it. All the wood, coal, oil and gas man has ever burned came from our natural nuclear power plant, the sun, through that basic process of life, photosynthesis. Without realizing it until this century, we have really been dependent on nuclear energy all along. Now that we have begun to generate electricity directly in nuclear power plants of our own design and construction, we are merely tapping directly the universal energy source for all of creation that previously we have used only indirectly and derivatively.

Similar considerations apply to radioactive wastes. Our solar system was formed as the result of a cataclysmic explosion of a collapsing star, a supernova, which generated enormous quantities of highly radioactive atoms of all the chemical elements through uranium and plutonium to californium. The wastes from this explosion were spewed out into the surrounding gas and dust from which the sun and its family of planets were formed four and a half billion years ago. The earth and all the other planets were loaded with radioactive waste at their formation. Most of the original radioactivities, including plutonium, have long since decayed in the intervening four and a half billion years, but some with half lives of a billion years or more, such as uranium, thorium and a form of potassium, are still present. The heat generated by their decay has given the crust of the earth its plasticity and geologic dynamism; evident in the drift of continents and earthquakes, and most visibly, in volcanos.

When we bury deep in the earth's crust the radioactive wastes we generate, we shall not be adding anything foreign to it, nor will we ever add more than a minute fraction of what is already there. Radioactive waste, too, is an integral part of the created order.

One cannot reject nuclear energy as something introduced into the scheme of things by man contrary to God's purpose. Nuclear power is too basic and universal to the whole operation of the universe for that. From God's standpoint it is clearly a great good and so, in the words of 1 Timothy, is to be gratefully accepted: For everything created by God is good, and nothing is to be rejected if it is received with thanksgiving (1 Tim. 4:4). There is no way we can claim that nuclear power was not intended by God, or that some power other than God is responsible for it.

THE BLESSING AND THE CURSE OF DOMINION

There is a most perceptive insight into the uniqueness of man compared with every other creature created by God at the beginning of the Torah. The ancient story of creation in the first chapter of Genesis concludes with a summary of what God accomplished when He created man as His crowning achievement: So God created man in His own image . . . and God said to them, "Be fruitful and multiply, and fill the earth and subdue it; and have dominion over the fish of the sea, and over the birds of the air (Gen. 1:27, 28), and over the cattle, and over all the earth" (Gen. 1:26). But this statement is qualified near the end of the Torah by another, making a kind of parentheses to all the Pentateuchal law in between, in Deuteronomy: I call heaven and earth to witness against you this day, that I have set before you life and death, blessing and curse; therefore choose life, that you and your descendants may live (Dt. 30:19).

The power of man in the exercise of his dominion to subdue the earth has had to wait 2,500 years since this was written to reach its full potential. The author of the first chapter of Genesis could have had no premonition of the heights of man's dominion over nature which would be reached in the 20th century, which seems to be the one finally destined to see the fulfillment of this statement of God's plan for man. Man has been fruitful and multiplied, thanks to his dominion over his body through modern medicine, and by the end of the century, he will just about have filled the earth. Man is rapidly approaching the limit of both his fruitfulness and his dominion.

But man's impressive dominion over all the rest of creation is inescapably linked to his freedom, and therein lies his dilemma. From the earliest times he has agonized with the dilemma that he could exercise his God-given dominion either to bless or to curse his life and that of all his fellows on the earth. Agricola, in his great treatise De Re Metallica, reviews the arguments that raged in ancient times with respect to man's use of iron, whether for swords or for ploughs, quoting Ovid, Pliny and others. Every advance that man has made in the exercise of dominion over new elements of nature has confronted him with the choice of the blessing and the curse. From the invention of gunpowder, through napalm, to thermonuclear weapons, the potential curse has grown by enormous steps, but equally the potential blessing of dynamite for excavation, gasoline for transportation and electricity from nuclear power has also grown. Now that man has learned to tap the universal energy source that powers the universe, the magnitude of both the curse of destructive power and the blessing of abundant energy have reached an ultimate magnitude involving the entire earth and all its creatures.

Man cannot escape exercising dominion, but because he is free, the consequences of his choices are his alone. When his choices are self-centered and self-serving without regard for the welfare of others or responsibility for the earth and its creatures, they lead to destruction and a curse of awesome proportions. Many despair of man now that he wields the ultimate power of nuclear energy and are convinced that because of his unredeemed sinfulness, he cannot be trusted to exercise dominion over it. Perhaps they feel that god erred in giving mankind this power to begin with. But rightly or wrongly, man has it and has no other choice but to accommodate himself to the reality of his situation.

Now, however, a growing number of voices are being raised against this effort. They fear that man cannot be trusted to develop its blessing for fear that it would simply encourage him to develop its curse. It is essential that we devote our best efforts to finding ways to prevent the misuse of nuclear energy. We must work tirelessly to prevent the potential curse from being realized, but a refusal of its blessing is not one of them. Whether we develop the blessing or not will not affect either the continued spread or development of the curse. The genie is long since out of the bottle and there is no way he can be put back in.

ENERGY AND THE CONQUEST OF FEAR

For a very long period of his evolution, primitive man shared with all other animals of forest and steppe a paralyzing fear of fire and fled in mortal terror from it whenever it broke out. Fire was then exclusively a curse with no blessing in it. But at a crucial turning point in his evolution, of which we have little information but which was of incalculable importance for his future, man turned and, instead of fleeing in terror from fire, brought it right into his living quarters and thereafter tended and nurtured it. Man had come through to the other side of fear to the incalculable benefit of his future. Today no one questions the validity of this first energy choice, but initially there must have been numerous fearful voices raised against it, or at least howls of dismay.

Fear produces a paralysis of action and must be overcome by a confident acceptance of life as it is given man to be lived in spite of all its risks. Since the Industrial Revolution, the introduction of other energy sources has been accompanied by widespread fears that were eventually overcome. When railroads were first introduced in the last century, they were met by extreme fear reactions. A steam locomotive belching smoke and fire, hissing loudly and puffing steam was a terrifying sight when first experienced. Electricity, as a natural phenomenon in lightning, was viewed for centuries only as a curse. When it began to come into general use as a technology at the turn of this century, it too was accompanied by widespread fear. It was a new and strange phenomenon, invisible and mysterious. It was a new way of dying, and it inspired deep, subliminal fear. There was, of course, a real basis for some of this fear. Electricity is quite dangerous, and a healthy fear of it has resulted in great strides in ensuring its safe use. Man has found ways of conquering his natural fear of steam and electricity so that they no longer paralyze him into rejecting these gifts. He has chosen to reap their blessings while at the same time laboring to reduce their curse.

We stand today on the threshold of reaping the blessings of nuclear energy. It is a gift many times more ample than any of the other energy gifts buried in the crust of the earth. Moreover, as we have seen, we have reached a maturity of knowledge by which we now see that it is God's prime energy choice for His whole creation. As with man's earlier energy choices, fearful voices are raised against it, and we are urged to reject its blessing because its curse is so unimaginably catastrophic. People fear for the safety of nuclear electric generating plants, imagining awful consequences if they really get out of hand. They fear plutonium as such, as well as the possibility that it might be diverted from electric power to weapons.

They have a pathologic fear of radiation and radioactivity. They conjure up in their minds fearful scenarios of what might happen accidentally or by evil intent. No contemporary topic has been the subject of so much misinformation and downright fearmongering as has nuclear energy.

Many of these fears have some basis in fact, and these are continuously the object of sober and informed concern of the engineers designing the plants and those in charge of their operation. The real fears will always be there because nuclear power is inherently very dangerous. Some of them are misplaced, as with the accident at the Three Mile Island plant, which did not endanger the health of anyone, but which is a continuing dreadful financial burden on those dependent on it for electricity. Some are simply imaginary, as in the case of the disposal of high-level wastes from nuclear power. Nuclear power has already demonstrated a much better safety record and a far better environmental record than its only long-range alternative, coal, and this record will steadily improve with experience. A large portion of the fears in the general public that bedevil the nuclear industry are irrational, grossly exaggerated and unnecessarily paralyzing. These fears, as with others in the past with new forms of energy, will gradually moderate and be overcome as nuclear power assumes its destined and essential role in the future course of humanity. Let us hope that the time required will not be long, because the world energy problem worsens with every passing year.

We can do no better at this juncture than to heed the admonition in the Wisdom of Solomon: for fear is nothing but a surrender of the helps that come from reason (Wis. 17:22).●

SECOND ANNUAL LEADER LUNCHEON

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mrs. HECKLER. Mr. Speaker, on November 4 I was privileged to attend the second annual leader luncheon of the West Suburban Branch of the Boston YWCA, in Framingham, Mass. This annual celebration, established to further the advancement of women in the business world, honored more than 40 extraordinary women from the suburban Boston area.

The recipient of the Leader of the Year Award for 1981, presented at the luncheon, was Marilyn Zann—an outstanding woman whose work as a business leader, artist, community leader, wife, and mother has earned her a place among the first rank of the Commonwealth's private citizens. The founder of an innovative personnel agency designed to help women and minorities find their place in the workplace, Marilyn Zann is also well known and respected for her tireless work with community groups, her achievements as an accomplished sculptress, and her selfless efforts as a hosptial volunteer.

Mr. Speaker, I am proud to bring to the attention of all my colleagues in this House the dynamic record of Marilyn Zann, and also to list here the names of the 39 other extraordinary women honored at the west suburban YWCA's leader luncheon. All of them have played a major role in increasing the role of women in the business community, and their participation in this awards luncheon was a fitting celebration of the contribution of women to our society.

Those 39 women are:

Ann Arvedon, chair of the Framingham Board of Health and HMO planner for Blue Cross of Massachusetts;

Mary Beth Bauman, mechanical systems engineer for the Raytheon Co., Equipment Division;

Susan Bistany, department administrator for the Raytheon Co., Equipment Division;

Cecilia Bland, program manager for Computer Aided Design & Manufacturing;

Patricia Brown, office manager for Roberta M. Kenney Advertising;

Ann S. Broyer, personnel administrator for the Raytheon Co.;

Shirley Chorney, district training center manager for Digital Equipment Corp.;

Jean Coviello Cohen, assistant general manager of the Sheraton Tara Hotel in Framingham, Mass.;

Nan Collins, manager of administration for ARCHITECH Corp;

Michelle L. Cunha, executive vice president of the South Middlesex Area Chamber of Commerce;

Patricia Di Ruscio, employment manager/recruiter for the Leonard Morse Hospital;

Adrienne Dorfman, founder of Women West/South/North;

Marietta Ethier, corporate counsel for the Digital Equipment Corp.;

Ruth A. Farrell, executive assistant to the president of the Perini Corp.;

Betty Funk, executive director of the Greater Framingham Mental Health Association.

Seba K. Gaines, manager for education package development, Honeywell Information Systems Division;

Rose Ann Giordano, manager, Large Computer Product Group, Digital Equipment Corp.;

Jo-Ann Gladstone, manager of TAC/TEMPS Trainer;

Roberta Golden, director of sales, Sheraton Tara Hotel;

Jacqueline Greenlie, manager of the Data Management Group, Prime Computer;

Paula F. Henry, career developer, Work Systems Associates;

Mayling Ju Hutchinson, operations analyst, Digital Equipment Corp.;

Roberta M. Kenney, president, Roberta M. Kenney Advertising;

Pamela A. Maddalena, manager of marketing support for office automation, Prime Computer;

Margaret Martin, merchandise manager, Zayre Corp.;

Sara A. McNichols, education manager for marketing support, Honeywell Information Systems;

Phyllis M. Morcone, assistant treasurer and clerk of the corporation, Koehler Manufacturing Co.;

Bette Nockles, section manager of board assembly, Prime Computer;

Joanne T. O'Brien, R.N., supervisor of the continuing care planning unit at Massachusetts General Hospital;

Kathleen A. Powers, consultant, Marketing Reporting and Analysis Department, Prime Computer;

Sally Pratt, employment counselor, Opportunities Unlimited of New England;

Ann-Marie Rauliniatis, producer and host for the 3-hour news and public affairs radio talk show "Mornings," on WKOX Radio in Framingham;

Mary Schaeffer, marketing manager of engineering systems, Prime Computer;

Dorothy J. M. Schlegel, personnel management, Prime Computer;

Claire Sherman, executive housekeeper, Sheraton Tara Hotel;

Marjorie Smith, personnel director for the town of Framingham, Mass.;

Janine A. Thomas, international tax manager, Prime Computer;

Cindy Tokarz, associate human resources representative, Prime Computer; and

Ana Yacobian, president and treasurer of ARA's, Inc., one of the most renown clothing firms in New England and an institution in my hometown of Wellesley, Mass.

Each of these women has every right to be extremely proud of her record of achievement. I for my part, am extremely proud to have taken part in the ceremony that honored them, and I ask all my colleagues to join me in this tribute to these outstanding women leaders.●

DISTRICT OF COLUMBIA SALUTES SAMUEL H. JORDAN

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. FAUNTROY. Mr. Speaker, Samuel H. Jordan, Acting Deputy Director of the Office of Emergency Preparedness/Mayor's Command Center, will be honored for his invaluable service to the residents of the District of Columbia on the occasion of a "D.C. Salutes Sam Jordan Day" which will be held November 24, 1981.

Mr. Jordan is indeed deserving of the recognition which will be bestowed on him by his fellow citizens next Tuesday, and I would like to outline for my colleagues the range of services

provided by this dedicated public servant.

Mr. Jordan is required to be on call for 7 hours a day, 7 days a week to respond to emergency situations in the city. A family left homeless as a result of fire, children without food, emotional situations culminating in suicidal/barricade situations, those who assemble to petition their government; all rely on the professionalism, compassion, and dedication of Sam Jordan. Indeed, I am certain that nearly every one of my colleagues has constituents who have benefited from the service of Mr. Jordan. I have in mind those national occasions such as when we inaugurate a President, welcome foreign dignataries, and assemble for a Solidarity Day; all are occasions on which Sam Jordan insures the safety and well being of hundreds of thousands of our citizens.

Samuel H. Jordan can be looked to as one who exemplifies the best in a public servant, and I know that my colleagues join me in commending him for his outstanding service and in wishing him well in his future years of service to the District of Columbia, the Capital City of our Nation.●

ABUSES IN LEGAL SERVICES CORPORATION

HON. ALBERT LEE SMITH, JR.

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. SMITH of Alabama. Mr. Speaker, unfortunately, I am continually being made aware of the abuses of the Legal Services Corporation and its affiliates which often result in great harm and expense to society.

Recently, Pennsylvania Governor Thornborgh stated that one of the reasons for the recent escape and hostage taking at Pennsylvania's Graterford Prison was the result of the efforts of Community Legal Services in Philadelphia to have the ringleader and three-time convicted murderer placed back in the general prison population at Graterford. The Pennsylvania Legal Services group received $2,277,972 in Federal funds in 1980.

I have also read with disgust a report from the Southern District Court of Texas which found that the Texas Rural Legal Aid was guilty of the abuse of legal process by its attempt to create a potential charge of discrimination where one did not exist. The Texas Rural Legal Aid received $3.9 million from the Legal Services Corporation last year.

It has been alarming to me to read statements of many of the people who direct Legal Services activities. Recently the Cleveland, Ohio, Plain Dealer quoted the director of the Cleveland Legal Aid Society in her defense of Kathy Boudin, notorious member of the Weather Underground, who was arrested recently in connection with the $1.6 million Brinks robbery in New York. Marge Grevatt, a close friend of Boudin's, stated that the American system had pushed Boudin into her role of violence and terror. "I think it is a terrible commentary on our society when someone with her sensitivity and commitment becomes frustrated to the point that she did," said Grevatt. The Cleveland Legal Aid Society received $1.5 million from Legal Services Corporation in 1980.

I offer for the record the first installment of an excellent monograph on the Legal Services Corporation entitled "Missionaries for Liberalism: Uncle Sam's Established Church" by Michael E. Hammon:

MISSIONARIES FOR LIBERALISM: UNCLE SAM'S ESTABLISHED CHURCH

(By Michael E. Hammond)

INTRODUCTION

Since the beginning of the Republic, Presidents and officers within each administration have engaged in activities which could legitimately be classed as "advocacy." This advocacy—which has frequently dealt with issues involving great controversy—was considered not only the right, but even the responsibility of the President.

Recently, however, recipients of Federal largesse have engaged in a form of advocacy which is qualitatively different from the "bully pulpit" which Roosevelt knew. The difference between Alan Houseman and Thomas Jefferson goes beyond Houseman's relative inarticulateness and the banality of his ideas.

Houseman's statements represent a new form of advocacy—an advocacy which is unresponsive to and uncontrollable by elected executive authority, attacks the religious beliefs of a substantial portion of Americans, is violative of the laws governing the program Houseman supervises, and consistently represents a specific ideological point of view.

This new form of "government ideology," transcending electoral results, is not unique to any single Federal agency.

Congress has established various "intervenor funding" programs for the purpose of financing studies and appearances by "consumer advocates" before agencies. The Federal Trade Commission's program, for example, has handed millions of dollars to groups which are almost without exception, ideologically liberal, and which, in most cases, have substantial financial resources available. This appears to be in direct violation of the FTC's charter, which prohibits "intervenor funding" for any group which could otherwise afford to participate in FTC proceedings.

In areas such as Federal funding intended to benefit the handicapped, "protection and advocacy" mechanisms have been established by statutes like the Developmental Disabilities Act and the Rehabilitation Act of 1978. Under these programs, outside groups are funded for the purpose of litigating and lobbying on behalf of what has turned out to be a consistently liberal set of ideological premises. Although most "protection and advocacy" programs explicitly or implicitly prohibit lobbying the Federal government, the recipients of "P&A" monies freely acknowledge that they have ignored these statutory restrictions.

In addition to those programs expressly authorized to fund advocacy activities, there are many others which have had that unintended result.

For example, a House Appropriations Committee report found that Sam Brown's ACTION had supported union organizing, funded a training institute for community activists to the tune of $432,235, and assigned volunteers to work in the 1979 Arkansas primary election.

LEGAL SERVICES ADVOCACY

But the Legal Services Corporation (LSC) is probably more extensively and exclusively involved in ideologically premised advocacy than is any other agency.

In 1981, this government-created, semi-autonomous entity received $321,300,000 in taxpayer funding. Like other advocacy programs, which operate through extra-governmental non-profit corporations, it is characterized by an organic statute which, while not saying so, has the effect of channelling funding to individuals and organizations on one end of the ideological spectrum.

It is an instructive indication of ideological coloration that a representative of the LSC-allied Food Research and Action Center, went unchallenged when she stated at a November, 1980 conference of the National Legal Aid and Defender Association:

What all of us ultimately . . . care about—ultimately, is meaningful welfare reform, and a meaningful redistribution of wealth and income in this country. Well, getting from here to there is easier said than done. It so happens that there's not a maturity in this country or in Congress for doing that right now, and, what Congress has responded to is not giving low-income people dignity that comes with meaningful cash assistance—what they've responded to is these individual needs. We'll hand them some food stamps—we'll give them a section 8 certificate, . . . which all of us get frustrated about sometimes, because that's not really doing anything to eliminate poverty or change the conditions of poverty. In any event, you have Congress responding to individual needs. They're not responding to a Poor People's Platform—they're responding to individual needs. And, whether I like it or not because of my own personal political and social views I know that on the food issue I get the most mileage out of doing a bleeding heart, kind of churchie, feed-the-poor, kind of thing.

Legal services attorneys have lobbied or litigated to secure disability payments to individuals because they were homosexuals, the cessation of technological development of farm machinery because it would put migrant workers out of work, the imposition of racial quotas in medical school admissions, the turnover of large portions of the Eastern United States to persons of Indian ancestry, the payment of supplemental social security benefits to alcoholics, the establishment of "black English" as a separate language, and the upgrading of Armed Forces discharges for persons thrown out of the service because of homosexuality.

Most of these activities are not within the scope of litigation envisioned by Congress when it passed the Legal Services Corporation's 1974 charter. This intent was most clearly stated by Senator J. Glenn Beall (R.-Md.) when he said: "[The type of cases which the Legal Services Corporation will be handling] are not cases which reach headlines or front pages of newspapers. But

to the poor, every one of these cases is important, whether it be the family being evicted or a mother having her child taken away. Thus the poor (will be) provided representation in difficult day-to-day problems in such areas as family law, landlord-tenant problems with employment and consumer cases."

Whether various activities by Legal Services recipients are actually illegal under the specific prohibitions of the Act is difficult to judicially establish. In 1977, Congress added a provision to the Legal Services Act to prohibit a litigant against a Legal Services client from raising the validity of that representation in connection with the pending lawsuit. Instead, representation questions were to be referred to the Corporation for resolution and, presumably, were to be judicially reviewed, if at all, only under standards which assumed the validity of the Corporation's very broad determination of the scope of its jurisdiction.

Suffice it to say that this costly and partial procedure for challenging LSC jurisdiction had virtually assured that representation decisions, however unlawful, have gone largely unchallenged.

In spite of the dearth of judicial decisions to provide guidance, however, there are a vast number of cases in which involvement by Legal Services recipients would seem to be clearly in direct violation on any of a dozen specific statutory restrictions.●

WOODROW WILSON BRIDGE

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. HOYER. Mr. Speaker, I rise in support of the proviso in the Senate version of the continuing appropriations resolution which would fully fund the reconstruction of the Woodrow Wilson Bridge. This is the only bridge in the country owned by the Federal Highway Administration, and it is only fitting that we provide the $60 million needed to repair it.

The proviso, as introduced by Maryland Senators Mathias and Sarbanes, and Virginia Senator Warner, is supported by the State of Maryland as being critical to solving the safety problems of the bridge.

Conditions on the bridge have become an increasingly important issue for its more than 104,000 daily users. The structure has three serious problems: a severe deterioration of the concrete deck portion of the structure, a lack of shoulder areas for disabled vehicles, and the existing six lanes cannot accommodate the present 100,000 vehicles which pass over the bridge each day.

Mr. Speaker, one of every four accidents occuring on the Washington Beltway takes place on the Woodrow Wilson Bridge. Of the 103 accidents on the bridge in 1980, 56 resulted in injury or death.

The Maryland State Police of the Forestville Barracks, who are charged with traffic control on the bridge, have incurred substantial losses in man-hours and equipment because of the poor condition of the bridge. In 1975, Trooper Mark Hudson was killed coming to the aid of a motorist. From 1976 to 1979, two troopers were injured in the line of duty while aiding accident victims on the bridge. This year TFC Vernon Herron and CPL. William Vogel were injured in separate incidents.

The Senate version of the continuing appropriations resolution contains the vitally needed funding that will allow the complete redecking which includes shoulder areas in both directions to accommodate disabled vehicles. The engineering plans are complete and await the necessary funding. Every delay will only add to the cost of this project—not only in dollars and in the amount of time wasted by millions of commuters each day through traffic tieups, but also in the lives that have been taken as a result of the horrendous condition of this bridge.

I urge the conferees to support this provision in toto. Anything less will only cause confusion and delay.●

WORLD-CLASS MARITIME MAN

HON. ROBERT W. DAVIS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. DAVIS. Mr. Speaker, a respected Great Lakes seafarer recently retired after more than 40 years of dedicated service to the maritime industry that has recognized him as a "World-Class Maritime Man" and that was instrumental in the recent dedication of the John L. Horton Conference Room at the Great Lakes Maritime Academy. It is my pleasure to submit the following article about "Red" Horton from the Cliffs News, while suggesting that this man was the epitome of productivity, efficiency, innovation and sensitivity to the needs of his men and to changing economic conditions within the reaches of the Eighth Sea.

"WORLD-CLASS MARITIME MAN" RETIRES

(By Dave Hoek)

HE WAS "RED" HORTON WHEN, AS A TALL, LANKY REDHEAD, HE REPORTED TO WORK

He sat tall behind his desk, talking intently into the telephone and jotting notes on a legal pad. The call was important and the caller was receiving the man's full attention, even as he leaned back in his chair and rested his feet on a corner of the desk. The conservation would be a long one.

It was a typical pose for the energetic, delightfully youthful man who has been involved in most of the progress of the Cleveland-Cliffs Marine Division for 40 years.

John L. Horton was doing what he liked best in the months just before his scheduled reitrement July 1, 1981. He was spearheading a major project, reaching out across the nation to ask advice and to absorb information from marine industry experts he has cultivated as friends and colleagues during four decades. As assistant to Senior Vice President M. Thomas Moore, John Horton had a front-line responsibility in examining alternative fuel sources for the Great Lakes maritime industry and designing the Great Lakes' first coal-fired vessel in many years.

He was "Red" Horton when, as a tall, lanky redhead, he reported to work February 1, 1941 at Cliffs' Cleveland office. He was entering a career that was a tradition in his family. The lure of the sea had been established early. His grandfather, a construction and marine contractor who helped build Cleveland's breakwall in Lake Erie, had moved his family to Vermilion aboard one of the family's package flat tugs. His father had been a captain on the Great Lakes for the Pittsburgh Steamship Co. (U.S. Steel). Years later, Horton would return to a building the family had owned—now a popular French restaurant on the Vermilion River—and point out splotches of white paint he had dobbed on bare wood when, as a boy, he had cleaned brushes for his father.

At Cliffs, Horton was barely into a routine when he was excused for military duty during World War II. He served as a deck officer on hospital and troop ships in the U.S. Army's Transportation Corps. He returned November 4, 1946, as a senior clerk in Marine Personnel.

Horton's career was shaped by his determination, his inaginative goals, his great sense of vessel service to basic industries, his unequaled knowledge of the Great Lakes, and a number of "colorful" marine department managers who guided Cliffs' fleet over the years.

"John always has certain goals he will drive for in a very determined way," one former Cliffs executive said. "They have always been for the betterment of the industry and the men who work in it."

Horton was named marine superintendent in 1950, and manager in 1976.

"Horton studies things very thoroughly and follows through on every aspect of a project—really keeping on it until he knows all the answers."

Described as a great idea man, Horton is one never satisfied with the ordinary. He is known for his "crusades" for safety or improved operations and for urging industry people to study new concepts. His persistence in the face of skepticism led to Cliffs' current coal-fired vessel project, the first project of its kind started in the U.S. and one of the first in the world.

Horton's love for the lakes and his determined way of working have gained the respect of leaders throughout the marine industry. He is well-known and frequently consulted by people in Washington, D.C. at the Maritime Administration, the Coast Guard, the Corps of Engineers, the Environmental Protection Agency, and the Navy.

Horton has traveled "to see for myself" how others operate in the maritime industry. "He decides who he has to get to know to investigate a particular project and then he lines up his contacts. People at all the agencies know and like him," another colleague said. As a result of his pursuits, Cliffs has received more than its share of government grants and funds.

Horton's personality and interests "are the start of a good book," said one colleague, who like many others in Cliffs' Cleveland office, have "Horton anecdotes" to share.

"He loves strawberries and claims he timed a business trip to Europe one time to

correspond with the strawberry season there."

"Did you know he's a vexillologist? That's someone who researches the history of flags. He makes flags too." (His latest is a Cliffs' fleet safety flag.)

"He loves chocolate—can smell it out anywhere in the office. Open a box and he'll appear."

"He likes to think of himself as a lover—a lover of life and variety, of his wife, Florence, their family, and of people."

"John is a dreamer in the very best sense of the word. He has vision and is always concerned about the future of the industry and the quality of the people, their training and skills."

"He enjoys asking people 'What have you done for me today?' to keep the Marine Division foremost in their minds, I guess."

"He wrote a book on seamanship in 1942—still hands it out to people and signs their copies with wild inscriptions."

These human qualities never overshadow John Horton's commitment to the management of the fleet. He played a major role in the design and construction of the three largest vessels in the Cliffs' fleet—the S/S Cliffs Victory, the S/S Walter A. Sterling, and the flagship, the S/S Edward B. Greene.

Construction of the Cliffs Victory is a story in itself. Horton, faced with an immediate need for another ship in 1951, conceived an unheard of plan to convert an ocean-going ship to a lake vessel within 90 days. It called for modifying the hull in Baltimore and towing the vessel to New Orleans and up the Mississippi River to Chicago for completion—in only nine feet of water with only inches to spare under 115 bridges. Cliffs' success with the venture prompted others to later follow the plan and led to the making of a movie "A Victory for Cliffs" that was distributed to service groups for 25 years.

Horton's plans converted the Cliffs' fleet from coal to steam turbines, led to the first automated single boiler ships in the world in the 1950s and to the first oil-fired fleet which resulted in crew reductions and important economies for the company.

His significant accomplishments also include successful testing of oil from shale as a transportation fuel on the S/S Edward B. Greene. He also negotiated construction contracts for Cliffs' first self-unloaders and managed the Sterling's conversion. He is known for his expertise in other areas too, including food costs and navigation conditions at each port.

Horton was the key man in establishing Cliffs' technical reputation with Detroit Edison Company for the first 1,000-foot vessel project. In short, his contributions to the company and to "my fleet" are important and numerous.

No single cause has motivated him more, however, than fleet safety. His deep involvement in shipboard safety practices and improved equipment positioned Cliffs as a leader in Great Lakes safety. Prior to statutory requirements and as a direct result of his efforts, Cliffs initiated the use of monkey ropes on lifeboats and VERY (flare) pistols. It added lights and whistles to life jackets to aid night recovery and modified jacket design to prevent men from slipping out of them. Through Horton's efforts, a ladder with non-skid steps rather than rungs was develoed for Great Lakes boats.

He became "Mr. Safety" on the Great Lakes, a reputation earned even before 1976 when he was named the first recipient of the Shepheard Award for Achievement in Merchant Marine Safety, the nation's highest marine safety award. He also served as Chairman of the Marine section of the National Safety Council and was Chairman of the Welfare Committee of the Lake Carriers Association for many years.

Moore summed up the admiration John Horton has earned: "This man cannot be neatly categorized. He is competent, imaginative, sensitive, respectful, persistent—a world-class maritime man.

"John's sense of sailing life and traditions and his lifelong devotion to the service mission of the Great Lakes vessel industry are unequalled. He has made tremendous contributions to the industry and to Cliffs. I'm grateful for his counsel and assistance. We're going to miss having him here."

Curiosity about safety, efficiency and people have been John Horton's career concerns as he has maneuvered Cliffs' fleet into many firsts in the company's pioneering tradition.

Curiosity and a sense of adventure will continue to be part of his retirement too. Horton, a graduate of Miami University in Oxford, Ohio, plans to enroll in graduate level courses at Cleveland State University and to continue vacationing at favorite places in the Caribbean.

His love of the Great Lakes hasn't diminished since his childhood. He and his wife will continue to live near Lake Erie in Rocky River, Ohio and sail their 21-foot Lightning class sailboat out of the Cleveland Yachting Club.●

AIR TRAFFIC CONTROLLER PROPOSAL

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. FORD of Michigan. Mr. Speaker, last night, as an amendment to the continuing resolution, the Senate adopted the entire air traffic controller legislative proposal just recently submitted by Secretary of Transportation Lewis. This proposal was introduced in the House only yesterday (H.R. 5038) by Mr. DERWINSKI, the ranking minority member of the committee, at the request of the administration, and was referred to the Committee on Post Office and Civil Service for its consideration. The administration and the other body are clearly trying a legislative end run around the House and its committee system. This is unfortunate.

This proposal requires careful consideration before enactment. It singles out one small group of employees for special pay and benefits at a time when all other Federal employees; for example, FBI agents, Defense scientists, NASA engineers, are being asked to sacrifice. Its special treatment is not limited to air traffic controllers. It applies to many other FAA employees. It would provide additional pay. Although we have not yet obtained a cost estimate of the bill from the Congressional Budget Office, we estimate that the cost of implementing the administration's proposal will be in excess of $50 million in the first year and more than that amount in succeeding years.

The proposal contains several very controversial provisions. For example, it exempts FAA employees from the premium pay cap. It exempts them from duel compensation laws relating to military retirees, and it exempts them from the reemployed annuitant provisions of existing law thereby permitting a Federal retiree to collect both his full salary and his full annuity.

These proposals may be meritorious, or they may not. Clearly, they deserve careful consideration. An initial analysis by the committee staff suggests the legislative proposal may contain numerous technical flaws.

The members of this committee are anxious to do whatever we can to facilitate the recovery of the air traffic control system. We have held discussions with Secretary Lewis regarding the administration's air traffic controller pay legislation, and we have held, and will continue to hold, extensive hearings on the air traffic controller work force. This end-run approach however is not an appropriate way to address this problem. In my view, it is an irresponsible way to legislate and makes a mockery of the legislative process.●

AMERICA'S INFRASTRUCTURE IS WEARING OUT

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. OBERSTAR. Mr. Speaker, this week the House Public Works and Transportation Subcommittee on Economic Development, which I have the honor to chair, held 2 days of hearings on economic development policy for the decade of the 1980's.

Our distinguished witness list included Dr. Pat Choate, senior policy analyst, Economics, TRW, who is known to many of us as the coauthor of "America in Ruins," perhaps the definitive documentation of the wearing out of this Nation's infrastructure.

Mr. Speaker, this Nation's future economic growth is fully dependent on viable infrastructure: The transportation, communications, water supply, wastewater, and other public capital investments in which we have previously invested so much national treasure.

This treasure has been neglected to the point where, soon, we will face insuperable replacement costs, if we do not pay the replacement costs, if we do not pay the repair bills now.

I invite my colleagues to read Dr. Choate's full, illuminating, and alarming analysis of the current condition of America's infrastructure, and actions for the future which he recommends.

TESTIMONY OF PAT CHOATE, SENIOR POLICY ANALYST—ECONOMICS, TRW

Mr. Chairman, it is a pleasure to be here today to discuss with you a topic of such vital importance to our nation and its communities.

Throughout America—North, South, East, West, urban, suburban and rural—the basic public facilities that underpin our economy are wearing out faster than they are being replaced and repaired. Thus, a large and growing number of communities are now hamstrung in their economic revitalization efforts because their basic public facilities—streets, roads, water systems and sewerage treatment plants—are too limited, too obsolete or too worn out to sustain a modernized economy.

For example, a Department of Commerce survey of the wastewater treatment capacities of 6,870 communities found that over 3,000—46 percent—of these systems were operating at 80 percent or more of capacity. A system operating at this level of capacity generally cannot accommodate additional industrial load. The same survey indicated that water treatment and distribution systems were operating at effective full capacity in a third of these communities. Other studies by the Department of Transportation have documented that one in every five bridges now require major rehabilitation or closure and that as much as twenty percent of the Interstate Highway System is beyond its designed engineered life, is worn out and now requires total rebuilding.

A number of studies have attempted to measure the importance of these public works on the investment and location decisions of individual firms. The most comprehensive of these studies was a Census Bureau survey conducted in the mid-1970's. Over 2,000 firms operating in 254 distinct product classes were examined. For virtually all 254 industry categories studied, the survey found that the availability of public works facilities was either of critical or significant importance to investment and location decisions by the private firms. While not a sufficient condition for private investment, the availability of public facilities was virtually always a necessary condition—an important distinction for public policy.

Moreover, the survey revealed that public facilities were almost always a very much more important locational consideration to firms than were the more visible federal, state and local tax incentives or the availability of industrial revenue bond financing.

Thus, when the deteriorated condition of all these public facilities essential to private sector investment are considered, it becomes clear that the overwhelming majority of the nation's communities—perhaps as much as three quarters—will be unable to support modernized development until major new investments are made in the basic public facilities that undergird their economy.

Well-conceived public works are not pork-barrel. Indeed, investment in public facilities is as essential for national and local economic renewal as investment in a renewed industrial plant. Indeed, public works, along with public education and publicly sponsored research, are the only "supply-side" investments that government itself makes.

Yet in the case of public works, the nation is simply not making those public work investments that are necessary to underpin the revitalization of our economy. For at least two decades, all levels of government have reduced public works expenditures on maintenance, rehabilitation and new construction in order to balance budgets, reduce taxes and finance a growing array of social programs. In spite of clear evidence of deterioration, the non-inflated value of public works investments by all levels of government declined from $33.7 billion in 1965 to less than $24 billion in 1980—a 30 percent real decline.

To rebuild America's essential public facilities, substantially more funds will be needed in the 1980's than have been available in the 1970's. The better and more creative use of financing techniques—such as more extensive use of user fees, privatization or public/private leasing—can raise some of these funds. At the same time, more purchasing power can be obtained from those funds that are available through the elimination of waste and fraud—efficiencies that can flow from improved management and aggressive Congressional oversight.

Yet even with the extensive use of imaginative financing and honest, competent management, simply will not be possible to generate the $2-3 trillion needed to rebuild America's public facilities. There are too many other compelling public and private demands on the limited capital that will be available in the 1980's. To put the issue in perspective, the Department of Transportation reports that over $800 billion will be required in this decade to retain just the present levels of service on the nation's non-urban highways; yet this is an amount greater than all of the public works investments made by all levels of government in the decade of the 1970's.

Clearly, difficult choices must be made—choices that will exert profound influences on the national economy, the quality of life of all citizens and the shape and direction of virtually every community's development.

The principal barrier to making these choices in a considered manner is the absence of a public works investment strategy as embodied in a national capital budget. Today, the United States has no inventory of its public facilities; there is no assessment of the condition of existing facilities; there are no standards for the services to be provided by public facilities; there are no investment strategies and no investment priorities; there is no uniform estimate of future investment requirements; there is no basic agreement among the federal, state and local governments on the allocation of authority and responsibility for the financing, construction and operation of specific types of projects; and there is only the most limited oversight by the federal government over those federal public works expenditures that are made—particularly those made in the form of block grants or revenue sharing.

In the absence of such basic policy and management information and a national capital budget, many unintended and unwanted consequences are produced.

First, no overall view is taken of the nation's public works needs, the role of the respective levels of government in meeting these needs, or how individual federal investments relate to each other or to any long-term strategy.

Second, the short term is favored over the long term. Budgets operate on a two to three year cycle which thus biases the budget process towards projects that can be financed in one or perhaps two appropriations. Moreover, in the absence of a longer term strategy, it is often difficult to maintain a coalition that can sustain a long-term project no matter how vital it may be. Unfortunately, many of the nation's most important public works challenges—such as rebuilding the Interstate Highway System and assuring clean and adequate water supplies—will take a decade or more to finance and construct.

Third, in the absence of a coherent national public works investment strategy (which sets investment needs and the ways to meet them) investment requirements for the nation's public facilities cannot be systematically and thoughtfully considered against other important public investment responsibilities such as defense and social requirements—areas where there are consolidated budgets and long-term investment estimates.

Finally, as public facility investments were ignored and deferred in the 1970's so that the limited public funds could finance a growing list of social expenditures, public works investments could again be ignored and deferred in the 1980's because of other more visible calls on the public treasury.

The time has come for the federal government to bring coherence and stability to its public works activities. The first and most important step in this process is the creation and use of a national capital budget.

A national capital budget would consist of six basic components:

An inventory of the nation's public facilities, coupled with an assessment of their physical condition. An estimate of capital investment needs. An estimate of required operation and maintenance expenditures. The identification of sources of financing. The specification of priorities. The identification of the responsible institutions.

By providing a framework in which policy, legislative and management decisions can be considered, a national capital budget can help the President and Congress bring coherence to the nation's difficult public works investment decisions. Such a basic management tool can also help bring stability and certainty to federal decisions—a stability that will permit state and local governments to better plan and manage their public works responsibilities.

But most important, a national capital budget can permit the President and Congress to carefully consider the nation's aggregate public works needs against the nation's aggregate defense and social needs—permitting a balance in investments not now possible.

The rebuilding of the nation's public works is a difficult but critical task that must be faced. Our success in meeting this challenge will largely determine our success in rebuilding our economy and maintaining even the present quality of life of our citizens. The most fundamental step in meeting this challenge is the creation and use of a national capital budget.

Thank you for the opportunity to share my views with you this morning.●

FINANCIAL CIRCLE LEADER

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mrs. HECKLER. Mr. Speaker, since colonial days the progress and pros-

perity of New England have been closely linked with the development of a thriving financial community in our region. Not only in an economic sense, but also as a driving force in civic and cultural advancement, New England's financial community has for centuries been an integral partner in providing a better life for millions of people.

One of the undisputed leaders of New England's financial circle is a man who epitomizes the long traditional of active concern and involvement in civic affairs—Richard D. Hill, chairman of the board of the First National Boston Corp.

For 10 years the chairman of the parent company of the First National Bank of Boston, Dick Hill has rightly earned the reputation of being "the most influential bank president in New England." A far-seeing and brilliant businessman, he has in the last decade worked to strengthen and modernize the bank's operations—and in those 10 years has presided over a quadrupling of the First National Boston Corp.'s assets.

At the same time Dick Hill has devoted himself to helping the people of Boston build a better life for themselves. He is a central figure not only in economic development—as a former head of the Vault, an unofficial financial coordinating committee that brings together the heads of Boston's largest and most influential firms—but also in countless civic projects. His work as a member of the Boston Committee, established by the mayor of Boston to ease racial tensions within the city, is only one example of his active concern in facing the crucial issues of our time.

Throughout his life, Dick Hill has shown that hard work and a keen intellect remain the keys to success in our society. As a businessman as chairman of the board of trustees of his beloved alma mater, Dartmouth College—as a public figure—and as a devoted husband to his lovely wife, Polly, and father to three fine children—he typifies the ideal of the complete citizen.

Dick Hill's accomplishments are a valuable example of the American system at its best. I wish to call to the attention of my colleagues the following profile of Richard D. Hill—published in the October 25 edition of the Boston Sunday Globe—which captures the spirit of this outstanding man:

"DICK, I THINK YOU OUGHT TO BE A BANKER"

(By Donald Lowery)

Several days after he should have, in the spring of 1941, Richard Devereux Hill went to see a placement officer at the Amos Tuck School of Business at Dartmouth College. His aim was to secure one of the jobs students were required to take in the summer between their two years in the program.

The New Hampshire school "had two jobs left in Boston, one with the First National Bank and one with the National Shawmut," Hill recalled recently. The placement officer "looked at me and said: 'Dick I think you ought to be a banker.' He didn't have the faintest idea of who I was."

Hill had never heard of either bank. But after going home to Salem he headed for Boston. "When I got off the subway I just happened to turn right and this was the first bank I came to. That's how careers are made," Hill said in one of his frequent exhibitions of dry humor and quips.

Since the day he landed the $15-a-week job at the First, Hill has become the most important banker in the most important bank in New England. It is a position, he says convincingly, on which he never had designs.

"I never planned to become president or chairman but I had hoped I would be a senior officer. In terms of planning ahead for my career, I think I would have been perfectly satisfied with a job at a lower level and obviously at somewhat lower compensation," said the 62-year-old Hill, who last year received remuneration in excess of $330,000.

In the 10 years Hill has been head of the First National Boston Corp., the bank's parent, the assets of the company have grown four-fold, from slightly more than $4 billion to today's total of $16.2 billion. The bank has developed a number of new sophisticated banking services, including its computer leasing operations, and it has expanded its locations to the point where it is a truly international bank.

Along with running the bank and its holding company, Hill has been a central figure in most major developments involving the economic health of Boston and Massachusetts. He recently stepped down as the head of The Vault, an unofficial financial coordinating committee whose members are the heads of the largest and most influential businesses in Boston. He is a member of the Boston Committee, a four-member group appointed by Mayor Kevin H. White to help lessen racial hostilities in the city.

A man of average height and medium build, Hill is noted for his understated attire and a subdued manner, attributes uncommon to big bank chief executives, who often appear paranoid.

In describing the role and the influence of the institution he heads, Hill says he does not believe the company has as much power in the city as is generally believed.

"It's a perception on the part of others that may not be absolutely accurate.

"We do not have very many votes either in Boston or in Massachusetts and we have a great deal of competition both within New England and from institutions outside of New England. To the extent that we unwisely or unfairly try to exercise this power we're talking about. I'm sure our competition would come in and take some of it away from us."

As to how he fits in the affairs of the city and the region, Hill said: "I really look at my own role as having a great deal of responsibility and a rather limited amount of power."

Mayor White, who has known Hill the entire time the two have served in their respective posititions, said: "I like Dick Hill. It's both affection and admiration. He's a man with an independent mind. I consider this rare in both politics and business." White compared Hill favorably with past heads of Boston businesses who have taken leadership roles in civic activities. "I think he really cares about the city." White said.

David T. McLaughlin, the recently appointed president of Dartmouth College, was the immediate predecessor to Hill as chairman of the college's Board of Trustees and has worked closely with him for five years.

"I find him to be extremely quick, he has a fine intellect and he knows exactly how to apply it to substantive issues in a very efficient and productive manner. He's fun to work with," McLaughlin said of Hill.

Asked what he likes most about Hill, McLaughlin responded, "His humanness. He's a very natural person with a great interest in others."

Hill grew up in Salem where his father was a lawyer and a district court judge. His early schooling was slightly marred by a teacher who said he was bright enough to skip the fifth grade. "That was the year they taught long division and I've had trouble with it ever since," said Hill, who now lives in Marblehead.

As a student in Salem, Hill recalls, "I got reasonably good marks but never in the valedictory level. I was kind of a lazy student because things came to me easily and I didn't work terribly hard."

In high school in Salem, Hill was active in various extracurricular activities and his talent as a clarinet player helped him become the leader of the school's symphony orchestra.

He then went to Phillips Exeter Academy "because my mother thought I was too young to go to college." At Exeter, Hill was part of a dance orchestra that was good enough to get a contract to play on Cunard passenger ships between New York and Liverpool during the summer following his graduation.

Although his father was a trustee of Tufts University and Hill had always thought he would go there, he ended up at Dartmouth, a school his mother liked because it was all male.

While completing his major in economics at Dartmouth, Hill continued his musical activities, founding a dance orchestra called "The Green Collegians", which played big band and swing music at local high school and fraternity gatherings.

Looking back at his college days, Hill said he regrets choosing a "three-two" plan which gave him three years of undergraduate liberal arts studies and two years at the Amos Tuck School. "It was a mistake for me. The trouble with that system is that I missed my fourth year of liberal arts. The senior year is the time when you really should get the most out of liberal arts. That's when you've grown up enough to know what courses you should select and I missed that."

Spending his senior year at the business school did allow Hill to complete college because the Navy recruited his class to serve as ensigns in World War II, contingent on their graduation from Tuck.

During his naval training at Dartmouth, Hill decided he would join the newly formed bomb disposal forces after hearing the sales pitch of a young lieutenant.

"He made it sound very difficult to get into and he also pointed out it was a small group with a great deal of espirit de corps and we could participate in picking our assignments."

Hill spent most of his time in the Solomon Islands and says the only time he was ever worried about his safety was when he was ordered to defuse Japanese bombs that were resting in shallow waters off the shore of a South Pacific Island.

"They had a barge up above me with the air pump that supplied me air through a

hose. When I got down to where I thought the bomb was located, the barge all of a sudden moved away just about as far as they could move it, as far as they could stretch the air hose. It indicated to me they didn't have much confidence in my ability to deal with that bomb.

After his tour of duty, Hill received a special citation from Admiral W. F. Halsey, commander of the South Pacific Fleet, for developing a fuse for personnel mines as an emergency defensive measure in the field during the Solomon Island campaign.

Hill returned to the bank after the war and about three years later made the move that began his corporate ascent. He organized an operation at the bank that enabled independent trucking company franchises to bypass the normal time-consuming settlement of accounts between themselves when carrying freight through each other's territory. The bank established accounts with the companies and settled accounts between the trucking companies.

As he worked on that operation, the bank handled a credit request for what today is the Ryder Systems Inc. truck rental and leasing company, and Hill handled the credit request.

"Because it was a new field for banking and we got there first, it was a great opportunity for us. We became known as a bank with a lot of expertise in the trucking industry." The trucking business mushroomed in subsequent years and Hill earned a reputation as one of the more able young bankers at the First.

Hill became a loan officer at the bank in 1948, a full vice president in 1955 and president in 1966.

"Banking was always fun," Hill said. "Right from the start, the thing I liked most about banking, and still do, is the fact that it brings us into daily association with high-ranking businessmen. In a bank you are dealing with people who make policies in a company. You are dealing with the heart and soul of a company and that's fun," he said.

Along with his dealings with executives of other businesses, Hill said his most rewarding personal experiences in his career have been the friendships developed with other international bankers, including Sir Anthony Tuke, former chairman of Barclay's Bank Ltd. of London; Isao Masanune, chairman of the Industrial Bank of Japan; and Akira Kawasaki of the Bank of Tokyo.

Hill is the father of a daughter, and two sons, the youngest of whom is a banker in the Seattle office of the Continental Illinois National Bank & Trust Co. Pursuit of his career, he said, was not to the detriment of his family life.

"I made it kind of a rule to try not to be out more than two nights during the week. Because we had the same sporting interest, we all like to ski, we all like to sail, when the kids were college age and beyond we saw a lot of them because we rented a ski place in New Hampshire and they'd come up almost every weekend."

Today, Hill is still a fan of swing and big band music, and his fellow clarinet players Benny Goodman and Artie Shaw are among his favorites. Although he no longer plays for money, Hill does occasionally join friends to play Dixieland music.

A recreational sailor since his early teens, Hill once was very active in competitive racing but he had to drop it because of the lack of time. He continues to pleasure cruise on his 40-foot Concordia yawl.

Three years before he reaches official retirement age, which coincides with the 200th anniversary of the First National Bank, Hill does not hesitate when asked what he hopes will be said about him when he departs.

"I hope they say that he left behind a good bank with good successor management and possibly, in the process, contributed something to the improvement to the place we live.

PUTTING A CAP ON LEADERSHIP

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. WOLF. Mr. Speaker, an excellent editorial appeared in the November 1981 issue of Sea Power magazine. As the article points out not only do those in government service deserve better, but above all, so do the taxpayers and citizens, deserve the best. We cannot allow the exodus of top management talent from the Federal Government to continue. I ask that the text of this article be printed at this point in the RECORD.

PUTTING A CAP ON LEADERSHIP

Few Americans realize it, but unrealistic compensation limits imposed by Congress on the rest of government virtually guarantee that the most talented people in our naval and military forces, and in the federal civilian work force as well, will leave government service and seek employment in the private sector instead.

Thousands already have. Many more thousands are likely to join them in the very near future unless immediate remedial action is taken.

Now, while I have great respect for the men and women of the U.S. Congress, and for the weighty and sometimes intractable problems that they have to solve, I think that on occasion they seem to "take their eyes off the ball." The recent "pay cap" issue is, in my opinion, such an occasion, and I believe it is time for someone to speak out about it.

While it has not been stylish for the past 50 years to worry about raising compensation levels at the "high end" of our society—quite the contrary sometimes—and while it may be hard to feel concerned about the economic conditions of people making $50,000 a year, let's turn it over and look at the other side. Business and industry have long since learned that intelligent compensation administration is the cornerstone for retaining and motivating the outstanding performer. Far from establishing policies which result in a flattening or leveling off as one is promoted to higher and higher responsibility, they try to bend the curve in the other direction and provide extraordinary compensation for those who perform in an extraordinary manner—in the intelligent self-interest of the company.

Throughout its history, our country has been most fortunate in attracting to public service outstanding, capable men and women whose talents contributed immensely to our attaining—and maintaining—greatness in the world. Perhaps even more remarkable is the fact that so many elected to make a career of service to their country—in and out of uniform—despite being compensated for their labors at rates that rarely matched those in the marketplace. One can only wonder where America would be today had it not been able to turn in time of crisis to these selfless, dedicated leaders—people such as Eisenhower, Nimitz, Bohlen, and countless others, both civilian and military.

Still, in days past those who toiled for the government did have the satisfaction of knowing that increased responsibility brought with it more pay—as elsewhere. If an up-and-coming Navy captain was selected for promotion to rear admiral, not only did two stars replace his old insignia of rank, but his paycheck and other forms of compensation received a sizable boost. To be sure, much more was demanded and expected of him, but at least he had more than a title and his new insignia to show for his accomplishments.

Who would believe, though, that under today's ridiculous-beyond-belief ground rules regulating pay for our government executives the same up-and-coming captain later could become the Chief of Naval Operations, a pinnacle five promotions up the ladder, and not receive an additional dollar in base pay? Or that by the fall of 1982, under current pay-increase plans for both civilians and the military, which put an upper limit or "cap" on compensation for senior executives, his pay—as CNO—would be surpassed by that of a middle grade GS-14, a Civil Service rating ranked as the protocol equivalent of a Navy commander? To say the least, that kind of practice hardly serves as an incentive to continue serving the government in uniform!

In fact, a recitation of the havoc pay caps are wreaking might commence with those words we came to know as children—"Once upon a time . . ."—because it sounds almost like a fairy tale. And not one that ends happily, either! Here are some of the more chilling examples of the results of this shortsighted, poliitically expedient policy which a combination of executive and legislative branch decisions have inflicted upon government executives:

The pay at five—repeat, five—levels of government service is frozen at the same dollar level.

Some 33,000 civilians and slightly over 1,000 generals and admirals are included in the freeze. And, as Congress legislates new pay increases for those on the lower end of the scale, that number obviously will grow.

In the past 11 years, government executives affected by the pay cap have received but three pay raises, amounting to a collective total of 43 percent. In that same time span, private-business-sector executives have averaged pay increases of 116 percent and General Schedule (GS) government employees 118 percent—and the government's hourly-earning index and Consumer Price Index both increased by more than 130 percent.

At least partly as a result, the retirement rate for career government employees whose pay is capped has soared—from 17.6 percent of those eligible to retire in March 1978 to 57.1 percent of those eligible to retire in March 1980.

Any colonel or captain drawing bonus pay of any kind makes more than any flag or general officer in the armed services who is not drawing bonus pay.

What causes all this is that, by act of Congress, the pay of senior military and civilian executives in the government cannot exceed Executive Level V (currently $50,112). This has caused increasing numbers of senior people each year to be caught in a pay squeeze which makes it more attractive to take early retirement and go on to more lu-

crative jobs elsewhere, while drawing retirement pay that soon rises to the level of the pay they received while working in the government.

Sound strange? It is—and it is driving good people out of the government in droves. Senior military officers are also affected, and only a sense of duty and loyalty to the organization has made some of them stay on longer. But retired pay is tied to the cost of living and rises automatically as the cost of living rises. Many senior people are now in the odd position, therefore, of making more on their retired pay than they would be making if they had stayed on in the government. Legislative relief is obviously needed—and has not been forthcoming.

And yet, on the very day the recent federal spending cuts took effect, the Congress voted itself a bigger operating budget, in addition to a package of personal tax breaks, expense-account advantages, and other financial benefits. While not termed a "pay raise," that package certainly puts more money in the pockets of the country's lawmakers.

Shocking as those examples cited earlier are, though, they don't even come close to this magnificently ironic one which says a lot about our priorities: The six officers who shoulder the greatest burden in connection with the defense of our nation—the Chairman of the Joint Chiefs of Staff and the five service chiefs (including the Coast Guard Commandant)—all receive roughly 17 percent less pay than does the social secretary to the wife of the President of the United States! And that situation is not new; it has continued for several administrations!

In sharp contrast, according to a U.S. News & World Report survey completed in 1979, the median pay among 356 chairmen of the boards of major corporations was $399,349, that of 325 company presidents was $373,649, and that of 370 company vice presidents was $228,187. And none of those individuals has the life and death responsibility for the country and its people that our service chiefs and their senior colleagues have.

On their wisdom and military experience hangs, literally, the fate of the country, for they constitute the senior military advisers to our civilian commander-in-chief, the President.

Still another fascinating contrast is provided by scrutinizing the differences in pay of junior and senior executives working for Uncle Sam and those drawing paychecks in the corporate world. The monthly pay of the Commandant of the Marine Corps, for example, is barely four times that of a newly commissioned second lieutenant, and only 2.6 times that of a civilian who enters government service after acquiring a master's degree in college. But senior General Motors executives are paid 20 to 30 or more times the salary of the average executive trainee.

Is there any wonder that career employees—in and out of uniform—are leaving government service in droves? But why stay after reaching the peak level in pay if your demonstrated talents bring you nothing but more work and greater responsibilities? Why not hang it up early and enter corporate life, where those same talents will not only earn more remuneration for what you are doing but also permit you and your family to enjoy your retired pay while you're still young enough to make the best use of it? And if you have children to educate, why scrimp on their tuition when you can draw on two sources of income for it?

What is perhaps most insidious about the pay cap phenomenon is that it affects only the senior people in the government—those at the top of the ladder—so does not create the groundswell of public and media sympathy evoked by the plight of the sailor on food stamps who could not make ends meet. Recent pay raises helped him—and he more than deserves that help—but they didn't help senior people at all. But the pay cap will affect younger personnel, if key leaders in the government and military continue to be under-compensated, and retire, at the present rate. There already are 451 key Department of the Navy civilian jobs vacant. They cannot be filled because competent people are looking elsewhere for better pay. This is a shameful situation.

But the real danger to our society and to our country is not the injustices we do our senior civil service and military executives by such a short-sighted executive pay policy. It is in the effect of that policy upon the "comers"—the young men and women who have moved along rapidly, ahead of the pack, and who are the potential outstanding leaders of the future. They take a look ahead and see that for the next few years they will be getting compensation increases, but, if they really make it to the top, all that will increase will be the hours of work, the crushing responsibilities, and the worries and concerns. How much better, they will say, to "split off" now, while the kids are still young and while a full career can be obtained elsewhere. Far better to leave the service of your country after 10 or 15 years and march down a new path, than to spend 25 or 30 years with no further growth or rewards—and then be in a much less advantageous position in seeking a job in business or industry.

What this kind of compensation pattern does is counterproductive: It motivates the top performers, whom you most want to keep, to leave and leaves you with the journeyman performer, who is necessary in some numbers but will never provide the top leadership that is critical.

Now consider this: Under current law an officer can hope to reach the O-6 level—captain or colonel—at the 22-year mark in his career, at about 43. After 30 years of service, he would have to retire, unless selected for continuation for up to five years. If he were selected for promotion to flag or general officer rank he would have the potential of another 19 years of service before reaching mandatory retirement at age 62. On the civilian side, a young man fresh out of college and entering government service could aspire to reaching GS-15 (where the pay cap now hits) after 15 years of service. Theoretically, he could continue serving his government as long as his health and desire hold out, since there is no mandatory retirement age at present for government civilian employees. However, no matter how high either the captain or the GS-15 ultimately advances to, under current law he couldn't make any more money!

It must be obvious to anyone watching a news telecast or reading a newspaper or news magazine that this is no time for mediocrity to be the principal characteristic of our government. But in large measure that's precisely what we shall have if the current pay cap policy, and the resulting drain of talent and brains, are permitted to continue. Excellence of performance is based on both incentive and need. But if incentive is stifled and in turn causes need not to be met, then those affected will put their talents to use elsewhere. And those who might otherwise wish to serve their government will for the most part elect not to do so. Cold hard statistics already are proving that.

Nevertheless, Congress recently voted to continue the pay cap, then exactly one week later approved and sent to the President a pay bill increasing military pay substantially. The main purpose of the pay bill is to attract to—and keep in—the military services those talented men and women who are so badly needed. Are those two actions consistent? Hardly!

At the time the second vote was taken, the one on the pay bill, those legislators knew full well that, despite all the magnificent rhetoric extolling the bill that would appear in the Congressional Record, none of those officers now serving at the highest five levels of our military leadership—colonels, captains, and above—would receive any additional pay! They also knew that the next lower echelon of our military services, the commanders and lieutenant colonels who will be our future naval and military leaders, would also realize that fact, and perhaps plan their own futures accordingly. How hypocritical can we be? And how shortsighted?

Certainly the current tenor of government and mood of the country is for economy. But I believe that the people of this country want intelligent savings, not savings which are shortsighted and which really cost us more money in the total picture.

And just what are we talking about? Supposing we were to postulate added pay—ranging from an additional $5,000 to perhaps even $30,000—for all of the very top people in the civil and military service of their country? Since the number of people affected would be larger at the lower end of the spectrum, let's assume that the average increase would be around $10,000 per year per person. What we are talking about, then, is a total annual cost amounting to less than 0.05 percent—less than one twentieth of one percent—of our federal budget, or, another way to look at it, less than half of what we spend on health and welfare every day!

If you want to look at a popular vote on this issue, consider how the shareholders—the owners—of large industrial corporations have voted time after time when some shareholder owning eight shares or so has attempted to impose a pay cap on top corporate salaries. Recognizing that if the pay of all the senior officers in a company like General Motors were eliminated entirely it would permit something like a one-penny-per-share increase in earnings, and realizing that these people are responsible for the success—indeed, for the very life and death—of their corporation, shareholders have always voted overwhelmingly, by well over 90 percent, to defeat such pay caps. Can't the members of the Congress and the administration who believe that it is politically expedient to cap our top people see that they are wrong? And not only wrong, but stupid?

As a businessman, as a taxpayer, and as an American who has high hopes that his government will be led and defended by able, dedicated leaders, I am appalled by such an abysmally stupid policy. And I am angry at those who—shortsighted, politically cowardly—perpetuate it.

What needs to be done?

On 1 October, Congress approved a continuing resolution (Public Law 97-51) which maintained the current pay rates for senior

level executives (and thus continued the pay cap) until 20 November, 1981. At that time, either another continuing resolution—or remedial legislation authorizing new, higher pay rates—must be approved. Proposed new rates for senior civilian executive service have already been developed. If enacted into law and funded by Congress, they would automatically raise the pay cap significantly. What is needed now is public support on this vitally important issue. Congress must take some form of definitive action by 20 November, and if the cap is at least raised it will send a much-needed positive signal to the leaders of our government and military.

At this crucial juncture in American history, our nation needs outstanding leaders—in Congress, in our government agencies, in the military. But if members of Congress, whose votes can be the determining factor on whether talented people will be available for those other key positions of our national leadership, worry more about enhancing their own compensation with tax advantages and avoiding any possibility of a political flap rather than worrying about America, then the ultimate cost to our country will be frighteningly high. The time has come for Congress to wake up, to face the facts, to cease and desist. And it also is time for its members to be told by their constituents to alter this ridiculous policy. For not only do those in government service deserve better, but above all so do we, as taxpayers and citizens, deserve the best!●

BISHOP McSHEA: A MAN OF VISION

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. RITTER. Mr. Speaker, the Lehigh Valley of Pennsylvania, whose people I am proud to serve, is an area rich in tradition. A melting pot of many ethnic groups, it has developed a religious heritage which is as diverse as it is devout.

Among those in the religious community, as in the larger community of which we are all a part, a select few shine above the rest. The Most Reverend Joseph McShea, first Bishop of the Diocese of Allentown, is one of those few whom God has blessed with special gifts and talents to better serve His people.

As the founding bishop of the Diocese of Allentown, Bishop McShea has used those gifts wisely to benefit not only the people of his own church and diocese, but also Catholics and non-Catholics alike in the five-county diocese area.

On December 6, Bishop McShea will celebrate the 50th anniversary of his ordination. In recognition of this occasion, Bishop McShea will celebrate a Pontifical Mass of Thanksgiving at the Cathedral Church of Saint Catharine of Siena in Allentwon. The celebration will continue with a Golden Jubilee Banquet in his honor.

Born on February 22, 1907, in Lattimer, Pa., he entered Saint Charles Borromeo Seminary in Philadelphia in 1923. He was sent to Rome in 1926 to complete his studies for the priesthood, being ordained on December 6, 1931. A year later, he completed his studies at the Pontifical Roman Seminary and the Lateran University in Rome, receiving doctorates in philosophy and theology. Named titular Bishop of Mina and Auxiliary Bishop to the Archbishop of Philadelphia, John Cardinal O'Hara, on February 8, 1952, he was consecrated a bishop on March 19, 1952.

In February 1961, Archbishop Egidio Vagnozzi, Apostolic Delegate to the United States of America, announced that "His Holiness, Pope John XXIII, has divided the archdiocese of Philadelphia * * * to form the new Diocese of Allentown." At the same time, the Holy Father named the Most Reverend Joseph McShea to be Bishop of the new See of Allentown.

Two months later, on April 11, Bishop Joseph McShea was installed as the founding bishop of the new Diocese of Allentown in the Cathedral of St. Catharine of Siene.

"This diocese begins its life with countless resources, but most of all it has almost a quarter of a million Catholic souls," Bishop McShea said, adding:

"This is a day of birth. The Diocese of Allentown springs forth as another flowering of the Catholic Church, the mighty tree born of the smallest seeds * * *"

Twenty years later, a combination of work and prayer has had marvelous effects on the growth of those seeds which have become the Diocese of Allentown. Much of that work and prayer has come from Bishop McShea's own hands and heart—a heart which is always willing to give and to do good for his fellow man.

An April 9, 1981, editorial in the Philadelphia Catholic Standard and Times states that "in a world and in a church rocked by turmoil during the past two decades, the Diocese of Allentown has shown an enviable stability and progress."

Under Bishop McShea's leadership in the early 1960's, a $7.5 million education expansion program was undertaken, a goal exceeded by more than $4 million. An editorial in the secular press called it "a new standard for supporting worthwhile causes * * * a magnificent tribute to the vision, courage, and leadership of Bishop McShea."

More than 200 buildings have been constructed, purchased, or completely renovated in the diocese. In 1963, Holy Family Manor was opened in Bethlehem to care for the elderly. In 1964, Allentown College was established in Center Valley through the inspiration of Bishop McShea. In 1968, Archbishop Luigi Raimondi, then Apostolic Delegate to the United States of America, dedicated a $2.8 million extended care facility wing to the Holy Family Manor, increasing the capacity to 200 beds and expanding care possibilities. In 1974, Holy Family Villa, a home for retired priests, was opened adjacent to the manor.

"Today's intellectuals sneer at bishops who build," Bishop McShea wrote in 1969, "but these buildings are the indispensable tools of every form of apostolate. Thank God that the generosity of our people and the dedication of our priests and religious make these works possible."

Throughout the past 20 years, Bishop McShea has become known as a leader as well as a builder. In 1966, Bishop McShea called for a diocesan modernization plan which included the convocation of a diocesan synod to shape the diocese in light of the teachings of the Second Vatican Council. On May 1, 1968, after 18 months of preparation, the First Synod of Allentown was celebrated, establishing a set of 110 general norms and regulations to govern its maturing life. This synod has been hailed as one of the first and most successful diocesan synods in the Nation after the Second Vatican Council.

In addition to its building and educational programs, the Diocese of Allentown has been the center for two national movements.

The first, National Shut-In Day, was founded in Reading in October 1970. It gained nationwide recognition in 1972 when President Nixon signed a congressional resolution establishing the third Sunday of October as Shut-In Day.

The second, Operation Rice Bowl, was founded in the Allentown area in 1975 by clergymen of varying faiths. It has spread to Catholic dioceses throughout the United States, raising several million dollars during the past 5 years, of which $700,000 was contributed by Catholics of the Allentown Diocese alone.

In August 1980, Bishop McShea mandated that a basic catechism would be used in all religion classes in the diocese. The Standard and Times called the bishop's decision "an action which could and should set a pattern for diocese throughout the United States."

In 1961, Bishop McShea called the Catholic families of the diocese to work and pray for the sake of the new diocese. In 1981, he calls the Catholic families to work and pray for the sake of the families themselves, saying, "Family life, of course, is the key to good community, civil, and political life."

As for the future, Bishop McShea stated in February that he is focusing especially on three areas of pastoral care: Campus ministry, ministry to the Hispanics, and pastoral hospital ministry.

"Much has been accomplished up to the present," he said, "but I would think that in the next year or so we can do even more."

During the past 20 years, the Diocese of Allentown has grown from 243,260 in a total population of 897,325 to 260,157 Catholics in a total population of 1,032,343. Much of this growth can be attributed to the wisdom and courage of Bishop McShea. His foresight has allowed those few seeds of 20 years ago to blossom into a prosperous and faithful Catholic community whose members work and pray together as the larger family of Christ of which they are all a part.

I am happy to serve Bishop McShea as a Congressman, and I am proud to call him my friend. His 50 years of service should serve as an inspiration to us all.●

FUTURE OUTLOOK—NATURAL GAS

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. COLLINS of Texas. Mr. Speaker, America is seriously concerned about the future of natural gas. A sound evaluation of the outlook was made in a recent speech by Secretary of Energy, James B. Edwards. He spoke before the American Gas Association in Washington, D.C.

He emphasized the need for America to be realistic and for Congress to take the leadership in moving toward immediate deregulation of natural gas. Here are the major sections from the speech of November 18, by Secretary of Energy Edwards.

I suspect that early on after the election last year, many of you were not yet convinced that this Administration was really going to keep its promises. Or that our efforts to deregulate our Nation's energy market would really work. By now, I think most of you are firm believers in our commitment.

Everyone—even the critics who predicted no one would be able to afford gasoline—can see that oil decontrol has been a smashing success. In most parts of the country, gasolines costs less now than it did earlier in the year. And, for the first time in recent memory, the average cost of home heating fuel actually declined a little last month.

But, Washington is undergoing a major transformation. There's a new spirit in the capital these days. I'm sure all of you realize that this President is different from other presidents we've had. Even the bureaucracy is finding that out. He's made promises that he intends to keep. He's given us marching orders that he expects us to follow. And he's set the Nation on a course from which he has no intention of deviating. This President isn't just a man you work for. He's an inspiration. He inspires ordinary men and women to greatness. He wants us to put our narrow interests aside and to stop playing politics with the Nation's future.

He is going to keep on driving down inflation. He is going to keep on cutting the government down to size. And he is going to keep right on dismantling the regulatory apparatus that has stifled our Nation's progress, weakened our resolve and dimmed the light of leadership to which so many other countries look for solace, support and security.

We think we are doing our share. We're not so sure sometimes if industry is always accepting its share. After years of coddling, some sectors of American industry are a little afraid of competition. This Administration believes that competition is in everyone's interest. The oil companies are back in the business of competing with each other; other sectors, including the gas industry, we hope will accept the same set of rules.

The national debt has just exceeded a trillion dollars. That's more money than even a New York banker can comprehend. Think of it this way: If we sold every acre of farmland in America, all the grain and livestock, all the machinery—everything—the proceeds would just about cover our debt.

We've already taken the ax to the Department of Energy's paperwork requirements. More reductions in paperwork are on the way. But just because industry doesn't have to fill out as many government forms—that doesn't mean anything goes. There are plenty of risks. Some of them are already evident. Very few oil companies are making money these days in their downstream business. In order to compete, gasoline is sometimes being sold under cost. Who would have thought even a year ago that the government was not going to perpetually guarantee dealers and oil companies a comfortable rate of return through the Department of Energy's price controls?

The gas industry, too, needs to realize that controls on the price of gas aren't going to last much longer. We can't afford to keep paying a subsidy everytime a Btu of natural gas is burned in America. Correcting the deficiencies in the Natural Gas Policy Act is still on our agenda. I know a few of you are not convinced that decontrol is in your best interests. We're convinced that it is in the Nation's best interest.

The President is as committed to getting the government out of regulating the price of natural gas as he was during the campaign. I expect to continue consultations with Congress and look forward to being able to submit legislation early next spring. We don't intend to call for a windfall profits tax.

The Cabinet Council's proposal to the President, which he has under consideration, is to correct the deficiencies in the present NGPA. Now, what are these deficiencies? First, price. The experts projected that the price of oil in 1985 would be about 16 dollars a barrel. We all know what has happened in that market. Second, after the NGPA runs its course, 40 percent of the old gas will still remain controlled. We recommend that all old, as well as new gas, be decontrolled over a three-year period. The third item to correct is restrictions to the use of natural gas under the Fuel Use Act and incremental pricing. Fourth, we have recommended that a new category be created for newly discovered gas, but the price will be capped off at the Btu equivalent of oil. This discourages a person from discovering new gas and holding it off the market until decontrol is completed. We're proposing to set the maximum price at about 70 percent of the oil equivalent.

There are other non-price issues that must be considered, and these we expect the Congress to take up. The main issues are redetermination clauses and the most-favored-nation clauses in contracts and the access to offshore gas in both interstate and intrastate markets.

Now, what will this do for you? Our studies show that there will be increased conservation that will help us back out of the use of imported oil.

The price will go up moderately but at a manageable rate. The residential price of natural gas is already climbing at 5 to 10 percent a year in real terms. Our study, released last week, provides examples of the impact of decontrol options. We estimate that under phased decontrol the price would go up 10 to 15 percent. That means the average residential buyer will pay 40 to 80 dollars a year more for gas. In the long-run, the consumer will pay roughly the same for gas. And we'll avoid the sudden, sharp price hike in 1985 that is built into the NGPA. That hike would directly cost the consumer about $170 in one year plus the inflationary effects that such a price shock to the economy would cause. Our proposal will have a minimal impact on inflation and on the Gross National Product and a negligible impact on unemployment.

We realize that some of the pipelines will—in the short-run—find that decontrol puts a crimp in their way of doing business. And we realize that some gas distribution companies are afraid that higher prices will reduce demand for gas.

It comes down to all of us paying a little more for natural gas on an interest-free installment plan, or facing a politically unacceptable crisis in 1985.

No one should think that come 1985 we'll just roll over and let the NGPA be fixed up so gas remains subsidized. If we don't start fixing the NGPA now, there *will* be a spike in 1985. That will throw the market into disarray. In addition, some consumers will be hurt a lot more than others because of inequitable access to cheaper price-controlled gas.

President Reagan is asking all of us to make sacrifices; that includes not just the consumer and the taxpayer, but the producers, transporters and distributors of our energy. There may be a few gas companies for whom accelerated decontrol would cause genuine hardship; but, while there will be some shifts in the market, no catastrophes await any of the pipelines and distributors.

Our studies show that the production of gas will not slacken immediately because of decontrol. Instead, the assurance of decontrol will provide the market incentive to develop new fields and to explore for more gas. And we're pursuing passage of the Alaska Natural Gas Pipeline waiver package in Congress. If built, it will expand the amount of gas available in the lower 48.

In short, this Administration is doing its utmost to see to it that there will be plenty of energy available. We think the gas industry has a bright future—but only if the government gets out of the way and leaves it up to industry to match supply and demand. Decontrol will create a stable, predictable market, one where the rules of the game aren't subject to change everytime a bunch of bureaucrats and liberal congressmen decide to interfere.

I realize it isn't easy for a company to sacrifice short-term earnings because of a long-term promise from the government. These days, we are all in the habit of being too present-oriented. Rest assured that the liberal's roller coaster ride is over. The rules

aren't going to keep on changing, and the economy isn't going to keep on declining.

This President realizes that if we don't turn the country around now, if we don't stop bickering among ourselves about who is going to accept the responsibility, and if we don't restore our confidence in ourselves, this country is lost. America is not yet out of the woods. We need incentives to conserve more while at the same time producing more gas, oil, coal, renewable resources and other types of energy. Decontrol will spur conservation and production.

Oil drilling in this country is up nearly 40 percent this year because of decontrol. Gas drilling nudged ahead only six percent. If the gas industry wants to restore its lost share of the energy market—which has gone down from a third to a quarter—we need to do more drilling and more finding. Decontrol will assure that.

The quarter century of experience we've had with manipulating the price of gas by government fiat ought to be proof enough that the market is a far better taskmaster than the government. The government, I'm afraid, has often been too easy on industry. It has become easier to adjust to regulation that to fight it. It is easier to be told what to do than to accept the responsibility for voluntarily assuming a share of the Nation's burden.●

IRVING KRISTOL TELLS THE TRUTH ABOUT REAGANOMICS AND THE FACTS BEHIND THE BIRTH OF "SUPPLY-SIDE" TAX CUTS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. KEMP. Mr. Speaker, as it becomes increasingly clear that the economy entered a recession before the administration's delayed tax cuts could take effect, it is also increasingly clear how absurd it would be to further delay the tax cuts. The simple fact is that you do not raise taxes during a recession; at least, we haven't since the days of Herbert Hoover.

In fact, we should accelerate the cuts in individual tax rates. As Irving Kristol explained in today's Wall Street Journal, this is a point on which both Keynesians and supply-siders can agree, although for sharply different reasons. The Keynesians think we need to increase demand during a recession. The supply-siders, on the other hand, see increased after-tax incentives as a way to increase output and saving.

Kristol presents a convincing argument in favor of accelerating the Reagan tax cuts. I commend his excellent article to my colleagues and ask them to join Bob Walker and those of us who want to accelerate the tax cuts so as to meet the growing problems of unemployment and negative growth.

The article follows:

THE TRUTH ABOUT "REAGANOMICS"

(By Irving Kristol)

Mr. Kristol is professor of social thought at the NYU Graduate School of Business, a senior fellow of the American Enterprise Institute and a member of the Journal's Board of Contributors.

On or about Oct. 1, the American economy fell off a cliff. So, unsurprisingly, did interest rates. And so, unwittingly, did most of the critics of the administration's economic program.

It is true that even now one hears politicians, in a state of free fall, declaiming to empty space that what this shattered economy needs is either a rollback in President Reagan's tax cuts or a whole new set of taxes. But it is reasonable to assume that such declamations will cease once it occurs to these falling bodies that a tax increase is an absurd prescription for a recession.

Why did the economy collapse? The answer is obvious and has no connection with "Reaganomics." It was the collision between the swollen Carter budget for fiscal 1981 (which ended Sept. 30) and the tight money policy of the Fed, which combined to push interest rates sky-high and the economy into a decline.

It had nothing to do with Mr. Reagan's tax cuts, which are only now beginning to be phased in, and in a minimal way at that. It had nothing to do with Mr. Reagan's budget cuts, which are still largely on paper. And it certainly had nothing to do with an increase in defense expenditures, which are as yet a gleam in the Pentagon's eye.

One might ask: What would have happend if Jimmy Carter had been reelected? Government spending would have been unaffected, since he would have been presiding over his own budget, already promulgated. The Fed would have kept money tight—this policy had been se prior to the election—in an effort to prevent run-away inflation. We would have been exactly where we are today, and for exactly the same reasons.

What might have changed this scenario? Well, if the tax cut had been put in force earlier and to a more substantial degree, it would at least have made the economy's fall less precipitous and even (as "supply-siders" hoped) might have prevented it altogether. It was a major point of the "supply-side" thesis that the negative effects of tight money could be muted, if not annulled, by the positive effects of tax cuts. But conservative Republicans in the Senate, hypnotized by the size of the Treasury's deficit—they have neither learned nor forgotten any economics since the days of Herbert Hoover—insisted on the tax cuts being phased in more gradually.

So where do we go from here? There are three alternatives open to the administration.

RECOMMEND COURSE OF INACTION

First, it can do nothing and just wait for the economy to right itself. Most conservative economists would strongly recommend this course of inaction. As interest rates tumble, as the inflation rate continues to decline and as we approach the 10% tax cut scheduled for July 1, the economy ought to show signs of life—by the second quarter of 1982 perhaps, by the third quarter probably.

Even if interest rates should then start picking up along with economic activity, the increase in corporate cash flow as a result of accelerated depreciation, along with the increased savings and investment created by the tax cut and the flow of funds into Individual Retirement Accounts should moderate the rise.

Second, the government could increase its spending in order to stimulate the economy. The logical candidate for such an increase would be in the area of defense expenditures—since we're going to spend that money in any case, why not spend more of it now rather than later? The trouble with this strategy is that government spending takes its time to have any effect, and it usually starts to stimulate economic activity when the economy no longer needs it.

Third, the administration can try to persuade Congress to move forward—say, to Feb. 1—the 10% tax cut now due on July 1. At the moment this would be difficult, in view of the rhetorical fog exuded by the media and sundry politicians about "Reaganomics." But after a dismal Christmas, the mood of the country could be such as to welcome it.

Incidentally, and ironically, this last strategy—clearly my own choice—is one that any liberal-Keynesian economist would endorse, for reasons having nothing to do with "supply-side" economics. On their analysis, the economy is suffering from "fiscal drag," and the "full employment" budget is actually in surplus. But after having publicly vilified "Reaganomics" so enthusiastically, the Democrats in Congress have made it close to impossible for the party to accept a quickening of the 1982 tax cut. And the Republicans' emphasis on a balanced budget makes it equally difficult for them to do so. So unless or until the recession worsens, Congress is committed to inaction.

Meanwhile, we may as well clear our minds about the issue of "Reaganomics." One of the most distressing aspects of David Stockman's unfortunate interview is the distorted history of "Reaganomics" that it presents, one that is now being gleefully accepted and promulgated by Mr. Reagan's detractors. On this topic I can speak with an authority equal to David Stockman's—we were both there in the early days of the creation—and, for reasons beyond my comprehension, he has got it wrong.

Actually, "Reaganomics" as it finally took shape was the result of a confluence of two streams of economic thought—the "supply-side" school and the "capital formation" school.

The "supply-side" approach was (and is) essentially populist in its approach—which is the reason Ronald Reagan instinctively found it so appealing. Kemp-Roth called simply for a 30% tax cut on all income tax rates for all taxpayers. There was no cut in business taxes, no cut in inheritance taxes. Only individual taxpayers benefited, and all in the same proportion.

This last aspect of the bill upset liberals who seem to feel that any tax cut that does not aim at the redistribution of wealth favors the more affluent. Kemp-Roth was certainly nonegalitarian in this sense. But it did not "favor" anyone. It was simply indifferent to the issue of income distribution. There is plenty of evidence that such indifference is more widespread among Americans than are any egalitarian passions.

But it was not only liberals who disliked Kemp-Roth. The majority of conservative economists—including such distinguished men as Arthur Burns, Herbert Stein, Charls Walker, among others—thought it a misguided effort at tax reform. They believed that any tax cut should aim more directly at the problem—a very real problem—of capital formation. Instead of a cut in tax rates for everyone, which they opposed, they openly pressed for accelerated depreciation, a lower capital gains tax, a reduction in the

top rate of income tax and so forth. The "supply-siders" thought these were all worthy goals, but believed strongly that income tax relief for all tax payers must precede tax cuts for business and the more affluent.

The original tax cut that President Reagan sent to Congress was little more than Kemp-Roth, pure and simple. But then something bizarre happened. The Democratic leadership in the House, desirous of passing "its own" tax bill rather than the administration's, started tacking on the capital-formulation agenda to the "supply side" bill.

UNHAPPY "SUPPLY-SIDERS"

The White House watched with incredulous satisfaction as both agendas were merged into one piece of legislation, and then overwhelmingly passed. The only ones who were unhappy were the "supply-siders"! Their individual tax cut was lowered from 30 percent to 25 percent and was phased in much more gradually than they had hoped.

So there was no "Trojan Horse," no deception, no conspiracy. What is now called "Reaganomics"—the totality of those tax cuts—was a bipartisan creation. And in the long view, the totality of those tax cuts represents the most progressive piece of tax legislation in our history—"progressive" in the sense that it lays the groundwork for sustained and superior economic growth in the years ahead.

In that same interview, Mr. Stockman used the phrase "trickle down" to describe the administration's economic policy, and this has served as a red flag to all those of an egalitarian inclination, who believe that the fruits of economic growth should be equally shared from the outset by everyone.

The phrase, in fact, is an inaccurate one—"trickle out" would better describe the process, since the initial beneficiaries from economic growth are not necessarily and are never exclusively the existing rich. The U.S. has many thousands of businessmen and inventors who have become very rich in the past decade through entrepreneurial innovation. In the course of becoming rich, they have created new jobs (and new careers) for tens of thousands of employes. Is the fact that these employes are today less rich than their employers to be deplored as an inequity? Of course not.

It is inherent in the dynamic process of economic growth that, while everyone benefits over the long term, not everyone benefits equally, and most certainly not in the shorter run. The very incentives that lead to economic growth run counter to any such egalitarian results. What liberals and socialists really want are entrepreneurs and innovators who are selflessly dedicated to their tasks, and who seek no material rewards as a token of their success. Perhaps the world would be a better place if such people existed in larger numbers—but they don't exist in such numbers, never have and (one may fairly presume) never will.

Which is why people who inveigh against "trickle down" are, wittingly or not, committed to a utopian economics. They say they want economic growth but are hostile to the necessary preconditions for economic growth. It is that hostility which accounts for their animus toward "Reaganomics." They are so fearful it might work that they are rushing to discredit it before it has even been tried.●

THE SMALL BUSINESS INVESTMENT INCENTIVES ACT

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. MARRIOTT. Mr. Speaker, unless we act quickly, we may have the dubious honor of standing watch over the demise of much of America's small business community. The ability of this Nation's sole proprietorships, partnerships, and small corporations to provide jobs, ideas, and a foundation of strength for our economic system is being swept away by a combination of long-term high inflation, huge increases in energy costs, heavy regulatory burdens, a tax system biased against the smaller firm, and unexpectedly high interest rates.

The good news, of course, is that all of these areas have been addressed: For the first time in memory, an administration has taken serious aim at its own regulatory arsenal and put much of it in mothballs, particularly where small business is concerned; moreover, another precedent was set earlier this year when both parties finally gave the small business something more than lip service in their tax packages.

In recent days, both inflation and interest rates have shown moderate declines; unfortunately, for far too many small firms, the improvement is a case of too little, too late, as shown by the following excerpt from recent testimony of the National Small Business Association before the Subcommittee on Tax, Access to Equity Capital and Business Opportunities of the House Committee on Small Business:

SMALL BUSINESSES ARE HURT FIRST AND HARDEST

It is almost universally recognized that small businesses bear the greatest burden of any credit squeeze.

Council of Ecomomic Adviser's Chairman Murray Weidenbaum told the Wall Street Journal: "In periods of monetary restraint, the smaller, weaker borrowers suffer most."[1]

In an attempt to measure the financial impact of high rates in detail, our association recently completed a report on business bankruptcies.[2]

BANKRUPTCIES

We found a dramatic rise in business failures that has been parallel to interest rate movements. From mid-1980 to mid-1981, business bankruptcies tabulated by the U.S. courts increased 30.1 percent over the previous year. That is the second largest year-to-year rise of the past 20 years, exceeded by only the 45.2-percent increase occurring between 1974 and 1975.[3] Court-filed bankruptcies have thus been running at an alltime record rate of more that 4,000 per month since January, 1981.

Even more current and more alarming are figures from Dun & Bradstreet for January 1 through September 3, 1981, which reflect that business bankruptcies increased from 7,812 to 11,076, a jump of 41.8 percent compared with the same 35-week period in 1980.[4]

Smaller businesses (defined as those with liabilities of $100,000 or less) comprised 50.53 percent of the 1981 total, and reportedly businesses with $1 million or less accounted for about 90 percent.

It is also well known that certain industries are particularly sensitive to interest rates, and have therefore taken a beating from high rates. These include home building, construction, automobile, and farm implements.[5]

An industry breakdown of the D&B figures for the 35-week period is as follows:

1981 compared to 1980

Construction	+48.5
Services	+37.6
Retailing	+41.4
Manufacturing	+36.9
Wholesaling	+30.1

Since many small businesses are undercapitalized to begin with, owners are often required to put up personal assets such as their homes as additional security for business loans. If a bankruptcy follows, an owner can also have his family life shattered, exacting a "toll of personal tragedy."[6]

We must also emphasize to this subcommittee the many reports of well-managed, hitherto sound businesses which are at the end of their rope, and which will not be able to continue in the face of persistent rates in the neighborhood of 20 percent.[7]

IMPACT OF INTEREST RATES ON SMALL BUSINESS CAPITAL FORMATION AND SURVIVAL

In the best of times, capital formation is more difficult for smaller firms than for larger ones.

A fresh study by the Reagan administration clearly establishes anew the disadvantage of smaller size.

The Commerce Department utilized five banks in various regions across the country to take samples of the business community and survey the unmet needs for capital.[8]

This study concluded:

Capital gaps are a reality (page 4);

Gaps as to borrowed funds occur primarily in the intermediate to long-term maturities (page 4);

Independent firms are at a disadvantage in capital markets (page 5); and

[8] "An Empirical Analysis of Unmet Demands in Domestic Capital Markets in five U.S. Regions," U.S. Department of Commerce, February, 1981.

Small firms have the most difficulty obtaining capital (page 5).

In the area of equity capital, hearings in the Senate have documented similar difficulties of smaller and even medium-sized businesses, especially at the bottom of difficult economic cycles.[9]

These problems are dramatized by the statistics for the mid-1970's, which show that small firms (worth $5 million or less) were able to sell only nine registered stock issues in 1974 and four in 1985.[10]

This subcommittee, chaired by Mr. Nowak, and on which I am the ranking Republican, heard from many others whose testimonies reflected the same concern. The National Federation of Independent Business, for example, told us,

The state of small business is dangerously weak. Over the last year, thousands of small firms have gone out of business, and today many more are just barely holding on. * * * As the interest rates paid by these reluctant borrowers has risen with anticipated inflation, cash flows have been squeezed even further.

In fact, the NFIB concluded that, "for many firms, this prolonged period of high interest rates has been the 'knockout' blow after having been severely debilitated by the adverse effects of years of unsound government policies."

M. Eamonn McGeady, speaking on behalf of the Chamber of Commerce of the United States, noted,

For many businesses, especially the small ones that are relatively more dependent upon short-term debt, effective defensive measures have long since been exhausted in this 3-year battle with high and rising interest rates.

Incredibly, our past tax policies have forced investors to weigh the tax shelter benefits of a venture before they even consider its potential profit or productivity. There is something terribly wrong when an investor can receive tax credits for putting money into an oil well with little probability of oil production, or into a shopping center that is never fully occupied, but not for providing badly needed capital to a promising small business. It is time to rechannel investment money from tax shelters, where the success of the business is not the primary consideration, to areas where success is actually a prerequisite for the best return.

For that reason, I, and 24 of my colleagues, Mrs. SNOWE, Messrs. WILSON, BAFALIS, FORSYTHE, DE LA GARZA, HANSEN of Utah, BADHAM, GINGRICH, ROTH, JEFFRIES, MCDADE, MCEWEN, CRANE, DREIER, WILLIAMS of Ohio, CONTE, NEAL, DAUB, WEBER of Ohio, LOTT, STATON, EVANS of Georgia, and ROEMER, are today introducing the Small Business Investment Incentives Act.

First, the bill amends the Small Business Investment Act by removing the $35 million ceiling on leverage to any one small business investment company (SBIC). The ceiling, which has been in effect since 1976, is inconsistent with the purposes of the 1958 act. It discourages the formation of new, large SBIC's and stunts the growth of existing SBIC's.

Second, it allows SBIC's to make loans to their employees to buy stock options. This will make SBIC laws consistent with Public Law 96-477. Allowing such option plans will enable SBIC's to attract more talented management and could allow them to give the employees a stake in the business.

Finally, it establishes a small business participating loan, with special incentives for loans to minority and disadvantaged businesses.

Under this program, the loan would be made to a company with equity capital of less than $10 million. It would not be subject to Securities and Exchange Commission regulation. And, it would bear a stated rate of interest—at least 6 percent—plus pay a negotiated percent of the profits for a negotiated period of time.

The advantages to the lender are as follows: (1) The stated interest paid by the borrowing business would be taxed as ordinary income to the lender; (2) the share of the borrowing business' profits would be taxed at the preferential capital gains rate; (3) the lender would be entitled to deduct any losses incurred as ordinary losses; (4) an investment tax credit (ITC) of 20 percent of the amount of the SBPL, or $20,000—whichever is less—would be allowable to the lender; in the case of a joint return, the limit would be $40,000, and (5) on a loan made to a minority or disadvantaged business—as defined by the SBA—the lender would qualify for an ITC of 30 percent of the amount of the loan, or $30,000, whichever is less. In the case of a joint return, the limit would be $60,000.

There are clear advantages to the small business borrower as well: (1) Interest payments would be a deductible expense; (2) obtaining growth capital through the SBPL would not require giving up a share of the business' equity to an outsider—something small businessmen and women are extremely reluctant to do; (3) the SBPL is self-administering—no additional Government redtape would be required; and (4) since return on investment depends on the small firm's profitability, the business would have a lender with a vested interest in its success.

I submit that this approach is far superior to any direct grant or loan of the taxpayers' money. It relies on the private sector almost entirely. Moreover, it should redirect investment capital from dead end investments, tax shelters that cause a "revenue loss" to the Treasury without any recapture of new tax revenues, to areas that will spur job creation, innovation, and productivity. Finally, it recognizes the fact that, for the past decade, well over 95 percent of the capital obtained by small businesses has come in the form of loans, since most small companies are not incorporated and so do not issue stock.

The record makes it abundantly clear that this kind of creative approach is overdue. A lot of people have recently taken to quoting John F. Kennedy's observation that "A rising tide lifts all the boats." That's no consolation to a boat already driven onto the rocks or in dry dock for repairs. Unfortunately, that is the state of many of America's battered and bankrupt small businesses. This proposal is one step we can take to prevent even more small firms from joining their ranks.

I would urge my colleagues to join the rest of us, who represent both parties and a broad spectrum of political philosophies, in this effort to avoid tinkering with monetary policy while we seriously attack the problem of high interest rates as they affect our small business community. The history of this Nation—economically, socially, and politically—demonstrates that it is a worthy cause indeed.●

HOUSTON ELECTS FIRST WOMAN MAYOR

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. LELAND. Mr. Speaker, today I am proud to be a Houstonian. I am proud that my city has elected Kathy Whitmire, the first woman mayor of Houston. Kathy received 62 percent of the runoff vote and won in virtually every election precinct. The fact that every important ethnic and socioeconomic group gave her strong support is very significant. She appealed to the wide diversity of Houston voters because of her mixture of fiscal conservatism and social progressivism. While she stressed both her ability as the former city controller to save the taxpayers millions of dollars, and her ability as a certified public accountant to manage the city, she certainly did not win the election because of money. Her opponent, Jack Heard, spent more than three times as much money as she did. Heard spent $1.5 million while Kathy spent only $650,000. To counterbalance her lack of funds, Kathy used the volunteer support of hundreds of people from all walks of life throughout the city.

Kathy Whitmire's victory is a sterling example of the power of the people. She ran her campaign with great integrity and I am certain she will bring the same degree of integrity

to her new job as mayor of Houston. Kathy's style of management will bring together the many diverse groups that live in Houston. I recommend that my colleagues take a few minutes to read the following two inspiring articles:

[From the New York Times, Nov. 19, 1981]

FEMINIST MAYOR FOR HOUSTON

(By William K. Stevens)

HOUSTON.—She beat them all: the Mayor, who in the voters' minds had apparently allowed the quality of public services in explosively growing Houston to slip badly; the sheriff, who called his 5-foot opponent "that little lady," and the bankers and lawyers and developers and big-money people who once largely decided who was elected to public office in Houston.

Kathy Whitmire, who was married at the age of 20, widowed at 30 and a seasoned politician and dedicated feminist at 35, won a stunning victory Tuesday to become the first woman to be elected Mayor of this boisterous, muscular city, a city long seen from afar as a masculine preserve of Big Oil, country-Western music and good-ol'-boy ways of looking at the world.

Mrs. Whitmire, after four years as City Controller, defeated Sheriff Jack Heard in a runoff-election landslide, just as together they had resoundingly sent Mayor Jim McConn toward unwilling retirement two weeks before. Final unofficial returns gave Mrs. Whitmire 62.5 percent of the runoff vote. She won in virtually every election district and ran strongly among every important ethnic and socioeconomic group in this increasingly polyglot city.

In January, Houston will join the company of three other big cities with mayors who are women: Chicago, San Francisco and Phoenix. "I'm proud of that," Mrs. Whitmire says. But in terms of Houston itself, the nation's fifth largest city, both she and others see a greater significance.

THERE'S ROOM FOR DIVERSITY

What it means, the Mayor-elect said, is that Houston is growing up. "there's room for diversity in this city, and I think that's good," she said in a relaxed conversation a few days ago. "Nobody has control. I think what my administration will represent is the idea that Houston can be managed like a business and that it doesn't have to be the captive of a few power brokers."

Mrs. Whitmire won the mayoral race with almost no support when it counted from the moneyed power brokers. But, even after her impressive victory, political analysts were already saying that to avoid a strong challenge in 1983 she would have to convince those same interests that she could deliver on her overriding election promise: to apply the principles of sound business management so as to improve basic city services.

It is hardly a revolutionary manifesto, and Kathryn Jean Whitmire is no revolutionary. But she is a deeply committed feminist. She learned to speak in public by stumping against repeal of Texas' ratification of the proposed equal rights amendment. As early as 1973, she was an active member of the National Women's Political Caucus.

She has taken strong stands in favor of nondiscriminatory hiring policies in city agencies, including the hiring of homosexuals as police officers if they apply and are qualified. In matters of human rights and equal opportunity, she would be called a liberal elsewhere. She shies away from the term, however, because it is anathema in Texas politics; she prefers to call herself a "progressive."

SUBDUED CAMPAIGN STYLE

But in money matters Mrs. Whitmire is an out-and-out conservative, and in this fusion of fiscal conservatism with an otherwise generally liberal outlook she may be representative of many rising politicians of her generation. She is a Democrat, although the mayoral election is nonpartisan.

Her Texas-accented campaign style is subdued, even bland, but she is somewhat more animated in private. Until recently she wore her hair in a platinum, shoulder-length pageboy. She has changed it now to a curlier, shorter style in its natural honey color. It is less flamboyant, more in keeping with the tailored suits she wears and the moderate, sensible image she tries to project.

She was born Kathryn Niederhofer in Houston on Aug. 15, 1946, the daughter of Karl and Ida Niederhofer. Her father, a retired electrical contractor, and mother are now divorced.

The Mayor-elect has been interested in politics "as far back as I can remember," she said. She "always figured I would marry somebody in politics," and did. She met Jim Whitmire when they were both students at the University of Houston, from which she holds an accounting degree, in the mid-1960's. By all accounts the relationship was very close, almost to the point where the two were alter egos. She became a certified public accountant, rising to audit manager for the firm of Coopers & Lybrand.

PREOCCUPATION WITH POLITICS

But politics was the Whitmires' preoccupation and hobby. He ran twice for the City Council and lost. Her own ambition was growing in those years. And when her husband died of complications of juvenile diabetes in 1976, she took up the mantle the next year and ran successfully for Controller. In that post she established a reputation as an aggressive guardian of the city's financial health who did not hesitate to cross swords with Mayor McConn or anyone else.

The Whitmires had no children, and Mrs. Whitmire has been devoting her full energies to politics and government. Her reputation is that of a tough administrator who will brook no frustration or tolerate ineffective performance by a subordinate, an adroit infighter whose every important move is made with one eye on politics.

Mrs. Whitmire lives in half of a duplex in Southwest Houston that she co-owns with her brother, Tom, and sister-in-law. They have installed a swimming pool, and Mrs. Whitmire likes to go to the beach, but, as for hobbies, the Mayor-elect asks with a laugh, "What are those?"

[From the Washington Post, Nov. 20, 1981]

MAYOR-MANAGER—HOUSTON'S NEW CHIEF EXECUTIVE WANTS TO MAKE FIFTH BIGGEST CITY RUN BETTER

(By Dan Balz)

HOUSTON—She is barely 5 feet tall in a city of soaring expectations, a 35-year-old accountant in a den of dealmakers, and the first woman elected mayor in the history of brawling Houston. But if any of that overwhelms Kathy Whitmire, she isn't letting on.

She won a landslide victory Tuesday, swamping her opponent with 62 percent of the vote, and as a horde of reporters camped outside her city hall office awaiting her first official press conference as mayor-elect, Whitmire stared straight at the problems that confront her.

"I'm not a no-growth candidate and I didn't think my opponent was a no-growth candidate," she said, "so it wasn't a referendum on growth. People in Houston have had a lot of opportunities that have been brought on by the economic boom, and I don't think there are very many people who want to do away with that kind of opportunity.

"But I think the growth would stifle itself if the city government is not about to do something about the traffic and the flooding and the crime."

She has none of the flippant feistiness that marks her mayoral sister to the north, Jane Byrne of Chicago, but there's a steeliness about Whitmire's conviction that what this fast-growing city needs more than anything now is good management in city hall.

"That's what I ran on," she interjected when asked whether management reforms alone were enough to overcome the monumental traffic jams, inadequate public transportation, rising crime and deterioration of city services that mark daily life in Houston. "In Kathy Whitmire's opinion, that is what's needed. Absolutely."

She is trying to devise a tricky formula to guide the city in the next two years—an attack on the effects of growth without wrecking the growth climate that has made Houston the nation's fifth-largest city. But Whitmire sees the formula from the other side. Solving the problems of growth, she says, is what it takes to avoid inhibiting growth.

Whitmire has yet to persuade skeptics that reforming the local bureaucracy is the kind of leadership that Houston wants or needs. "Many of the traditional power-brokers in the city that did not support Whitmire will have to be convinced that she can do a competent job as mayor or they're going to start looking for an attractive candidate to run against her in 1983," said Richard Murray, a political scientist at the University of Houston.

"I think Dick's just wrong," Whitmire said, characterizing her election as representing "a new direction at city hall."

Whitmire was born and raised in Houston, the daughter of working-class parents. She remembers when the first freeways were built, how she used to get around on the bus and that she never worried about locking her doors at home, but she shares the view of many local residents that Houston today is a better city than when she was young.

Married at age 20, she got involved in local politics through her husband. "I've always been interested in politics," she said, "and I always expected to be involved in politics, except that I expected to be the wife of a politician or a candidate rather than to be one myself."

But in 1976, her husband died, and shortly after that the office of city controller was vacated. Whitmire, a certifed public accountant, jumped into the race, and because Houston had never elected a woman to any elective office, her campaign became a crusade that attracted thousands of volunteers.

As controller she became a visible critic of incumbent Mayor Jim McConn, opposing pay raises for city employees, and denouncing a $1.35 million street inventory as a "pothole study." She also reformed the pension program in the city and reworked the financing of the city water system to head off tax increases.

Whitmire is a Democrat, but she seeks to avoid political labels. "I think that every-

body recognizes that on financial matters I am very conservative," she said. "But when you say conservative . . . people extend that into a lot of other things like being against women's rights and against individual liberties.

"I don't subscribe to any of those philosophies," said the woman who won the active support of the city's gay community. "I'm not in favor of the government trying to control anyone's life. I'm really even a strong defender of property rights in that I don't favor zoning. So how you classify that in terms of liberal and conservative, I don't know."●

WORKING AMERICANS: THEIR NEEDS FOR THE FUTURE

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. OBERSTAR. Mr. Speaker, the House Public Works and Transportation Subcommittee on Economic Development, which I have the honor to chair, held hearings this week on economic development policy. We will draw heavily on the wealth of factual information developed at these hearings when we write our legislation next year.

One of our most informative witnesses was Dr. Janet L. Norwood, Commissioner of the Bureau of Labor Statistics, U.S. Department of Labor. She gave us a truly eye opening and enlightening picture of today's diverse labor force, one which I would like to share with my colleagues.

STATEMENT OF DR. JANET L. NORWOOD, COMMISSIONER, BUREAU OF LABOR STATISTICS

Mr. Chairman and Members of the Subcommittee, I am pleased to be here this morning to review with you some labor force issues involved in economic development. Before we look at developments for the future, however, we must be sure to understand where we are today. A number of developments have occurred over the last few decades which must be considered in labor market planning for the future.

UNEMPLOYMENT

Unemployment has been considerably higher in recent years than it was in the 1950's and 1960's. The overall jobless rate averaged 6.2 percent during the 1970's, compared with less than 5 percent in each of the previous 2 decades. Changes in the age composition of the labor force as well as social and legislative changes that affect the supply and demand for labor have contributed to this pattern. While the exact causes of the rise in unemployment are complex and discussion of them tends to arouse considerable controversy, the one unquestioned fact is that there are now many more young workers than there were previously. Millions of children born during the post-war baby boom have grown up and entered the labor force. As a result, the labor force now contains a higher proportion of young people than it used to, and teenagers always have higher than average jobless rates.

But we know that the impact of unemployment has never been evenly distributed across demographic groups. Blacks and other minorities have always been worse off than whites, women have typically had higher jobless rates than men, and youth unemployment exceeds that for more mature workers.

In general, unemployment rates for black Americans typically are at least twice the rates for whites, and jobless rates for the Hispanic population fall between those of whites and blacks. But black teenagers fare the worst of all worker groups. In October, the jobless rate for black and other minority workers was 15.5 percent, the highest on record. The rate for teenagers in this group was 43 percent.

It is not surprising that young people have higher unemployment rates. Youngsters need time to explore the job market and to gain the experience and training that will lead to future success. Furthermore, many young people combine school and work. They often experience a period of joblessness as they move in and out of the labor force. It is true that young people have the highest incidence of unemployment, but they also experience the shortest periods of joblessness.

Moreover, the policy implications are quite different when the unemployed are students—who often seek part-time work—or when they are young people who have dropped out of school without completing their education credentials. Among persons 16 to 24 years of age, the jobless rate for drop-outs runs roughly twice the rate for those who completed high school.

Cyclical movements in the economy tend to affect certain labor force groups and geographic areas more than others. Since economic recessions tend to affect employment in manufacturing and construction most severely, men generally are harder hit than women, because most factory and construction workers are male. In addition, those geographic areas that are heavily dependent on durable goods manufacturing are affected more sharply than other areas. In recent years, the old industrial areas of the Midwest and Northeast have suffered as people have moved to new jobs in the South and West and as cyclical reductions have occurred in the demand for manufactured goods. It is, therefore, not surprising that Michigan's unemployment rate is now the highest in the Nation.

In addition to these recent economic developments, the composition of unemployment reflects long-term labor force trends. In October, 44 percent of the unemployed were adult men, 35 percent were adult women, and the remaining 21 percent were teenagers. While the female share of unemployment has been generally rising over time as women's labor force participation has increased, the cutbacks in the goods-producing sector have caused a relatively greater increase in joblessness among men. Among all demographic groups the vast majority of the unemployed are seeking full-time jobs: four-fifths of the adult women, three-fifths of the teenagers, and 95 percent of the adult men want full-time work.

We must remember, too, that considerable turnover occurs in the ranks of the unemployed from month to month. Typically, even in a month when the unemployment level is unchanged, about half of the unemployed were not unemployed in the previous month. A little more than a quarter of those who were unemployed in the previous month will have found employment, and a little less than a quarter will have left the labor force, perhaps to attend school, devote full time to other activities, or go into retirement.

UNDEREMPLOYMENT

Underemployment is also a worrisome problem, although it is not easily defined. "Visible underemployment" as defined by the International Labour Office refers to people who do not have a sufficient amount of work. In the United States, we regularly measure and publish statistics on the number of persons who are working part time but who want to work full time. This statistic has been rising recently as the labor market situation has deteriorated. In October, a record 5 million persons were working part-time because their hours were cut back or because they were unable to obtain full-time work.

The more classic concept of underemployment was that used by the Gordon Committee in 1962. The Committee referred to the "employment of persons at jobs that call for less than their highest level of skill (and at wages less than those to which their skills if fully utilized, would normally entitle them)." In this sense, underemployment is the relationship between the quality of the job and the ability and skill of the incumbent. The trouble is that scaling these abilities and skills is very difficult.

Education is, of course, desirable in and of itself. But education also brings with it an expectation of obtaining a particular type of job. The National Center for Educational Statistics projects that in each year of the decade of the 1980's about 1.1 million people will graduate from college. But we in BLS project that only about 850,000 openings will occur each year in jobs which traditionally have been held by college graduates—that is, professional, technical, managerial, and administrative jobs. This imbalance suggests that nearly 1 graduate in 4 will probably have to enter an occupation not previously requiring a college degree.

LABOR FORCE COMPOSITION

Women.—Let's turn now to demographic changes in the profile of the U.S. labor force. The most striking change, of course, has been the increased participation of women in the labor force. Today, more than half of all women are in the labor force. This compares to one-third in 1950. While women over age 35 made the greatest strides in the 1950's and 60's, the last 10 years have been characterized by phenomenal advances in labor force participation among younger women. The participation rate of women in the 25- to 34-year age group was 34 percent in 1950, rose to 45 percent by 1970, and reached 66 percent in 1980.

As more and more women enter the labor force, the proportion of multi-earner families increases. Looking at data just for wives, we find that fewer than 1 of every 4 was in the labor force in 1950, compared with 1 of every 2 wives today. What this means is that the "traditional" family, in which a working husband supports his homemaker wife and two children, is no longer typical. In 1980, this type of 4-person family represented only 6 percent of all American families. The increase in labor force activity has been particularly strong among wives with children. In 1980, 4 out of every 10 preschoolers had a mother who worked outside the home. The proportion is even higher among school-age children—6 out of 10 of them had a working mother in 1980.

Another demographic change with important social implications is the dramatic increase in the number of families maintained entirely by women. Currently, there are about 9 million such families, one out of

every six families in the Nation. Women who maintain families tend to face severe problems in the labor market—their unemployment rate in recent months has exceeded 10 percent. Moreover, these women are much more likely than other workers to be the sole family earner. When unemployment strikes, the family has fewer options and tends to be very hard hit.

Minorities.—During the 1970's, the share of black and other minority races in the labor force rose to 12 percent. This increase resulted entirely from population growth; the participation rate for black men declined even more than that for their white counterparts, while the participation of black women rose less than that for white women.

Blacks are expected to continue to increase their share of the labor force in the 1980's. These gains will occur both because of population growth and because of rising labor force participation rates for minority women. Because the birth rates among black and other races did not decline as soon nor drop as much as among whites—blacks are expected to account for 1 of every 5 additions to the labor force during the 1980's. This compares to 1 in 10 additions in the 1960's and 1 in 7 in the 1970's. We all know that blacks have not fared as well as whites in the labor market; their jobless rates are very high. If we are to succeed in narrowing the large differential in black and white unemployment rates, these projections imply that blacks must obtain more than 1 of every 5 additional jobs generated during the 1980's.

Youth.—We expect the rate of labor force growth to slow during the 1980's because of the reduced birth rates during the 1960's and early 1970's. The youth labor force (16–24 years of age) will actually decline during the next decade. This will reduce the number of young people available to join the Armed Forces or accept employment in those industries that draw their workforce primarily from this age group. It will also reduce the market for educational institutions and those industries that produce goods and services for youth. As the youth share of the labor force declines, of course, the adult share will increase. This means that we can expect a future work force that is, on average, more skilled, more experienced, and potentially more productive than we have had in the recent past. This development can be expected in spite of the long-term secular decline in the labor force activity of adult men. As early retirement has become more prevalent, the decline in labor force participation rates has been especially large among men over 55 years of age.

INDUSTRY COMPOSITION

Workers of the future will work in different industries than workers of the past. Thirty years ago, one in every 2 workers was employed in agriculture, mining, construction, or manufacturing; the other worked in the service sector—transportation, public utilities, trade, finance, insurance and real estate, services, or government. In the last 3 decades, however, 90 percent of all new jobs were in the service-producing sector. By 1980, only 3 out of every 10 jobs were in the goods-producing sector.

Within the service-producing sector, business services, amusement and recreation services, legal services, social services, and, especially, health services expanded their work forces. The private health industry alone added more than 2 million jobs during the 1970's.

Factory jobs continued to increase, but very slowly. And employment in such important industries as autos, steel, railroads, and textiles actually declined. Nevertheless, the oil and gas extraction industry (in mining) and the electronic computer equipment industry just about doubled their job counts.

The industrial composition of employment differs from place to place. New England and the East-Central regions of the Nation have the highest share of goods-producing jobs, while the Middle Atlantic States have the highest share of service-producing jobs. All areas have, however, participated in the rapid growth of service jobs.

The States with the most rapid employment growth between 1950 and 1980 were generally in the South and West. Nevada, Arizona, and Florida were the three States with the highest percentage growth. Slow-growing States were concentrated in the north-central and northwestern areas of the country. West Virginia, New York, Pennsylvania, and Rhode Island registered the smallest percentage increase in jobs.

During the next 10 years, we expect continued employment growth in the services industry as medical, business, and other services generate many jobs. State and local government's share of total employment will probably decline during the 1980's.

Factory jobs are projected to hold their own during the next decade because of an acceleration of investment and an increased emphasis on defense expenditures.

Since I have covered a great deal of material, let me conclude by summarizing some major points:

The burden of unemployment is not shared equally among all groups of our society. If the historically-wide dispersion between blacks and whites is to be reduced, it is estimated that more than one in five of the additional jobs generated between 1980 and 1990 will have to go to black workers.

With the rapid increase in the labor force participation of women, the multi-worker family has become the norm—at least among married couple families. Families maintained by women, however, face serious problems in the marketplace.

Seven out of ten jobs are now in the service-producing sector and job growth is expected to continue to be stronger in this component of the economy.

Mr. Chairman, thank you for inviting me to testify today and I would be pleased to answer any questions which you or the Committee members might have.

APPENDIX: SOURCES OF DATA

The labor force data come from the Current Population Survey (CPS), a monthly sample survey of about 60,000 households, representative of the civilian noninstitutional population of the Nation. The CPS provides a large amount of detail on the economic and social characteristics of the population. It is the source of monthly estimates of total employment, both farm and nonfarm, and total unemployment, whether or not covered by unemployment insurance. It is a comprehensive source of information on the personal characteristics of the population, such as age, sex, race, educational attainment, and marital and family status.

Counts of nonfarm payroll jobs, hours, and earnings, come from the Current Employment Statistics program, a cooperative Federal-State venture which collects data from a sample of establishments employing over 30 million wage and salary workers. The data relate to all workers, full- or part-time, who received pay during a specific payroll period, and are available by considerable industrial detail for the Nation as a whole and by State and metropolitan areas.

Employment and wage data for workers covered by unemployment insurance laws are compiled from quarterly tax reports submitted to State employment security agencies. These reports provide a virtual census of workers (and their wages) of private nonagricultural employers and the Federal Government. The majority of State government employees are also included.

Local area labor force and unemployment estimates are a product of a Federal-State cooperative program in which State employment security agencies prepare estimates under concepts, definitions, and technical procedures established by BLS. The monthly estimates for 10 large States are obtained directly from the Current Population Survey. Estimates for smaller areas are based on administrative statistics from State unemployment insurance operations and other sources.●

FUTURE OF THE SECURITY OF THE WORLD

HON. ROBERT W. DAVIS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. DAVIS. Mr. Speaker, this week two very important events took place which will bear directly on the future of the security not only of the United States, but of the world.

The first was the speech by the President proposing reductions in strategic and theater nuclear weapons, conventional forces and also increased discussion of ways to prevent war. The second was the passage by this body of the fiscal 1982 defense appropriations bill containing funds for the B-1 bomber and MX missile. I would like to express my strong support for both of these actions and explain why I believe the two are not inconsistent.

I don't believe there is anyone among us that could not feel a sense of hope being stirred by this major foreign policy initiative. It was truly a historic occasion and may one day be marked as one of the significant turning points in our quest of a more peaceful world.

On the same day, the House of Representatives turned back by wide margins attempts to delete funds from the defense appropriations bill for two major strategic nuclear programs, namely the MX and B-1B. I am sure that opponents and cynical observers would attribute this to "business-as-usual" or political considerations by the Congress on a day which also marked the beginning of a major peace effort aimed at reducing the chance that such weapons ever are used. If Congress had really wished to make a sincere statement of support for the President's speech, the opponent would say, funds for these new,

costly, destructive nuclear weapons would have been cut.

Such a view does not consider, however, the factors which allowed the President to offer such a policy in the first place. As President Reagan pointed out in his speech, these issues must be kept in their proper perspective and be considered in the context of the military build-up by the Soviet Union. they have made tremendous improvements in all phases of their military forces, nuclear and conventional, offensive and defensive, air, land, and sea-based. Let us not kid ourselves; Soviet leaders are deadly serious about their nation's military forces. These forces have been increased and improved and the potential threat which they pose to the national security of the United States and our allies cannot be ignored.

The Reagan administration took office with the intent of addressing a number of serious problems in our Nation's defenses. I believe we have made progress in less than a year in some of these areas although much remains to be accompliished. Perhaps the most important is the effort to rectify the perceived strategic imbalance. It has been a part of accepted American military doctrine that military weakness, or even perceived weakness is the surest way to invite aggression. In fact, it has been a part of military thought for thousands of years. In terms of 20th century strategic nuclear doctrine, this concept has evolved into a policy insuring stability; that neither superpower shall ever be able to perceive a benefit greater than the cost of initiating a nuclear war. The validity which each of us attaches to this policy is closely tied to the assumptions we make regarding the intentions of Soviet policymakers. When mistaken assumptions could well result in nuclear war, it seems wise, to my way of thinking, to move very carefully. Allowing our strategic forces to become ineffective based on hope is not careful in my view.

Improvements in Soviet strategic nuclear forces coupled with the growing obsolescence of American strategic nuclear forces has created a threat to the strategic stability or balance. The B-1B and the MX are the results of programs to upgrade our forces to regain that balance. I am aware of the numerous arguments that have been presented on both sides of these issues relative to the merits of the programs. Personally, I am convinced by the arguments in favor of the programs and this House is on record strongly supporting both. The point which I would like to stress in this statement is that going ahead with these programs is not incompatible with the goals outlined in the President's speech.

Many opposed to the MX and B-1 programs have focused on the seemingly never ending build-up of strategic nuclear forces and asked how continued spending on such programs can possibly lead us to a more peaceful world. To respond to that, I would again paraphrase the President and state that such decisions must be viewed from the proper perspective; the programs are in response to a perception of a potential danger, a danger which cannot be ignored. There is a period approaching of instability in the strategic balance which if we do nothing to avert, may result in the perception, whether real or imagined that there is a vulnerability. Our efforts to "close the window", in terms of these specific programs are therefore short-term and should not be viewed as a regressive step to our long-term goal of negotiating an end to the threat of nuclear destruction.

To continue to pursue our long-term goal, we must indicate that we sincerely seek to pursue reductions of military forces and that the door back to the negotiating room is always open. This the President has done in the most visible and direct fashion.

We cannot, however, seek to negotiate from a position of weakness. We cannot allow our military forces to deteriorate from insufficient attention and resources. We cannot use our long-term goal as our excuse for not doing what must be done in the short-term to keep ourselves strong. We cannot gamble on negotiation because in the world of negotiation, there is no guarantee.

In a more pragmatic sense, if we do not fulfill our short-term goals, we will actually set back our long-term effort. If both sides do not similarly perceive the threat posed by the existence of nuclear weapons, what incentive remains to proceed to the negotiating table?

These short-term goals must be kept in their proper perspective, however. Because our country will continue to rebuild our defenses and maintain our stength, it is not a signal that our long-term goals are false or merely rhetorical. Let no one underestimate the sincerity of our intention in seeking a more peaceful world. A world without war, as difficult as it is to imagine at times, is one of the most powerful motivations there is.

We will continue to pursue our long-term goal, but we will proceed carefully. The stakes are too high to follow any other course than this.●

CHEMICALS AND CANCER

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 20, 1981

● Mr. OBEY. Mr. Speaker, the following article by Dr. Samuel Epstein provides an important perspective on two of the most important health questions of our time: What causes cancer and how can it be prevented? The two questions are related. They are the focus of a heated debate between those who stress the importance of involuntary exposure to environmental carcinogens and those who emphasize lifestyle factors such as smoking while suggesting that environmental causes like carcinogenic chemicals in the workplace are relatively unimportant. The argument revolves around the relative importance that one ascribes to either environmental carcinogens or lifestyle factors. In the debate in this area, like many other health areas, the scientific evidence is incomplete and sometimes contradictory. I believe that Dr. Epstein makes a useful contribution to the debate by pointing up the scientific problems with the data used by some lifestyle proponents. I certainly don't believe that the last word is in, and I personally don't even agree with some of Dr. Epstein's arguments on the role of diet, but I do think that he puts his finger squarely on the way the chemical industry uses the lifestyle argument to take the public's eye off their own contribution to the problem of cancer causation.

FALLACIES OF LIFESTYLE CANCER THEORIES

Peto's article, purporting to be a review of the book The Politics of Cancer, is largely a restatement of the lifestyle theory of cancer causation. This theory postulates that if you get cancer it is essentially your own fault, and that the causal role of past involuntary exposure to environmental and occupational carcinogens is trivial. Not surprisingly, the lifestyle theory has emerged as the major professed basis of the chemical industry's objections to the regulation of its carcinogenic products and processes. As an enthusiastic proponent of this theory, Peto asserts that smoking-derived and fat-associated cancers "collectively account for more than half of all cancer deaths." As a corollary, of Peto's emphasis on lifestyle factors, he denigrates the role of occupational and environmental carcinogens and the need for their effective regulation, claiming that there has been no recent increase in cancer mortality rates other than that due to smoking. We shall demonstrate that there is scant scientific basis for the lifestyle theory, and that it is in fact contradicted by a substantial body of published evidence.

CANCER RATE TRENDS

Peto justifies his emphasis on lifestyle factors by dismissing evidence for recently increasing cancer rates, apart from "that due to the massive effects of smoking on lung cancer". However, there is substantial evidence to the contrary. Standardized cancer death rates, adjusted to the 1940 age structure of the total United States population, show a progressive overall increase of about 7 percent from 1935 to 1970 (ref. 4) despite marked reductions of stomach cancer rates for unexplained reasons and of cervix cancer rates for reasons including the frequency of elective hysterectomy for non-malignant disease and the success of screening programmes. These trends are consistent with standardized mortality data for the United States (Table 1), where they are even more marked in black males, and with

crude mortality data for the United Kingdom (Table 2). The overall rate of increase in US cancer mortality in the 7-year period from 1969 to 1976 (5.5 percent), adjusted to the 1970 age structure, is substantial and comparable with that for the preceding 35 years, 1935 to 1970 (7 percent). The overall increase in incidence rates is even more marked than mortality rates in the past decade, involving a wide range of organs besides the lung (Table 3). Moreover, the increase in incidence for all sites is comparable with that when lung cancer is excluded (Table 4).

Reliance on overall age-adjusted incidence or mortality rates alone is simplistic, as such rates can mask steep increases in organ-specific cancers in high risk population subgroups, such as asbestos insulation workers or menopausal women treated with oestrogen replacement therapy. The overall probability, at today's death rates, of a person born now getting cancer by the age of 85 is 27 percent for both men and women; this is increased from the 19 percent for men and 22 percent of women born in 1950. Furthermore, recent cancer rate trends reflect exposures and events beginning some 20 or 30 years ago, when the production of synthetic organic chemicals was relatively trivial compared with the present levels. The production of synthetic organic compounds in the United States in 1935, 1950 and 1975 was about 1, 30 and 300 billion pounds per annum, respectively; sharp increases have also been observed for a wide range of derived industrial products such as chlorinated hydrocarbon solvents, plastics and resin materials, and of industrial carcinogens, such as vinyl chloride and acrylonitrile. It is resonable to anticipate that greater production has been paralleled by increased exposure of increasing numbers of both the workforce an the general public, which is likely further to accentuate increasing trends in cancer rates. It must also be recognized that before the 1976 Toxic Substances Act, which the chemical industry so effectively stalled for so long, there were no requirements for testing chemicals before their introduction into commerce (with the exception of special-purpose legislation for drugs, pesticides and food additives). Thus, the overwhelming majority of industrial chemicals now in use have never been tested for chronic toxic and carcinogenic effects, let alone for ecological effects.

ROLE OF SMOKING

As emphasized in The Politics of Cancer (p. 178), "Smoking is the single most important cause of lung cancer, as well as of cancer at other sites, chronic bronchitis and emphysema, and cardiovascular diseases". Less well appreciated by lifestyle advocates is that overemphasis on smoking is widely used to divert attention from occupational causes of lung and other cancers. Of the approximately 100,000 annual lung cancer deaths in the United States, at least 20 percent occur in nonsmokers. It is relevant that lung cancer death rates in nonsmokers approximately doubled from 1958 to 1969, an increase maintained since. Furthermore, the role of occupational exposure to carcinogens was not recognized in most of the classic epidemiological studies which linked lung cancer with smoking. This led to overestimation of the contribution of smoking compared with occupational risks or to their possible interactions.

TABLE 1—AGE-ADJUSTED CANCER MORTALITY RATES PER 100,000 U.S. POPULATION FOR SELECTED SITES BY SEX AND YEAR 1969–76, AND AVERAGE PERCENT CHANGE [1]

Site	Sex [2]	Mortality rate per 100,000		Average percent change 1969–76

[1] The 1970 population was used as standard for age-adjustment.

Thus, "we are unable to say how much of the risks attributed to cigarettes is a 'pure' cigarette risk and how much is cigarette times another, possibly on the job hazard". Moreover, smoking and occupation are confounded variables, smoking among men being more prevalent in 'blue-collar' workers than in professional and managerial classes. Occupational causes of lung cancer, include asbestos, radon daughters, nickel ores, chromium, arsenic, beryllium, mustard gas, vinyl chloride and bischloromethyl ether, apart from incompletely identified carcinogens in a wide range of industries such as rubber curing, tanning, steel (coke ovens), foundries, automobile, and petrochemicals. Thus, lung cancer rates in asbesto insulation and topside coke oven workers are as much as 10 times greater than general population rates.

Underestimation of the role of such occupational carcinogens has been assisted by the fact that lung cancer mortality rates, based on the International Classification of Diseases, fail to distinguish pleural mesotheliomas from lung cancers; there is evidence of substantial under-reporting of mesothelimoas (by about 75%) in high risk groups, and even more so in occupations, such as automobile mechanics, where asbestos exposure has not been well recognized. There is a further lack of distinction between lung cancers of different histological types, some of which, such as adenocarcinomas, are less likely to be due to smoking than to occupational carcinogens. In several instances where the risk of bronchogenic carcinoma has been shown, to be increased among occupationally exposed groups, there has been an accompanying shift in the distribution of histologic types of tumours", away from the small-cell undifferentiated and squamous cell carcinoma of the lung, the principal types whose frequency is increased by smoking, in the direction of other types, particularly adenocarcinoma. "This (shift) has been noted among metal miners, uranium miners, copper smelter workers, vinyl chloride polymerization workers, chloromethyl methyl ether production workers, and mustard gas manufacturers."

Possible variations of smoking patterns fail to account for the marked excess in U.S. lung cancer rates identified in specific occupational exposures, particularly among ethnic minorities and migrants from southern states. A further challenge to the dominant role ascribed to smoking seems to be provided by observations that the risk of lung cancer in certain occupational groups, such as American Indian uranium miners, Swedish zinc-lead miners, mustard gas workers, copper smelters exposed to arsenic, and chloromethyl methyl ether workers, is about as high among nonsmokers as smokers, although the latency period is reduced in smokers, suggesting a possible promotional effect of smoking. It appears that the relative risks of lung cancer for smokers as against risks for nonsmokers may have been overestimated, particularly in less than lifetime studies. Variations in smoking do not account for geographic excesses in lung cancer rates in U.S. males and females, which overall reflect proximity of residence to petrochemical and certain other industries; there are also data showing associations between levels of atmospheric carcinogens and lung cancer mortality rates. It may be noted that a report from Peto's own institution demonstrates that the correlation coefficient between lung cancer and smoking internationally explains only one-third as much of the variation as does the correla-

tion between lung cancer and solid fuel consumption (0.4 versus 0.7; r^2 = 0.16 versus 0.49).

TABLE 4.—CHANGES IN U.S. CANCER INCIDENCE RATES FROM 1970 TO 1975

Groups	Average percent increase in incidence rates, 1970–75			
	Cancers of all sites		Cancers of all sites except lung	
	Annual	5-year	Annual	5-year
White male	0.9	4.7	0.9	4.6
Nonwhite male	2.3	11.9	2.7	14.3
White female	2.2	11.6	1.8	10.2
Nonwhite female	6.1	34.6	5.7	32.2

TABLE 5.—INTERNATIONAL CORRELATIONS BETWEEN BREAST, COLON, AND LIVER CANCERS AND POSSIBLE ACTIOLOGICAL VARIABLES [1]

	Correlation coefficients			
	Consumption of—		Gross national product	Total energy production
	Fat	Animal protein		
Breast cancer:				
Incidence	0.79	0.77	0.83	0.70
Mortality	.89	.83	.72	.60
Colon cancer (M):				
Incidence	.74	.74	.81	.68
Mortality	.85	.86	.77	.69

Liver cancer (F): Incidence	−.59	−.67	−.53	−.31

[1] Liquid energy.

Overemphasis on the carcinogenic effects of smoking, and ignoring or discounting the role of occupational and other exposures, is extended by Peto and others to cancers of the bladder and pancreas which are variously characterized as related to or caused by smoking. However, the relative risks for these cancers are several times less in smokers compared with nonsmokers than is the case for lung cancer. Excess bladder cancer rates have been identified in several occupational categories, including rubber, paint manufacturing and textile dyeing workers, and among residents in highly industrialized counties, particularly those with large chemical industry complexes. Excess pancreatic cancer rates have also been reported in various occupations including steel and metal workers and organic chemists.

Recognition of the important role of occupational exposures in lung cancers previously ascribed, exclusively or largely, to smoking in no way detracts from the recognition, emphasized in The Politics of Cancer, that the impact of smoking constitutes a "national disaster". There is no basis for regarding the smoking/lifestyle and occupational theories as mutually exclusive, particularly as these exposures may operate interactively. Furthermore, lifestyle is a somewhat misleading rubric for smoking as it restrictively implies voluntary personal choice. Placing responsibility for personal choice of an addictive lethal habit on young teenagers, the fastest growing group of new smokers, seems inappropriate. Failure to control smoking reflects a wide range of political and economic constraints, including massive press advertising by the industry which omits the word 'death' from the guarded small print warning of danger, massive revenues to federal, state and local government from tobacco taxes, federal subsidies to the industry and unwillingness of governments to increase tobacco taxation or to develop incentives to tobacco farmers to diversify. It is also important that the industry has moved to open up massive new markets with high-tar cigarettes in less developed countries, where the population is poorly informed on the hazards of smoking.

ROLE OF DIET

Lifestyle proponents are on less sure ground when they bracket diet, excess fat and overnutrition with smoking as the casues of the majority of cancer deaths. This claim is based largely on international correlations between consumption of total fat and rates of cancer of the breast and colon; however, such correlations by themselves are not proof of causality. Similar correlations were found, in the same study from Peto's institution, between breast and colon cancers and other variables, such as Gross National Product and consumption of animal protein, which also appear to reflect industrialization (Table 5). Furthermore, "epidemiologically, the case against fat is weak because there are populations that have a high fat intake and little bowel cancer . . .". Of two case control studies on the association between diet and breast cancer, one found no effect and the other found trivial effects of fat and caloric intake, concluding that ". . . recommendations of major dietary modification as a possible preventive measure for breast cancer are clearly premature".

Equally unconvincing are the studies, cited by Peto as corroborative evidence on the experimental effects of diet, which were largely concerned with the influence of fat on the incidence of tumours induced by chemical carcinogens and ionizing radiation, and the influence of caloric intake on the incidence of spontaneous and induced tumours. Not only were different variables defined in the animal and human studies—percent fat in the diet and total dietary fat, respectively—but increasing fat levels in the animal experiments were associated with increased incidence of skin, liver and breast cancers, whereas the reported correlations between fat consumption and liver cancer mortality are negative for both men and women (Table 5). Moreover, these experiments often failed to differentiate between variations of total dietary fat and caloric intake in test animals and to adjust caloric intake in controls to reflect dietary fat variations in test animals; the magnitude of the variations in fat and caloric intake required substantially to influence the incidence of induced and spontaneous tumours in experimental animals is generally far in excess of the dietary differences observed among the various human populations studied. These experiments invariably failed to adjust the intake in controls of fat soluble carcinogens, present in fat as accidental environmental contaminants, to reflect variations of fat intake of test animals.

Peto's claim for the causal role of dietary fat in human cancer overstates the conclusions of those cited as the basis for his claims. Armstrong and Doll, for instance, merely suggest that dietary fat levels may influence the incidence of colon and breast cancers, without asserting causality. Doll considers that diet may act by modifying the incidence of tumours induced by carcinogens or by acting as a vehicle for exogenous carcinogens—a suggestion also made in *The Politics of Cancer* which Peto dismisses as "implausible". Carrol concludes that "although caloric intake may be a factor in human carcinogenesis, it does not appear to offer a practical approach to the problem". As recognized by current concepts on the multifactorial aetiology of cancer, there is a subtantial probability that a wide range of influences, diet and other lifestyle factors included, modify individual responses to carcinogenic agents. To ascribe causality to any particular modifying factor requires a degree of scientific evidence that has not yet been presented for dietary fat.

ROLE OF OCCUPATION

Peto associates himself with the insistence by the chemical industry and other lifestyle proponents that occupational exposures account for about 5 percent or "a very small proportion" of all cancers. This view is based on ascribing given percentages to known or alleged lifestyle factors, including smoking, fatty diet and sunlight, leaving a small unaccounted for residue to which occupational factors are arbitrarily assigned by exclusion. The authors of this simplistic hypothesis compensate for its tenuous basis by reliance on 'educated estimates' and by making circular references to each other, often by 'personal communication', as the responsible authority.

However, there are problems with such 'guesstimates'. First, they fail to consider the multifactorial aetiology of cancer and the role of multiple causal agents, such as asbestos and smoking; thus, the summation of known causes of cancer should properly exceed 100 percent. As one of the lifestyle authors recently stressed[36], "there is now strong evidence to suggest that the risk of cancer is commonly increased by interaction of two or more factors". Second, current cancer rates reflect exposures 20 to 30 years ago, when production levels of occupational carcinogens were a small fraction of the present; such estimates should thus now be adjusted to reflect increasing numbers of workers exposed. Third, the authors of these guesstimates failed to consider the very limited nature of the data base on exposure to occupational carcinogens. Nor have they at any stage protested or even commented on the persistent refusal of the chemical industry to make such critical data available. In the absence of exposure data, it is even less clear how the 'lifestylers' confidently arrive at their estimate of less than 5 percent.

Rather than addressing himself to such problems, Peto dismisses recent estimates of the importance of occupational carcinogens in a report by the U.S. Public Health Service as exaggerated, unsound and unreasonable. This report, prepared by nine named and internationally recognized experts in cancer epidemiology, statistics and carcinogenesis from three federal research agencies, is based on a National Occupational Hazard Survey which between 1972 and 1974 surveyed nearly 5,000 workplaces chosen to provide a cross-section of industry in the United States. The report estimated the total number of workers exposed to asbestos, nickel ores, chromium, arsenic, benzene and petroleum fractions, including aromatics. The excess cancers attributable to each of these carcinogens were derived by multiplying the number of exposed workers by known risk ratios and subtracting the "normal incidence" of the cancer.

The report concluded that "as much as 20 percent or more" of cancers in the near term and future may reflect past exposure to the six carcinogens considered. The uncertainties and limitations in these conclusions, including the possibility that expo-

sures and risk ratios may have been overestimated in some instances, were clearly stated in the report, as were other considerations including the multifactorial aetiology of cancer, and the role of lifestyle factors and their possible interactions with occupational exposures.

The possibility that this government report underestimates rather than overestimates the role of occupational exposures, for several reasons some of which are recognized in the report, has not been considered by its denigrators, including Peto. First, the calculations in the report ignore the role of radiation and of some ten epidemiologically recognized occupational carcinogens, other than the six considered. Second, the risk ratios considered may be artificially low as they were largely derived from less-than-lifetime epidemiological studies, which may thus underestimate the true risk in view of the long latencies commonly involved. Third, the report does not consider the many statistical and methodological constraints common to most occupational epidemiological studies such as relatively small numbers of workers in many locations, changes in exposure patterns over time due to employee turnover, plant shutdown, process and production changes and changes in management, all of which lead to fragmentation of health and exposure records, access to which is often restricted by industry. Fourth, the estimates fail to take account of the many chemicals recognized as carcinogenic in animals for which there are no exposure or epidemiological data. Thus, of 442 chemicals and industrial processes recently evaluated by the International Agency for Research on Cancer (IARC), epidemiological data are available for only 60 (14 percent), although evidence of experimental carcinogenicity was considered to be sufficient for 143 (32 percent). Fifth, the estimates exclude high risk occupations with incompletely defined carcinogens, such as the steel, rubber and tanning industries. Sixth, the estimates do not adequately reflect conditions in small business where exposure levels are likely to be higher than in major chemical companies. Seventh, the report does not reflect major increases in the production of the occupational carcinogens it considered such as benzene, with the likelihood of recently increasing exposures. Eighth, the study examined only a limited numberd of sites, excluding cancers such as skin and bladder which are known to be occupationally related. Finally, the estimates neglect the possible role of fugitive point-source emissions of industrial carcinogens as causes for the excess of overall and organ-specific cancers, including lung, bladder, colon, pancreas and breast, in residents of certain highly industrialized counties.

This government report has received extensive support from various expert bodies, such as the Toxic Substances Strategy Committee, whose position has been endorsed by 17 federal agencies, and international groups, such as the International Labor Organization, and the US and British trades union. The report has also received additional support in the critique of two consultants to the chemical industry's American Industrial Health Council which concluded that ". . . the full range (of total cancer attributable to occupational exposure) using multiple classifications may be from 10 to 33 percent or perhaps higher if we had better information on some other potentially carcinogenic substances . . . The annual number of cancer deaths attributable to asbestos is in the range from 29,700 to 54,000, which corresponds to a percentage range of the total cancer of 7 to 14 percent * * * Any argument over these numbers cannot detract from the fact that asbestos exposure was, as the authors (of the Government report) state, a major public health disaster * * *. We also believe that reduction of exposure to carcinogens in the course of employment can certainly be expected to affect major reductions in the frequencies of occurrence of cancer and is one of the most promising applications of preventive medicine." The American Industrial Health Council failed to release this critique until the record of the recent Occupational Safety and Health Administration hearings on regulation of occupational carcinogens closed.

Finally, there is no basis whatsoever for recent unsubstantiated allegations by Peto and others that all or most authors of the government report have disowned or rejected it or its conclusions (K. Bridbord, M. Schneiderman and A. Upton, personal communication). It should be further emphasized that this 50-page report was prepared as a government document specifically for inclusion in public hearing records, and not for submission to a scientific journal.

CONCLUSIONS

Cancer is a disease of multifactorial aetiology to which occupational exposure and smoking can contribute importantly, sometimes interactively. There have been substantial recent increases in cancer rates which cannot be accounted for by smoking alone. Smoking is the major lifestyle factor of importance in cancer, and evidence for the causal role of other lifestyle factors, particularly, diet, is slender. The role of lifestyle factors has been exaggerated, by those with an economic or intellectual investment in this theory, by largely excluding involuntary exposures to carcinogens and minimizing the role of occupational carcinogens. These considerations further illustrate the primary thesis of The Politics of Cancer: cancer is essentially a preventable disease which requires intervention and regulation at several levels, particularly the occupational and smoking. Failure to prevent cancer reflects major political and economic constraints which have hitherto been largely unrecognized or discounted.

(NOTE.—Samuel S. Epstein, professor of occupational and environmental medicine and Joel B. Swartz, assistant professor of occupational and environmental medicine, School of Public Health, University of Illinois, coauthored this article.)●

SENATE—*Saturday, November 21, 1981*

(Legislative day of Monday, November 2, 1981)

The Senate met at 12 meridian, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Gracious Father of us all, we pray for all who suffer disappointment because of changed plans due to this Saturday session. We think especially of families who sometimes hurt deeply under such circumstances. This has been a difficult week, Father, in which everyone involved in Senate business has put in long, hard hours under great pressure. They will not have their normal weekend respite. Grant, dear Father, that whatever time they have will be free from stress.

We pray for those family members who may find it difficult to accept these forced interruptions in their plans even though they know this weekend work is necessary and important. Give to them a special measure of Thy grace and tranquillity which will compensate for expectations frustrated, plans set aside, and perhaps some hours of loneliness.

And, gracious Father, vouchsafe to those who work here extraordinary blessing that will provide an extra quality of renewal to their shortened hours of rest and relaxation. Fill our hearts and homes and offices with special peace and love. In Jesus' name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business to extend not past the hour of 1 p.m., in which Senators may speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

CONTINUING RESOLUTION CONFERENCE CONTINUES

Mr. BAKER, Mr. President, it appears that the conference on the disagreeing votes of the two Houses on the continuing resolution making appropriations for the agencies and departments of the Government of the United States is not going well. I am sorry to report that, but at last inquiry, it did not appear to me that we are likely to get an early resolution of the differences between the two Houses on the conference report any time soon. It seems increasingly likely that we shall be in much of the day today, maybe late today, and perhaps on tomorrow. Once again, I urge Members to consider the possibility of a Sunday session and to make their plans accordingly.

On a personal note, Mr. President, I wish to say that I have had to alter my plans, as I expect has every Senator. I especially regret that because my only nephew is to be married in Memphis, Tenn., today and I had very much hoped to be there. But I am sure he will understand and his new wife will understand, as the family, friends, and acquaintances of other Members will understand the necessity to rearrange the most sensitive, personal and important engagements in order to be present in the House and Senate at this time. We are trying desperately to complete action on the bill that will enable use to continue the orderly operation of the Government.

A COLLECTIVE APOLOGY

Mr. BAKER. Mr. President, it is part of the responsibility of public service, especially that of service in the Congress of the United States, that personal life is often inconvenienced. Difficult times are the rule rather than the exception in terms of the orderly planning of one's life. I think people too infrequently realize the terrible burden that public service places on the families of public officials. I am not complaining.

I am a volunteer in the service of my country, as we all are. As my wife reminds me from time to time when I complain about late sessions or missed appointments or canceled vacations, nobody made me run. But we are here, Mr. President, and it is an accolade to all Members that they expressly, by their actions, implicitly understand the sacrifice that goes with this service. Families do, as well.

So, on this occasion, I am sure I speak for every Member of the Senate when I express our collective apology to families, to friends, to organizations, to those to whom we have made commitments for speeches, for social occasions, for gatherings of one sort or the other, that we will not be there present. All we can ask is that everyone understands, as I am sure they will understand, as I am sure we want them to understand.

ORDER FOR RECESS TODAY UNTIL 9 A.M. TOMORROW

Mr. BAKER. Mr. President, I shortly intend to ask the Senate to stand in recess pending the call of the Chair. Before I do so, however, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 9 o'clock Sunday morning.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. PROXMIRE. Will the Senator yield for 1 minute?

Mr. BAKER. Let me finish this 1 second Mr. President. After I yield, so the acting minority leader may claim his time, I may say to any Member that if they have routine business they wish to transact, I am prepared to extend the time for morning business if that will serve a good purpose, or to proceed to the consideration of any matter on the calendar—either calendar, the legislative or executive calendar—that we can do by unanimous consent. I believe it will not be wise for the Senate to take up any matter that is bound up in any controversy.

I yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I apologize to the majority leader. I thought he was about to recess.

GOOD NEWS FOR THE WORLD ON GENOCIDE

Mr. PROXMIRE. Mr. President, I want to say that at long last there may be light at the end of the tunnel. I understand the Foreign Relations Committee may have a hearing in the near future on the Genocide Convention and I think this is very, very good news. President Reagan made what I think was an outstandingly fine speech just the other day on the nuclear situation in Europe. It was a speech that commanded great respect from people—Democrats, Republicans, liberals, conservatives—all over our country. It was a speech of peace and reconciliation, and I think the Genocide Convention, of course, is aimed at exactly the same purpose. I think if this administration would support it—which they do, I understand, but if they would enthusiastically support it and push it, we have a good chance of getting it enacted. I think that is good news for all of us.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I thank the Senator. I have no further need for my time under the standing order and I am prepared to yield it to any Senator or to the control of the acting minority leader.

Mr. CRANSTON. I have no need of it for my time, Mr. President. I was tempted to object, for all the reasons the leader gave, to the Sunday session, but of course, I did not.

Mr. BAKER. Mr. President, I yield back my time under the standing order.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER (Mr. HATCH). The acting minority leader is recognized.

Mr. CRANSTON. Mr. President, I yield our time to the minority leader.

SOVIET UNION CENSURED ONCE AGAIN IN THE UNITED NATIONS

Mr. ROBERT C. BYRD. Mr. President, on Wednesday of this week, the United Nations once again voted overwhelmingly in opposition to the Soviet Union's continued occupation of Afghanistan. One hundred sixteen nations voted in support of the resolution, 23 opposed and 12 abstained.

This was the third time since the Soviet invasion of Afghanistan in December 1979, that the United Nations has overwhelmingly voted against Russian intervention in that small nonaligned nation.

According to an article appearing in the November 19 New York Times:

> An unofficial breakdown of the ballots showed that what has frequently been a majority of the Soviet Union, its allies and nations professing nonalignment again did not hold together on Afghanistan. Of 78 nonaligned countries that expressed themselves today, 65 voted for the resolution and 13 voted against.

Mr. President, it is apparent that Soviet propaganda has not made a dent in world opinion regarding the brutal occupation of Afghanistan. The world community is to be commended for not turning its back on Afghanistan and for not accepting continued Soviet occupation of that country. As the New York Times article noted:

> The outcome is widely regarded as a substantial political defeat for Moscow, which objects to any United Nations discussion of the issue.

Mr. President, it should be pointed out that the General Assembly resolution calling for the withdrawal of "foreign troops" from Afghanistan was drafted by the Secretary General of Pakistan's foreign ministry, Mr. S. Shah Nawaz, with strong support from the so-called "Third World." Thus, the Soviets can hardly assert that the United States is the primary source of opposition to their actions in Afghanistan.

I ask unanimous consent that the New York Times article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 19, 1981]

U.N. ASSEMBLY, FOR THIRD TIME, BIDS "FOREIGN TROOPS" QUIT AFGHANISTAN

UNITED NATIONS, N.Y., Nov. 18—The General Assembly renewed its demand today that "foreign troops" leave Afghanistan.

This was the third time since Moscow's military intervention in that country in December 1979 that the Assembly issued such a call, and the vote was again lopsided. Today, 116 nations supported the resolution, 23 were opposed and 12 abstained.

The document does not mention the Soviet Union by name and urges a pullout of "foreign troops." But the three days of debate left no one in doubt that the 85,000 Soviet soldiers in Afghanistan were the object of the resolution.

No diplomat here expects that the action will move a single Soviet soldier. But the outcome is widely regarded as a substantial political defeat for Moscow, which objects to any United Nations discussion of the issue.

An unofficial breakdown of the ballots showed that what has frequently been a majority of the Soviet Union, its allies and nations professing nonalignment again did not hold together on Afghanistan. Of 78 nonaligned countries that expressed themselves today, 65 voted for the resolution and 13 voted against.

The Assembly also called on "all parties" to seek a political solution that would enable the Afghans to choose their own government. Since early this year, Javier Pérez de Cuéllar of Peru, a special representative of Secretary General Kurt Waldheim, has been visiting the Soviet Union, Afghanistan and Pakistan in an attempt to reach a peaceful settlement. Mr. Pérez de Cuéllar's efforts have met with little success.

The Chief architect of today's resolution was Pakistan. S. Shah Nawaz, secretary general of the Pakistani Foreign Ministry, told the Assembly that the intervention had undermined détente between the United States and the Soviet Union.

"The central fact is the national resistance of the Afghan people to the continuing foreign military intervention," he said. "As long as attempts are made to ascribe the resistance to outside instigation, a political solution will remain beyond our grasp."

Oleg A. Troyanovsky, the Soviet delegate, complained of "the fuss surrounding the so-called Afghanistan question." He attributed the conflict there to "counterrevolutionaries" who he said were financed and armed by the United States and China.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENERGY DEPENDENCE

Mr. MATHIAS. Mr. President, it is accepted wisdom that the Lord helps those who help themselves. And I regret to say that in some respects today we in the United States are not helping ourselves and, therefore, we cannot expect the Lord's help.

We are denying ourselves markets in the world which could improve our own economic situation and we are denying our friends in Europe access to America's vast resources in energy which would relieve them of dependence on OPEC sources in the Middle East and on sources in Soviet Siberia.

All of this is brought into very sharp focus by the news from Europe yesterday. There it was announced that the Soviet Union and Ruhrgas, a corporation in the Federal Republic of Germany, have signed an agreement for a multibillion dollar pipeline for natural gas.

Mr. President, I do not think we can criticize our friends in Germany nor can we criticize the Soviet Union for entering into an agreement which, on the surface at least, has many obvious benefits. We would prefer that they had not done it. We can point out to our friends in Western Europe that they may get hooked on natural gas from the Soviet Union, that when they try to withdraw they may have all the problems of withdrawal; that they may find they have developed a dependence on the Soviet Union as the source of a vital form of energy.

I say we cannot criticize them because we have not offered them an alternative which it is in our power to offer them and that is a reliable source of energy from the United States.

It is, I think, important that we look at the agreement signed yesterday. That agreement calls for Western companies to provide financing and technology for a 3,000-mile pipeline in exchange for natural gas, at a price which has been fixed on 10½ billion cubic meters annually, which will be purchased by the Federal Republic of Germany and by six other Western European nations.

Ruhrgas estimates that the total value of the natural gas to be purchased over a period of 25 years will be something in the neighborhood of $45 billion. This is a massive transaction. I think we have to look beyond these statistics to see what this means for Western Europe and what it means for the United States.

As I have suggested, it shows at least the potential for developing a dependence on the Soviet Union for energy.

I think we have to look at that potential as we consider the broader kinds of security questions within NATO. The Soviet Union already provides 16 percent of the natural gas requirements of the Federal Republic of Germany, and this project obviously will increase that dependence as well as that of the other participating nations.

Of course, the argument is made in Europe, to counter this concern, that it is decreasing their dependence on oil

from the Middle East; it is decreasing their dependence on OPEC. That is, of course, not subject to argument. It is at least a new source.

But then the question arises, is it a better source? Is it a more dependable source or is it a source which ultimately may make the recipients more vulnerable, which may lead to concessions, not merely concessions in the matter of price, but concessions in totally unrelated areas, such as trade and other economic issues or even arms control?

In the event, which I hope will never occur, but in the event, of a major confrontation between the NATO nations and the Warsaw Pact nations, the possibility of an invasion of Poland suggests itself in that regard, is it likely the Soviet Union would turn off the tap? Or, if, in fact, we placed an embargo on East-West trade, would the response be turning off the natural gas pipeline valves? These are all serious questions.

Of course, our friends in Europe find this transaction beneficial in more ways than one because, at a time of rising unemployment, they see the potential for many new jobs. They also see construction contracts for years ahead, and on the Soviet side of course, the sale of natural gas means access to hard currency, which will be extremely valuable at a time when the Soviet economy has been slowing down, according to the official reports of the Soviet Government.

But all of that, as important as it is for use as members of the North Atlantic Treaty Organization, all of that involves decisions which are beyond the control of the United States. Those are decisions that are being made by the Federal Republic of Germany as a sovereign nation, and decisions that are being made by the Union of Soviet Socialist Republics.

What we really need to worry about now are the decisions that are within our own ability to make and to execute. We need to worry about our failure to take the steps to put ourselves in a position to meet the energy needs of our friends in Europe. Our failure to prove that we are an adequate and a reliable supplier of coal seems to indicate that we are missing a very great opportunity.

It is sometimes forgotten right here in this Chamber that the United States is the Saudi Arabia of coal. Our coal can meet two-thirds of the world's additional energy demands—and there will be an additional energy demand—by the year 2000.

By the end of this century, the United States can be exporting as much as 215 million tons of steam coal to an energy-thirsty world, and energy is the lifeblood of society today, here in the United States and in every other part of the developed and developing world.

Increased U.S. exports of coal would not only help our domestic economy by providing jobs in the mines, jobs on the railroads, jobs in the ports, but in addition to that it can help us in executing our foreign policy all around the world.

Those who buy American coal and who engage in other reciprocal trade with us as a result of our coal exports can become our partners on a whole range of economic and political and social issues.

So I think the news yesterday of the Soviet-European natural gas agreement underscores the need for a vigorous program to promote the export of American coal.

Increased American coal exports would go a long way toward providing a stable and secure source of energy to our friends in Europe and to many other countries while, at the same time, help our own balance of trade.

But in order to do this we have to provide the means to get the coal to the rest of the world.

I would suggest that today, November 21, 1981, the most important single thing we need to do in this regard is to get out the dredges and to start making American ports adequate to receive the modern colliers that are capable of carrying vast cargoes of coal in an efficient and economic way.

The Congress and the administration should give the development of port facilities the highest priority to meet what is far more than just an economic need, a commercial need, but which touches upon the most vital interests of the United States in dealing with the rest of the world.

The pipeline deal between the Soviet Union and Western Europe raises some very grave issues, but it also sends us some signals that can be very useful to us if we are wise enough to read the signals and smart enough to respond.

The question that is before us is whether we are going to stay on the sidelines and merely watch these developments taking place in the rest of the world, whether we are going to be passive observers of important developments or whether we are going to participate in the future, whether we are going to prepare ourselves to be active partners in the future, by preparing ourselves now to play the role we are capable of playing as an important source of energy for our friends in many parts of the world.

To do this, Mr. President, we have to act very fast. We have lost years in delay in the improvement of port facilities.

Yesterday's announcement in Europe makes it clear that far more than a few profits hang in the balance. National security questions of the highest order are involved in the simple process of mining coal and shipping it to a world that is waiting for it. And I hope that our successors in this Chamber in the year 2000 will not be asking, "Why did not the United States go to work in 1981 and put this great country in a position to lead the world, as they were capable of having done?"

Mr. President, I urge Congress and I urge the President of the United States to place this issue at the top of our national agenda.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MATHIAS). Without objection, it is so ordered.

SUMMARY OF CANCUN SUMMIT

Mr. HAYAKAWA. Mr. President, the leaders of 22 nations—14 developing and 8 industrialized nations—met in Cancun, Mexico, October 22–24, to discuss the economic plight of the Third World. The main course of the talks involved the establishment of future global negotiations between the industrialized and developing nations on solving the world hunger problem.

Not only was the Cancun Summit successful in creating a good beginning for more constructive relations between the rich and poor nations, but it gathered the leaders that comprise two-thirds of the world population and allowed informal dialog to take place. These talks provided the opportunity for those leaders to lay a base for better understanding by becoming acquainted with the problems of other nations.

Mr. President, although the developing nations were basically interested in securing economic aid from the rich countries, the United States presented other alternatives. The United States stated that a positive program in dealing with the hunger problem in the Third World depends upon "a coherent view of what is essential to the development—namely political freedom and economic opportunity," stressing the necessity of free enterprise. The most effective way to achieve a system of free enterprise in the Third World, the United States emphasized, is through free trade and private investment.

The United States held a firm stand against increasing development aid, pointing out that there was no nation at the summit who has contributed more in foreign aid than the United States—$57 billion in the past decade. However, many of the developing nations noted that the United States was behind "percentage-wise according to GNP"—0.27 percent in foreign aid contributions compared to some of the other industrialized nations. The poor nations felt that at least 1 percent of the rich nations' GNP should be donated to them. The United States, on the other hand, stressed that development aid was not the answer and supported a program to teach the poor nations to take care of themselves. The U.S. proposal included the sending of American agriculturalists and farmers to the developing nations to teach them how to become self-sufficient.

Mr. President, since the World Bank and the International Monetary Fund play such an important role in foreign aid affairs, the developing countries emphasized that they should be represented in these agencies on a one-nation-one-vote basis, the same procedure as in the

United Nations, rather than the existing format of proportional representation based on the amount of contributions made by a country. The United States backed the present procedures of these agencies, insisting that they should be obeyed. However, the United States stated that the agencies should focus more on the developing countries in the future.

Mr. President, it is a pleasure to summarize the discussions at Cancun.

Perhaps the most surprising factor of the summit was the presence of the United States to begin with. Although the U.S. delegation tended to be isolated on many of their views, their ideas to stimulate economic growth in the Third World were agreed upon with "a broad acceptance of many approaches." President Reagan was praised on his willingness to listen to the economic problems of the developing nations.

The President was also confronted by several Third World leaders on international security matters; Chinese Prime Minister Zhao Ziyang expressed his opposition to the U.S. proposed sale of military aircraft to Taiwan and Indian Prime Minister Indira Gandhi stated her disapproval of the U.S. proposed sale of F–16's to Pakistan.

Despite these disagreements, Mr. President, it was agreed upon by all nations that attended the summit in Cancun that global negotiations will be the main goal toward solving the problems of world hunger in the future. There was no definite date set as to when these talks would take place, but the developing countries expressed hope that they will begin by next year at the latest.

Mr. President, this is a very felicitous beginning. I am glad to report this short summary to my colleagues. I thank the Chair.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I remain hopeful that something will result from the conference efforts that are now in progress. If there is a conference agreement, the report must be considered, of course, by the House before it can reach the Senate for consideration here.

There are two other matters that I hope to deal with today, Mr. President. One is the HUD conference report and the other is the energy-water resources conference report. I understand both of them have been cleared, with one exception, which we are trying to pursue at this time.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now stand in recess subject to the call of the Chair.

There being no objection, the Senate, at 1:09 p.m., recessed awaiting the call of the Chair; whereupon, at 6:02 p.m. the Senate reassembled when called to order by the Presiding Officer (Mr. HATCH).

The PRESIDING OFFICER. The majority leader is recognized.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I understand we are in a position to take up the conference report on energy and water development for the fiscal year ending September 30, 1982, and perhaps the HUD conference report as well. I believe the chairman of the Committee on Appropriations is ready to come out of the conference for a brief time to do that and should be able to do that in just a moment. If that measure is cleared now on the minority side, we shall proceed.

Mr. CRANSTON. Mr. President, the conference report on energy and water is cleared.

Mr. BAKER. In a moment, Mr. President, I shall ask that the Chair lay before the Senate the conference report on energy and water but, awaiting the attendance of the principals, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I see the minority leader is here. May I inquire if we are in a position now to clear the energy-water conference report?

Mr. ROBERT C. BYRD. Mr. President, the energy-water conference report is ready on this side and we are presently working to see if the HUD conference report is ready.

Mr. BAKER. I thank the minority leader.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on H.R. 4144 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of November 19, 1981.)

Mr. HATFIELD. Mr. President, I bring before the Senate today the conference report on H.R. 4144, the Energy and Water Development Appropriations Act for fiscal year 1982. The conferees resolved the differences between the House and Senate on this bill early Wednesday, November 18. The conference report and statement of managers have been filed as House Report 97–345 and it has been printed in the RECORD. Therefore, I shall not elaborate on all the items which were in disagreement, but I do want to sketch an outline of some of the important elements of the proposal which is before us today. In any event, Mr. President, I believe we have reached, through long hours of negotiation, a reasonable and prudent agreement which can be cleared by the Senate and sent immediately to the President for his signature.

As recommended by the committee of conference, the conference agreement provides $12,472,025,000 in new budget authority for energy and water development through the activities of the Department of Energy, Corps of Engineers, Bureau of Reclamation, and several independent agencies. The amount of the conference agreement is $938,262,000 below the March budget estimate, and only $375,478,000 above the revised September budget estimates. The Congressional Budget Office advises us that this conference total is about $92,000,000 in budget outlays over the revised budget estimates.

In other words, the conference report is less than $100,000,000 in outlays over the revised budget request.

To reach this level of savings, the conferees were faced with some extremely difficult decisions. In many cases, after careful consideration, we agreed to the lower amounts for many programs and activities.

Because of the downward impact of the second round of budget cuts, the Senate allowance usually was much lower than the House recommendation. As a result, the conference agreement in total is much closer to the Senate proposal than to the House bill. And although the total level for each account is between the Senate and House allowance, the total amount of the conference report is below both the House and Senate totals for the entire bill.

While this is not a common occurrence, it has happened on occasion in the past. But more importantly, Mr. President, I believe that arriving at this lower total amount clearly shows our determination and commitment in both the House and Senate to reduce the growth in Federal spending.

Mr. President, the conference report and statement of managers provide much detail, and therefore, I shall summarize in rather general terms the appropriations provided for in the conference agreement.

Title I of the conference agreement provides appropriations for the U.S. Army Corps of Engineers civil works program. The conference report provides a total of $2,914,666,000 which is an increase of $22,845,000 over the Senate level and a reduction of $248,536,000 below the House bill.

The Corps of Engineers funding level is $161,674,000 above the revised budget and $213,734,000 below the March budget estimates. Of the total amount, about half, or $1,416,992,000 is provided for 227 on-going construction projects. The bill contains no new construction starts for either the Corps of Engineers or the Bureau of Reclamation.

For title II, the Bureau of Reclamation, the conferees recommend a total of $760,161,000, which is only $2,500,000 more than the Senate bill, and $78,427,000 less than the House-passed bill.

The conference agreement contains $8,044,766,000 for Department of Energy programs in title III. This includes $2,303,126,000 for energy supply, research and development activities; $529,360,000 for general science and research activities; $243,318,000 for power marketing administrations and $76,177,000 for the Federal Energy Regulatory Commission. The energy accounts include $341,316,000 for solar, geothermal and renewable energy development; $327,274,000 for conventional nuclear reactor systems development and nuclear waste management; $687,016,000 for breeder reactor systems including $195,000,000 for the Clinch River breeder reactor project; and $456,000,000 for fusion energy development.

Mr. President, the conference agreement includes $752,432,000 for seven independent agencies and commissions in title IV, including $150,000,000 for the Appalachian regional development program, $465,700,000 for the Nuclear Regulatory Commission, $129,162,000 for the Tennessee Valley Authority, and $3,888,000 for the Water Resources Council.

As always, I congratulate and commend our distinguished colleagues in the House who served as conferees on this bill for their wonderful cooperation in resolving these differences. Special recognition, thanks and appreciation is due the Representative from Alabama (Mr. BEVILL), who was the chairman of the House conferees and chairman of the conference. I also wish to thank the Representative from Indiana (Mr. MYERS), the ranking minority member, for his support and valuable contributions.

Mr. President, I want to express my thanks and deep appreciation to my friend and colleague, the distinguished Senator from Louisiana (Mr. JOHNSTON), who is the ranking minority member of this committee. I want especially to commend him for his dedication and support. It is a great pleasure to work with him, and I think the final product of our committee shows the cooperation we have had. I extend my personal thanks to him.

Finally, Mr. President, both the majority and minority staff of this committee come in for special thanks—on the minority side, of course, Proctor Jones, and our majority staff members. Steve Crow, David Gwaltney, and Gloria Butland. I think they are especially to be commended for their diligent work on this bill.

Mr. President, I indicate one very significant fact, and that is that the nuclear weapons program is in this budget and that it is in excess of a billion dollars over last year's level of spending.

When we consider that kind of increase in one part of the budget and the fact that we ended up in the total view of the budget being so close to the September budget requests, I think it is great testimony not only to the staff but also to the ranking minority leader, who formerly was chairman of this committee, and to the House Members as well, that we are able to bring this report to the floor and ask for its adoption.

I yield to the Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I thank my distinguished chairman for his kind remarks. I commend him for his leadership, which has been excellent in this area.

It has been very difficult to cut back on what we consider to be a most important—indeed, essential—function of Government, which is providing the water resources infrastructure for our country. Of course, on that water infrastructure the commerce of the Nation moves, or a very large percentage of it; floods are controlled; water is brought to the parched West and Southwest and other water-short parts of our Nation; hydroelectric electricity is produced among other benefits.

With those very important functions, the percentage of our gross national product, the percentage of the Federal budget—indeed, the amount of dollars in nominal terms—continues to go down. When we look at the stark figures in nominal dollars, this bill is $162 million over last year's bill.

However, as our distinguished chairman pointed out, we have an increase of over a billion dollars in nuclear weapons and related activities. So when you take the billion dollar increase in nuclear weapons, the bill, on its essential energy and water functions, outside of weapons, is actually over $800 million less than last year in nominal dollars; and when inflation is added to that, it is even much more than that. I suppose it is an accomplishment for which we can commend ourselves.

However, at this time, commendation for cutting the essential services of the Nation is hardly a deserved exultation. Perhaps what we should do is be a bit more sad that we must go in this direction of severe budget cuts.

Mr. President, I should like to call attention to one item of the conference report, on page 5, where it is stated as follows:

No funds are included for a study to determine the feasibility of constructing a project at Lincoln School, Maine.

The reason that phrase is in this report is that between the time the bill left the Senate, where there was money to study the project at Lincoln School, Maine, and the time we got to conference, an authorization bill was passed which we erroneously believed deauthorized the whole Dickey-Lincoln project. However, we now learn that what was deauthorized was the Dickey part of the project and that the Lincoln School continues to be authorized. So this statement really is in error.

In order to correct it, now that it has left the conference, I hope the distinguished chairman will join me, at the request of the distinguished Senator from Maine (Mr. MITCHELL), in correcting that in the conference committee now going on. We have report language prepared that will read as follows:

The Corps of Engineers is directed to carry out the Lincoln School, Maine, study as proposed on page 24 of Senate Report 97-256

We understand that that is agreeable to the House conferees, and it will restore us to the same position we were in when this bill left the Senate.

Mr. HATFIELD. Mr. President, I would approve the proposed amendment.

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. JOHNSTON. I yield.

Mr. MOYNIHAN. As a member of the Subcommittee on Water Resources of the Committee on Environment and Public Works, I say that that is precisely my understanding. The intention of the committee was to delete the Dickey dam but not the Lincoln School dam.

Mr. JOHNSTON. I thank the Senator.

Mr. President, with commendation for my chairman, I yield the floor.

Mr. MOYNIHAN. Mr. President, I wonder if I may address a few brief words to the distinguished managers of this bill, who, in defying the laws of nature, are still on their feet and still able to think of something other than the committee conference they are in at the moment.

This is the appropriation for energy and water development. But would I be wrong in my impression that no new water development projects are in this bill?

Mr. HATFIELD. The Senator is correct.

Mr. JOHNSTON. The Senator, unfortunately, is correct.

Mr. HATFIELD. No new construction projects.

Mr. MOYNIHAN. No new construction projects.

I cannot fail to note that the Tennessee-Tombigbee rolls along, with allocations of $189 million to Alabama and Mississippi, and so forth.

Mr. JOHNSTON. The Senator is correct. I know he will be glad that we are winding down to the final stages of that wonderful project.

Mr. MOYNIHAN. We are winding down slowly.

I want to make a point which I believe should be a concern of the Senate, and it is that water development in this country has halted. We can continue with some old projects. Indeed, some of the projects, such as the Tennessee-Tombigbee, in all truth, are a source of the discrediting of a good deal of this enterprise; but this Nation, for practical purposes, in the 1970's, ceased to develop its water resources.

A combination of the environmental impact statement and the budget crisis and the extraordinary regional imbalance of these programs have effectively stopped them.

One of the oldest domestic functions—the first domestic function—of Congress was the development of inland waterways, a debate that took us through much of the 1930's until it was resolved.

The Senator from New Mexico (Mr. DOMENICI) and I have been hard at work in the effort to produce a national water program which we say would be national and rational: That rather than making these free goods for those who have the congressional influence or good fortune to obtain them, and thereby casting doubt on their utility, we simply allow, each year, a certain portion of money to water projects, divided among the States on a formula based half on population and half on size. Let the States save their allocations for large projects, diffuse it among small, do as they will, and no longer go through the absurd pretense. The Senator knows we can produce a water project to water cattle but not for people to drink. We can wash coal but not babies with water developed by the Federal Government. Single purpose water supply projects are not considered legitimate Federal projects. The process no longer works.

What you have here are the projects of another generation, finally authorized. It was pointed out in the Tennessee-Tombigbee debate that George Washington had approved the Tennessee-Tombigbee and well he might. It was a good 18th century canal. But we are going to have to do more.

Water is precious. There are parts of the country where it is scarce. There are parts of the country where geologic water is running out. Our agriculture, to an extent we do not comprehend, is based in the high plains on geologic water; this is also true in parts of the Southwest and the new cotton growing areas. Either we attend to this subject or we shall look up 20 years hence and say why did we not do what needed doing?

I simply point out it is not in any sense responsibility of the Senator's committee. It is the authorizing committees that cannot reach agreement but the effect is in this bill.

Mr. JOHNSTON. Mr. President, if I may reply to my distinguished friend, first of all with respect to some kind of formula that would spread water dollars across the country on some kind of even basis, per capita, or square miles, that would be an excellent idea if the blessings and ravages of water were also equally shared around the country.

But they do not need beach erosion dollars in Arizona. They do not need hurricane protection in New Mexico. They do not need to levee the Mississippi River where the Mississippi River does not flow.

These great and powerful rivers, coastlines, and oceans must be tamed and harnessed to protect the people where they occur. And that, of course, is the very obvious reason that there is an imbalance in dollars.

Now there are some very legitimate areas that the Northeast particularly should be protected on and which we have tried to give dollars in that direction. For example, the Tocks Island project involving the State of the distinguished Senator from New York was authorized and planned and ready to go, and it was about a billion dollar project, but it was killed and not by Congress but by the Representatives from New York——

Mr. MOYNIHAN. And Pennsylvania, but it is the Delaware River. It rises in my county.

Mr. JOHNSTON. It was to provide some of the water supply for New York.

Mr. MOYNIHAN. Yes.

Mr. JOHNSTON. The point is it has not been the venality and selfishness of those on the committee that has at times resulted in an imbalance in Federal dollars.

Mr. MOYNIHAN. Tocks Island, just to make the point, was a downstream project on the Delaware River. It had nothing to do with water supply for my State. But could I make a point?

Mr. JOHNSTON. I believe it was possibly in exchange for 300 million gallons a day for the great city of New York and northern New Jersey.

Mr. MOYNIHAN. We would eventually, I guess, have gotten some. We have adequate water supply.

Mr. JOHNSTON. The point is whether or not Tocks Island was a good project or not. These projects should be spread around based on need.

I hope that we do not find the mighty Mississippi failing to be leveed because we are sending that levee money out to some dry State in the Southwest that does not have the same kind of need.

Mr. MOYNIHAN. I say to my friend that the legislation which Senator DOMENICI and I have introduced specifically provides for multi-State programs where they have a river such as the Mississippi. There is no other river such as the Mississippi, but there are rivers that move from one State to the other.

I make the point that I do not rise in any sense of hostility to what is going on. I rise to point out to him that nothing is going on. This is not a situation which I had anything to do with creating. Five years ago I became a member of the Committee on Environment and Public Works.

My previous interest had been primarily with the State highway program. I came upon the water program, a program that has never touched my part of the country. Ever so often the Corps of Engineers puts up $20,000 to dredge Buttermilk Channel between Red Hook and Governors Island in New York Harbor. It is at about the level that was done in 1830.

But I came upon a stalemate of a former function of Government, which was a driving animating force in this body, but which has ceased to function It does not work. I tell the Senator the Mississippi River one day may change its course and go down the Atchafalaya and leave New Orleans high and dry. It will be God's own work to get anything through this process we now have because this process is stalemated. I did not stalemate it. I had nothing to do with it. I encountered it and am trying to resolve it. That is all.

Mr. JOHNSTON. I agree with the distinguished Senator. I hope we can turn that around.

I read, for example, in the morning paper where the Germans have just effected a contract with the Russians to bring natural gas from Siberia.

We have a competing form of energy which I think would have been very much in our interest to supply to Western Europe and obviate the need for this natural gas, and that is coal. The only thing is our coal is not cost competitive and it is not cost competitive because we cannot bring the deep draft collier, the big 200,000 deadweight ton colliers into our ports because we cannot dredge them and we cannot dredge them because the committee will not report legislation to have it done even though in the case of the port of New Orleans, for example, the benefit-cost ratio is some 8.5 to 1.

I can only say I agree with the Senator very much that we need to unhook this stalemate and to get the legislation flowing as well as the rivers.

Mr. MOYNIHAN. Does the Senator know—he perhaps would be interested—the Subcommittee on Water Resources, of which I am the ranking minority member, of the Committee on Environment and Public Works earlier this week reported a bill by the chairman of the subcommittee, the Senator from South Dakota (Mr. ABDNOR) and me by a vote of 6 to 1 to do exactly that. Our bill will establish a port development program and a port maintenance program that will in fact produce some of those coal ports. We are no longer going to get them through this body as free goods. We must get them somehow.

We must build at least three, one on the east coast, one on the gulf, and one on the west coast, in this decade to capture those long-term coal contracts or they will not come to handle the extraordinary international trade. It is not just a coast-wise activity. It goes into the mines, into the Powder River Basin of the Rockies, these coal supplies, as well as Appalachia, and such like. We have to learn to do this. We have not.

Mr. JOHNSTON. I look forward to seeing that legislation reported to the floor.

Mr. HEFLIN. Mr. President, will the Senator yield?

Mr. JOHNSTON. Yes.

Mr. HEFLIN. I would like to congratulate both the distinguished Senator from Louisiana and the distinguished Senator from New York on their remarks about the need for the development of our water resources. I am convinced that our water resources, next to our human resources, are our greatest resources in this Nation today, and will continue to be such in the future. Needless to say, we must plan for the future.

The vision of some very elder statesmen, such as Washington, was mentioned. Perhaps, our distinguished historian does not realize it, but in 1809, I believe, Thomas Jefferson came forth with the idea of joining the upper waters of the Tombigbee with the Tennessee River. I certainly feel that there are many, many, fine water projects and resources that should be developed.

I want to cooperate, and I hope that we will not follow what has happened in history where we have been so greatly delayed in carrying out the vision of our great forefathers and the wisdom that they saw at that early stage.

But I do feel both of you are correct. These are resources that need to be developed, and I certainly appreciate the statement of the distinguished Senator from New York. I am glad to state that he speaks with no hostility toward the Tenn-Tom. I, for one, want to cooperate in helping to develop one of our great resources, water.

Mr. MOYNIHAN. I thank the distinguished Senator from Alabama. I have observed in the course of a brief period when I was chairman of the Subcommittee on Water Resources that you can live without oil and you can even live without love, but you cannot live without water. This is something—I come from a region which has basically not looked to the Federal Government and historically it has not done so.

But I made the point to my friend from Louisiana that there has not been a single water project provided for in a decade.

Mr. HEFLIN. It certainly concerns me, and that is why I was congratulating the distinguished Senator from New York on his foresight and his desire to move forward. I hope we will be able to move forward much more rapidly in the future than we have in the past.

Mr. MOYNIHAN. I thank the Senator.

Mr. JOHNSTON. I thank the distinguished Senator from Alabama. I am persuaded more now than ever now that I know the Tennessee-Tom is a legacy of Thomas Jefferson, and we are doing the right thing in proceeding toward its completion.

Mr. MOYNIHAN. I would like to interrupt the Senator. It is actually a project of the French imperialists, if you would like to know the fact, in 1740. We drove them to it.

Mr. JOHNSTON. Being from a francophile State that is another good reason.

Mr. HEFLIN. Mr. President, if you want to go back further in history. I have heard rumors to the effect that the proposal to build the Tennessee-Tombigbee Waterway was to be the 11th commandment, however, it is further rumored that some obstructionists prevented it from flowing down from the mountaintop.

Mr. JOHNSTON. I must say to my distinguished friend that with all the writing we hear about water, and with all the money invested in water, it has really been rather small. In all of these years we have invested about $8.5 billion under the Reclamation Act in all the West, with the tremendous dividends that has paid; billions upon billions of benefits and only $8.5 billion invested. You compart that with the Washington Metro System where more than that was spent in 3 years, and you get the real imbalance in what we are failing to do for water in this country

Mr. MOYNIHAN. I wonder if I can address one question—not a question but to ask him to go over it once again—to my chairman.

Do I understand him to say that the appropriation for nuclear weapons in this legislation is $1 billion more than it was a year ago, I mean in the last such appropriation?

Mr. HATFIELD. Let me give the Senator a precise figure. This is a 21-percent increase over last year or translated into dollars it is $1,004,514,000, and let me give a further figure which is offered gratuitously, that is $174,481,000 or 4 percent below the President's September budget request.

Mr. MOYNIHAN. There is no one in this body who is more sensitive than he to the import of those numbers. After a decade of strategic arms negotiations, in 1 year we increase by 20 percent the expenditures which now routinely go to $1.4 billion a year, which cannot simply be for the maintenance or replacement of existing nuclear warheads, so they have to constitute a continuing growth in that arsenal.

The Soviets have four warheads for every county in the United States now. and we have the equivalent for their form of government that corresponds to a county, and it is madness, and I only can express appreciation that the chairman of the Appropriations Committee knows it better than anybody in this body and can take no pleasure in it. But it does need pointing out.

Mr. HATFIELD. I thank the Senator for his remarks. He has raised, of course, that part of this budget that I do not bring here with great pride. But I am one vote on the committee, and the fact that we were able to shave 4 percent, which is under the September request, I think is in itself only an indication of the magnitude of the task we are dealing with and the momentum behind it.

I suppose the only philosophical consolation one can derive out of this experience is that it is much like a freight train that is rushing down the track, roaring down the track. You have to slow it before you can reverse it. I suppose 4 percent is sort of a slowing, but it is a very minuscule impact upon the direction of the velocity.

Mr. MOYNIHAN. You have slowed the rate of acceleration.

Mr. HATFIELD. Yes; there is not much solace in that.

Mr. President, I yield to the Senator from North Dakota.

Mr. ANDREWS. Mr. President, I thank my colleague, the distinguished chairman of the Appropriations Committee, for yielding, and I want to thank him and the other members of the Appropriations Committee who were so accommodating to the senior Senator from North Dakota and myself for the amendment we offered in the committee concerning a very vital water project, the Garrison Diversion project in North Dakota. We are also pleased that our conferees in the House, who know these kinds of projects best, and who know their value, accepted the Burdick-Andrews amendment in conference.

Unfortunately, a strange thing happened to the conference report. In the legislative process it got somewhat derailed on the floor of the other body yesterday, and looking at the record I began to wonder whether they were talking about my State and the project that I know as Garrison Diversion. They talked about the Canadian worries about water quality, and they talked about some terrible biota and the poor quality water that was coming off of these Rocky Mountain slopes.

Frankly, Mr. President, the Senate knows, and I appreciate that, and the conferees know, that there is no purer water in the North American Continent than that which comes off those Rocky Mountain slopes. It flows across the State of Montana and is impounded in the western part of North Dakota.

If some of these people who bring the misinformation into play have repealed the law of gravity so that the water flows uphill from the bottom of the river, so to speak, maybe something could have happened to that water quality. But the last time I was in North Dakota no one had repealed that law of gravity.

Let me point out again, Mr. President. that the chairman and the members of this committee were wise, as was the Senate, in adopting the Burdick-Andrews amendment because it would have allowed this project to go forward. Water quality in that project is, of course, first rate. The landowners-protection that was there for mitigation acres, where we said that mitigation acres could not be acquired by condemnation, was removed by the action of the House. That was an important safeguard. Why, you would have thought in reading the record that somehow or other our landowners in North Dakota are not active outdoorsmen, are not active environmentalists. Of course, they are.

During the last two decades tens of thousands of acres have been purchased from willing sellers to provide waterfowl refuges, and the main purpose of the Garrison Diversion project, or one of its three main purposes, is to provide water during extended drought periods to

maintain that base waterfowl production flock for the central flyway.

During the disastrous droughts of the thirties there came two decades where you would not hunt a duck or goose in North Dakota because we did not have that water resource. Now our hunting is great. Only with Garrison Diversion can we protect these waterfowl they talk so much about.

I think another thing that is strange is that the greatest environmental problem we have in North Dakota arises from our continually and critically low streamflows and that those calling themselves environmentalists attack the only project that can restore those streamflows. They attack the only project, Mr. President, where the Public Health Service reports that the fish you catch in the Red River between Grand Forks and Fargo are unsafe to eat, because of low streamflows, and the only way you can help that is to put more streamflow into that water, into that river, so there is not the stagnation that arises.

Canadian objections have come over history for the Souris River as it returns to Canada. Why? Because it goes through a duck refugee, and the combined defecation of hundreds of ducks adds to the nitrates of the stream, and the Canadians have protested it. Again, we want to restore streamflow.

The only way you can upgrade the quality of that water, as any scientist knows, is to increase the streamflow, and the only way you can increase the streamflow, Mr. President, is through Garrison Diversion.

Strange, too, the National Taxpayers Union took an interest in our project. They said that you are going to save taxes if you stop this project somehow or other. What they failed to realize is that the majority of the major cities in eastern North Dakota need this project as it is their only source of water over future decades.

Without water, municipal taxes will have to be raised at a fantastic rate and the overall tax needed to furnish this type of water supply will triple or quadruple over what could be done through the transfer of this water east.

Yes, Mr. President, North Dakota owes a great deal to the Senate and to the conferees and the people who shepherded this through as far as it went. And the people of North Dakota have a challenge now to make sure that this false information, which misled so many, is corrected, and it will be over the next few months.

In the meantime, we cannot get away from the basic issue. The basic issue in this was that parts of the amendment that did not deal with mitigation acres had to do with the court decision. And a society that is, shall we say, a lobbying group—I guess it is a lobbing group, because they registered to lobby in the Congress on environmental issues—convinced a judge that he should stop an authorized project of Congress because the then Secretary of the Interior said we should not proceed with it.

Mr. President, the people spoke in an election a little over a year ago, and they changed these officials who made that deal. Part of the language that was put in the Senate says that the people's right to vote to change the course of an administration is an inviolate right and it cannot be abridged. Saying that a new Secretary of the Interior cannot move ahead with an authorized project because a previous Secretary of the Interior did not want to, violates one of the basic tenets under our Constitution.

It is much as though they said the President could not abrogate the wheat embargo on sales to the Soviet Union because the prior President had put in place a wheat sales embargo.

So the people lost in this strange action. And I hope that we can change that course during the next 2 or 3 months.

In the meantime, Mr. President, the thanks of the people of North Dakota, its Governor and legislators, and those of us who are privileged to serve in the Senate, goes to the chairman of this great committee and the committee members themselves for the job they did and the conferees for recognizing the significant need of the State of North Dakota. And I wanted to express their thanks here on the floor tonight.

Mr. HATFIELD. Mr. President, I express my thanks to the Senator from North Dakota for his kind remarks. Both Senator JOHNSTON and I have been associated with this project for the many years now that we have served together on this Appropriations Committee.

We are certainly not the experts that the Senator from North Dakota is on the project, for I know of no one who has more ably articulated this project and defended it, advocated it, supported it, and given leadership to it than the Senator from North Dakota, both as a Member of the House and now as a member of the Senate Appropriations Committee.

I think most people understand, too, that we have to rely upon the good judgment and the capability of our colleagues. We cannot be experts on everything. And because of the high integrity and the high admiration that the Senator from North Dakota is held in, I must say much of my support was based upon that kind of personal confidence in the Senator.

But, in addition to that, from the staff level and from those who testified before our committee and the so-called experts, we gained the base, the support base for this action on the part of the committee and we felt comfortable in carrying the burden in the conference on behalf of the people of North Dakota.

I might say to the Senator, as he was describing the detail of the impact of this project on wildlife and on the needs of human beings in his State. It reminded me of a similar experience I had in my own State a number of years ago where some of the so-called experts in environment and wildlife presented a bill that would establish a wilderness in what is now a wildlife refuge providing habitat for antelopes. Their view was that they wanted to protect those antelopes and, therefore, the best way to do it was to declare that wildlife refuge a wilderness.

In asking questions of these so-called wildlife and environmental experts, I asked them what the purpose was. They said, "To retain the natural, original character of this area to feed the antelopes." I said, "Have you visited the area?" Well, some had and some had not. I said, "If you visit there, you will find it is today predominantly sagebrush."

Antelopes cannot live very long off of sagebrush. And if you know the historic perspective and the historic origin of this area, it was originally bunch grass. And in those days before overgrazing, it fed and provided the habitat or the sustenance of not only antelopes but many other wildlife.

So the purpose being served in that proposal was in effect to deny a food base for the antelope which would eventually have killed off the herd. On the other hand, by holding it as a classified wildlife refuge, we could go in and reclaim that sagebrush wasteland and replant the bunch grass and create a constant expanding food base for an expanding antelope herd.

But the simplistic idea that somehow that classification of wilderness was going to maintain or restore, in itself, a primitive original character and provide forever a refuge and protection for the wildlife was incorrect. It was going to do precisely the opposite.

I draw the analogy only to underscore this Garrison Division project as it relates not only to the wildlife of this Nation, but also as a migratory wildlife treasure of the whole continent, and the needs of the people and the fact that water impoundment is going to be the key to the future of the human race, not just wildlife. I think this illustrates and underscores the support that I have had in the past and continue to offer in the future to the Senator from North Dakota on this project.

Mr. ANDREWS. I appreciate the remarks of my colleague. He says it so well.

Those of us who understand the land, those of us who know our State know that the environment is, indeed, a fragile thing and extremely important to us. And no one knows that environment better than those of us who live there.

We have had the same experts in western North Dakota who come in to classify land and they tell the ranchers who are grazing cattle there what the proper way is to maintain the grass, and that if they have a sickly steer, they cannot take a four-wheel drive vehicle in. They have to take that steer out without the benefit of the four-wheel drive vehicle.

Mr. President, I would point out to the chairman of the committee, and I am sure he knows, that the only way you can remove a disabled steer or heifer from a pasture without a 4-wheel drive vehicle is on a travois behind another horse. And the sticks of the travois drag ruts through the fragile ground that does far more environmental harm than a 4-wheeled vehicle. Yet someone from a thousand miles away arrogates onto himself the ability to tell us that they know far better about our environment than we do. It is really ridiculous. And as probably the only Member of the

Congress who got his degree in agronomy and studied the ecology and environment before it was a fashionable thing to do, I kind of resent that, and the people of North Dakota do, also.

Back in pre-statehood days, back when we had that Eastern expert named George Custer who came out to our area, he was told by some Eastern reporters and big shot politician types that: "General, go West and raise a little heck with the natives out there and, young man, we will make you the next President of the United States."

He believed them. And he came out there with a whole host of reporters or his story would not have been nearly as well written up as it is. Unfortunately, the natives of North Dakota had a little different feeling and General Custer came to grief. Those natives of North Dakota back in those days, of course, were the original Americans. But they modified their environment to make it better to live in. They built their teepees, which was a modification of the environment. And the North Dakotans who are now there who came in the 1880's recognized the need to change the environment. And they petitioned Congress when they were still a territory over a hundred years ago on the needs for survival out there. The only way was to divert the life-giving flow of the Missouri River eastward into the four streams that form the eastern part of the State, the Souris, the Red, the James, and the Sheyenne.

That has been the dream of North Dakota for many years.

Again, Mr. President, might I commend my good friend and colleague, Senator HATFIELD. We have probably gone on far too long on this. We could wax eloquent about the nature of our two States. Oregon is a fantastically beautiful State. Oregon for years has said, "Stay home. We do not want any more to come here. We like it the way it is."

North Dakota has a little edge on them, might I say, because we have 40 below zero sometimes and that helps eliminate the riff-raff and we get along pretty well managing our own environment, Mr. President.

Again, my thanks to my colleague.

Mr. HATFIELD. Mr. President, I move the adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. HEFLIN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I ask that the Chair lay before the Senate the amendments in disagreement.

The PRESIDING OFFICER. The clerk will state the amendments in disagreement.

The assistant legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 14 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

SEC. 110. Funds herein or hereinafter appropriated in this title for the Chetco River, Oregon navigation project, authorized by the 1945 River and Harbor Act, as amended and modified, shall be used to design and construct further modifications to that project in accordance with the Report of the Chief of Engineers, dated May 2, 1977.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 17 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

SEC. 111. The Chief of Engineers is hereby directed to raise the dam at Lake Darling, North Dakota, by approximately four feet and to implement upstream and downstream flood control measures.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 18 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

SEC. 112. No funds appropriated in this Act may be used to construct channel realignment work on the Ouachita and Black Rivers navigation project in Arkansas and Louisiana until such time as the Chief of Engineers has completed a restudy of the various options for navigation above Crossett, Arkansas, including the two barge abreast configuration, with a view toward reducing the number of cutoffs and bend widenings required. The results of this restudy should be reported to the respective Appropriations Committees of both Houses of the Congress for review, and should accurately reflect the economic and environmental tradeoffs of providing greater than two-barge navigation.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 33 to the aforesaid bill, and concur therein with an amendent as follows:

In lieu of the matter proposed by said amendment, insert:

: Provided, That of the funds appropriated herein, $9,000,000 is to be derived by transfer of unobligated balances from the funds appropriated under the heading "Operation and Maintenance, Southwestern Power Administration", and $16,000,000 is to be derived by transfer from funds appropriated under the heading "Plant and Capital Equipment, Departmental Administration": *Provided further*, That $1,300,000 of the funds provided herein shall be for the Region X wood-derived fuels program and transferred to the Bonneville Administration for obligation and expenditure.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 47 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

URANIUM SUPPLY AND ENRICHMENT ACTIVITIES

For expenses of the Department of Energy in connection with operating expenses; the purchase, construction, and acquisition of plant and capital equipment and other expenses incidental thereto necessary for uranium supply and enrichment activities in carrying out the purposes of the Department of Energy Organization Act (Public Law 95-91), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion; purchase of passenger motor vehicles (not to exceed 23 for replacement only); $1,806,000,000, to remain available until expended: *Provided*, That revenues received by the Department for the enrichment of uranium and estimated to total $1,805,000,000 in fiscal year 1982, shall be retained and used for the specific purpose of offsetting costs incurred by the Department in providing uranium enrichment service activities as authorized by section 201 of Public Law 95-238, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484): *Provided further*, That the sum herein appropriated shall be reduced as uranium enrichment revenues are received during fiscal year 1982 so as to result in a final fiscal year 1982 appropriation estimated at not more than $1,000,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 52 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

For administrative expenses of the Geothermal Resources Development Fund, $200,000, to remain available until expended; and for carrying out the Geothermal Loan Guarantee and Interest Assistance Program as authorized by the Geothermal Energy, Research, Development and Demonstration Act of 1974 (Public Law 93-410), $2,000,000, to remain available until expended: *Provided*, That not to exceed $2,000,000 from the Fund shall be available for interest differential payments in fiscal year 1982: *Provided further*, That the amounts remaining in the Fund shall be used as a default reserve for loan guarantees issued pursuant to section 201 of title II of Public Law 93-410, as amended.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 57 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: "official entertainment expenses (not to exceed $1,500);".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 64 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

WATER RESOURCES PLANNING

For the Water Resources Council for salaries and related expenses necessary in carrying out the provisions of the Water Resources Planning Act of 1965 (42 U.S.C. 1962-1962d-3), as amended, including services as authorized by 5 U.S.C. 3109 and 42 U.S.C. 1962a-4(5), $3,888,000 including $658,000 for expenses in administering the Act (42 U.S.C. 1962(b)), and $3,230,000 for preparation of assessments and plans (42 U.S.C. 1962d(c)): *Provided*, That none of the funds included herein shall be used for an Independent Project Review, for expenses of River Basin Commissions or for Grants to States.

Resolved, That the House insist upon its disagreement to the amendment of the Senate numbered 23 to the aforesaid bill.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the Senate concur in the amendments of the House to the amendments of the Senate numbered 14, 17, 18, 33, 47, 52, 57, and 64.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Now, Mr. President, I ask unanimous consent that the Senate recede from its amendment No. 23.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I yield the floor.

THE PROPOSED SALE OF F-16'S TO PAKISTAN

Mr. HATFIELD. Mr. President, the Senate some time this evening will take up a Foreign Relations Committee report dealing with the matter of the F-16's to Pakistan, that is being promoted and advocated by this administration.

Mr. President, I had introduced a resolution of disapproval. As you know, Mr. President, if either body refuses to act on that, or acts on such a resolution in the negative, that is sufficient to give the President the signal to proceed.

The House of Representatives took such a vote and in that vote the administration position prevailed. But being one of strong spirit, I pursued this subject even though it is technically mootish, and had intended to ask for a rollcall and give thereby an opportunity for extended debate on this subject on the Senate side.

The Senate Foreign Relations Committee has seen fit to recommend for the President's policy on this package. Again, I emphasize the fact that this is a moot issue from a technical, legal point of view. But out of the discussions and the intention that I had expressed in the introduction of the resolution of disapproval, I have had the opportunity of extended discussions with representatives of the State Department.

Mr. President, it is again one of those unfortunate situations that I find myself in where I have been willing to receive a letter from the Secretary of State on a confidential basis and I am not able to therefore violate that trust or that relationship by disclosing the contents of the letter in specifics.

But let me merely share with the Senate and the record two observations relating to this subject.

I had raised, amongst others, the question: What would be the position of this administration if the Pakistanis, who would be the recipients of these sophisticated weapons, detonated a nuclear device? What would be the position of continuing the delivery of these planes if a detonation of some nuclear device by the Pakistani Government were to occur?

That was one major concern.

Another major concern was, what would the administration's attitude toward human rights in Pakistan? I do not have to recite the sad record of the political situation in Pakistan vis-a-vis the execution of former President Bhutto and the way that was handled, and other executions.

I suppose one could call those political killings. I do not think there was due process that one could justify in any sense, a legal procedure that guaranteed any rights to President Bhutto or to any of those people associated with him. But I shall not go into the sorry chapter of Pakistanian history. I only raise it for the simple reason that I think it indicates that here is a nation of poverty-stricken people who are desperately in need of a subsistence agricultural base and we are sending them $4 billion of military equipment and sophisticated weapons.

Mr. President, I think that we have seen the misuse of American weaponry when a regime was replaced by an unfriendly regime such as in the case of Iran. I am not certain what kind of political stability the Zia government represents. General Zia, from everything I can understand, happened to be in the right place at the right time. That does not in any way indicate that he carries with him a substantial political constituency base except through force of his position of power.

I think, therefore, that in this material—by the way, Mr. President, I think it is interesting to note that this is the second anniversary of the burning of the American Embassy in Pakistan under this same government, when there was such a dilatory response to the call for assistance that it permitted the actual destruction of the American Embassy. There could have been some response if they had had any desire to respond to the call.

Mr. MOYNIHAN. Will the distinguished Senator yield for a question at that point?

Mr. HATFIELD. Yes, I yield.

Mr. MOYNIHAN. I am so happy the Senator brought up the incident of the burning of our Embassy at Islamabad. As the Senator knows, Islamabad is a new city built alongside the old city of Rawalpindi. Rawalpindi is a series of military installations. The government has in the neighborhood of half a million troops within 5 miles of the American Embassy. It took them 10 hours to get there and only a sheer miracle saved the lives of the many Americans who were in the top floor where they had taken refuge. And that government has still not paid us for the damages.

Mr. President, can you imagine the Capitol surrounded by a mob, the Senators up in the library, and the Pentagon not noticing it for 10 hours, or no one at the Forrestal Building observing anything untoward on Independence Avenue?

It was deliberately done and at the risk of the horrible death of our people there. And the Pakistanis have not paid a cent, nor have they agreed to.

Mr. HATFIELD. They have made no restitution.

Mr. MOYNIHAN. None, sir.

Mr. HATFIELD. They have not given any satisfactory explanation.

Mr. MOYNIHAN. And we are proving to them that the way you deal with Americans is to threaten to burn their Embassy to the ground and, then, they will listen.

Mr. HATFIELD. The same government that, when they were offered $400 million by an earlier administration, said, "that is peanuts."

Mr. MOYNIHAN. Not enough. We are teaching them how to deal with the American Government.

Mr. HATFIELD. Mr. President, the Senator has added to this interesting development that has occurred in Pakistan.

Mr. President, what I wish to do tonight is indicate that I shall not pursue the rights that I have at this time to try to stop or in any way hinder the report of the Committee on Foreign Relations that has been filed. I only say that I have been given very strong assurances by the Secretary of State that this Government's policy, which is being determined and evolving, is to be fully cognizant of this question that I raised about the continuation of supplying arms under the scenario of a detonation of a nuclear device by Pakistan.

I am satisfied by the strong assurances given to me by Secretary Haig that the policy would be very cognizant of that circumstance and would have in place positions and responses that would answer some of my deep concerns.

On the question of human rights, again, I have had good assurances from the Secretary that this Government is conscious of those problems in Pakistan and that this Government is concerned, deeply concerned, about human rights—not only in Pakistan but elsewhere in the world, and it is understanding of how to use influence to raise the human rights of people and, therefore, will assist in any way they can to influence and press for reforms.

As to those assurances, without disclosing the details or the commitments in these letters—I have had an exchange—I want to say that I shall reserve for the future, again, my right to not agree with this policy in any way and use whatever vehicles may come along to further express my concern.

As far as the vehicle now before the Senate—that is, the Senate report from the Committee on Foreign Relations—even if we had had a vote on it, it would not have stopped the sale. But I do think there will be other vehicles down the road that can again permit the Senate to address this subject and perhaps to interdict this policy in some more meaningful way than merely speaking to it and exercising rhetoric concerning the subject matter.

Mr. President, I wanted to explain to my leader and to the Senator from Illinois, who has been very cooperative, as chairman of the Senate Foreign Relations Committee, why I have receded from my previous position without in any way diminishing my concern or interest, but feeling more assured that the administration is fully aware of my concerns and, I believe, really is pursuing ways to be affirmative in its response to such scenarios and to handle them in an appropriate way.

I thank the Senator from New York (Mr. MOYNIHAN). From the very beginning, when I raised this matter a number of weeks ago, the Senator was on the floor and engaged in colloquy and cosponsored the resolution of disapproval. I am really grateful for his loyalty to this concern that we share and for his eloquent statements in relation thereto.

Mr. BAKER. Mr. President, I thank the Senator from Oregon for his concern, for the statements which he has made, which are so appropriate to the circumstances now and those that have preceded this time.

I wish also to express my appreciation to him, for indicating that he does not wish to go forward with a vote on a resolution of disapproval at this time. I can assure him, when he wishes in the future to make any speech on this subject or take any further action in the Senate, I shall see that he has every opportunity to do that.

Mr. President, I express my appreciation and admiration to the Senator from New York and others who have expressed their concern in this respect as well.

Mr. President, there is another conference report.

Mr. MOYNIHAN. Will the majority leader yield for a moment? Before the Senator from Oregon leaves the floor, may I ask him two questions?

First, did the Secretary of State, in his bizarre behavior of sending you a confidential letter about public policy, on which the U.S. Congress had expressed itself by statute, assure you that Pakistan is not building a nuclear weapon? You might have noticed the article in yesterday's New York Times about the seizure, on October 31, of an illegal shipment of zirconium, a key metal used in the construction of nuclear weapons, to Pakistan. Second, did the distinguished Senator ask—and did the Secretary tell the Senator—if the administration had made any effort to obtain a commitment from the Pakistani Government that these weapons would not be used against India? It is inconceivable from the point of view of New Delhi, that they would not be.

There have been two Indo-Pakistani wars in this generation. In both cases, Pakistanis invaded India with American weapons that they had been given to fight Russians. They have never yet fought a Russian. They keep fighting the Indians. And they keep getting whipped.

Mr. HATFIELD. To respond to the Senator, we did not explicitly get into that part of the issue. I did again raise that issue in conversation with the representatives of the Secretary, that two-thirds of the Pakistani Army today is not on the Afghanistan border; it is on the Indian border.

Mr. MOYNIHAN. On the Punjab border.

May I make a point? We necessarily think of the world from the part of it we occupy. And that is normal. But we are a world power and are obligated to know what we are doing in other places.

Let me offer you a scenario. Pakistan has produced a nuclear weapon. That weapon is delivered by an F–16. We have unwittingly given Saudi Arabia, which has close military contact with Pakistan, the F–15, the AWACS, and the sidewinders to protect the bombing missions. That is a nuclear weapons force.

The Pakistanis are financing the establishment of the nuclear weapons force with Saudi money. The Pretorian Guard in Jidda is Pakistani. That government of 2,000 cousins, as the distinguished ranking minority member of the Foreign Relations Committee described it, certainly would not want itself protected by its own country.

We are giving the Saudis and the Pakistanis together a nuclear weapons system, and I am sorry to tell you that before it is consummated, the Indians will go to war. We will have a nuclear war in the subcontinent.

In his confidential letter, did Secretary Haig raise that thought? I just put it to you: We do not know what it looks like out there.

I am not sympathizing with the Indians. When that bomb went off in 1974, I was in New Delhi serving as our Ambassador. I recall saying to the Foreign Secretary and to the Prime Minister, "You have just done something disastrous. You have absolute hegemony in South Asia today, and yet you set off this bomb." The day will come in 10 years' time when there will be a mogul general in power in Islamabad and he will call you up one day and say, "I have four bombs, one for Madras, one for Calcutta, one for Bombay, and one for New Delhi. We would like to have the Punjab and Kashmir back by Thursday, or we'll all meet in Heaven on Friday."

That is geopolitics for you.

Mr. HATFIELD. I thank the Senator.

SENATOR GLENN ASSESSES ADMINISTRATION NONPROLIFERATION EFFORTS

Mr. CRANSTON. Mr. President, many of us here in the Senate continue to look to JOHN GLENN for thoughtful analysis and leadership on the vexing problem of controlling the spread of nuclear weapons. I know I welcome his thoughts and contributions in the Senate Foreign Relations Committee, which is chaired by another Senator who is keenly sensitive to proliferation dangers, my friend CHUCK PERCY.

Because of my deep interest in the subject of nonproliferation, I was eager to read the statement made by Senator GLENN yesterday during Senate hearings on nuclear nonproliferation policy. I am submitting the full text of this statement for the attention of my colleagues and ask unanimous consent that it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY JOHN GLENN

Mr. Chairman, the Reagan Administration has now been in office for nearly a year and I think there is an unmistakable pattern that emerging regarding their efforts in the field of nuclear nonproliferation. To sum it up in a few words, just as Reaganomics has been trying to turn back the clock some 40 years on domestic social programs, so the Reagan nonproliferation policy would turn the clock back to the day of laissez-faire nuclear commerce of the early 1970's. Over and over again, we have seen this Administration attempt to undermine the restraints that we have built up over the last five or six years and even at this early stage, the negative effects of our obviously weakened interest in nonproliferation, are beginning to manifest themselves around the world.

Let me just go over some of the highlights of what this Administration has been doing. on the highly visible question of arms transfers to Pakistan, for example, the original position of the Administration was to try to do away completely with the so-called Symington Amendment, one of our earliest nonproliferation laws, whose purpose was to restrict the spread of sensitive nuclear technologies. The Administration consistently opposed all of my efforts to temper their original proposal in this regard and only by strong congressional opposition have we been able to salvage this vital provision of law. Moreover, this Administration has still refused to state explicitly and for the public record that it would terminate assistance to Pakistan even if that country went so far as to detonate a nuclear device.

Then there was the State Department memorandum of October 2, 1981 which went out over Mr. Malone's signature to the interagency group reviewing changes in nuclear nonproliferation law. The paper listed the areas where modifications of the Nonproliferation Act ought to be considered and an attachment contained what amounted to recommendations that certain of these changes be implemented. These changes include substantial undercutting of the full-scope safeguards criterion, elimination of sanctions provisions for nuclear violators, and elimination of truly independent review of executive branch nuclear export decisions. Under these circumstances, how can other nations that we are trying to get to accept full-scope safeguards take us seriously. We have given a new lease to their hopes that if they hold out a little longer, they will be able to renew trade with the United States without submitting to IAEA safeguards across-the-board.

This brings me to the question of the Tokai-Mura Plant, and U.S. policy on reprocessing, in general. We are now approving pell-mell every transfer of spent fuel from Japan, Sweden, Spain, and Switzerland for reprocessing in Great Britain and France; and, as far as the Japanese Tokai plant is concerned, we have basically given them carte blanche. How can we discourage the export of this technology to sensitive regions, or persuade countries like India to forego reprocessing when, with every ounce of strength, it seems, we are telling the world that reprocessing makes sense and is a legitimate part of civilian nuclear programs? And let me add, that we are doing this when we know full-well that the IAEA has had great difficulty in safeguarding these facilities—I don't think they have ever achieved their safeguards objectives with these plants.

The most recent Tokai-Mura arrangement raises questions as to whether the United States would acquiesce in the reuse of plutonium in light-water reactors, that is plutonium "recycle." For a number of years the United States has strenuously opposed the use of plutonium in this fashion out of concern that it might result in premature widespread use of plutonium with its attendant nonproliferation and domestic security problems. Yet, as I understand it, the United States has not in its understanding with Japan ruled out the possibility of plutonium being used in this fashion, even though this possibility had, in fact, been eliminated in the wording of our prior understandings with the Japanese.

And then there is the case of Brazil. Here we have been trying over a number of years to gain that country's acceptance of the terms of the Nuclear Nonproliferation Act which require that it accept safeguards on all of its nuclear activities as a condition for receiving nuclear fuel from the United States. Now, however, we have made it easier for the Brazilians to obtain that fuel elsewhere, from other suppliers, by telling the Brazilians that we will not enforce penalty clauses against them that are contained in our fuel supply contracts.

The effect of this, of course, is to encourage them to seek fuel from other suppliers whose export controls are less strict than ours. But our action in this case goes beyond that, because it also gives a signal to those other suppliers, and here I am thinking about the British-Dutch-West German Consortium, Eurenco—and the French-led Consortium, Eurodif, that is okay with the United States

if they export to Brazil even though that country has not accepted full-scope safeguards. That signal to the other suppliers is directly contrary to the efforts we have been making over the past several years to get them to adopt the same strict export controls that we have. Again, we have undermined the efforts to get the suppliers to accept strengthened and uniform export controls.

As I said at the outset, the impacts of these policies are already being felt in a very negative way. Mexico, for example, in soliciting bids for the construction of two power reactors is openly trying to set up competition among the nuclear suppliers to see who will be willing to supply sensitive nuclear technology—enrichment and reprocessing facilities—as part of the package to sweeten their offers. We have not seen this kind of blatant search for such sensitive equipment since the Brazilian deal with West Germany in 1975. Over the past 7 years France and West Germany, as well as the United States, had made it clear that they would not supply sensitive technology to nonnuclear weapon states, but now it appears that Mexico believes our collective resolve on this score has eroded and that it may well be able to obtain these dangerous plants.

And finally, there is the example of South Africa's end-run around U.S. export controls about which I will say more later.

When one adds to this record the insensitivity shown by the administration to the nonproliferation aspects of its statements on domestic and foreign reprocessing, its statements on the use of civilian reactor spent fuel for the weapons program, and its obsession with the "reliable supplier" argument, one might be excused for thinking that maybe this administration feels non-proliferation is none of its business.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT AND RELATED AGENCIES APPROPRIATION CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on H.R. 4034 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative cleark read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4034) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of September 11, 1981.)

Mr. GARN. Mr. President, today I am proposing that we accept the agreements arrived at in the conference on House Joint Resolution 357 as they affect the HUD-Independent Agencies appropriations bill for fiscal year 1982 and incorporate those agreements into the bill. I know that the distinguished chairman of the Committee, Senator HATFIELD, as I am, is anxious to assure that the appropriations process acts as quickly as possible on regular fiscal year 1982 bills.

On Tuesday, November 17, I proposed in full committee a series of 44 changes to the conference agreement in H.R. 4034. These changes, as amended in committee, were incorporated in the second continuing resolution.

On Thursday, November 19, I included in the RECORD a detailed description of these specific changes.

These proposals were debated in conjunction with House Joint Resolution 357 and further modified on the floor of the Senate. During our conference with the House, we made some additional changes in the Senate-passed version of the continuing resolution and those changes, of course, are contained and accompany the continuing resolution.

Before the application of the Baker amendment, the committee amendments on the HUD-Independent Agencies appropriations bill reduced the House level contained in the continuing resolution by $1 billion, after including the full year costs for the veterans entitlement programs in the House-passed version as was done in the Senate version.

The result of the conference agreement, excluding any across-the-board cuts, reduced the House-proposed level by $900 million and increased the Senate level by $700 million. After the application of the across-the-board cuts contained in these amendment, we will have achieved a $1.6 billion reduction in the House proposal level for the programs and activities contained in the HUD-Independent Agencies Appropriations Act.

Mr. President, what I am proposing here is to modify the conference report on H.R. 4034 to conform in every respect with the agreeemnt reached in House Joint Resolution 357. The effect of this would be to produce a regular fiscal year 1982 appropriations bill for HUD-Independent Agencies at the level and under the terms and conditions provided in the continuing resolution under section 101(f).

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The clerk will report the amendments in disagreement.

The assistant legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 4 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: *Provided further*, That of the budget authority provided herein, $2,354,400,000 shall be allocated for public housing new construction other than for low-income housing for Indian families.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 5 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS—FISCAL YEAR 1981

For an additional amount for "Payments for operation of low-income housing projects", $148,000,000 to remain available until December 31, 1981.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 13 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by said amendment, insert: "$3,666,000,000.".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 23 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by said amendment, insert: "$65,456,000.".

Mr. GARN. Mr. President, I ask unanimous consent that it be in order to consider amendments 5, 13, and 23 en bloc and that it be in order to concur en bloc in these amendments of the House to the amendments of the Senate en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEFLIN. Mr. President, in recent months, we have had two outstanding events occur in the history of space exploration by the United States. We have had two successful flights of the shuttle, Columbia. In my judgment, we have made real progress in the NASA program and in the field of space. There are many military benefits and byproducts that can result from our further space efforts. There can be little doubt that great progress is being made in our space program.

If there is a percentage reduction, such as the Baker proposal of 4 percent, it is certainly my hope that the President and OMB or both, or all who are concerned, will not attempt to reduce the funds appropriated to NASA under this legislation. And if any cuts have to be made, I hope that they will not unduly affect NASA.

The chairman of the conference committee, Mr. GARN, and I have spoken about this. Perhaps he would like to speak to this suggestion.

Mr. GARN. That is correct. I agree with the Senator from Alabama. I feel very strongly about the importance of NASA and the work they are doing.

We are adopting an agreement with the House in percentage reductions, and there is some flexibility for the President. I agree that he should not use all that flexibility in cutting NASA. Beyond the colloquy we are having here, I will make that known, as the chairman of the Subcommitte on NASA, to the administration; and I will work with them carefully as to where these cuts would be made. We have a great deal of back-

ground information on the various programs, and I assure the Senator from Alabama that I will watch the program carefully.

Mr. HEFLIN. I hope the head of OMB will read these words.

Mr. GARN. Mr. President, I move that the Senate concur in the amendments of the House to the amendments of the Senate numbered 5, 13, and 23.

The PRESIDING OFFICER. The question is on agreeing to the amendments.

The amendments were agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, I move that the Senate concur in the House amendment to the amendment of the Senate numbered 4, with the following amendment, which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Utah (Mr. GARN) proposes an unprinted amendment numbered 704.

Mr. GARN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment add the following new title:

TITLE V

SEC. 501. Notwithstanding any other provision of this Act—

(1) The amount of the increase in contract authority under the heading "HOUSING PROGRAMS, ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING", shall be $897,177,848, and the amount of the increase in budget authority under such heading shall be $17,373,528,040.

(2) The amount appropriated under the heading "HOUSING PROGRAMS, HOUSING COUNSELING ASSISTANCE", shall be $3,520,000.

(3) The amount appropriated under the heading "SOLAR ENERGY AND ENERGY CONSERVATION BANK, ASSISTANCE FOR SOLAR AND CONSERVATION IMPROVEMENTS", shall be $23,000,000.

(4) The amount appropriated under the heading "COMMUNITY PLANNING AND DEVELOPMENT, COMMUNITY DEVELOPMENT GRANTS", shall be $3,600,000,000.

(5) The amount appropriated under the heading "COMMUNITY PLANNING AND DEVELOPMENT, URBAN DEVELOPMENT ACTION GRANTS", shall be $458,000,000.

(6) The amount appropriated under the heading "POLICY DEVELOPMENT AND RESEARCH, RESEARCH AND TECHNOLOGY", shall be $20,000,000.

(7) The amount appropriated under the heading "FAIR HOUSING AND EQUAL OPPORTUNITY, FAIR HOUSING ASSISTANCE", shall be $5,016,000.

(8) The amount appropriated under the heading "MANAGEMENT AND ADMINISTRATION, WORKING CAPITAL FUND", shall be $528,000.

(9) The amount appropriated under the heading "DEPARTMENT OF DEFENSE—CIVIL, CEMETERIAL EXPENSES, ARMY, SALARIES AND EXPENSES", shall be $4,476,000.

(10) the amount appropriated under the heading "ENVIRONMENTAL PROTECTION AGENCY, SALARIES AND EXPENSES", shall be $562,837,000.

(11) The amount appropriated under the heading "ENVIRONMENTAL PROTECTION AGENCY, RESEARCH AND DEVELOPMENT", shall be $167,759,000.

(12) The amount appropriated under the heading "ENVIRONMENTAL PROTECTION AGENCY, ABATEMENT, CONTROL AND COMPLIANCE", shall be $395,000,000.

(13) The amount appropriated under the heading "ENVIRONMENTAL PROTECTION AGENCY, BUILDINGS AND FACILITIES", shall be $3,621,000.

(14) The amount appropriated under the heading "EXECUTIVE OFFICE OF THE PRESIDENT, COUNCIL ON ENVIRONMENTAL QUALITY AND OFFICE OF ENVIRONMENTAL QUALITY", shall be $919,000.

(15) The amount appropriated under the heading "EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF SCIENCE AND TECHNOLOGY POLICY", shall be $1,578,000.

(16) The amount appropriated under the heading "FEDERAL EMERGENCY MANAGEMENT AGENCY, FUNDS APPROPRIATED TO THE PRESIDENT, DISASTER RELIEF", shall be $301,694,000.

(17) The amount appropriated under the heading "FEDERAL EMERGENCY MANAGEMENT AGENCY, SALARIES AND EXPENSES", shall be $93,879,000.

(18) The amount appropriated under the heading "FEDERAL EMERGENCY MANAGEMENT AGENCY, STATE AND LOCAL ASSISTANCE", shall be $121,829,000.

(19) The amount appropriated under the heading "FEDERAL EMERGENCY MANAGEMENT AGENCY, EMERGENCY PLANNING AND ASSISTANCE", shall be $67,906,000.

(20) There are appropriated, out of any money in the Treasury not otherwise appropriated, for the repayment of notes dated April 17, 1979, and September 28, 1979, issued by the Director of the Federal Emergency Management Agency to the Secretary of the Treasury pursuant to section 15(e) of the Federal Flood Insurance Act of 1956 (42 U.S.C. 2414(e)), $328,240,000.

(21) The amount appropriated under the heading "DEPARTMENT OF HEALTH AND HUMAN SERVICES, OFFICE OF CONSUMER AFFAIRS", shall be $1,760,000.

(22) The amount appropriated under the heading "NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, RESEARCH AND DEVELOPMENT," shall be $4,973,100,000 of which not to exceed $3,104,900,000 shall be available for the Space Shuttle including space flight operations: *Provided*, That the limitations subject to the approval of the Committees on Appropriations contained under this heading shall not be affected by this subsection.

(23) The amount appropriated under the heading "NATIONAL SCIENCE FOUNDATION, RESEARCH AND RELATED ACTIVITIES", shall be $1,010,000,000.

(24) The amount appropriated under the heading "NATIONAL SCIENCE FOUNDATION, SCIENCE EDUCATION ACTIVITIES", shall be $22,000,000.

(25) The amount appropriated under the heading "NATIONAL SCIENCE FOUNDATION, SCIENTIFIC ACTIVITIES OVERSEAS SPECIAL FOREIGN CURRENCY PROGRAM)", shall be $3,080,000.

(26) The amount appropriated under the heading "SELECTIVE SERVICE SYSTEM, SALARIES AND EXPENSES", shall be $18,633,000.

(27) The amount appropriated under the heading "DEPARTMENT OF THE TREASURY, OFFICE OF REVENUE SHARING, SALARIES AND EXPENSES", shall be $6,148,000.

(28) The amount appropriated under the heading "DEPARTMENT OF THE TREASURY, NEW YORK CITY LOAN GUARANTEE PROGRAM", shall be $822,000.

(29) The amount appropriated under the heading "VETERANS ADMINISTRATION, COMPENSATION AND PENSIONS", shall be $13,824,000,000.

(30) The amount appropriated under the heading "VETERANS ADMINISTRATION, READJUSTMENT BENEFITS", shall be $1,938,800,000.

(31) The amount appropriated under the heading "VETERANS ADMINISTRATION, MEDICAL AND PROSTHETIC RESEARCH", shall be $128,215,000.

(32) The amount appropriated under the heading "VETERANS ADMINISTRATION, MEDICAL ADMINISTRATION AND MISCELLANEOUS OPERATING EXPENSES", shall be $57,700,000.

(33) The amount appropriated under the heading "VETERANS ADMINISTRATION, CONSTRUCTION, MAJOR PROJECTS", shall be $378,338,000.

(34) The amount appropriated under the heading "VETERANS ADMINISTRATION, CONSTRUCTION, MINOR PROJECTS", shall be $102,942,000, of which not to exceed $30,018,000 shall be available for the Office of Construction.

(35) The amount appropriated under the heading "VETERANS ADMINISTRATION, GRANTS FOR CONSTRUCTION OF STATE EXTENDED CARE FACILITIES", shall be $15,840,000.

(36) The amount appropriated under the heading "DEPARTMENT OF THE TREASURY, INVESTMENT IN NATIONAL CONSUMER COOPERATIVE BANK", shall be $43,000,000: *Provided*, That the final Government equity redemption date for the National Consumer Cooperative Bank shall occur on December 31, 1981.

(37) During fiscal year 1982, gross obligations of not to exceed $75,960,000 are authorized for payments under section 230(a) of the National Housing Act, as amended, from the insurance fund chargeable for benefits on the mortgage covering the property to which the payments made relate, and payments in connection with such obligations are hereby approved.

(38) The amount appropriated under the heading "HOUSING PROGRAMS, PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS—FISCAL YEAR 1981", shall remain available until September 30, 1982: *Provided*, That any part of the foregoing amount which has not been obligated before the forty-fifth calendar day following the enactment of this joint resolution, shall be deemed obligated notwithstanding the provisions of 31 U.S.C. 200(a).

(39) The Congress also approves the deferral under the heading "VETERANS ADMINISTRATION, (DISAPPROVAL OF DEFERRAL)", of the Washington, D.C., and Long Beach, Calif., projects as contained in deferral notice D82-140.

(40) Notwithstanding any other provision of this Act, including any other provision of this title, any agency may before December 31, 1981, transfer to salaries and expenses from other sources made available to it by this Act, such amounts as may be required if the aggregate amount available for salaries and expenses, after such transfer, does not exceed the amount contained for such purposes in this Act before the application of the changes contained in title V: *Provided*, That such transfers shall be subject to the approval of the Committees on Appropriations: *Provided further*, That in the Department of Housing and Urban Development not to exceed (1) $34,000,000 shall be available for data processing services, (2) 12 full-time permanent positions and 16 staff years shall be available for the Immediate Office of the Assistant Secretary for Administration, and (3) 26 full-time permanent positions and 27 staff years shall be available for the Office of the Assistant Secretary for Legislation and Congressional Relations: *Provided further*, That in the National Aeronautics and Space Administration not to exceed (1) 150 full-time permanent positions shall be available for the Office of the Comptroller and (2) 120 full-time permanent positions shall be available for the Office of External Relations: *Provided further*, That in the Veterans Administration not to exceed (1) $1500.000 shall be available for the Office of Planning and Program Evaluation and (2) 649 staff years shall be available for the Supply Service.

(41) Notwithstanding any other provision of this Act, Section 140 of H. J. Res. 357, as passed by the Senate on November 20, 1981 shall apply to programs, projects or activities contained in this Act: *Provided*, That section 140 shall remain in effect through September 30, 1982.

Mr. GARN. Mr. President, I ask for the immediate consideration of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah.

The amendment (UP No. 704) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BUMPERS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The motion to concur in the House amendment to the amendment of the Senate numbered 4, with UP amendment No. 704, was agreed to.

(Later the following occurred:)

Mr. GARN. Mr. President, earlier this evening, we agreed to the HUD appropriations conference report and sent it to the House.

In the last paragraph, No. 41, of unprinted amendment No. 704, a few words were omitted. I believe it is important that we put those words back in, to clarify the amendment. It is short enough that I think it would be best to read it, so that there is no misunderstanding.

(41) Notwithstanding any other provision of this Act, section 140 of H.J. Res. 357, as passed by the Senate on November 20, 1981, shall apply to programs, projects, or activities contained in this Act: *Provided*, That section 104 shall remain in effect for the programs, projects, or activities in this Act through September 30, 1982.

Mr. PROXMIRE. Mr. President, I agree with my good friend from Utah. He is correct, of course. His amendment will make sure that this applies only to the HUD bill and does not apply to supplementals. It does not apply to other legislation we may pass. That was certainly the intention on both sides.

So I am happy to support the amendment.

Mr. GARN. I thank the Senator from Wisconsin.

The PRESIDING OFFICER. Without objection, the change will be made, as requested.

(Conclusion of earlier proceedings.)

Mr. PROXMIRE. Mr. President, Senator GARN has done an excellent job along with the members of the subcommittee on the Appropriations Committee on this appropriations bill.

We all know how difficult it is to cut spending and automatically for many years we have had increases in all these appropriations bills of 10, 15, or 20 percent.

This appropriations bill this year is $9 billion, as I understand it, below 1981 roughly. It is also about 15 percent below 1981—15 percent. That is, I think, an unusual accomplishment under very, very difficult circumstances. It is 5 percent below the President's request of last March and while it is slightly above what the President requested in September, I think all in all it shows a remarkable diligence and effectiveness on the part of Senator GARN, Senator HUDDLESTON, and other members of the committee and subcommittee.

So I think that congratulations are certainly in order.

For years I had the honor to serve as chairman of this subcommittee. It is one of the most complicated and difficult subcommittees that the Appropriations Committee has. It covers housing, NASA, the Veterans' Administration, the National Science Foundation, and the Environmental Protection Agency. It is a very important, extremely comprehensive, and extremely varied appropriations bill.

So I think all of us owe a debt in this year when it is so important that we hold down spending and so important that we move as quickly as we can toward a balanced budget and to fiscal responsibility because of high interest rates and inflation that the distinguished Senator from Utah has done so well.

I might also mention that this was the first appropriations bill enacted. It passed the Senate in July and it has been waiting as a conference report for a couple of months.

The Senator from Utah has not only done a remarkable job along with a really brilliant chairman in the House of Representatives, Congressman BOLAND, but he has done it with great promptness and if all of the appropriations bills are handled with this alacrity we would not be here tonight and we would have no problem with balancing the budget and moving in the fiscally responsible direction we should.

So I am delighted to have the opportunity to congratulate my good friend from Utah on a topflight job and also the excellent staff that has worked with him, Wally Berger and others.

Mr. GARN. I thank the Senator from Wisconsin very much. It has been a pleasure for me to work on this committee and the Banking Committee with Senator PROXMIRE for many years now.

I wish to say that there are a lot of people who deserve credit for this. Wally Berger certainly does for his excellent work.

Senator HUDDLESTON, who is the ranking majority member, has been incredibly cooperative this year, proceeding to the point where we could pass the appropriations bill in July and get a conference report back by September 15, well in advance of the normal October 1 deadline. This is the only bill that took place.

But also Congressman BOLAND deserves credit. I have never had the pleasure of working with anyone who is more cooperative on the other side of the aisle of the other side of the Capitol than Congressman BOLAND.

So it certainly is not just Senator JAKE GARN'S achievement. There were a lot of people on both sides, Democrats and Republicans in the Senate and in the House of Representatives and Chairman BOLAND who made it possible to do this.

I regret the fact that we had to hold the conference report at the desk since September 15 because I would have liked to have enacted it rapidly and sent it to the President for signature.

But in this case the delay has been helpful. As the Senator from Wisconsin mentioned we are over $9 billion under last year's budget. But the delay from September 15 until now has allowed us to take $1.6 billion more out of the bill than in the conference report agreed to on September 15.

So in this case I believe the delay was worth it.

Mr. President, I believe that finishes the action on this bill and all of the motions necessary to send it back to the House of Representatives have been made. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

CANADIAN-USA RELATIONS: THE CANADIAN PERSPECTIVE

Mr. STEVENS. Mr. President, as I am sure many of my colleagues are aware, the Canadian Ambassador to the United States for the past 4 years, Mr. Peter M. Towe, will be leaving soon. He will be succeeded by Ambassador Allan Gotlieb.

Ambassador Towe recently addressed the Carnegie Endowment and American Foreign Service Association in a speech entitled, "Canadian-USA Relations: The Canadian Perspective."

The Ambassador makes two main points in his speech which I think are worth mentioning. The first is that the current rhetoric flowing between our two nations goes beyond what real tensions exist between them. The second point, and it relates to the first, is that there are differences between the United States and Canada because of culture and historical events which both nations need to keep in mind when disagreements—and thus tensions—arise.

There is a close friendship between the United States and Canada. Alaskans, because of Alaska's geographical location, are very close to their friends and neighbors in British Columbia and the Yukon Territory. At times, I think we Alaskans feel closer to our Canadian friends than we do to our fellow countrymen. There are constant exchanges among the State, provincial, and territorial governments. Alaskan and Canadian citizens interrelate on all levels as a normal course of business and everyday life.

Alaskans and Canadians will meet in Fairbanks for the Arctic Winter Games next year from March 14 to 18 as part of the friendship between Canadians and Alaskans. This will be the seventh meeting of athletes from Alaska, the Yukon Territory, and the Northwest Territories. The games have been held five times in Canada. This is the second time they will be held in Alaska.

I wish my good friend, Peter Towe, good luck in his new assignment and welcome his successor, Allen Gotlieb.

I ask unanimous consent that Ambassador Towe's speech be printed in the RECORD following these remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CANADA-U.S.A. RELATIONS: THE CANADIAN PERSPECTIVE

(Notes for an address by Peter M. Towe, Ambassador of Canada)

The first words I have for you today are not my own. However, in tone and in content, they are very familiar.

"The relations of few countries are as intimate and important as those between Canada and the United States. They loom far larger in the eyes of a Canadian than of an American. That is natural.

"It may be expected that the relations between the two states will become increasingly important and that the problems arising therefrom will grow in magnitude."

Those must be the sage observations of a Canadian political figure, you might conclude. Or of an Ambassador to the United States.

They are.

Lester Pearson—who, of course, was both.

And what might be illuminating to you is that they are from a letter he wrote in January 1932.

You know, Canadian Ambassadors here have been saying that sort of thing for as long as there have been Canadian Ambassadors here. Because it's true. We are two nations sharing a continent. We share prosperity; fears; and many values. We also share a great deal of history. Some of this history is not at all about sharing.

I enjoyed the festivities celebrating the 200th anniversary of the battle of Yorktown earlier this month. I was the one at the ceremony thinking that the American victory at Yorktown made superfluous General Washington's plan for another expedition in 1782 or '83, this one of enormous strength, to take Canada.

I was also thinking, as your President exchanged toasts with President Mitterrand, of how Canada fitted 200 years ago into that triangle. The French did, of course, support the American Revolution against their English enemies. The Congressional leaders in fact expected their French allies to invade Lower Canada. But the French did not attack Canada. The official explanation was that the first priority was to assist the Americans to liberate the colonies in the Southern part of the continent. The actual policy of Versailles was to leave Canada in the hands of the British so as to drive the newly independent state into friendship and expanded trade with France.

To a large extent, French policy was foiled. General Washington, in peace negotiations with the British asked that Canada be ceded to the U.S. which, if the request had been taken seriously, would have enabled you to spend this lunch hour listening to someone else. It wasn't, but the British concessions to the new Republic were meant to counter French influence—and they were made to a large extent from what eventually became Canada. Such was—and remains—the rather seamy stuff from which history is shaped.

Canada. Not yet a country. Still a colony. But with a growing number of inhabitants of many different kinds. Whose own views were mired—Canadians in fact fought on both sides at Yorktown—and naturally, were not considered by these big powers.

Who were they? They were the original French-speaking habitants. Still resentful of the British conquest but determined to survive culturally. Then, the Loyalists to the British Crown, many in fact refugees from the Revolutionary War to the South. And there were others—in Montreal, particulary—who had been impressed by the philosophical values of the American Revolution. In a Canadian way, these values worked their way into our own nation-building process, and became the basis of the political values we share in common, even if our political systems are in so many ways quite different.

Indeed, that nation-building process goes on today. Its effects, stemming from the very fact that we are different nations, seem to be what the present fuss in Canada-U.S. relations is all about. But its description is not so different from what Lester Pearson sensed 50 years ago.

My first posting to the Canadian Embassy here came at a time of unprecedented cooperation between us. We worked together even when the issues were difficult, through such huge undertakings as the construction of the St. Lawrence Seaway. Also, at that time, having years before dropped our defences against each other, we joined in defence against others, through the creation of the Permanent Joint Board of Defence in 1940 which led after the war to the Pinetree Line and the Dew Line, and eventually to joint defence of the continent through NORAD.

During my next posting to this city, a decade and more ago, the mood was dramatically different. The U.S. was briefly and aberrationally in trade deficit with Canada. The measures taken in 1971 to protect the American dollar, measures which had a grievous, and disproportionate effect on Canada, were not the object of any prior consultations. Canadian pleas that account be taken of our historically special relationship with the USA went unheeded.

This is, I suppose, a contradiction, but it is one Canadians are used to. You were much bigger and stronger and could speak of retaliation much more credibly than we could. As my historical reflections today indicate, we in Canada are aware that it was ever thus. Successive Administrations here have had, perhaps, a shorter-term view of what's been going on. There is after all a tendency here to think that history re-begins every four years.

I don't mean to suggest that as Ambassador here, or earlier, as an officer in our Embassy—where, incidentally, I've spent almost half my working career—I've been stewing in the acid of 200 years of accumulated grievance.

Far from it. Most of my time has, in fact, been spent on the things we've worked out together, in the development since the war of the most complex, and concentrated relationship which exists between any two nations.

I recall those very creative post-war years when international institutions emerged from a common sense of hope or of peril: The resolution among the three countries which had cooperated in developing the atomic bomb to see atoms used henceforth only for peace; the founding of the United Nations; and when the Cold War shocked us all into insecurity again, the creation of the Atlantic Alliance.

In these experiences, our common and enduring view of the world's perils became shaped. It became natural for Canada to think of itself as an ally of the U.S.; in responding to Secretary Acheson's special plea to send ground troops to Korea; in Canada making a special effort to respond to the Suez crisis, where Canadians could play a peacekeeping role from which the larger powers were disqualified, in a sort of complementarity to U.S. big power leadership—and one which at that time kept the good relations between the U.S. and the U.K., as well as France, on the rails.

So I preface my remarks by taking a long view. Not of antagonism. But of history, the history of two nations, each, in its way, pursuing its own aspirations.

And now I turn to today.

We are told that relations between Canada and the United States have entered a difficult and dangerous phase. Americans in both the public and private sectors bewail the so-called new nationalism of Canadian government policies. In Canada many complain loudly about recent American statements, describing them as alternately patronizing or imperialistic. Looming over all the rhetoric is the perception on both sides of the border that we are locked into an inescapable spiral of retaliation and counter-retaliation, to the eventual disadvantage of both countries.

A dramatic picture—but is it accurate? I think not. It exaggerates current tensions in a few areas at the expense of an overwhelmingly positive relationship and it implies that until recently the bilateral relationship was devoid of substantive issues and difficulties.

Quite frankly, relations between Canada and the United States are always delicate.

It is not hard to see why. Interdependence is the watchword of the present age. Academics describe it, politicians espouse it, and the common man confronts it in his daily life. Imports and exports, balance of payments, the value of the dollar, the shock of escalating energy prices. We have all become part-time international economists. The lesson is clear to us all—no nation's economy is a secure fortress. We must struggle to find accommodations with our economic partners or we will all suffer.

For Americans this is a relatively recent experience. To Canadians this "modern reality" has been a feature of our national life for generations. We have had historically to be more sensitive than most to the economic policies of foreign governments. At the present time fixed U.S. capital investment in Canada is greater than in any other country, as is Canadian investment in the U.S., where we are the third largest source of foreign investment. Trade between our two countries totals almost (Can) $100. Billion annually.

It is important, I believe, not to over stress the negative. It is not surprising to me that many commentators express real anguish over what they perceive to be a deterioration in our bilateral relations. After all, for many years relations between Canada and the U.S.A. as countries and, more importantly, between Canadians and Americans as individuals, have been warm and genuine. There is an easy familiarity between our two countries which is, perhaps, unequalled in the world. In fact, the similarities between us are so great that we often overlook the differences which make us distinct. And we do so at our peril. Our strength as nations depends not only on our shared qualities but also on those qualities which are unique and lend variety and richness to our national lives.

It is not an easy task to specify these differences: some are very obvious while others are rather abstract and difficult to define with precision. I do not want to provide an exhaustive list for you, but I would like to suggest a few items which contribute to a deeper understanding of Canada.

Our geography and population. Although Canada is larger in area than the U.S., we have a population only one-tenth as large, and almost all of it located within 100 miles of the frontier with the U.S. These facts create special problems such as the vast transportation and communications systems which must be maintained in support of a relatively small economic market.

Our bicultural and bilingual identity, the fact that Canada has two founding cultures and official languages—French and English—creates special national riches but also special and unavoidable costs.

Our federal political system. Canadian provinces exercise jurisdiction over social and economic sectors to a much greater extent than the individual states in the U.S.A. The Canadian federal government's powers

are correspondingly more limited than those of its American counterpart.

These, and other, factors taken together have created a distinctively Canadian political culture, a blend of our respect for and dedication to free enterprise and individual initiative with our recognition that government involvement in the economic, social and cultural life of Canada is demanded by the imperatives of our national heritage.

Canadians expect their governments to develop and execute policies which are responsive to their needs and interests. This expectation, by itself, is not unique. Americans also expect their governments to pursue policies which maintain national security, encourage social and political stability and promote economic prosperity. Bluntly put, Canadians and Americans look to their governments to articulate and defend their respective national interests.

And this is as it ought to be. To demand otherwise would be foolish and unrealistic. But it is not the end of the matter for the term "national interest" is infinitely elastic and can be stretched to justify almost any action. Therefore, Canadians and Americans make an additional demand on their governments which reflects their shared belief in democratic political principles—we demand that our governments pursue our national interests in a responsible manner.

When we look at foreign policy we see that responsible governments adjust their policies to suit changing circumstances. This is not opportunism or cynicism; rather we must continually make judgments about how best to pursue our national interest in a manner consistent with our international obligations and responsibilities. At times we must summon up the national will to act boldly while at other times prudence and patience provide the sternest tests of our national resolve.

It is balance we seek and, when I reflect on over three decades of personal involvement in the Canada-U.S.A. relationship, I am struck by the balance we have achieved in the management of this relationship. I cannot think of two other countries which have so effectively pursued their national interests in such a harmonious and mutually beneficial way.

I am deeply troubled, therefore, by the recent charges in the United States that Canada has embarked on a new—and dangerous—course of economic nationalism. Nationalism, I hasten to add, is not used by those making the charge as a neutral description of the reasonable pursuit of national interest. No, we are speaking here of nationalism which conjures up images of folly, irresponsibility and anti-Americanism. It is our emotions which are being appealed to—not our reason. Against the backdrop of such a long and fruitful bilateral relationship, I find the invocation of the term "nationalism" entirely inappropriate.

When the United States Government argues (as does Canada) in favour of fair international trading practices, it does so because it believes such practices benefit the U.S. economy. Similarly, when the Administration and Congress state they will pursue fair trading practices, even if it means "getting tough" with trading partners, they do so because they believe this is necessary to achieve vital national objectives. There is nothing wrong with this: indeed, it would be exceedingly odd if the U.S. government pursued policies which it believed were inimical to American national interests. But we should not delude ourselves into thinking that pursuit of these interests, however reasonable they may be, is cost-free; voluntary restrictions on automobile exports may be a necessary element in the revitalization of the domestic automobile industry, but they do impose a cost on Japanese producers. There have been, and continue to be, debates within the United States on the best ways to pursue trade objectives and yet, throughout these debates, I cannot recall a single reference by any of the participants to the new "nationalism" of the United States Government, not even when such blatant acts as buy-American legislation are enacted by the Congress or, increasingly, by State governments. Perhaps it is the case that one nation's "nationalism" is another nation's "patriotism."

The point is that labels, by themselves, are not really helpful and may even prove damaging. We should be prepared to look behind the labels if we wish to gain a richer understanding of each other. All nations—even Canada and the United States—make mistakes. When we do we expect you to point them out; I know we do not hesitate to point out your mistakes to you. If we cannot resolve our problems through bilateral discussions we have recourse to multilateral instruments such as the GATT, instruments we both helped to create and continue to sustain.

Historically, we have acted responsibly toward each other and we can continue to do so if we do not lose our nerve. It takes political courage to exercise patience, to calmly assess the costs and benefits of foreign policies. In the United States, President Reagan has embarked on a dramatic economic program. Its success will be vital to the recovery of the global economy. We know the measures will take some time to work through the economy and so we have refrained from excessive criticism of the program for its short-term consequences, such as high interest rates, which have a dramatic impact on Canada. Similarly, Canada's National Energy Program has as its primary objectives the achievement of energy security and, by 1990, providing for ownership by Canadians of 50 percent of our own oil and gas industry. Surely few Americans will find these goals objectionable. The Program's measures are designed not to punish foreign investors but to encourage Canadians to invest in the energy sector and to bear the costs necessary to achieve national energy objectives. Some have taken issue with the means. But it is by now I hope clear, that Canada has and will continue to implement this policy in a manner consistent with our obligations to you and our other economic partners.

If the Program works—and we believe it will—Canada will be off the world oil market by the early 1990's. This clearly serves not only Canadian interests but also global interests. Your economic recovery program and our National Energy Program are bold policies designed to meet extraordinary circumstances. Both governments agree and support the long-term objectives of both programs; we must avoid allowing our short-term anxieties to thwart the achievement of those objectives.

I also want to touch on another Canadian policy which has been frequently criticized. I want to demonstrate that this policy, once it is understood, is a most reasonable response to a difficult and precarious situation. I refer to Canada's policy on foreign investment.

Canada is a major importer of capital. Throughout our history we have actively sought foreign investment and created the domestic conditions which make Canada so attractive to investors from abroad. We would not have achieved, nor could we maintain, our high standard of living without major infusions of foreign investment capital. We have not pursued this policy for selfless reasons; we do it because it serves our interests. Similarly, foreign investors find Canada an attractive country to invest in because they make a profit. Foreign capital investment, like domestic investment, demonstrates the free enterprise maxim that pursuit of private benefit contributes to the public good.

But this is not holy scripture. All modern nations recognize that the marketplace is not perfect and some government role is necessary if market imperfections are to be prevented from becoming gross economic distortions. Antitrust laws, for example, are not predicated on the simplistic notion that big is bad but rather on the hard economic evidence that monopolies can stifle competition, encourage inefficiencies and lower general economic performance. Where natural monopolies are necessary, as in the utilities sector, we regulate them to ensure they operate in the public interest.

Foreign investment is not exempt from this type of scrutiny; if anything, there is greater public demand in this country for your government to become involved in foreign investment issues. And the demand increases in direct proportion to increases in the level of foreign investment. To be sure, some of the complaints reflect little more than xenophobia, a belief that foreign investment is, by virtue of its origin alone, undesirable. But there are grounds for some serious worries as well. For example, are head offices in foreign countries sufficiently sensitive to domestic realities? Do they offer domestic companies a fair opportunity to bid on branch plant procurement? Or do they purchase goods and services from traditional sources located near the head office? Do decisions about corporate marketing and investment made on a global scale ignore domestic concerns such as the desire to raise the level of research and development activities of branch plants? Are subsidiaries subject to the extraterritorial application of foreign laws?

Successive Canadian governments had to face these issues at a time when foreign investment had risen to extraordinarily high levels and there were real fears in Canada that control of the economy was in foreign hands. We could have chosen to ignore this, but that would have allowed the legitimate concerns of Canadians to fester and, perhaps, explode in an unpredictable manner at some future time. It could have chosen to drive out foreign investment, even though this would have damaged severely the Canadian economy. Instead, in 1974, the government chose to steer a middle course between the two extremes of inaction and over-reaction—it established a mechanism to screen new foreign investment in Canada.

Canada requires foreign investors to demonstrate that their investment proposals confer "significant benefits" on Canada. Is this an irresponsible demand? I think not. Of course, our screening mechanism is not perfect—not everyone, even in Canada, believes it is necessary. No mechanism created by government and implemented by bureaucrats can or should claim omniscience. But minor difficulties should not be used to destroy the reasonable objectives of the policy. Canada will continue to need vast amounts of capital beyond our own ability to save; by reassuring Canadians about the economic benefits of foreign investment, the government ensures that Canada remains an open and hospitable environment for foreign investors.

I've spent a lot of time lately explaining Canadian positions but in doing so I don't want to imply that the U.S. has a monopoly on grievances—far from it. I have already referred to the proliferation of "Buy America" legislation, but there are other trade issues such as the DISC legislation where Canada has serious disagreements with American policy. On investment issues, the Jones Act and the Communications Act among others prohibit or strictly limit foreign investment in certain sectors. You too have notable exceptions to the principle of national treatment. Perhaps I don't need to recall that there was deep disappointment in Canada at the failure by the Senate to ratify a treaty which would have created an equitable joint management scheme for our East Coast fisheries. As for the environment

there are a number of areas where we must develop cooperative programs if we are to avoid the destruction of irreplaceable resources in both countries. These problems—ours and yours—will not be solved by mere finger-pointing, much less exaggerated claims and counter-claims. We must strengthen our commitment at the highest level to finding appropriate solutions.

Now let me conclude by trying to project a bit into the future. I believe that your President struck a very appropriate note when early on, he stressed the importance of establishing an accord with his northern and southern neighbours. By that I don't mean—nor I think did he—that we had to build new institutions into the relationship or to depart from the multilateralism which has shaped our respective foreign economic policies. I can't speak for your President, but what I think we need to strive for is to accord to each other the respect we are due as sovereign nations.

You have global responsibilities beyond the reach of my or other foreign democratic governments and we have, historically, supported you and will continue to do so whenever possible. Indeed I venture to say that the level of understanding and support given the United States by Canada is unequalled by any other nation. We do so not out of any sense of altruism, but because of shared values and common perceptions of the world and when we want to achieve. Economically we support you as well, again not out of a sense of altruism, but as a natural outcome of the intermeshing of our economies. Canada historically runs an overall balance of payments deficit with you and this contributes to offset the imbalance you face with other countries. In turn, you are the main means of our defence, our vital market and the source of our much-needed investment capital and technology. It is a mutually rewarding relationship.

What we need to ensure is that it remains so. Early on in my remarks I noted that we are still in the process of nation-building. And that is so and will be so for many decades to come. We need space to work out our problems—to forge our destiny. Obviously I don't expect the U.S. to do other than protect and advance its interests with us as this process occurs. In the current crisis, however, if crisis it is, I do expect you to take the longer view and to accord to us the respect that is due us—recognition of our differences and of the right, even the desirability of following different paths when national interest dictates.

INTELPOST EXPANDS TO ADDITIONAL CITIES

Mr. STEVENS. Mr. President, I was pleased to note that the U.S. Postal Service is expanding its Intelpost service into four major U.S. cities: Boston, Detroit, Houston, and San Francisco. Citizens in these four metropolitan areas will join those living in the Washington, D.C., and New York areas in having available high-speed international electronic mail service between the United States, Canada, England, and the Netherlands.

The Postal Service has a mandate from Congress to provide the most modern and efficient postal service anywhere in the world and I believe the move to expand the Intelpost system is in keeping with that mandate. I urge the Postal Service to continue to go forward as is economically prudent in expanding even further the present Intelpost system.

Mr. President, I ask unanimous consent to have printed in the RECORD the complete text of an article on this service which appeared in the recent edition of the Postal Leader.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

INTELPOST SERVICE EXPANDS TO ADDITIONAL CITIES

Four additional U.S. cities—Boston, Detroit, Houston and San Francisco—have been added to the U.S. Postal Service's Intelpost network.

The high-speed international electronic mail service currently operates between the United States and Canada, the United Kingdom and The Netherlands.

When the service began in 1980, only Washington, D.C., and New York City served as service centers.

Expansion of Intelpost within the United States is now possible by linking the service with Express Mail, a service that offers same-day or overnight delivery within the United States.

For example, a letter can be mailed by 11 a.m. in San Francisco and delivered the following morning in London or Amsterdam. The message will travel from the West Coast to Washington, D.C., arriving the same day. The letter will then be transmitted by Intelpost, using facsimile transmission, to its final destination abroad. The cost is $5 per message page plus the normal Express Mail Charge.

The facsimile system offers exceptional accuracy in the transmission of complex documents such as statistical tables, artwork and correspondence written in languages such as Arabic or Chinese.

Sophisticated equipment scans letters and documents converting their contents into electronic signals which are relayed to Canada via land lines. Messages to London are directed to Toronto where a switching arrangement allows further transmission via satellite to the United Kingdom. Messages destined to The Netherlands also travel through London.

Once the signals are received at their destinations, equipment capable of printing an 8½ in. x 11.7 in. page in seconds will convert the electronic impulses into black and white facsimile copies of the original documents.

The message may be picked up in person within an hour after receipt at any Intelpost service center. If "pick-up" service is not requested, the message will be placed in an envelope and delivered to its addressee by regular mail. Special delivery is provided to selected U.S. and foreign post offices at an extra charge.

The Postal Service plans to expand Intelpost service to other foreign countries.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. LEVIN (for himself, Mr. COHEN, Mr. HART, Mr. PRYOR, Mr. ROTH and Mr. RUDMAN):

S. 1882. A bill to prohibit Federal agencies from soliciting offers from, awarding contracts to, extending contracts with, or approving subcontracts for, any person who has been debarred or suspended by another agency; to the Committee on Governmental Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. LEVIN (for himself, Mr. COHEN, Mr. HART, Mr. PRYOR, Mr. ROTH, and Mr. RUDMAN):

S. 1882. A bill to prohibit Federal agencies from soliciting offers from, awarding contracts to, extending contracts with, or approving subcontracts for, any person who has been debarred or suspended by another agency; to the Committee on Governmental Affairs.

AWARDING OF CONTRACTS

● Mr. LEVIN. Mr. President, in March 1981, the Subcommittee on Oversight of Government Management held 2 days of hearings on Federal debarment and suspension procedures. I am the ranking member of that subcommittee and my colleague from Maine, Mr. COHEN, chairs it.

The hearings culminated a year-long investigation by the subcommittee into how effectively agencies use debarment and suspension procedures to protect themselves and the Federal Government from dealing with fraudulent and irresponsible contractors. Debarment and suspension procedures should enable the Government to protect itself while at the same time insuring that the Government acts fairly and openly in the process.

Debarment is the exclusion of a firm from entering new contracts or subcontracts with the Federal Government for a specified period of time, usually not to exceed 3 years, based on an administrative finding of fraud or a history of poor performance. Suspension is a temporary exclusion of a firm pending an investigation into allegations of wrongdoing or inadequate performance.

Our investigation and hearings into debarment and suspension procedures revealed several very disturbing facts. First, most agencies showed little aggressiveness in initiating and pursuing debarments and suspensions. Second, notification to other agencies that a firm had been debarred or suspended was sadly lacking, and even where given, the information was often incomplete or dated. Third, and most shocking, even after contractors were formally and properly debarred or suspended by one Federal agency, other agencies continued to award contracts to those firms, either out of ignorance of the action or out of refusal to give any need to the other agency's findings.

During our investigation, we examined every agency's individual debarment and suspension regulations and procedures. We discovered a hodgepodge of unclear and vague procedural requirements. Some agencies had no written procedures at all, and others had no understanding of how a debarment or suspension action would proceed if initiated. Clearly, this confusion worked a disservice both to the Government and to contractors. Without clear procedures, many agencies were hesitant to take any action at all when faced with a firm alleged to be fraudulent or incompetent. In some cases, agencies simply denied contracts to suspected firms without ever giving them any opportunity to meet questions about their honesty or capacity.

Even where the actions were taken, the listing and notification of debarments was insufficient, providing very little notice to anyone of anything. The list did not even include suspensions; it was updated only twice a year and its distribution was limited and sporadic.

The hearings unveiled several very costly examples where a contractor properly debarred or suspended by one agency

continued to get new contracts from other Federal agencies. This made no sense to us. Just as a private corporation would be foolish to continue dealing with a supplier proven to have defrauded or reneged on a contract with one of its divisions, so too would the Federal Government, in the absence of some compelling reason to do so.

As a result of our hearings, we made a series of very specific recommendations, including many which were directed to the Office of Federal Procurement Policy (OFPP) Task Force on Debarment and Suspension. It had become clear to us that a single, standard written procedure for debarment and suspension would eliminate the confusion and hesitancy we had found while also strengthening the protections afforded both the Government and contractors. We recommended such a uniform procedure and emphasized that it should incorporate adequate due process protections, without becoming cumbersome or overly legalistic. Specific ways of insuring prompt and accurate reporting of debarment and suspension actions to all Federal agencies were also included in our recommendations.

Significantly, we also recommended that debarments and suspensions properly made through uniform procedures by one agency be given Government-wide effect, unless some compelling reason required otherwise. Of the problems considered during the hearings, perhaps the most disturbing was the degree to which agencies resisted following or paying any heed to other agencies' debarments and suspensions. While some of this resistence grew out of the variances in agency procedures, much of the failure could often be explained only by agency chauvinism.

The Federal Treasury as a whole will be protected only if individual agencies coordinate and accord presumptive validity to actions other agencies take to protect themselves from dishonest and incompetent firms. Common business sense dictates no less. Agency autonomy and independence are not threatened by a Government-wide acknowledgement that corrupt and irresponsible contractors have no business doing business with any Federal agency, again in the absence of some compelling reason to do so.

The OFPP Task Force has since drafted and published for public comment an Office of Management and Budget (OMB) policy letter which would incorporate many of our recommendations and remedy many of the problems raised at the hearing. While the OMB policy letter would seek to impose standard debarment and suspension procedures for all agencies and require Government-wide acceptance of the decisions which result, we still see a need for legislation to insure uniform and prompt acceptance of this change.

It is for that reason that today I am introducing, along with Senators COHEN, HART, PRYOR, ROTH, and RUDMAN, a bill which simply requires that debarments and suspensions, arrived at after following proper administrative procedures, would be effective throughout the Federal Government, unless a compelling reason required an agency to contract with that firm. Where such a compelling reason exists, the agency head would be required to explain the specific reasons in writing and send that explanation to the General Services Administration where it would be filed in a place available for public inspection.

This commonsense practice must apply to the Federal Government as a whole. Without it, debarment or suspension by one agency does little to protect all the other Federal agencies from pouring more taxpayer money into fraudulent or incompetent firms. With uniform debarment and suspension procedures which include adequate due process protections, separate agency determinations on the same facts would be superfluous and a waste of Federal and contractor resources and time. At the same time, because the procedure is formal and open rather than one of whispers and secrecy, contractors are justly afforded an opportunity to refute questions raised about their conduct or performance.

We are mindful that on occasion the best interest of the Government could very well require contracting with a suspended or debarred contractor. This could be the case, for example, where the contractor is the sole source for a much needed service or product, or where national security requires. It is for that reason that the bill specifically provides an exception to the Government-wide effect of a debarment or suspension, so that the national interest is protected.

Senator COHEN and I offered an amendment to the DOD fiscal year 1982 authorization which would impose this requirement on that Department. The amendment passed the Senate and has been accepted by the House-Senate conference now considering the bill. The legislation we offer today would impose the very same requirement on all Federal agencies, so the Federal Government as a whole can better protect itself and the Federal Treasury from wasteful spending scarce dollars on firms which cheat the Government or which are unable to meet their contractual obligations. Certainly, in these days of tightened budgets and spending slashes, we can do no less.

I ask that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1882

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) an agency shall not solicit an offer from, award a contract to, or extend a contract with an offeror or contractor who is debarred or suspended by another agency and shall not, in any case in which the approval of such an agency is required for the award or extension of a subcontract, approve the award or extension of a subcontract, approve the award or extension of a subcontract to a subcontractor who is debarred or suspended by that agency or another agency, unless—

the head of the agency concerned determines that there is a compelling reason to solicit such an offer, award such a contract, extend such a contract, or approve the award of such a subcontract and—

(1) promptly notifies the Administrator of the General Services Administration in writing of such determination, and

(2) includes in the notice a statement of the specific reasons for such determination.

(b) The Administrator of the General Services Administration shall maintain each notice received pursuant to subsection (a) in a file available for public inspection.

(c) For purposes of this section—

(1) the term "debar" means to exclude, pursuant to established administrative procedures, a person from contracting and subcontracting with the Government for a specified period of time;

(2) the term "suspend" means to disqualify, pursuant to established administrative procedures, a person from contracting and subcontracting with the Government for a temporary period of time;

(3) the term "offeror" means any person who submits or proposes to submit an offer on a contract or on a subcontract to a contract;

(4) the term "contractor" means any person who has entered into a contract with an agency;

(5) the term "contract" means a written agreement, including amendments and modifications thereto, between an agency and a contractor for the procurement of goods or services;

(6) the term "subcontractor" means any person who submits or proposes to submit an offer to a contractor for a subcontract to perform all or part of a contract;

(7) the term "agency" has the same meaning as in section 551(1) of title 5, United States Code; and

(8) the term "person" has the same meaning as in section 551(2) of such title.●

● Mr. COHEN. Mr. President, I am pleased to join my distinguished colleague, Senator LEVIN, in sponsoring legislation to strengthen Federal contracting procedures by requiring the Government to stop doing business with contractors known to be undesirable.

Our bill would require Federal procurement officials to recognize actions taken by other agencies against contractors who have defrauded the Government, performed poorly on Federal contracts, been indicted or convicted, or who are under investigation for serious offenses. It would prohibit a Federal agency from soliciting offers from, awarding contracts to, or extending contracts with a contractor that has been suspended or debarred by another Federal agency, unless a compelling reason justifies the contract award.

This legislation is similar to an amendment that I offered to the fiscal 1982 Defense Authorization Act on May 13. Accepted by the full Senate, that amendment prohibits the Department of Defense from knowingly contracting with businesses that have been debarred or suspended by another agency, absent a good reason for doing so. The broader legislation we are introducing today would apply the same restriction to all Federal agencies.

The purpose of debarments and suspensions, which are used to disqualify contractors for specified periods, is to protect the Government's investment. The evidence demonstrates, however, that the Government often fails to protect itself from undesirable contractors. In my judgment, the Government does not sufficiently weigh a contractor's past performance in determining his present responsibility. Given the serious grounds for debarment, this problem is compounded when a debarred firm continues to receive new contracts from another

agency that is either unaware of the debarment or has ignored it.

It is important to understand that agencies do not invoke their suspension or debarment procedures lightly. In every agency, these procedures are used as a last resort and are employed infrequently. In fact, over half of the agencies surveyed by the Oversight of Government Management Subcommittee had not suspended a single contractor during the last 5 years. To underscore just how serious a debarment or suspension is, I would like to briefly list some of the grounds for these procedures.

A firm may be debarred for: embezzlement, theft, forgery, bribery, falsification or destruction of records, an offense indicating a lack of business integrity and directly affecting the question of present responsibility to perform on the contract, or serious violations of contract provisions, including a willful failure to perform. A firm may be suspended while an agency investigates any of the charges that are grounds for debarment. So we are not discussing minor problems that would lead to a firm's disqualification for bidding on Government contracts.

Mr. President, this legislation will not be burdensome; it only makes good business sense. Although the vast majority of contractors perform both honestly and admirably on Government work, a small minority do not. To assure the best performance and fullest return on its investment, the Government must effectively eliminate those cnotractors who have defrauded the Government, proven to be irresponsible, or demonstrated in others ways that they are bad actors with whom the Government should not do business.

Permitting irresponsible contractors to receive Federal dollars not only jeopardizes the Government's investment, but is also unfair to those reputable, capable firms who should be the recipients.

I would like to make one final point. There is nothing in this legislation that would prevent any agency from awarding a contract to a debarred or suspended firm as long as it is warranted. Cases will occur in which an agency would be justified in contracting with a business, despite the fact that another agency had found the firm to be an unsatisfactory performer. In such cases, the agency could go ahead with the contract as long as it filed a written statement with the General Services Administration outlining the reasons for contracting with the firm. Reasons of national security or sole-source would be examples of adequate justification for awarding a contract to a debarred or suspended firm.

Based on hearings held by the Oversight of Government Management Subcommittee, I have concluded that the Federal Government has acted neither efficiently nor vigorously to cease its business relationship with firms that clearly have lacked integrity in their past dealings with the Government. The failure of some agencies to accord presumptive validity to other agencies' debarments and suspensions contributes to this problem. I believe that this legislation will benefit Federal agencies by alerting their contracting officials to the dangers of contracting with irresponsible or fraudulent contractors and by providing them with the statutory authority to avoid such contracts whenever possible.●

● Mr. HART. Mr. President, this year we have focused great attention on formulating a lean, responsible Federal budget. We have an equally important responsibility, however, to insure that budget is properly and efficiently managed. Senators COHEN and LEVIN, as chairman and ranking minority member of the Subcommittee on Oversight of Government Management, have distinguished themselves for proposing concrete ways to reduce wasteful Federal procurement practices. I am pleased to join them today in introducing legislation to improve Federal debarment and suspension rules as one important step toward achieving that goal.

Fraud and waste in Government procurement is still extensive, despite the attention it has received in recent years. "Hurry-up" spending, the process by which agencies obligate billions of dollars in the final weeks of the fiscal year to avoid cuts in future appropriations, costs the taxpayer an estimated $2 billion each year. Sole-source contracting by agencies in response to unsolicited work proposals or procrastinated policy decisions serve no public interest but waste millions more. And haphazard purchasing planning and auditing make very poor use of scarce public funds.

An especially blatant example of poor business practice by the Federal Government is demonstrated by the use of the debarment and suspension process. When a private business fails to perform in accordance with a contract with a Federal agency, that agency can impose sanctions against the company by debarring or suspending further business activity with it. This is a powerful tool, yet it is used infrequently and inconsistently. When one agency acts to debar or suspend, other agencies are not adequately informed. Even when they are informed, they fail to impose similar sanctions against the fraudulent firm.

The legislation we are introducing today simply requires that when one agency debars or suspends a company, all other agencies are prohibited from awarding contracts to that company unless sufficient justification—such as national security—exists, and the company is the only one that can perform the work.

This proposal represents one small step toward reducing the millions of dollars lost every year on wasteful procurement practices. But it is a real step which can achieve a real difference. I urge its prompt consideration.●

● Mr. PRYOR. Mr. President, I am proud to join Senator LEVIN today in the introduction of legislation which will provide that agencies and departments cannot continue contracting with firms which have been shown to have perpetrated fraud against the Government, or failed to perform according to their agreements with the Government.

During the course of 2 days of hearings before the Subcommittee on Oversight of Government Management it was pointed out that application of the present Government regulations governing debarment and suspension of contractors is deficient. Contractors, debarred or suspended by one agency, move to a second agency and that agency often ignores the fact that the contractor defrauded the first agency or simply is unaware of the relevant facts. This is a poor reflection on the Government's management and dedication to insuring that the taxpayer's dollars are spent wisely. The taxpayers deserve that the Government get a dollar's worth of value for a dollar spent, and this legislation will help to make this the rule rather than the exception.

Let me draw a parallel to the private sector. To prevent or minimize consumer fraud, an organization called the Better Business Bureau came into being. Now, every day, consumers call upon this bureau to check on businesses and contractors and their past dealings to find out whether the business or contractor is legitimate and responsible. Almost every State has created a consumer agency to prevent fraud. Should the Federal Government require any less in its business dealings?

This legislation attempts to correct the situation which allows a contractor to continue commiting fraud or irresponsible performance at more than one agency or department. We are creating a presumption that when a contractor commits such fraudulent or irresponsible acts he should not be allowed to continue doing so simply by moving on to a different agency or department. This is good management and we owe the taxpayer no less.

Today, within the Department of Defense, if a contractor is debarred or suspended by one of the services a presumption similar to one created by this legislation does now exist. The remaining services may not contract with that firm unless compelling reasons exist to do so. DOD should be commended for this approach but they, also, do not follow this business principle to its logical end. By this I mean that a presumption does exist within the services of DOD but this principle does not apply where the debarment or suspension was made by a non-DOD Federal agency. Thus, fraud against the Department of Energy would not raise a presumption applicable to any of the military services.

Sound business principles need to be encouraged within the Government if we are to ever really achieve reductions in waste and abuse. This legislation embodies one such sound business principle and I am hopeful the Congress will recognize it as such and act swiftly to insure its enactment. Every day we delay such action, the taxpayer suffers. I commend Senator LEVIN for his leadership in this area and hope that we may soon see progress toward making the system of Government procurement more efficient.●

SENATE RESOLUTION 246—RELATING TO THE HUNGER STRIKE OF ANDREI SAKHAROV AND YELENA BONNER

Mr. MOYNIHAN submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 246

Whereas, Andrei Dimitriyevich Sakharov has worked tirelessly and courageously for many years to secure basic human freedoms for citizens and residents of the Soviet Union, particularly those rights and freedoms proclaimed and guaranteed by the Final Act of the Conference on Security and Cooperation in Europe, signed, at Helsinki, August 1, 1975;

Whereas, Andrei Sakharov was awarded the 1975 Nobel Prize for Peace for "his love of truth and strong belief in the inviolability of human beings . . . his courageous defense of the human spirit . . .", and for his role as the "conscience of mankind";

Whereas, Andrei Sakharov has been an eloquent and outspoken champion of dissidents in the Soviet Union who have sought to have their government abide by its formal commitments to protect human rights, and who have suffered at the hands of the Soviet State in consequence;

Whereas, Andrei Sakharov has been subjected to villainous harassment, punishment, loss of his livelihood, and acts of physical violence by agents of the Soviet State in retaliation for his activities in defense of human rights;

Whereas, the harassment and persecution of Andrei Sakharov by the Soviet State has been aggravated by the refusal of Soviet authorities to allow Yelizaveta Alekseyeva, his stepson's fiancée, to join her intended husband, Aleksei Semyonov, in the United States, in flagrant violation of the Helsinki Accords signed by the Soviet Union;

Whereas, Andrei Sakharov and his wife Yelena Bonner, have announced their intention to commence a hunger strike on Sunday, November 22, 1981 in protest of this refusal by Soviet authorities because in Dr. Sakharov's words, they have found the "exploitation of the fates" of Mr. Semyonov and Miss Alekseyeva "for revenge and pressure against me to be mean, illegal and intolerable."

Whereas, the American people share the outrage of Dr. Sakharov and his wife at this illegal refusal of Soviet authorities to allow Miss Alekseyeva to emigrate;

Whereas, the government of the Soviet Union is responsible and accountable for the fate of Andrei Sakharov and his wife, Yelena: Now, therefore, be it

Resolved, That it is the sense of the Senate that the Congress associates itself fully and completely with the hunger strike protest by Andrei Sakharov and urges the government of the Soviet Union to abide by its commitments and to permit Yelizaveta Alekseyeva to emigrate.

SEC. 2. The Secretary of State is requested to transmit to the government of the Soviet Union a copy of this Resolution.

Mr. MOYNIHAN. Mr. President, I do not believe it is widely known or that it has been widely reported in the United States that tomorrow Dr. Andrei Dimitriyevich Sakharov and his wife, Yelena Bonner, have announced that they will begin a hunger strike as a consequence of the refusal by the Soviet authorities to allow Yelizaveta Alekseyeva, Dr. Sakharov's stepson's fiance, to join her intended husband in the United States. This refusal is done in flagrant violation of the Helsinki accords.

It is only the most recent humiliation, although, Mr. President, I would wish to withdraw that word. I was about to say the humiliation imposed upon this extraordinary man and his wife by the Soviet authorities. It is not because of the capacity of the Soviet Government to humiliate Andrei Sakharov.

He is the youngest member ever elected to the Soviet Academy, denied the company of his friends and the society in which he lived all his life, but now his family is being persecuted.

He has resorted to every possible effort to call attention to the nature of the Soviet regime by words and by actions. Having failed to move them, he now resorts to the final effort a person can undertake: he proposes to starve himself and his wife, with him, proposes the same.

This would be an event beyond imagination in the brutality it would entail.

The Soviets have only to issue an emigration visa, only to follow their commitments in the Helsinki agreement. They have not done so because they wish to persecute further this extraordinary person who, when he won the Nobel Peace Prize in 1975, was commended for "his love of truth and strong belief in the inviolability of human beings."

Yet the Soviet regime violates those rights, Mr. President, as much as it can, and as much as it can with impugnity.

I have a resolution, Mr. President, which I offer to the Senate for consideration next week, should this event develop now. It stresses the sense of the Senate that the Congress associate itself fully and completely with the protest by Andrei Sakharov in urging the Government of the Soviet Union to abide by its commitments.

ADDITIONAL STATEMENTS

HANDGUN CONTROL

● Mr. KENNEDY. Mr. President, Pete Shields, the chairman of Hangun Control, Inc., has recently authored an important book on one of the truly indefensible American tragedies—the escalating handgun violence that plagues our land. In "Guns Don't Die—People Do," Mr. Shields gives a personal and factual account of the urgent need to control the proliferation of handguns in the United States.

Last Sunday, the Washington Post carried a highly favorable review of Mr. Shields' book by Edwin M. Yoder, the former editorial page editor of the Washington Star. I share Mr. Yoder's view that this book should be in every home in America. Its powerful message should be heard and heeded by every citizen throughout the Nation. Most important for us in Congress, as Mr. Yoder writes, it is a book that "lays out the compelling case for realistic legislation."

In the same review, Mr. Yoder scathingly discusses a separate book that purports to defend the position of the National Rifle Association and others who oppose handgun control. On few, if any, issues that we face in Congress, are the facts and logic so overwhelmingly on one side. By a large majority, the American people favor realistic handgun control, and it is long past time for Congress to exercise its responsibility.

Mr. President, I hope all of my colleagues will take the opportunity to read Mr. Shields' book. I commend Mr. Yoder's thoughtful review to Members of the Senate, and I ask that it may be printed in the RECORD.

The review follows:

[From the Washington Post, Nov. 15, 1981]

THE AMERICAN WAY OF DEATH

(By Edwin M. Yoder, Jr.)

To disclose my bias at the outset, the handgun issue ceased to be an abstraction for me on that bleak early-December night almost a year ago when my friend Dr. Michael Halberstam was shot and killed by a burglar. Not that my experience is unusual. Having a friend or relative assaulted by handgun is now so commonplace in this country that 10,000 people acknowledged as much in response to the queries of Handgun Control Inc. last year.

The story of Handgun Control Inc. is in large measure the story of Nelson (Pete) Shields III. If there is a principle of justice in this naughty world, we may look forward to the day when a sensible president, having just signed an effective federal handgun-control law, will present the Medal of Freedom to Pete Shields: not only because he is one of the remarkable citizen-activists of our time but because his labor aims to renew that most essential of the four freedoms, freedom from fear.

Shields' passionate involvement in the crusade against the great U.S. handgun madness began, as so many deep commitments do, in personal sorrow. On a spring night in San Francisco seven years ago his 23-year-old son and namesake perished of random gunshot wounds in one of the malicious "Zebra" killings. Soon thereafter Shields took early retirement from his comfortable career as a du Pont marketing executive and enlisted in the effort to pass an effective federal handgun-control law. He was then 50. He quickly became its driving force.

In "Guns Don't Die—People Do," Pete Shields tells his story and lays out the compelling case for realistic legislation. It is a story, and a case, that every thoughtful citizen needs to examine with care.

Pete Shields knows as well as anyone that cold statistics rarely make people march, that the mobilization of a citizen's lobby demands that "victims" like the Shields' bear public witness to their losses and hurts. But if statistics alone could persuade, the statistics on the American handgun-death epidemic would do so. It is a national scandal. Every year, year upon year, some 10,000 Americans (immensely more than in any other country on earth) are murdered by handguns, while an equivalent number die of accidental or self-inflicted wounds from the same source. In the seven peak years of the Vietnam War (1966–72), U.S. handgun murders exceeded Asian combat deaths by some 20 percent: 52,000-plus to 42,300. Twelve of 13 U.S. presidential assassinations or attempted assassinations (including attempts upon presidential candidates) were with handguns. In 1973 alone, 751 people were victims of criminal homicide in Detroit (the vast majority by concealable pistol or revolver). That was more than the total number of civilians killed between 1969 and mid-1974 in strife-torn Northern Ireland. (The populations of Detroit and Northern Ireland are about the same.)

Thanks to the tireless obstruction of the National Rifle Association (which Shields and his allies have rightly come to think of and call "the pistol lobby") the congressional response to all this is disgracefully pussillantious. Indeed Congress is not merely passive: even today there is a bill (known as McClure-Volkmer) that would gut the modest law passed in 1968 after the shooting of Sen. Robert F. Kennedy.

The case for an effective federal handgun law, apart from the scandal of slaughter,

is essentially the wild variation in state and local laws. This patchwork assures a continuing traffic which, through laxity, theft and illicit sale, places cheap, concealable pistols and revolvers in the hands of criminals, lunatics, potential suicides and overexcitable people who kill one another in crimes of passion.

One gauge of the intellectual dishonesty of the pistol lobby is that the alleged ineffectiveness of state and local laws is ritually cited as the reason why federal law would be vain. But as Shields demonstrates, it is precisely the absence of uniform national standards (registration, a waiting period between purchase and delivery allowing law-enforcement officials to check character and criminal records, detailed record-keeping, etc.) that renders local and state efforts ineffective. For instance some Virginia suburbanites feel smug about the assault rates on the nearby streets of Washington. How many of them realize that about a third of the handguns that find their way to mischievous and deadly uses in the nation's capital are bought across the Potomac in Virginia? And no wonder, since the Old Dominion's firearms laws are as lax as any in the Union. Similarly, the tough strictures of New York's Sullivan Act, as amended, are undercut by the interstate traffic. Writes Shields: "A Treasury Department study in the early 1970s showed that over 90 percent of the handguns used in crime in New York came from out of the state. . . . For example, the handgun used to kill John Lennon was acquired in Hawaii and that used to kill former congressman Allard Lowenstein came from Connecticut."

Actually, the views, strategies and political successes of the pistol lobby remain a bit mysterious. For years polls have confirmed the belief of a majority of Americans (even among gun owners) in sensible federal handgun control. But the National Rifle Association, like many single-issue lobbies, seems to reflect almost exclusively the views of its most intense and militant minority; and indeed, the NRA is so structured that signs of softness or sense in its national headquarters are aggressively nipped. By distorting or ignoring the history and meaning of the Second Amendment; by conflating efforts to register handguns with imaginary plots to confiscate all firearms; by lavish campaign subsidies to congressional friends and fellow-travelers; by all these means and others the NRA and its allies manage still to swing a weight disproportionate to numbers and certainly to the merits of their case.

Some notion of the classic anti-control mentality is to be gained from Alan Gottlieb's. "The Rights of Gun Owners," presumably intended to act as a timely antidote to Handgun Control Inc. Since no good case is to be made, in fact or logic, against the moderate and limited legislative goals of Shields and his allies, the pistol lobby must necessarily resort to what one English statesman has called, in another connection, "suggestio falsi, suppressio veri and plain damned nonsense." There is much of all three in Gottlieb's book.

Under suggestio falsi (more commonly known as attacking straw men), it is the constant intimation of Gottlieb's book that the "gun-controllers," as they are scornfully called, believe they can reduce or even eliminate crime itself (not just gun-assisted or homicidal crime), that private pistol ownership is a constitutional right, not a privilege; that government is poised for some sort of "handgun confiscation program"; that otherwise sensible people regard gun ownership per se as the "real cause of crime in America."

Under suppressio veri (overlooking relevant truth), Gottlieb's whopper is the careful concealment of the discreditable truth that orginizations like his own "Citizens Committee for the Right to Keep and Bear Arms" rarely if ever support any federal gun-control legislation, however limited, and usually obstruct it at every turn.

As for the plain nonsense, take your choice. Gottlieb has the slippery habit of making the Founding Fathers (especially those who drafted the Second Amendment) sound like precocious lobbyists for the National Rifle Association. My history books, curiously, rarely if ever mention Thomas Jefferson's obsession with firearms. I wonder, too, whether George Washington actually said that "firearms stand next in importance to the Constitution itself" and "deserve a place of honor with all that's good." (He seems to have thought otherwise when he sent an army under Alexander Hamilton to disarm and disband rebellious moonshiners in Pennsylvania.) But in any case, the searcher for verification of these and other quotations will be in deep trouble unless he keeps a library of pistol-lobby books and periodicals. The statement attributed to Washington is footnoted, so help me, to an editorial in Vigilante, "Summer 1977, p. 6." Alas, I do not subscribe to that publication, nor in fact to American Rifleman, Rifle, or Gun Week, some of Gottlieb's other references.

Not without reason do such mischievous and mendacious screeds as this breathe a certain air of beleaguered desperation, along with their weird rhetorical tactics. The march of Pete Shields' growing hosts can be heard in the distance and maybe the pistol lobby is scared. It ought to be.●

CONGRESS MUST SUPPORT THE PRESIDENT

● Mr. SYMMS. Mr. President, my good friend, Ralph Smeed, writes a weekly provocative and entertaining column in my hometown newspaper, the Idaho Press-Tribune of Nampa and Caldwell, Idaho. I found Ralph's column which was published on October 25 of particular importance.

He points out the dangers in the Congress losing the courage to back President Reagan's program, indeed his mandate, to provide less government. To abandon now the President's program of reduced Federal spending, reduced Federal taxes and reduced Federal Government regulation would surely lead to the destruction of the road which the President is constructing to bring about the restoration of individual freedom in this country.

I urge my colleagues to read this column carefully. Mr. President, the Congress must remain firm in its support of President Reagan's efforts to get this country moving in the right direction once again. I ask that this column be printed in the RECORD.

The column follows:

CONGRESS ALL BUT SOLD US OUT

(By Ralph Smeed)

If there is anybody in the state of Idaho who has had better conservative credentials than Ralph Smeed I don't know who such a person is. There are those who credentials are as good, but, in my opinion, none better.

I say this because I fear we conservatives may not have all the answers, at least politically speaking, that I once thought we had. I once thought all our country's problems each had a simple solution—elect a conservative. He was more apt to have common sense, be fiscally conservative, be honest and sincere, cut out waste and, generally speaking, make government efficient. (For this last, forgive me).

As things were and had been for over 30 of the last 35 years the liberals had things so terribly screwed up that almost any change, I thought, was certain to be a tremendous improvement.

Well, I still think the liberals were and are, in fact, big spending if not irresponsible idealists whose political panacea for every problem is to throw a bundle of government money (not theirs) at it and it would sure go away. If it did not go away, well, "We just didn't throw enough money at it," they'd retort. This danger is still with us, I'm afraid, but not all on account of the liberals.

President Reagan's election, if it said anything at all, told us that the American public wanted "less government and more defense." After all, President Lyndon Johnson convinced us that we could have both guns and butter so we did not raise taxes for a pay-as-you-go war. Now we're being coaxed to go in a similar direction by almost everybody but Reagan himself and a pitifully few others. The rest of the congress has all but sold us out, saying: "Because of the political difficulty of real budget control there is no alternative but to postpone the scheduled tax rate cuts, allow inflation once again to boost taxes surreptitiously and go back to all of the old liberal ways."

Today the national debt is a liberal trillion dollars—that's one followed by 12 zeroes. The interest alone (and don't kid yourself, this will be paid by someone by blood, by guts or by a dictator) computed at today's 20 percent rate is $20,000,000,000. That's 20 billion dollars—each year. Just think how hard it would be to get the congress to vote a one-time billion dollar appropriation (not to mention 20) today, even for, say, highway repair. And the interest is each and every year and getting worse.

Also each year is the military appropriation, not just a one-time appropriation. That's $130 or $140 billion each year. Ye gods! But, you may say, not all the debt pays 20 percent interest. True enough. But just how long do you think it will be before it does?

Comes now those baddies, the liberals. I thought some years ago, they were all bad, remember? Well now they are screaming "hold that line, hold that line, hold that line." I wonder why, of course, but I'm glad—I guess. I think they begin to fear something.

Maybe, just maybe, they fear we might be losing our freedom(s). To their everlasting credit the liberals seem to have a sixth sense about freedom, especially the loss of it. At least in the abstract they sense it.

Oh, sure, they don't usually see the connection between private ownership and freedom. Certainly the news media liberals don't see it. If they do, they're against it. But some of the liberal intellectuals are beginning to see it. And it is those idea-people, mostly liberals I'm afraid, whose articulate spokesmen led us into this mess who may now hold the way out—in their very capable hands. Capable, at any rate, when it comes to leading the great "unwashed" masses who may vote for the leaders who love liberty and, God help us, now responsibility.

It was the late, great liberal George Orwell, himself a genuine socialist, who long ago gave us his famous books: "Animal Farm" and the now famous, because it's here, "1984," that so vividly explained the tyranny of modern big government—communism. (Where were the conservative authors then?) I know but few conservatives, even today at this late date, who have read both of Orwell's classics.

Thank Heaven Reagan is one of those conservatives who reads. He's read Orwell, too, but he isn't getting much help—at least not enough—from conservatives who claim to love economic liberties and property rights, nor liberals who claim to love personal liberties and human rights. Neither side wants to give an inch.

But what is a human right without a property right? And how long can the former last without the latter? Not long—as we're beginning to find out.

The great libertarian scholar, Murray Rothbard, explains that a property right is merely the extension of a human right. So perhaps we should help Reagan get the liberals to run the U.S. foreign policy and push human rights—without the federal checkbook.

Unfortunately, if they agreed to do that, he'd probably expect us conservatives to run the domestic policy and push property rights—without a subsidy for business.●

PRIVILEGE OF THE FLOOR

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that two members of my staff, Robert Potts and Richard Billmire be accorded the privilege of the floor during the remainder of today's session and throughout the session tomorrow if any such session occurs.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, earlier today I obtained an order for the Senate to convene in the morning at 9 a.m. After consulting with a number of Senators and with the Chaplain I think it might be wise to change that hour.

ORDER FOR RECESS UNTIL 1:30 P.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent now that when the Senate completes its business today it stand in recess until the hour of 1:30 p.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, the conferees are still at work. There is still hope that they can complete their work yet this evening and that the House of Representatives can act and transmit the message to the Senate for our action this evening.

I cannot be sure of that. But there is a sufficient basis to hope for that.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. BAKER. Mr. President, while we wait the further action of the conference, I ask unanimous consent that the Senate now stand in recess subject to the call of the Chair.

There being no objection, the Senate, at 7:28 p.m. took a recess, subject to the call of the Chair.

The Senate reassembled at 9:11 p.m., when called to order by the Presiding Officer (Mr. BAKER).

(Remarks of Mr. GARN at this point are printed under the proceedings on the HUD conference report.)

RECESS SUBJECT TO THE CALL OF THE CHAIR

The PRESIDING OFFICER. The Senate will stand in recess, subject to the call of the Chair.

Thereupon, at 9:13 p.m., the Senate recessed, subject to the call of the Chair.

The Senate reassembled at 10:27 p.m., when called to order by the Presiding Officer (Mr. RUDMAN).

ORDER OF BUSINESS

Mr. BAKER. Mr. President, the House of Representatives has recessed over until tomorrow at 1 p.m., I am informed. The conference on the disagreeing votes of the two Houses is still in progress.

I am still hopeful that the conference committee can resolve the differences in the two bills and be in a position to report the bill first to the House of Representatives tomorrow.

There is no possibility that the Senate can act on the conference report tonight under these circumstances.

There is already an order for the Senate to convene tomorrow at 1:30 p.m.

RECESS UNTIL TOMORROW AT 1:30 P.M.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now stand in recess until 1:30 p.m. tomorrow.

There being no objection, at 10:28 p.m., the Senate recessed until Sunday, November 22, 1981, at 1:30 p.m.

HOUSE OF REPRESENTATIVES—*Saturday, November 21, 1981*

Legislative day of Friday, November 20, 1981

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 10 a.m., Saturday, November 21, 1981.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

The land has produced its harvest; God, our God, has blessed us. God has blessed us; may all people everywhere honor Him.—Psalm 67: 6, 7.

Almighty God, we thank You for the abundant gifts You have bestowed upon us and upon our Nation. With the advent of the season of Thanksgiving make us aware of how we may use our blessings for the benefit of all people. May we be good stewards of the harvest of the Earth that the needy among us will be satisfied and the hungry will not be turned away. May we know the joy that comes when we reach out to the least among us for in so doing we reach out even to You. In Your name, we pray. Amen.

ENCOURAGING WORDS FOR CONTINUING RESOLUTION CONFEREES

(Mr. CONABLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONABLE. Mr. Speaker, I want to encourage the conferees on the continuing resolution to hang in there and to try to preserve the basic direction that the majority of the House and the majority of the Senate have established during the early life of the 97th Congress.

At a time when we seem to have increasing doubts about our capacity for self-government, maintenance of basic fiscal discipline in the face of all these pressures for uncontrolled Government spending is critically important. I know it is a tough job they have, and I would only wish to encourage them now to do what they can to preserve control rather than dashing the hopes of change which are not only the administration's, but the Congress mandate.

I regret that this effort is necessary in a continuing resolution, which is in itself a copout of sorts, but we have to do what we can at this point to retain the confidence of the people.

CONFERENCE REPORT ON S. 1098, NASA AUTHORIZATIONS, FISCAL YEAR 1982

Mr. FUQUA submitted the following conference report and statement on the Senate bill (S. 1098) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 97-351)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 1098 to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

That there is hereby authorized to be appropriated to the National Aeronautics and Space Administration to become available October 1, 1981:

(a) For "Research and development", for the following programs:

(1) Space Shuttle, $2,189,000,000;

(2) Space flight operations, $907,900,000;

(3) Expendable launch vehicles, $31,200,000;

(4) Physics and astronomy, $333,400,000;

(5) Planetary exploration, $215,300,000;

(6) Life sciences, $43,500,000;

(7) Space applications, $398,600,000;

(8) Technology utilization, $12,600,000;

(9) Aeronautical research and technology, $284,800,000;

(10) Space research and technology, $129,300,000; and

(11) Tracking and data acquisition, $408,180,000.

(b) For "Construction of facilities", including land acquisition, as follows:

(1) Modification of 12-foot pressure wind tunnel, Ames Research Center, $18,500,000;

(2) Modifications to space flight operations facility, Jet Propulsion Laboratory, $9,300,000;

(3) Rehabilitation of utility control system, various buildings, Lyndon B. Johnson Space Center, $680,000:

(4) Construction of waste material incinerator, John F. Kennedy Space Center, $895,000;

(5) Repair of operations and checkout building roof, John F. Kennedy Space Center, $825,000;

(6) Modifications for enhanced 20-inch supersonic wind tunnel, Langley Research Center, $2,950,000;

(7) Modifications for high pressure turbine corrosion and thermal fatigue testing, Lewis Research Center, $1,200,000;

(8) Modification and relocation of 26-meter antenna, STDN, Goldstone, California, $4,700,000;

(9) Relocation of DSS-44 antenna to Tidbinbilla, Australia, $2,200,000;

(10) Space Shuttle facilities at various locations as follows:

(A) Construction of solid rocket booster processing and segment storage facilities, John F. Kennedy Space Center, $12,400,000;

(B) Modifications to firing rooms, John F. Kennedy Space Center, $3,100,000;

(C) Modification of manufacturing and final assembly facilities for external tanks, Michoud Assembly Facility, $2,785,000;

(D) Modifications to Building 30 for Shuttle operations, Lyndon B. Johnson Space Center, $650,000;

(E) Minor Shuttle-unique projects, various locations, $1,115,000;

(11) Repair of facilities at various locations, not in excess of $500,000 per project, $12,800,000;

(12) Rehabilitation and modification of facilities at various locations, not in excess of $500,000 per project, $17,700,000;

(13) Minor construction of new facilities and additions to existing facilities at various locations, not in excess of $250,000 per project, $2,320,000; and

(14) Facility planning and design not otherwise provided for, $10,000,000.

(c) For "Research and program management", $1,114,300,000 and such additional or supplemental amounts as may be necessary for increases in salary, pay, retirement, or other employee benefits authorized by law.

(d) Notwithstanding the provisions of subsection 1(g), appropriations hereby authorized for "Research and development" may be used (1) for any items of a capital nature (other than acquisition of land) which may be required at locations other than installations of the Administration for the performance of research and development contracts, and (2) for grants to nonprofit institutions of higher education, or to nonprofit organizations whose primary purpose is the conduct of scientific research, for purchase or construction of additional research facilities; and title to such facilities shall be vested in the United States unless the Administrator determines that the national program of aeronautical and space activities will best be served by vesting title in any such grantee institution or organization. Each such grant shall be made under such conditions as the Administrator shall determine to be required to insure that the United States will receive therefrom benefit adequate to justify the making of that grant.

None of the funds appropriated for "Research and development" pursuant to this Act may be used in accordance with this subsection for the construction of any major facility, the estimated cost of which, including collateral equipment, exceeds $250,000, unless the Administrator or his designee has notified the Speaker of the House of Representatives and the President of the Senate and the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate of the nature, location, and estimated cost of such facility.

(e) When so specified and to the extent provided in an appropriation Act, (1) any amount appropriated for "Research and development" or for "Construction of facilities" may remain available without fiscal year limitation, and (2) maintenance and operation of facilities, and support services contracts may be entered into under the "Research and program management" appropriation for periods not in excess of 12 months beginning at any time during the fiscal year.

(f) Appropriations made pursuant to subsection 1(c) may be used, but not to exceed $25,000, for scientific consultations or extraordinary expenses upon the approval or authority of the Administrator and his determination shall be final and conclusive upon the accounting officers of the Government.

(g) Of the funds appropriated pursuant to subsections 1(a) and 1(c), not in excess of $75,000 for each project, including collateral equipment, may be used for construction of new facilities and additions to existing facilities, and for repair, rehabilitation, or modification of facilities: Provided, That, of the funds appropriated pursuant to subsection 1(a), not in excess of $250,000 for each project, including collateral equipment, may be used for any of the foregoing for unforeseen programmatic needs.

SEC. 2. Authorization is hereby granted whereby any of the amounts prescribed in paragraphs (1) through (13), inclusive, of subsection 1(b)—

(1) in the discretion of the Administrator or his designee, may be varied upward 10 percent, or

(2) following a report by the Administrator or his designee to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate on the circumstances of such action, may be varied upward 25 percent,

to meet unusual cost variations, but the total cost of all work authorized under such paragraphs shall not exceed the total of the amounts specified in such paragraphs.

SEC. 3. Not to exceed one-half of 1 percent of the funds appropriated pursuant to subsection 1(a) hereof may be transferred to the "Construction of facilities" appropriation, and, when so transferred, together with $10,000,000 of the funds appropriated pursuant to subsection 1(b) hereof (other than funds appropriated pursuant to paragraph (14) of such subsection) shall be available for expenditure to construct, expand, or modify laboratories and other installations at any location (including locations specified in subsection 1(b)), if (1) the Administrator determines such action to be necessary because of changes in the national program of aeronautical and space activities or new scientific or engineering developments, and (2) he determines that deferral of such action until the enactment of the next authorization Act would be inconsistent with the interest of the Nation in aeronautical and space activities. The funds so made available may be expended to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment. No portion of such sums may be obligated for expenditure or expended to construct, expand, or modify laboratories and other installations unless (A) a period of 30 days has passed after the Administrator or his designee has transmitted to the Speaker of the House of Representatives and to the President of the Senate and to the Committee on Science and Technology of the House of Representatives and to the Committee on Commerce, Science, and Transportation of the Senate a written report containing a full and complete statement concerning (i) the nature of such construction, expansion, or modification, (ii) the cost thereof including the cost of any real estate action pertaining thereto, and (iii) the reason why such construction, expansion, or modification is necessary in the national interest, or (B) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

SEC. 4. Notwithstanding any other provision of this Act—

(1) no amount appropriated pursuant to this Act may be used for any program deleted by the Congress from requests as originally made to either the House Committee on Science and Technology or the Senate Committee on Commerce, Science, and Transportation,

(2) no amount appropriated pursuant to this Act may be used for any program in excess of the amount actually authorized for that particular program by subsections 1(a) and 1(c), and

(3) no amount appropriated pursuant to this Act may be used for any program which has not been presented to or requested of either such committee,

unless (A) a period of 30 days has passed after the receipt by the Speaker of the House of Representatives and the President of the Senate and each such committee of notice given by the Administrator or his designee containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action, or (B) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

SEC. 5. It is the sense of the Congress that it is in the national interest that consideration be given to geographical distribution of Federal research funds whenever feasible, and that the National Aeronautics and Space Administration should explore ways and means of distributing its research and development funds whenever feasible.

SEC. 6. Section 7 of title 18, United States Code, is amended by inserting at the end thereof the following new paragraph:

"(6) Any vehicle used or designed for flight or navigation in space and on the registry of the United States pursuant to the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, Including the Moon and Other Celestial Bodies and the Convention on Registration of Objects Launched into Outer Space, while that vehicle is in flight, which is from the moment when all external doors are closed on Earth following embarkation until the moment when one such door is opened on Earth for disembarkation or in the case of a forced landing, until the competent authorities take over the responsibility for the vehicle and for persons and property aboard.".

SEC. 7. The National Aeronautics and Space Act of 1958, as amended, is amended by inserting at the end of section 305, the following new subsections:

"(k) Any object intended for launch, launched, or assembled in outer space shall be considered a vehicle for the purpose of section 272 of title 35, United States Code.

"(l) The use or manufacture of any patented invention incorporated in a space vehicle launched by the United States Government for a person other than the United States shall not be considered to be a use or manufacture by or for the United States within the meaning of section 1498(a) of title 28, United States Code, unless the Administration gives an express authorization or consent for such use or manufacture.".

SEC. 8. Section 6 of the National Aeronautics and Space Administration Authorization Act, 1970, as amended (42 U.S.C. 2462), is repealed.

SEC. 9. Appropriations hereby authorized for space transportation system upper stages in section 1(a)(2) shall not be used to initiate sole-source procurement of a new upper stage until NASA in cooperation with other agencies has reviewed alternative systems and assessed competitive procurement of a new upper stage to satisfy national requirements, and until 30 days after reporting its findings to the authorizing committees of the House of Representatives and the Senate.

SEC. 10. This Act may be cited as the "National Aeronautics and Space Administration Authorization Act, 1982".

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 1098 to authorize appropriations to the National Aeronautics and Space Administration for fiscal year 1982 for Research and Development, Construction of Facilities, and Research and Program Management, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the disposition of the differences agreed upon by the managers and recommended in the accompanying conference report.

The NASA original request for fiscal year 1982 totaled $6,725,700,000 and the revised

request totaled $6,122,200,000. The Senate authorized $6,222,900,000 and the House amendment authorized $6,122,120,000. The committee of conference agrees to a total authorization for fiscal year 1982 of $6,172,200,000 as follows:

SUMMARY OF ADJUSTMENTS TO S. 1098—NASA FISCAL YEAR 1982 AUTHORIZATION

[In thousands of dollars]

	Budget request	Revised budget request	House action	Senate action	Committee of conference
Research and development:					
Space Shuttle	2,230,000	2,194,000	2,134,000	2,189,000	2,189,000
Space flight operations	1,043,000	910,900	903,900	914,900	907,900
Expendable launch vehicles	31,200	31,200	31,200	31,200	31,200
Physics and astronomy	451,400	325,400	350,400	333,400	333,400
Planetary exploration	256,100	215,300	215,200	215,300	215,300
Life sciences	49,200	43,500	49,200	43,500	43,500
Space applications	472,900	372,900	410,900	398,600	398,600
Technology utilization	14,600	4,600	12,600	12,600	12,600
Aeronautical research and technology	323,600	264,800	264,800	316,000	284,800
Space research and technology	141,000	125,300	129,300	130,300	129,300
Energy technology	4,400	0	2,000	0	0
Tracking and data acquisition	435,200	415,200	400,200	415,200	408,180
Total	5,452,600	4,903,100	4,903,700	5,000,000	4,953,780
Construction of facilities	136,800	104,800	104,120	104,800	104,120
Research and program management	1,136,300	1,114,300	1,114,300	1,118,100	1,114,300
Grand total	6,725,700	6,122,200	6,122,120	6,222,900	6,172,200

The Conferees are concerned about the continuing downward trend (in real dollars) of the NASA budget. A strong civilian science and technology base to which NASA is a major contributor is essential to sustaining a strong economy and a credible national defense. Federal expenditures on our national space program are an investment in our future and lead to increased productivity, increased employment and contribute greatly to a positive balance of trade.

As a result of budget constraints that have been placed on NASA over the past few years, additional reductions in this and future fiscal years threaten even further the ability of the agency to fulfill the mandate of the National Aeronautics and Space Act of 1958. The conferees strongly believe that a balanced civilian space program as set out in the National Aeronautics and Space Act of 1958 is even more relevant today and direct NASA to do everything possible to maintain an effective balanced space program.

The Conferees realize that under the current budgetary situation priorities must, however, be set. Consequently, the Committee of Conference recognizes that the space shuttle program is the highest priority and therefore expects NASA to maintain its current delivery schedule for orbiter vehicle 104 and proceed with the current flight rate.

The points in disagreement and the conference resolution of them are as follows:

1. NASA requested $2,194,000,000, a reduction of $36 million from the original budget request, for the Space Shuttle program.

The House authorized $2,134,000,000, including a reduction of $60 million in changes and systems upgrading activities.

The Senate authorized $2,189,000,000, a reduction of $5 million from the revised budget request, reducing funding for the fifth orbiter.

The Committee of Conference adopts the Senate position to assure that the delivery schedule for orbiter vehicle 104 is maintained. The Conferees further direct that, within available funds, NASA should procure long-lead materials necessary to maintain the most efficient production schedule for a fifth Space Shuttle orbiter.

2. NASA requested $910,900,000, a reduction of $132.1 million from the original budget request, for the Space Flight Operations program.

The House authorized $903,900,000, a reduction of $7 million from the NASA revised request. This reduction is the net result from a decrease of $7 million in STS upper stage development, an increase of $8 million for solar electric propulsion (SEPS) advanced technical development, an increase of $5 million for advanced program studies, and a reduction of $13 million in upper stage operations.

The Senate authorized $914,900,000, an increase of $4 million from the NASA request. This additional funding continues SEPS advanced technical development and design activities.

The Conference substitute authorizes $907,900,000 including $12,800,000 for advanced programs and $4,000,000 for solar electric propulsion advanced technical development activities. The Conferees expect NASA to maintain as highest priority the orbiter delivery schedules and flight rates proposed in the March revised 1982 budget request. Although the Conferees recognize the broad capabilities that a Centaur upper stage would provide, the immediate driver for Centaur development is the Galileo mission launch in 1985. Consequently, commitment to launch Galileo in 1985 is essential before proceeding with Centaur development.

3. NASA requested $325,400,000, a reduction of $126 million from the original budget request, for the Physics and Astronomy program.

The House authorized $350,400,000, increasing the revised request by $25 million. The House included $15 million to allow development of the International Solar Polar Mission (ISPM) in a timely manner for a two-spacecraft mission, and $10 million for increased support for Shuttle/Spacelab instrument development.

The Senate authorized $333,400,000, an increase of $8 million over the NASA revised budget request to provide additional support for Shuttle/Spacelab instrument development and included adequate funding for ISPM to maintain the option for a two-spacecraft mission.

The Conferees adopt the Senate position and strongly encourage the NASA Administrator to honor U.S. commitments with respect to the ISPM mission. If the full mission cannot be supported, the United States should honor its international commitments for instrument development, launch, and tracking and data services for the European spacecraft.

4. NASA requested $215,300,000, a reduction of $40.8 million from the original budget request, for the Planetary Exploration program.

The House authorized $215,200,000, reducing the revised request by $0.1 million. The House reduced the funds for the Galileo program by $5.1 million and included a contingent authorization of $5 million to retain an option for a Halley Comet mission. The House authorized NASA, within available funds and after appropriate notification, to proceed with the Infrared Telescope Mid-Level Facility.

The Senate authorized the revised budget request, $215,300,000.

The Conferees adopt the Senate position but authorizes NASA to proceed with the Infrared Telescope Mid-Level Facility within available funds. The Conferees in providing for a fully funded Galileo mission want to reemphasize the importance of a vigorous planetary exploration program. This is an area in which the U.S. has led the world yet, looking ahead, the planetary science community needs new missions to maintain a viable program. The United States faces a 50 month gap during which no new planetary data will be returned from United States spacecraft thus relinquishing our leadership to other countries. For example, the Soviets, the Japanese and the European Space Agency are all planning Halley Comet missions. While it is recognized that NASA must set internal priorities within current budget constraints; the conferees expect NASA to maintain a balance among space science and planetary exploration and the overall objectives of the agency.

5. NASA requested $43,500,000, a reduction of $5.7 million from the original budget request, for the Life Sciences program.

The House authorized $49,200,000, restoring the funding to the level of the original request.

The Senate authorized the revised budget request, $43,500,000.

The Committee of Conference adopts the Senate position but is concerned that continuing reductions in these efforts will delay the availability of live support technology to support future long-duration manned space flight.

6. NASA requested $372,900,000 for the Space Applications program, a reduction of

$100 million from the original budget request.

The House authorized $410,900,000. This funding allows for initiation of a geological applications program ($10 million) in the resource observations area; development of upper atmospheric research satellite experiments at a reduced level ($15 million); continued work in technology transfer ($9 million); an increase in materials processing activities ($4 million), and an increase for communication and information system activities ($5 million).

The Senate authorized $398,600,000 which allows for development of upper atmospheric research satellite experiments at a reduced level of $15 million, continued technology transfer work at a level of $8 million, an increase in materials processing activities of $4 million, and an increase of $3.7 million for the proposed operational evaluation of the search and rescue project.

The Committee on Conference adopts the Senate position. The Conferees recognize that NASA's space applications program has significantly contributed to our understanding of weather and climate process's and atmospheric changes, enabling better forecasting; monitoring of agricultural production; identifying fuel and non-fuel minerals; and improved land use management. These benefits, in addition to research and development in materials processing and communications are critical elements of utilizing space technology for direct terrestrial applications.

The Conferees are concerned about any de-emphasis of civil space applications technology and therefore urge NASA to continue to maintain a strong research and technology program and ensure that these technologies are effectively made available for use of other government agencies and for private sector commercialization.

7. NASA requested $264,800,000 for the aeronautical research and technology programs, a reduction of $58.8 million from the original budget request.

The House authorized the revised budget request, $264,800,000.

The Senate authorized $316,000,000 for the aeronautical research and technology program, increasing the revised request by $51.2 million. This increase will be applied to various areas including advanced turboprop (or prop-fan), advanced aircraft composites, high speed aircraft technology, commuter aircraft technology, critical aircraft resources, active controls, technology, and laminar flow control technology.

The Conferees are conerned with a recent trend toward lower levels of Federal support for aeronautical research and technology development. NASA's research and technology for decades has been the wellspring for U.S. aviation development from which the nation's military, commercial and general aviation leadership has evolved. This has meant millions of jobs for Americans with a wide range of trade and professional skills in every region of the country. It has meant billions in favorable balance of trade over the years. In 1980 alone the aviation industry's net contribution to foreign trade has been $13 billion. It has meant billions of dollars returned to the Federal treasury in tax revenues.

The Conferees believe that the Nation's economic recovery program will be served best by moderating the proposed reductions in those highly selective areas where government outlays actually constitute an investment in future international competitiveness. The aviation industry stands out as a clear case in point. Its ability to maintain its preeminent position in the world should be strengthened, not weakened. That leadership is now for the first time in the history of aviation severely threatened by advanced technology developments through consortia of governments and industry in Europe and Japan. The Conferees are unwilling to risk future disaster in this industry of the kind already encountered in several of the Nation's strongest industries.

Accordingly, the Conference substitute authorizes $284,800,000, with the increase above the revised request to be used for acceleration of advanced turboprop technology, large composite primary aircraft structures, high speed transport technology (structures, aerodynamics and propulsion), commuter aircraft technology, critical aircraft resources, active controls technology, and exploratory or feasibility studies pertaining to a possible future numerical aerodynamic simulator.

8. NASA requested $125,300,000 for the space research and technology program, a reduction of $15.7 million from the original budget request.

The House authorized $129,300,000, increasing the revised request by $4 million. This includes increases of $2 million in each of the two following areas: Advanced chemical propulsion and information systems technology.

The Senate authorized $130,300,000, increasing the revised request by $5 million in the research and technology base.

The Conference authorizes $129,300,000, including $4 million for advanced chemical propulsion, information systems, space power, and electric and laser propulsion technologies.

9. NASA requested no funding for the Energy Technology program, a reduction of $4.4 million from the original budget request.

The House authorized $2,000,000, an increase of $2 million over the NASA revised request, to continue energy technology at a reduced level.

The Senate authorized the revised budget request for no funding.

The Committee on Conference adopts the Senate position. The Conferees recognize past contributions of space technology to solve some of our energy problems and the potential for continued contributions in the area of solar technologies, fuel cell technologies and energy conversion efficiencies. Therefore, the conferees request NASA to review its role in conducting its own research on energy technologies that result from space related research and development.

10. NASA requested $415,200,000 for the Tracking and Data Acquisition program, a reduction of $20 million from the original budget request.

The House authorized $400,200,000, a reduction of $15 million from the revised request in operations activities.

The Senate authorized the revised budget request $415,200,000.

The Committee on Conference authorizes $408,180,000 for tracking and data acquisition activities.

11. NASA requested $104,800,000 for Construction of Facilities, a decrease of $32 million from the original budget request.

The House authorized $104,120,000, a $0.68 million decrease from the revised request resulting in deferrals in the following three projects: (a) The Construction of an Addition to the Rehabilitation of Environmental Research Laboratory, Building 2423 for $190,000; (b) The Construction of an Occupational Health Facility Addition to Build 1100 for $245,000; and (c) Construction of Engineering Services Building for $245,000.

The Senate authorized the revised request.

The Conferees authorized $104,120,000 for construction of facilities activities including $2,320,000 for minor construction of new facilities and additions to facilities.

12. NASA requested $1,114,300,000 for Research and Program Management activities, a decrease of $22 million from the original request.

The House authorized the revised request.

The Senate authorized $1,118,100,000, an increase of $3.8 million over the revised request.

The Committee of Conference adopts the House position.

13. NASA recommended the inclusion of section 7 which amends section 305 of the National Aeronautics and Space Act of 1958.

In agreement with NASA the House amended section 7 to clarify its provisions and to conform them to existing law.

The Senate adopted the original NASA language.

The Committee of Conference adopts the House language.

14. The House amendment included a new section 9 which would prohibit the use of funds for the sole source procurement of a new upper stage until NASA reassesses the requirements of other agencies; reassesses the viability of competitive procurement; and reports its findings to the authorizing committees of the House and Senate.

The Senate bill did not include the foregoing language.

The Committee of Conference adopts the House language but includes a 30 day reporting period before NASA may proceed with a new upper stage development after reporting its findings.

15. The House amendment included a new section 10 which would permit use of $5 million of the funds authorized in Section 1(a)(5) for the Halley Intercept Mission only if such funds were requested in a message to Congress from the Administrator.

The Senate bill did not include the foregoing section.

The Committee of Conference adopts the Senate position.

16. The House amendment included general provision language as provided in the original bill submitted by NASA.

The Senate bill included a number of technical amendments to the bill submitted by NASA.

The Committee of Conference adopts the House language.

COMMUNICATIONS FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communications from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
November 19, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: On November 12, 1981, compliance with a subpoena to testify or produce documents or things for long distance telephone toll records issued upon application of the United States Attorney for the Eastern District of Pennsylvania by the United States District Court for the District of Columbia in *United States* v. *Joshua Eilberg,* Civ. Action No. 79-1623 (E.D. Pa.) was effected. In addition, the deposition of W. Raymond Colley, Deputy Clerk, was taken adducing testimony concerning the custodianship and handling of these records by my office.

This is to notify you, pursuant to the provisions of section 5 of House Rule L(50) of the Rules of the House of Representatives so that you may so inform the House.

Prior to compliance, this office attempted to make the necessary determinations concerning jurisdiction, materiality and relevancy and whether the subpoena was consistent with the rights and privileges of the House.

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

WASHINGTON, D.C.,
November 19, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: On or about November 11, 1981, I was served with a deposition subpoena to testify or produce documents and things issued by the United States District Court for the Eastern District of Virginia, commanding production of documents, including all correspondence, memoranda, reports within my possession and control relating to the conduct of an investigation by the House Select Committee on Aging in connection with a civil action into abuses in the sale of supplemental health insurance to the elderly in which several House employees are named defendants. *Glenda Brown* v. *American Broadcasting Companies, Inc., et al.,* Civ. Action No 81-0871-A (E.D. Va.). The subpoena was caused to be issued by American Broadcasting Companies, Inc., also a defendant in the above entitled action.

Pursuant to the provisions of Rule L(50) of the Rules of the House of Representatives, this is to notify you of receipt of the subpoena, and that I will be making the determinations required by Rule 50 concerning jurisdiction, materiality and relevancy and whether the subpoena contravenes the rights and privileges of the House.

Because the subpoena demands production of documents relating to an action in which employees of the House are named defendants relating to the performance of official investigative functions of the House Select Committee on Aging, it will be necessary for me to consult with the Committee as well in making the necessary determinations.

The subpoena is available in my office for inspection by Members.

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair desires to make the following announcement:

Yesterday it was announced that Members would be given 3 hours notice when the conference had been completed. In view of the fact that the Members had been notified last night that the House would be in recess until 10 o'clock this morning, we can forgo that, so the Chair asks the Members to be on alert, and when the conference committee report has been completed and written, the report will be filed and called up in the House with only the customary 15 minutes formal notice, and not necessarily 3 hours.

Mr. BRODHEAD. Mr. Speaker, can someone give us some idea of where things stand at the moment, or whether we should plan for this afternoon and this evening?

The SPEAKER. At 10 o'clock this morning the conferees have resumed deliberations. The Chair has also received notification from Mr. ROSTENKOWSKI that the social security conference could meet today, and he and Senator DOLE have high hopes that they can complete that. There could be a possibility that the House could bring that conference report up.

The Members themselves would have to watch the conferees as they are deliberating. They go into session at 10 o'clock this morning, so the Chair has no knowledge as to when they might conclude. Members will just have to play it by ear.

Mr. LAFALCE. Mr. Speaker, the Chair has indicated that he would give us 15 minutes notice after the conference report is written. Can we get some prior notice upon completion of the conference itself?

The SPEAKER. That would be common knowledge as to when the conference will be completed. Then, it normally takes at least a couple of hours to write the report. Then, the leadership will notify Members informally through the whip organization on both sides when the conference report has been completed. Then, 15 minutes after the report has been completed, the House will reconvene.

Mr. LAFALCE. Thank you, Mr. Speaker.

RECESS

The SPEAKER. Pursuant to the order of the House of November 19, 1981, the Chair declares the House in recess subject to the call of the Chair.

Bells will be rung 15 minutes before the House reconvenes.

Accordingly (at 10 o'clock and 8 minutes a.m.), the House stood in recess subject to the call of the Chair.

□ 2000

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 10 p.m.

LEGISLATIVE PROGRAM

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, the conferees on the continuing appropriation bill are still meeting. There have been several offers back and forth and I think one now is pending that is being considered seriously. I do not know whether it bodes well for an agreement later tonight. If it is, it will be much later tonight.

Therefore, there is not any reason for us to stay around. It has been generally agreed that whatever happens will take so long to get put together that it would not serve anybody's purpose to bring people in early tomorrow. Many of us would want to attend church and so we are going to recess in a little bit here until 1 o'clock tomorrow. We hope that we will have a conference committee report on which to vote.

If we do not have a conference committee report on the continuing resolution, we expect that we will have one with a Senate amendment on the HUD appropriations and we can vote on that tomorrow while awaiting for further action of the conferees.

So if the Members have planes leaving around noon or early afternoon, it may be well to cancel them, I would suppose, because we will be in session tomorrow afternoon unavoidably.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

If there is not an agreement is there any possibility we could have a continuing resolution for say 60 days or something?

Mr. WRIGHT. Until after Thanksgiving.

The SPEAKER. The Chair thinks that is a pretty good idea.

Mr. WRIGHT. Does the gentleman from California wish to make a unanimous-consent request?

Mr. ROUSSELOT. Do not tempt me, I may do it.

Mr. DANIELSON. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from California.

Mr. DANIELSON. Mr. Speaker, I know of one person who has an air-

plane reservation tomorrow night at 5:30 and would have to leave here at 4 o'clock. Is there any chance that might be able to be honored? Would it be prudent to move it over to Monday?

Mr. WRIGHT. Well, if I were guessing, I would say move it to Monday.

The SPEAKER. The Chair hopes to be able to keep an 11 o'clock appointment on Monday with his dentist.

Mr. DANIELSON. Would that be in Washington, D.C., or up in the bay area?

The SPEAKER. In Boston.

Mr. WRIGHT. That is a clue.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. ASHBROOK, special order for today for 30 minutes.

RECESS

The SPEAKER. Pursuant to the order of the House of November 19, 1981, the Chair declares the House in recess until 1 p.m., tomorrow, Sunday, November 22, 1981.

Accordingly (at 10 o'clock and 3 minutes p.m.), the House stood in recess until 1 p.m. Sunday, November 22, 1981.

EXECUTIVE COMMUNICATIONS, ETC.

2567. Under clause 2 of rule XXIV, a letter from the Secretary of Health and Human Resources, transmitting the semiannual report of the Office of Inspector General, Community Services Administration, for the period ended September 30, 1981, pursuant to section 5(b) of Public Law 95-452, was referred to the Committee on Government Operations.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER (for himself, Mr. MARTIN of North Carolina, Mr. VANDER JAGT, Mr. MOORE, and Mr. SCHULZE):

H.R. 5085. A bill to amend the Internal Revenue Code of 1954 to eliminate the double tax on dividends, to allocate corporate income tax revenues for payments to qualified registered voters, and for other purposes; jointly to the Committees on Ways and Means and Rules.

By Mr. BAILEY of Pennsylvania (for himself and Mr. MATSUI):

H.R. 5086. A bill to amend the Internal Revenue Code of 1954 to provide uniform periods for returns and payments of coal excise taxes; to the Committee on Ways and Means.

By Mr. FISH:

H.R. 5087. A bill to amend title 28 of the United States Code to authorize the collection of fees for the processing of certain requests for identification records, and for other purposes; to the Committee on the Judiciary.

By Mr. GLICKMAN (for himself, Mr. FORSYTHE, Mr. NEAL, Mr. CONTE, Mr. RODINO, Mr. DENARDIS, Mr. JEFFORDS, Mr. FAZIO, Mr. SIMON, Mr. GEPHARDT, Mr. COELHO, Mr. LEACH of Iowa, Mr. BONKER, Mr. WON PAT, Mr. HARKIN, Mr. LEHMAN, Mr. DOWNEY, Mr. DORGAN of North Dakota, Mr. HUGHES, Mrs. SCHNEIDER, Mr. SEIBERLING, Mr. HORTON, Mr. OBERSTAR, Mr. BARNES, Mr. HEFTEL, Mr. MITCHELL of Maryland, Mr. BROWN of California, Mr. ERDAHL, Mr. WOLPE, Mr. AKAKA, Mr. DELLUMS, Mr. TAUKE, Mr. MARKEY, Mr. LOWRY of Washington, Mr. WEISS, Mr. YOUNG of Missouri, Mrs. SCHROEDER, Mr. EDGAR, Mr. KILDEE, Mr. MCCLOSKEY, Mr. BEDELL, Mr. AUCOIN, Mr. LANTOS, Mr. DWYER, Mr. FAUNTROY, Mr. CLAY, Mr. OTTINGER, Mr. SUNIA, Mr. ASPIN, Mr. JOHN L. BURTON, Mr. DASCHLE, Mr. ROSENTHAL, Mr. ROE, Mr. SHAMANSKY, Mr. CONYERS, and Mrs. COLLINS of Illinois):

H.R. 5088. A bill to establish the U.S. Academy of Peace and Conflict Resolution whose function shall be to develop and implement programs to promote the peaceful resolution of international conflicts through the use of conflict resolution techniques; to the Committee on Foreign Affairs.

By Mr. MCGRATH:

H.R. 5089. A bill to authorize the issuance of variable-rate debentures by the Federal Deposit Insurance Corporation and Federal Savings and Loan Insurance Corporation; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MOLINARI (for himself, Mr. ADDABBO, Mr. SMITH of Pennsylvania, Mr. BENEDICT, Mr. SCHUMER, Mr. ROE, Mr. SCHEUER, Mrs. ROUKEMA, Mr. DENARDIS, Mr. DREIER, and Mr. CARMAN):

H.R. 5090. A bill to remove the limitation on the number of families with incomes between 50 percent and 80 percent of median-area income who are eligible for federally assisted housing; to the Committee on Banking, Finance and Urban Affairs.

By Mrs. SCHNEIDER:

H.R. 5091. A bill to amend section 205 of the Flood Control Act of 1948 (Public Law 858, 80th Congress), relating to small flood control projects not specifically authorized by Congress; to the Committee on Public Works and Transportation.

By Mr. SOLARZ (for himself and Mr. BARNES):

H.R. 5092. A bill to place restrictions on military assistance and sales for Guatemala; to the Committee on Foreign Affairs.

By Mr. WAXMAN (for himself, Mr. TAUKE, Mr. FLORIO, Mr. LELAND, Mr. LUKEN, Mr. MARKEY, Ms. MIKULSKI, Mr. MOFFETT, Mr. MOTTL, Mr. OTTINGER, Mr. SCHEUER, Mr. SHARP, Mr. SWIFT, Mr. SYNAR, Mr. TAUZIN, Mr. WALGREN, Mr. WYDEN, Mr. COLLINS of Texas, Mr. COURTER, and Mr. MARKS):

H.R. 5093. A bill to amend title XIX of the Social Security Act to require medicaid coverage of certain disabled children for care at home who are otherwise entitled to such coverage only if provided in a costly medical institution; to the Committee on Energy and Commerce.

By Mr. SKELTON (for himself and Mr. WRIGHT):

H. Con. Res. 227. Concurrent resolution providing for the commemoration of the 250th anniversary of the birth of George Washington; to the Committee on Rules.

By Mr. GONZALEZ:

H. Res. 284. Resolution expressing the sense of the House of Representatives that the President of the United States and the Secretary of Housing and Urban Development should not restrict the Federal Housing Administration's mortgage insurance programs or the Government National Mortgage Association's mortgage-backed securities program below the levels authorized for such programs by the Congress; to the Committee on Banking, Finance and Urban Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. LEWIS:

H.R. 5094. A bill for the relief of John Delgado Adams; to the Committee on the Judiciary.

By Mr. PETRI:

H.R. 5095. A bill for the relief of Cesar Noel Orantes; to the Committee on the Judiciary.

By Mr. SOLARZ:

H.R. 5096. A bill for the relief of Li Nam Ping; to the Committee on the Judiciary.

By Mr. VANDER JAGT:

H.R. 5097. A bill for the relief of Lt. Col. Matt Urban; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

LEGISLATION ESTABLISHING U.S. ACADEMY OF PEACE AND CONFLICT RESOLUTION

HON. DAN GLICKMAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Saturday, November 21, 1981

● Mr. GLICKMAN. Mr. Speaker, I am pleased to introduce today for myself and 55 other Members of the House, legislation that would establish a U.S. Academy of Peace and Conflict Resolution. The bill would implement the recommendations of the U.S. Commission on Proposals for the National Academy of Peace and Conflict Resolution. The Commission's final report, entitled "To Establish the U.S. Academy of Peace" was presented to the President and the Congress on October 20.

The proposed Academy would be an interdisciplinary institution devoted to international peace studies and research to advance conflict resolution methods and skills. Key to its operation would be the training of individuals in conflict resolution skills. The Academy would serve institutions and individuals in both the private and public sectors. It would be a federally created, nonprofit, independent corporation. Its core budget would come from Federal appropriations, but it would also solicit private financial support.

The establishment of an Academy is a pragmatic step that does not preempt existing defense policy. It is recognition of the fact that growing world tension cannot be controlled by military might alone. President Reagan has acknowledged this by seeking arms reduction in Europe. There is no doubt that increases in military spending improve the ability of the U.S. armed services to protect the Nation's vital interests, but additional spending itself provides no assurance or guarantee of lasting peace without being considered in connection with the principles enumerated in this legislation.

An Academy to advance conflict resolution techniques does not threaten the continuation of a responsible military program. It only strengthens that program. The existence of an Academy would comport with carefully crafted defense policy thus enhancing the Nation's overall security. The few efforts at nonmilitary conflict resolution bear this out. The Camp David accord, a most notable recent example of conflict resolution techniques, proves that traditional enemies such as Egypt and Israel can settle their differences in a mutually acceptable manner. But the Camp David accord is an exception not a rule. Too few individuals trained in conflict resolution skills are available to make such settlements more common. The existence of an Academy could correct this deficiency.

Use of the Academy's facilities would not be limited to the public sector. Clearly, Department of State employees and others who work for the Federal Government in an international capacity would be eligible, but the private sector could avail itself to the Academy as well. It is significant to note that private sector interest in the establishment of an Academy already exists. In testimony received by the Commission during its nationwide hearings, officials of multinational corporations said that an Academy could provide skills for their employees that are not currently available. Specifically, employees could be equipped with the necessary conflict resolution skills to handle confrontations that occur between the company and the host country. That could certainly lessen the sometimes strained relations between multinationals and their host countries and enhance the operation of international business concerns on an overall basis.

An Academy for Peace and Conflict Resolution is a small investment that will yield a tremendous return—individuals in Government and business who are trained to resolve conflicts before they become armed confrontations. Through that development, the United States, and indeed the entire world, stands a better chance to achieve the goal of enduring peace.

The bills, initial cosponsors are: Messrs. FORSYTHE, NEAL, CONTE, RODINO, DENARDIS, JEFFORDS, FAZIO, SIMON, GEPHARDT, COELHO, LEACH of Iowa, BONKER, WON PAT, HARKIN, LEHMAN, DOWNEY, DORGAN of North Dakota, HUGHES, Mrs. SCHNEIDER, Messrs. SEIBERLING, HORTON, OBERSTAR, BARNES, HEFTEL, MITCHELL of Maryland, BROWN of California, ERDAHL, WOLPE, AKAKA, DELLUMS, TAUKE, MARKEY, LOWRY of Washington, WEISS, YOUNG of Missouri, Mrs. SCHROEDER, Messrs. EDGAR, KILDEE, MCCLOSKEY, BEDELL, AUCOIN, LANTOS, DWYER, FAUNTROY, CLAY, OTTINGER, SUNIA, ASPIN, JOHN L. BURTON, DASCHLE, ROSENTHAL, ROE, SHAMANSKY, CONYERS, and Mrs. COLLINS of Illinois.●

RESTRICTING MILITARY ASSISTANCE TO GUATEMALA

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Saturday, November 21, 1981

● Mr. SOLARZ. Mr. Speaker, earlier this year, Amnesty International published a report entitled "Guatemala—A Government Program of Political Murder." This study, which documents a number of horrifying case histories of torture and murder by the Guatemalan Government, states that nearly 5,000 Guatemalans have been seized without warrant and killed since Gen. Lucas Garcia became President in 1978.

I have seen no effective refutation of any of the charges raised by Amnesty International. Nevertheless, despite the abysmal human rights record of the Lucas regime, the Reagan administration is now seriously considering the sale of military equipment to Guatemala. Specifically, the Congress may shortly be notified of the administration's intent to sell $1.7 million of helicopter spare parts to Guatemala.

I believe that the provision of military equipment to Guatemala, without making the receipt of this equipment conditional on a substantial improvement in the human rights situation, would be a tragic mistake. It would send the wrong signal to the extreme right in that country, and would likely lead to an escalation in violence. I have, therefore, introduced a resolution today with Congressman BARNES, the chairman of the Subcommittee on Inter-American Affairs of the House Foreign Affairs Committee, which places three strict conditions on the provision of U.S. military equipment to Guatemala. Specifically, the resolution requires the President to certify to the Congress that the Guatemalan Government:

First, is not engaged in a consistent pattern of gross violations of internationally recognized human rights;

Second, is achieving substantial control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Guatemalan citizens by these forces; and

Third, is ending the indiscriminate torture and murder of Guatemalan citizens by any paramilitary organization which receives assistance or support from the Government of Guatemala or over which the Government

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

of Guatemala is otherwise able to exercise control.

In the absence of a Presidential certification that these three conditions have been satisfied, no FMS cash or credit sales could be made to Guatemala.

This amendment is consistent with the action the Foreign Affairs Committee took earlier this year when it overwhelmingly adopted an amendment to the foreign aid bill offered by Congressman BINGHAM and Congresswoman FENWICK and me, that made the provision of U.S. military equipment to El Salvador contingent upon the fulfillment of six tough conditions. The Senate has recently adopted similar legislation with respect to El Salvador.

It would be both ironic and counterproductive if at the same time the Congress was moving to impose restrictions on military aid to El Salvador, it refused to place any restrictions on a renewed arms flow to Guatemala. The human rights situation is certainly worse in Guatemala. If there are no political prisoners in Guatemala, which on the face of it appears to be an improvement over the situation in El Salvador, it is only because all political opponents have been systematically killed or driven into exile. The Guatemalan Armed Forces and paramilitary forces are, if anything, even more brutal than their counterparts in El Salvador. And, whereas the Duarte government has at least made some efforts to implement a comprehensive land reform and other badly needed reforms, the Lucas regime has made no such redeeming commitments.

I urge my colleagues to join Congressman BARNES and me in our effort to prevent an unrestricted flow of U.S. arms to Guatemala that can only worsen an already intolerable level of violence and abuse of basic human rights.

Mr. Speaker, I ask that the text of this resolution be reprinted at this point in the RECORD:

H.R. 5092

A bill to place restrictions on military assistance and sales for Guatemala.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) funds may be obligated for assistance for Guatemala under chapter 2 or 5 of part II of the Foreign Assistance Act of 1961, letters of offers may be issued and credits and guarantees may be extended for Guatemala under the Arms Export Control Act, licenses may be issued under section 38 of the Arms Export Control Act, and members of the United States Armed Forces may be assigned or detailed to Guatemala to carry out functions under the Foreign Assistance Act of 1961 or the Arms Export Control Act, only if within six months prior to such obligation, issuance, extension, or assignment, the President has certified to the Speaker of the House of Representatives and to the Committee on Foreign Relations of the Senate that the Government of Guatemala—

(1) is not engaged in a consistent pattern of gross violations of internationally recognized human rights;

(2) is achieving substantial control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Guatemalan citizens by these forces; and

(3) is ending the indiscriminate torture and murder of Guatemalan citizens by any paramilitary organization which receives any assistance or support from the Government of Guatemala or over which the Government of Guatemala otherwise is able to exercise control.

Such certification shall discuss fully and completely the justification for making the determinations required by paragraphs (1) through (3).

(b) Not later than 6 months after submission of the first certification pursuant to this section and at the end of each succeeding six-month period thereafter, the President shall make the certification described in subsection (a) if he is able to make the determinations required by paragraphs (1) through (3) of that subsection. If at any of the times specified in the preceding sentence of this subsection the President does not make such a certification, then the President shall immediately—

(1) suspend all expenditures of funds and other deliveries of assistance for Guatemala which were obligated under chapters 2 and 5 of part II of the Foreign Assistance Act of 1961 after the date of the enactment of this Act;

(2) withhold all approvals for use of credits and guarantees for Guatemala which were extended under the Arms Export Control Act after the date of enactment of this Act;

(3) suspend all deliveries to Guatemala of defense articles, defense services, and design and construction services, which were sold under the Arms Export Control Act after the date of the enactment of this Act;

(4) suspend all licenses for the export of defense articles and defense services which were issued under section 38 of the Arms Export Control Act after the date of enactment of this Act; and

(5) order the prompt withdrawal from Guatemala of all members of the Armed Forces performing defense services, conducting international military education and training activities, or performing management functions under section 515 of the Foreign Assistance Act of 1961.

Any suspension of assistance pursuant to paragraphs (1) through (5) of this subsection shall remain in effect until such time as the President makes a certification in accordance with subsection (a).●

CONDEMNATION OF PLO TERRORISM

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Saturday, November 21, 1981

● Mr. FINDLEY. Mr. Speaker, I deplore and condemn the attempted assassination of Yousef Khatib, a West Bank Palestinian, and the murder of his 23-year-old son, Kazim, allegedly by the PLO. Just as I have condemned the PLO assassination of Israelis, I feel a great sense of horror and disgust when the PLO takes the life of a Palestinian.

The PLO apparently perpetrated this act because it considered Mr. Khatib to be "collaborating" with Israeli authorities in the West Bank.

Such acts of terrorism only undermine the PLO's contention that it is the sole legitimate representative of the Palestinians. To the extent that it keeps the allegiance of Palestinians through a campaign of fear and assassination, many will not take the PLO seriously as a political, as opposed to a military, force in the Middle East. And it belies the possibility, on which a just and lasting settlement in the Middle East must one day rest, that Israelis and Palestinians can live together in a cooperative and peaceful fashion.●

GARY, IND.'S DIAMOND ANNIVERSARY

HON. ADAM BENJAMIN, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Saturday, November 21, 1981

● Mr. BENJAMIN. Mr. Speaker, proud of its past, confident of its future, the Steel City of Dunes Country has been a welcoming haven to men and women of all nationalities, races, and creeds.

At the beginning of the 20th century, the area now known as Gary was an uninhabited region of sand dunes and scrub oaks located 25 miles from Chicago at the southern tip of Lake Michigan.

The land was first chartered by 17th century Jesuit Missionaries Jean Nicolet and Jacques Marquette, who explored much of the Great Lakes area and the upper Mississippi River. It was the burial ground of the Potawatomi Indians, and the home of Joseph Bailly, who established a trading post in the vicinity during the 1820's.

Gary, among the first communities to be shaped from undeveloped land, planned in detail and developed with care was launched together with the world's largest steelmaking complex. Work on the new mill was started on March 12, 1906, when the ground was broken for the plant's first blast furnace.

Gary Land Co. was formed in May 1906 to oversee the development of the city, to administer the sale of property, to approve plans for home construction, and arrange financing for potential owners. By the year's end, the town was incorporated and boasted its own administrative government. Gary had an assessed value of over $3 million and a population numbered in the thousands.

The first heat of steel was tapped in 1909. As of today, it has produced more steel than any other steelmaking facility in history.

Businessmen, civic and political leaders, and townspeople are proud of the progress they have made but are still aware of the problems to be resolved. They are working together to return Gary to its former preeminence as a proud, midsize industrial town known around the world as a city of opportunity.

Mr. Speaker. I am delighted to have the opportunity to include the remarks of my dear friend and constituent, Frank Roman on the occasion of Gary's Diamond Anniversay.

I have known Frank for more years than we are both willing to admit and I congratulate him on his ongoing archivist activities. Frank is an emeritus Gary—23 years—educator, librarian, former president of the Polish American Historical Association, and a contributing editor to the Polish American Journal. He is married to the former Sally Legowski.

A TRIBUTE AND SALUTE TO GARY'S DIAMOND ANNIVERSARY 1906–81

(By Frank B. Roman)

Celebrating 75 years of opportunity in 1981, with our Mayor Richard Gordon Hatcher, let's reflect for a short period of time on our roots and heritage:

Full seventy-five years ago, amid the Hoosier Winter's snow, these groves, this sandy, prairie land, our northern Lake Michigan Shore strand, were bare, bleak, and wild: But white, black man, wife and child, tarpaper shack dwelling place had found—(1,400 isolated homesteaders)—there resting, sleeping sound.

These 75 years of time, passing o'er every Northern Indiana clime, have wondrous changes made wherever man has strayed. Within our borders small, changes have passed o'er all. Many are now deceased, while others, who shared happy childhood then, are now gray-haired men and women.

Of children, men, women, in years now seven times ten (those years of wars and peace), have seen a large increase: some 175 thousand citizens here, rent or own solid homes, not tarpaper shacks, this Happy 75th Year.

The year 1981 which we celebrate a half-century plus 25 years, in our date, the Ottawa tribes are no more, upon our Hoosier Lake Michigan shore. With birchen bark canoes, they trap no more the rat and mink, along our Grand Calumet River's grassy brink. Their tomahawks are found imbedded in our sandy ground. Their spear and arrow heads are in the lowly beds. Yes, the Red race from us has gone, to live but in our song, and our historic page, in records of our earliest age.

The tread of juvenile or adult busy feet is now on many a "City of Opportunity" street. Voices of girls and boys, the homes of household joys, where late was a nature's solitude, or where Potawatomi wigwam stood are the busy "City of Opportunity" marts of trade, or professional activity. Prominent among them are: Bank of Indiana, U.S. Steel, Budd Company, Anderson Company, Post Tribune, Info. Crusader, Means Developers, WWCA Radio Station, WLTH Radio Station, Gary Public Transportation Co., Gary National Bank, Ellas Construction, Indiana University (Northwest), Employees of the Methodist and St. Mary Medical Centers, School City of Gary, members of local Chamber of Commerce and others. Their houses and stores are filled with goods and services made by hard labor, toil, and not paid with hay or soil. These give us our town and city hill, since white, Black men came, built the U.S. Steel Mill.

Now rise the metropolis spires, mid all our household fires. For men of every race, creed, acknowledge human need. This is the birthplace of Economist Paul Samuelson, the world renowned Jackson Five, Tony Zale (once Middle-Weight Boxing NBA Champion of the World), Footballs' Hank Stram, Don Elser, Tom Harmon, Alex Karras, the Met's Jack McCracken and Charlie Finley, former owner of Oakland A's. Also Frank Borman (NASA Astronaut), Congressmen Adam Benjamin and others. The "City of Opportunity" is also the home of the Northwest Indiana Symphony, The Senior Little League World Series (headed by "Mr. Baseball"—Joe Eckert), Gary's Polish Chopin Chorus and Millenium Choir, the Annual Founder's Day Festival, public libraries and information centers. We have wide variety of civic and fraternal organizations like the American legion, Kiwanis, Rotary, NAACP, Jaycees, the Urban League, Frontiers Club, Polish National Alliance, Polish Women's Alliance, Silver Bell Club (PNA), Knights of Columbus, Knights of Pythias, YWCA, Fraternal Order of Eagles, Alcoholics Anonymous, American Russian League, Boys Club of N.W. Indiana, Croatian Club, Gary Country Club, Ghetto Getters Club, Puerto Rican Benefit Society, Slovak Club, Sociedad Mutalista Mexico, Police American Congress, Indiana Division and others.

Men of every race, creed acknowledge human need, worship Him above, the one true God of Love, where late Pere Jacques Marquette, the Red men bowed and prayed, on sandy dunes, prairie wild, in forest shade. Next to the church, where under gentle rule, devised by Dr. Wirt, our children knowledge gain, gives proof of white, black, brown man's brain.

In all our districts stands our heritage from African, Latin, Caucasian, Continental, or Oriental cultures and lands.

From early dawn till night, and oft by NIPSCO light, the foundry, blast furnace, and the loom joined by AFL-CIO like a bride and groom, are symbols of a toil, bringing by Indiana Tollroad, highways, and railroads, a richer spoil. Where each mechanic and artistic art of labor claims its part. Our true wealth is made not by means of trade. "Man does not live by bread alone"—although he cannot eat a stone.

While we hope, we work, we wake and sleep. We pray dreaming that with federal and other leaders, we shall reap, overcome all hardships—be No. 1; and in good fix—come our Centennial-Two-Thousand and Six.

In the words of the late P-T scribe-Edward R. Brennan, let's conclude this tribute and salute to the "City of Opportunity" with words:

"We Hail Thee Gary—on thy Diamond Anniversary."

"City of Heroes, Saints and Bums—product of steel and sand, seventy-five years old and not a grey-hair showing."

We hail thee Gary "City of Opportunity," because you're rambunctious, rough around the edges, yet, with a heart as warm as a salamander's belly.

We hail thee Gary "City of Opportunity"—because you're not jelly. You face the future boldly, without rue and the sins of omission forgiven. Let your detractors stew in their unpleasant juices.

We hail thee Gary "City of Opportunity"—for as Garyites we expect with the Genesis Center, our Civil Rights Hall of Fame, a more glorious metropolis yet—comes the 21st Century upon the winding Grand Calumet.

Finally: (holding our heads and chalices high)—We Hail Thee "City of Opportunity"—Gary, Indiana.

With Our Mayor, Richard Gordon Hatcher and others (We'll build a fabulous city and a new man to inhabit it!).

We love you and are proud of our town, and more proud to be Americans. We love our abode and country. We believe in the dreams of our founding fathers. Above all—We Believe: "If there is any city or country, worth living in and worth fighting and dying for, it is Gary, Indiana, and the United States of America."

Long live the "City of Opportunity," God Love and Bless You Always—Diamonds and Gary are forever.●

THE IRS DOES NOT ASK, THEY JUST TAKE

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Saturday, November 21, 1981

● Mr. HANSEN of Idaho. Mr. Speaker, in response to a November 15 program on IRS abuses by CBS-TV's "60 Minutes," which was produced with my assistance, the following reaction from a Texas citizen was received illustrating the typical unhappy attitude of a great number of American citizens toward this agency.

NOVEMBER 16, 1981.

Re pay up or else
60 MINUTES,
c/o CBS,
New York, N.Y.

DEAR BROADCASTERS: First order of business—Bravo! Your broadcast as mentioned above was courageous and informative. Courageous for speaking out regarding the "untouchables" and hopefully one of many steps toward informing the American citizens on this, as stated "pernicious" and out of control agency the IRS/KGB.

Volumes could and should be said, but this agency intimidates and retaliates mercilessly. Therefore, instead of we, the people, being informed enough to take needed lawful action, we stay afraid through enforced ignorance and the IRS methodical plan to spread and perpetuate fear through manipulative retaliation.

It is time the ripple effect be reversed and this bureaucratic monster, the epitome of diminishing returns (no pun intended) no longer be allowed to scandalize, terrorize and ruin the citizens of this country. Contrary to their manifesto, those who get behind are not all cheats and criminals. Most people clearly understand the need to support their country and their government.

If the present administration would look to the IRS for spending cuts it would find a

gold mine. This agency spends thousands of thousands to collect hundreds or less. For that and the immoral actions it perpetuates, IRS costs billions. When confronted with its acts it offers excuses and suppression until a new regulation can be drafted to protect the IRS, not the taxpayer. The existing regulations are stiffling and overbearing with more and more forever bearing down on us. Simplification of the tax system would ensure the ability to cut operating and enforcement costs. One almost needs a separate degree just to understand what all the responsibilities are and how every move affects their tax.

Taxes are too high and too unequal. Business has been forced to collect the taxes creating more expense for them yet no reason is applied on the behalf of business. Productivity suffers because not only are markets depressed but half the earnings can be taken in taxes and a great deal of cash flow is tied up in the collection of taxes. Lord help the business whose cash schedule differs from "the regulaton", the fines are outrageous. Someone should also address the add-ons of fines, penalties and interest charged arbitrarily in this insensitive system. They are of criminal proportion.

I was blissfully ignorant for most of my work life, but no more. I have dealt with this insane agency and felt the helplessness of no recourse.

My experience was voluntary (move over Pandora) and though frustrating and enlightening, is fortunately not as terrifying as many. I first became concerned when IRS conducted a fishing expedition into what I considered quite personal—a checking account. They removed only a small sum, less than $35, and except for their administrative costs (they not only took it they returned it) it was as simple as writing a personal check. That was only one step in the intimidation process.

The IRS doesn't ask, they just take. Right or wrong, they take. After all, they don't have to prove anything, you do. That is if you're lucky enough that they listen before they destroy you and yours. Somehow, this seems in conflict with something I read somewhere in school.

There are concerned people out there as shown on your broadcast. Congressman George Hansen, Idaho has written a very true, very scary book, "How the IRS Seizes Your Dollars and How to Fight Back."

I've read the book, worded diligently within the system; yet still been intimidated and treated like a criminal. It appears to me that Congress and the media must work together to inform the public of this malignant agency so that the public can help those in power to gain control and reform.

The so called "tax revolt" is a symptom of this diseased, insensitive system. It is a few frustrated individuals among many who want change but cannot achieve change without informed, lawful, concerted action.

Please pursue this issue.

Respectfully,

(Name on file.)●

PROVIDE MEDICAID COVERAGE FOR DISABLED CHILDREN AT HOME

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Saturday, November 21, 1981

● Mr. WAXMAN. Mr. Speaker, I am introducing legislation today to provide medicaid coverage of disabled children at home when it can be demonstrated that such home care is no more costly than institutional care. I am pleased to announce that joining me as cosponsors are Mr. TAUKE, Mr. FLORIO, Mr. LELAND, Mr. LUKEN, Mr. MARKEY, Ms. MIKULSKI, Mr. MOTTL, Mr. MOFFETT, Mr. OTTINGER, Mr. SCHEUER, Mr. SHARP, Mr. SWIFT, Mr. SYNAR, Mr. TAUZIN, Mr. WALGREN, Mr. WYDEN, Mr. COLLINS of Texas, Mr. COURTER, and Mr. MARKS.

This bill addresses a problem that was raised to national attention by the President at his news conference on November 10. At that time, he discussed the case of a disabled child, Katie Beckett of Cedar Rapids, Iowa, who was referred to him by my cosponsor, Mr. TAUKE. My colleague from Iowa went to extraordinary efforts to bring this case of inequitable treatment to the President's attention. Katie was eligible for medicaid while receiving expensive inpatient hospital care, but was not eligible if she rejoined her family for care at home, even though such home care was both more appropriate and less costly.

Last week, the White House announced that the Department of Health and Human Services had granted a special waiver allowing Katie to return home and still receive care financed by medicaid. While the White House has managed to take care of this particular case, other disabled children are in comparable situations, and they have not been helped. To remedy this, I have developed legislation to cover these children.

The bill I am introducing today provides that coverage. It mandates medicaid in the home for disabled children who would be eligible for SSI if they were in an institution.

I would like to stress that this bill does not create any expanded entitlements under medicaid. States which have opted not to cover SSI disabled children under their medicaid program would not be affected. The bill simply says that if such a disabled child would have been eligible for medicaid while institutionalized, then they are eligible at home, if the home care is determined to be both appropriate for the child and no more costly than institutional care. The bill meets the joint objectives of more appropriate care for the disabled child and more cost-effective expenditures for the Government.

I look forward to working with all of you in enacting this legislation.●

VOICING OUR STRONG INDIGNATION TO THE SOVIETS

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Saturday, November 21, 1981

● Mr. DONNELLY. Mr. Speaker, I bring a matter of urgent importance to the attention of my colleagues. Andrei Sakharov and his wife, Elena Bonner, intend to begin a hunger strike this Sunday, November 22. This decision has not been made lightly by Sakharov, a Nobel Peace prize winner and renowned physicist, and his wife. They find themselves in a desperate situation. By way of background, Sakharov's stepson, Aleksei, emigrated to the United States 3½ years ago, and attends Brandeis University in Massachusetts. Aleksei's wife, Liza Alekseyeva, has been turned down repeatedly over the last 3 years in her efforts to obtain an emigration visa from Soviet authorities, and rejoin her husband. The young couple were engaged before Aleksei left the Soviet Union, and then in June 1981 they were married by proxy as a sign of their love and commitment to one another. It is despicable that the Soviets are punishing Aleksei and Liza in a cynical attempt to gain revenge on Sakharov, a man who has already suffered much for his beliefs and integrity. I would like to read into the RECORD a brief passage from Sakharov's recent letter to his colleagues in the international science community.

The tragedy of Liza and Aleksei continues and perhaps—if nothing changes—will last even longer. In this extreme position, after long and painful reflection, my wife, Elena Bonner, a veteran wounded in the Second World War, and I have made the decision to begin a hunger strike on November 22 to demand that Liza be granted permission to emigrate from the U.S.S.R. In communicating this decision I hope that you will understand the motives behind this step we are taking, its inner necessity for us in this tragic situation. I consider the defense of our children just as rightful as the defense of other victims of injustice, but in this case it is precisely me and my public activities which have been the cause of human suffering. I also think that this step is a continuation of my many years of speaking out in defense of the right to freely choose one's country of residence, the lack of which in our country leads to many tragedies. I am counting on your help.

We cannot let this family's continuing tragedy pass without at least voicing our strong indignation to the Soviets. I respectfully encourage my colleagues to write letters of protest to Soviet President Leonid Brezhnev and Ambassador Dobrynin about their Government's refusal of an exit visa for Liza Alekseyeva. All possible pres-

sure must be brought to bear so that Liza and Aleksei can be reunited. I cannot stress the seriousness of this situation enough. It is critical that we lend our support to Nobel Peace prize-winner Andrei Sakharov and his wife Elena in their efforts to end the terrible impasse affecting their family.●

GEORGE WASHINGTON'S 250TH BIRTHDAY

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Saturday, November 21, 1981

● Mr. SKELTON. Mr. Speaker, February 22 of the coming year will mark the 250th anniversary of the birth of our first President, George Washington. In honor of this occasion, I am today introducing a bill to establish a House-Senate committee to make arrangements for a joint meeting of Congress on that day. The majority leader, Mr. WRIGHT, of Texas, joins me in the introduction of this bill.

George Washington was a heroic military man, a great leader, and a loyal citizen. He lived a life of service to our infant Nation. Washington served as the Commander in Chief of the Continental Army in the American Revolution, presided over the Constitutional Convention in 1787, was unanimously chosen first President of the United States in 1789 and was re-elected for a second term.

Mr. Speaker, the accomplishments of George Washington can be exemplary to today's youth, and should serve as a reminder to all citizens of their obligation to make their own contribution to our democratic system of government. I hope that my colleagues will agree and cosponsor this legislation.●

UNDERMINING SOCIAL SECURITY

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Saturday, November 21, 1981

● Mr. FORD of Tennessee. Mr. Speaker, I would like to share a statement by Mr. Vernon Jordan, president of the National Urban League, which appeared in several newspapers around the country, with my colleagues. His statement on the undermining of social security is one many of us will agree with.

I insert in the RECORD the remarks of Mr. Jordan for my colleagues to read:

UNDERMINING SOCIAL SECURITY

Social Security is the most popular federal program and has been since it was started back in the 1930s. Now it is being undermined by widely-backed proposals to cut back benefits, and by scare tactics used by the system's opponents that suggest imminent bankruptcy for the Social Security trust funds.

The constant barrage of reports that "Social Security is in trouble" are wrong. The system is not in trouble, and it won't be if Congress resists the plans to cut it.

A short-term deficit is likely in the trust fund that finances pension payments. That can easily be dealt with by shuffling money between the various funds making up Social Security or by using general revenue.

There is no reason to overhaul a system that works because of a temporary cash flow problem that is easily resolved. By 1986, for demographic reasons, the funds will be solvent again. After that, trouble is not expected until well into the next century, leaving plenty of time to work out long-range answers to long-range problems.

So it is just plain wrong to frame the system's problems in grossly exaggerated terms designed to scare people into losing confidence that they will ever collect their retirement benefits.

And it is wrong to try to correct the system's minor problems through major surgery affecting the most vulnerable of the elderly. But that is what many current proposals amount to.

Last summer, the Administration rammed through one such idea. It persuaded Congress to drop the minimum benefit, a measly $30 per week. That was a terrible blow to the poorest of the elderly—many of them women who typically worked in low-paying jobs or in non-covered employment.

They were told that if they can't make it without the minimum benefit, they could always apply for welfare. That insulted elderly people who worked hard for low wages all their lives just to keep off the welfare rolls.

With Congress moving swiftly to rescind that callous move, the President has decided to join in asking for restoration of the minimum benefit—a wise decision. But the flap over that issue has severely damaged his credibility in the coming debate over the future of social security.

After all, people heard him say he would not take any benefits away from current recipients, and then he proposed a measure that would strip away the minimum below which no elderly person could fall.

So while the Administration is to be commended for now attempting to put social security on a permanently sound footing, its track record in dealing with the poor and the elderly engender great suspicion.

Those doubts were only reinforced by the President's continued backing for drastic benefit reductions for those retiring at age 62.

People taking early retirement already get reduced benefits. The majority choose to retire early because they are in poor health or because they can't find work.

We can expect further attacks on benefit levels as political leaders seek spending cuts to absorb the hugh deficits caused by tax cuts and military spending.

We must be on guard against any attempt to change Social Security from a universal insurance system to a means-tested welfare program for the elderly. Warnings of impending bankruptcy for the Social Security system and suggestions that people rely on personal savings for retirement only inspire fear.●

CONGRESSMAN WHITTEN CELEBRATES 40 YEARS IN HOUSE

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Saturday, November 21, 1981

● Mr. PEPPER. Mr. Speaker, I would like to take this opportunity to recognize and congratulate my good friend JAMIE WHITTEN, dean of the House and chairman of the Appropriations Committee, who celebrates this month the 40th anniversary of his election to this body.

Mr. WHITTEN's public service began in 1931 when he was elected, at the age of 21, to the Mississippi State House of Representatives. Today, at the young age of 71, he continues to serve his constituents and all Americans with endless dedication.

As chairman of the Appropriations Subcommittee on Agriculture, the gentleman from Mississippi has contributed to the creation of an agricultural system that is the envy of the world. Mr. WHITTEN's long hours and hard work over the years have greatly facilitated the ability of American farmers to perform their most important work without having to face financial disaster.

By assuming the chairmanship of the Appropriations Committee, the distinguished gentleman from Mississippi offered his talents to one of the most influential and important committees of this House and he has ably and efficiently performed that role for the benefit of us all.

Mr. WHITTEN has always stood for the best interests of this House and the United States and I extend to him a most sincere tribute of gratitude and respect for his service as he enters his fifth decade of membership in the House of Representatives.

Mr. WHITTEN is an honor to his district, to the House of Representatives, and to his country.●

IRS DEMANDS—PAY UP OR ELSE

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Saturday, November 21, 1981

● Mr. HANSEN of Idaho. Mr. Speaker, several months ago, Mr. Ira Rosen, a CBS-TV News associate producer for the program "60 Minutes" came to my office to verify or challenge the findings of Internal Revenue Service abuses revealed in my recently published book.

This publication by Simon & Schuster, entitled "How the IRS Seizes Your Dollars and How To Fight Back," was released in April 1981 and draws "from several large file drawers

of documents and testimony collected from frustrated Government employees and indignant citizens."

The book was written as a result of considerable research, data-collection and ad hoc hearings accumulated for presentation to congressional committee hearings and investigators, and to the Justice Department and IRS officials; and was finally published to better achieve this purpose through an expanded public information program calling for needed reform.

Mr. Rosen informed me that IRS and congressional committee staff rejected my contentions as "never happening" or "no longer happening." He wanted to know whether I could prove otherwise. Here we were with the pious, never-do-wrong bureaucrats sitting in front of the innocent-looking, but locked agency door challenging anyone to prove that they are harboring a hidden stable of man-eating fiscal alligators.

Well, they are doing just that, and I provided the documents and proof, with assistance from other concerned people, to convince "60 Minutes" they had a reliable story to tell on the abusive behavior of the IRS.

Over a period of months, I continued to provide documents and witnesses and interviews, and to validate information to assist an exhaustive effort by Mr. Rosen and "60 Minutes" host Morley Safer to achieve maximum credibility. This unusually painstaking exercise in accuracy become necessary because of the very nature of the IRS itself, its demonstrated ability to retaliate against its critics, no matter how powerful, and actual threats of such retaliation from IRS officials and other defenders in certain staff positions in the Congress.

The program resulting was good in its accuracy and its confirmation by reliable people, both inside and outside the agency, of scandalous abuse of citizens at all levels in IRS tax collection practices. However, the resulting program, for the same reason, was so restrictive that the full magnitude of IRS abuses remained untold. Hopefully, this can be more adequately done in the days ahead.

Many taxpayers are suffering at the hands of the IRS. Unfortunately, however, Congressmen, Government executives, and judges can also be audited, investigated, and intimidated without good cause, as can people in the media. Thus, a fearsome creature has been created which too many want to avoid tangling with. But the awesome powers of the IRS, not only to act under the law, but to act above the law, must finally be curtailed by a Congress made to realize that they have more to fear from their unhappy constituents, than they do from the self-serving intimidating ways of the IRS.

The following transcript (Vol. XIV, No. 7) of the November 15, 1981, "60 Minutes" program entitled "Pay Up or Else" is included here for the benefit of my colleagues and all citizens interested in knowing what the IRS is doing that is causing such a groundswell of complaints among Americans everywhere:

AUDIT THE TAX MAN

CHARLES SHEFKE: The IRS is probably the most pernicious organization that the Federal Government, our legislators, have ever created. And if I had to parallel it with any other kind of organization in the world, I would parallel it with the KGB, probably the Gestapo.

MORLEY SAFER: We talked to a revenue agent still working for the IRS and four other agents who recently left the service. Jack Elliott was an agent for the IRS for more than twleve years. Gary Dutloff left after seven years. Sharon Fields resigned after six years. Bob Braun is still a working revenue agent in a Pontiac, Michigan office. And Charles Shefke who quit he says because he, like the others, was being asked to intimidate relatively innocent small fry.

CHARLES SHEFKE: The poor taxpayer who wants to come up and be up front and tell you his story and tell you what's wrong literally exposes himself to getting the worst treatment that IRS can lay on him.

GARY DUTLOFF: If the revenue agent wants to, he or she can attach any property publicly available belonging to the taxpayer who is more than ten days delinquent in paying the taxes.

SAFER: So, in effect, does not need a warrant?

DUTLOFF: Does not need a warrant, does not need to see a judge.

BOB BRAUN: The revenue officer is essentially, when it comes down to a bottom line on it, a prosecutor, a judge, and a jury, and then he's the cop that goes out and executes it also.

SHEFKE: Justice Marshall said that the power to tax includes the power to destroy and we enforce the tax laws and we go out and destroy people. We literally destroy their life, their livelihood, everything.

SAFER: That almost happened to this man, Maurice Bishop, owner of All-Time Pest Control of Benton Harbor, Michigan. The IRS made an agreement with him under which he was to pay off his forty thousand dollar tax debt over a two year period. Bishop was paying on schedule and one day the IRS walked into his office and he says, like skilled shakedown artists, demanded the entire amount in cash there and then.

MAURICE BISHOP: He took his finger and struck it in my chest.

SAFER: You mean he was doing that sort of thing?

BISHOP: Right, he stuck his finger in my chest and told me, I done told you what I want you to do, and you're going to do it, otherwise we're going to, he kept saying, take your stuff and sell it for nothing and apply it to the debt.

SAFER: Several days after the meeting the IRS practically put Bishop out of business. They put a lien on all his business assets, nearly four hundred thousand dollars worth for that forty thousand dollar debt. Bishop feels it wasn't just the money the IRS was after.

BISHOP: They was trying to show me, since it was well known in the community, how they could really treat me so terrible and not tell everybody else about it, and that's what they were doing. They really didn't care whether I paid the taxes or not. That's just the way I feel, felt about it at that time.

SAFER: Fear, they wanted to spread some—.

BISHOP: They wanted to throw fear into the community. They did, because I told everybody I came in contact what was happening with me and the IRS.

SHEFKE: The revenue officer on the front line can go out and do that to people and in point of fact, if he's the kind of revenue officer they want, that's what he will do. They do want to intimidate the American people. They do want to scare them.

BISHOP: At one point I thought about leaving the country. I used to get up and walk the floor at night because I could see ever since I left Detroit in 1958 I worked about eighty to a hundred hours a week, and I'm going to, they're going to destroy all of this for me, and I have no way to, what could I do if they took my business and sold it? I had a family involved there, the people that are working for us are involved, the people that we owe, they would have all been losers. That's why I couldn't understand why they did what they done and I never will live long enough to understand that.

SAFER: Why such brutish behavior when the IRS had already made an agreement with Bishop to pay off his tax debt? An internal IRS memorandum, for example, shows the kind of pressure that is exerted on its men in the field. From Manchester, New Hampshire—"look over your inventory select one good taxpayer account for seizure action." A Grand Jury in Fort Worth recently indicted two IRS officers on charges of falsifying nearly two hundred federal tax records in order to meet office production quotas.

You still work for the IRS, Bob?

BOB BRAUN: I do.

SAFER: Is all this familiar stuff to you?

BRAUN: Absolutely.

SAFER: Does it still go on?

BRAUN: To a very great extent, yes. The, the whole idea of things being done for their statistics, for the number. If you want to move ahead, and go into management, which supposedly where all good revenue officers are supposed to wish to be, the way to get there is to have a good track record in seizures.

GARY DUTLOFF: Eighty percent to eighty five percent of the management meetings would deal with comparative statistics. Each manager would wear those statistics on their, on their sleeve.

CHARLES SHEFKE: In all the time I was in the service, I probably made fifty or sixty seizures. I can think of only two cases where a seizure was really warranted. And in point of fact, had I not seized the property, had I given the taxpayer an opportunity to pay the taxes, we would have collected more than I got in the seizure.

ROSCOE EGGAR: But we go to great lengths to avoid seizure. We go to great lengths to make sure that every single consideration has possibly been given the taxpayer that could be given to him in order to avoid that kind of drastic action.

SAFER: Roscoe Eggar is Commissioner of the IRS. He's been on the job since last March.

And you say that promotion, advancement, and even salary are not contingent on producing numbers?

EGGAR: Absolutely not. We have very strict rules against it.

SAFER: But it wouldn't surprise you if I told you that it continue to go on?

EGGAR: It would surprise me if you said that it continues to go on because I don't think in recent years it has gone on other than those exceptions where somebody fails to follow the rules. After all, we're interested in collecting the tax and we're surely not interested in putting people out of business.

RON NICHOLSON: They told us right when they came in, if we had the money fine, they would be gone. If not they were going to close us up, we were out of business.

SAFER: Just like that?

NICHOLSON: Just like that.

SAFER: Nicholson Machine Products Incorporated of Trenton, Michigan had been in business for thirty-nine years until the IRS seized the business for back taxes of around thirty thousand dollars. Ron Nicholson ran the business. Virginia Moore was his Office Manager.

VIRGINIA MOORE: We have parts that we need for Ford Motor Company that should now be in production. We cannot produce because we can't get out into the shop.

SAFER: Why not?

NICHOLSON: Because the United States Government owns it right now, as such, until we pay that money, we can't get back there.

SAFER: But don't you have the keys?

NICHOLSON: No, they locked up everything.

SAFER: Would you be trespassing now if you went into your own back shop here?

NICHOLSON: Certainly would.

SAFER: Unlike Maurice Bishop and his extermination firm, Nicholson Machine couldn't work out a partial payment agreement. Ron Nicholson just didn't have the money. His business, like other suppliers to the auto industry, is in bad shape.

It is the duty of governments, or albeit part of government to collect taxes. You would agree, no?

NICHOLSON: Certainly would. The only thing there we've been in business for thirty nine years, we've paid millions of dollars worth of taxes I'm sure, and not that we're going to, all we wanted was a chance.

SAFER: The IRS man is the arresting cop, the judge and the jury all wrapped up in one. Nowhere else in our society does this sort of thing happen.

ROSCOE EGGAR: We are properly examined and reviewed by more members of Congress and more committees of Congress than any other agency and if the Congress really believed that we were abusing those powers, I can't, for a moment, think that they wouldn't be doing something about it.

SAFER: But Congress has tried. Several pieces of tax reform legislation have been proposed over the last four years, not a single one has passed into law. One Senator who held hearings last year into IRS practices, is Carl Levin of Michigan.

CARL LEVIN: I think this is the only agency that I know of in this democracy of ours that has such dictatorial powers. They must have powers, they must have powers to seize assets under certain circumstances. But there is no reason to give them powers beyond those needed to carry out their job. There is no reason why, in this democracy of ours, we have a little Kremlin that goes on and on, as far as I'm concerned, without adequate controls. The question is how can we get that money into the Treasury best? And the use of quotas for seizures has never been shown to be the best way to do it and it has very harmful effects and violates their own rules.

SAFER: If it is a power unto itself, a renegade, how did it get this power?

LEVIN: I would say it's the natural power to give our tax collector as many powers as possible to increase the yield of the treasury.

SAFER: But you legislators have sat on the FBI, on the CIA, some would say you put too many restrictions on what they can do. And yet, the IRS, still runs wild and free.

LEVIN: [cross voices] . . . Well they're collecting money for us. They are collecting money for us is the only explanantion I can give for this go-along attitude.

SAFER: Does the IRS hold the power of fear over the Congress to some extent?

LEVIN: I think it does.

SAFER: And there are some examples to back up what Levin says. The late Senator Edward B. Long of Missouri held these hearings on IRS methods back in 1965. Agents and taxpayers testified on the abusive nature of the service.

Senator EDWARD LONG: There appears to be a festering infection in the IRS which must and shall be corrected.

SAFER: Shortly after, tax information about Senator Long was leaked to *Life Magazine* and he was defeated in the '68 election. In the mid-70's Senator Joseph Montoya of New Mexico also had hearings into IRS abuse.

VICTIM: I said I don't understand. You made me sell a house, get rid of my home that I didn't have to get rid of. I said now you're going to send me the money back? I said there has got to be something wrong with you. I said the whole darn Internal Revenue Service.

SAFER: Around the same time as these hearings, confidential information about Senator Montoya's taxes was leaked to the Washington Post by the IRS. Senator Montoya was defeated in his re-election campaign. The IRS later admitted it was in error and in fact paid him a refund. And there was Jack McDonald, former Congressman from Michigan. Ten years ago when he was in Congress, he was a member of a House Public Works Sub-Committee. The committee held hearings into a request by the IRS to move its Detroit computer office out into the suburbs. The committee in general, and McDonald in particular, was against the move.

JACK MCDONALD: We told them no, they couldn't move the facility and to find a facility within the city which they did some six months later.

SAFER: So the IRS went away from, with its tail between its legs, from the committee, correct?

MCDONALD: Only for twenty four hours.

SAFER: Because, then what happened?

MCDONALD: Then, the following day, my tax was called in for audit and my committee chairman's tax was called in for audit, and members of his family's tax was called in for audit.

SAFER: And what was the result of that audit?

MCDONALD: The audit came out with no change. However, I was audited for the next five years.

SAFER: What was the IRS's response to, I would guess, your accusation that you were being audited purely because you turned them down in sub-committee?

MCDONALD: Their response was it was just a coincidence.

SAFER: And Congressman George Hansen of Idaho was the subject of an IRS investigation that was leaked to the press and eventually dropped. That experience is not unrelated to his becoming the IRS's toughest congressional critic. Congressman Hansen's staff counsel, Jim McKenna, has been working on legislation to reform the IRS.

JIM MCKENNA: The fact of the matter remains that you have a coercive system without recourse, run by people who have no sensitivity to the rights of the citizens, and it has been, for twenty years, an impossible task to get any meaningful reform to protect the citizens.

SAFER: So how do they get away with it? Where have you guys been in all these years?

Congressman HANSEN: Everytime you allege they're doing certain things, by the time you prove it, they say, oh well, if we did that we've changed our policy.

SAFER: Just one of the things the IRS did do, and there's a pictorial record of it, is the case of Mona Oliver, a tax protester from Fairbanks, Alaska. The IRS came to seize her car. She locked herself inside. Agents proceeded to smash through the windows and dragged her away through broken glass. They subsequently sold the car for five hundred dollars.

ROSCOE EGGAR: In this particular case we mde judmental errors, errors of just human judgment, under what ever the circumstances were. As a direct result of this, we have changed our procedures. We now require that no revenue officer use force in making a collection unless either his personal safety is jeopardized or that of a third party.

SAFER: What would happen if you just dropped those tough nut cases?

EGGAR: If we made it known that we would never take that drastic action, then it wouldn't be long until those taxpayers, the hard core, who want to resist payment of their taxes in all events, would use that as a way of doing so.

SAFER: So in less oritund language, it's fear?

EGGAR: Well that's your term, not mine. I just chose to say that it's a part of our review program.●

HOUSE OF REPRESENTATIVES—*Sunday, November 22, 1981*

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 1 o'clock p.m., Sunday, November 22, 1981.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

God, be merciful to us and bless us; look on us with kindness, so that the whole world may know Your will; so that all nations may know Your salvation.—Psalm 67: 1, 2.

O God, as we approach our national day of thanksgiving, keep us to be aware of how each of us has been blessed. In spite of problems and pressures from every side, cause us, in this moment of prayer, to recall the liberties and freedoms that have encompassed our Nation. May not the difficulties or anxieties of any time make us forget the gifts that have been given to the people of our land. For Your mercy and providence to us, and for the presence of Your loving spirit that is with us every day of our lives, we offer this our prayer of thanksgiving. Amen.

MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4144) entitled "An act making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes."

The message also announced that the Senate agree to the amendments of the House of Representatives to the amendments of the Senate numbered 14, 17, 18, 33, 47, 52, 57, and 64 to the above-entitled bill.

The message also announced that the Senate recede from its amendment numbered 23 to the above-entitled bill.

The message also announced that the Senate agree to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4034) "An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes."

The message also announced that the Senate agree to the amendments of the House to the amendments of the Senate numbered 5, 13, and 23 to the above-entitled bill.

The message also announced that the Senate agree to the amendment of the House to the amendment of the Senate numbered 4, to the above-entitled bill, with an amendment.

CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 357, FURTHER CONTINUING APPROPRIATIONS, 1982

Mr. WHITTEN submitted the following conference report and statement on the joint resolution (H.J. Res. 357) making further continuing appropriations for the fiscal year ending September 30, 1982, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 97-352)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 357) making further continuing appropriations for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 24, 27, 56, 58, and 59.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 3, 4, 5, 6, 7, 8, 9, 10, 13, 16, 19, 20, 21, 30, 31, 33, 34, 35, 38, 41, 42, 46, 51, 55, 64, 65, 66, and 72 and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

Funds provided in the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriation Act, 1982, notwithstanding section 15(a) of the State Department Basic Authorities Act of 1956 and section 701 of the United States Information and Educational Exchange Act of 1948, as amended; subject to any rates provided for in section 101(k) of this joint resolution as follows:

TITLE I

Department of Commerce: General Administration, "Salaries and Expenses", $28,407,000;

Bureau of the Census: "Salaries and Expenses", $57,200,000; "Periodic Censuses and Programs", $92,898,000;

Economic and Statistical Analysis, "Salaries and Expenses", $25,490,000;

Economic Development Administration, "Salaries and Expenses", $25,000,000;

Minority Business Development Agency, "Minority Business Development", $56,641,000;

Maritime Administration, "Research and Development", $8,491,000;

Marine Mammal Commission, "Salaries and Expenses", $672,000;

except that for the following items funding shall be at the rate specified herein

Economic Development Administration, "Economic Development Assistance Programs", $198,500,000;

Federal Trade Commission, "Salaries and Expenses", $68,774,000;

Small Business Administration: "Salaries and Expenses", $207,945,000; "Small Business Development Centers", $14,000,000 which shall be available only for grants for Small Business Development Centers as authorized by section 20(a) of the Small Business Act, as amended;

United States Metric Board, "Salaries and Expenses", $2,000,000;

TITLE II

Department of Justice: General Administration, "Salaries and Expenses", $42,233,000;

Office of Justice Assistance, Research, and Statistics: "Research and Statistics", $35,000,000;

Legal Services Corporation, "Payment to the Legal Services Corporation", $241,000,000;

And the Senate agree to the same.

Amendment numbered 12:

That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert: *: Provided further, That for the purposes of this joint resolution the Senate reported level of H. R. 4121, entitled the Treasury, Postal Service, and General Government Appropriation Act, 1982, shall be the level reported by the Senate on September 22, 1981 (S. Rept. No. 97-192);*

And the Senate agree to the same.

Amendment numbered 14:

That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

(6) In addition to any sums otherwise appropriated there is appropriated an additional sum of $25,000,000 which shall be made available for training, job search allowances, and relocation allowances, under sections 236, 237, and 238 of the Trade Act of 1974.

And the Senate agree to the same.

Amendment numbered 17:

That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

(c) Such amounts as may be necessary for projects or activities provided for in the District of Columbia Appropriation Act, 1982, at a rate for operations and to the extent and in the manner provided for in the conference report and joint explanatory statement of the committee of conference (H.

Rept. No. 97-327) as agreed to by the House of Representatives on November 18, 1981, and the Senate on November 19, 1981, as if such Act had been enacted into law.

And the Senate agree to the same.

Amendment numbered 18:

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment insert: for in the conference report and joint explanatory statement of the committee of conference (H. Rept. No. 97-345) as approved by the House of Representatives on November 20, 1981, as if such Act had been enacted into law.

And the Senate agree to the same.

Amendment numbered 22:

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

"(1) The amount of the increase in contract authority under the heading 'HOUSING PROGRAMS, Annual Contributions for Assisted Housing', shall be $897,177,848, and the amount of the increase in budget authority under such heading shall be $17,373,528,040.

"(2) The amount appropriated under the heading 'HOUSING PROGRAMS, Housing Counseling Assistance', shall be $3,520,000.

"(3) The amount appropriated under the heading 'SOLAR ENERGY AND ENERGY CONSERVATION BANK, Assistance for Solar and Conservation Improvements', shall be $23,000,000.

"(4) The amount appropriated under the heading 'COMMUNITY PLANNING AND DEVELOPMENT, Community Development Grants', shall be $3,600,000.

"(5) The amount appropriated under the heading 'COMMUNITY PLANNING AND DEVELOPMENT, Urban Development Action Grants', shall be $458,000,000.

"(6) The amount appropriated under the heading 'POLICY DEVELOPMENT AND RESEARCH, Research and Technology', shall be $20,000,000.

"(7) The amount appropriated under the heading 'FAIR HOUSING AND EQUAL OPPORTUNITY, Fair Housing Assistance', shall be $5,016,000.

"(8) The amount appropriated under the heading 'MANAGEMENT AND ADMINISTRATION, Working Capital Fund', shall be $528,000.

"(9) The amount appropriated under the heading. 'DEPARTMENT OF DEFENSE—CIVIL, CEMETERIAL EXPENSES, ARMY, Salaries and Expenses', shall be $4,476,000.

"(10) The amount appropriated under the heading 'ENVIRONMENTAL PROTECTION AGENCY, Salaries and Expenses', shall be $562,837,000.

"(11) The amount appropriated under the heading 'ENVIRONMENTAL PROTECTION AGENCY, Research and Development', shall be $167,759,000.

"(12) The amount appropriated under the heading 'ENVIRONMENTAL PROTECTION AGENCY, Abatement, Control and Compliance', shall be $395,000,000.

"(13) The amount appropriated under the heading 'ENVIRONMENTAL PROTECTION AGENCY, Buildings and Facilities', shall be $3,621,000.

"(14) The amount appropriated under the heading 'EXECUTIVE OFFICE OF THE PRESIDENT, Council on Environmental Quality and Office of Environmental Quality', shall be $919,000.

"(15) The amount appropriated under the heading 'EXECUTIVE OFFICE OF THE PRESIDENT, Office of Science and Technology Policy', shall be $1,578,000.

"(16) The amount appropriated under the heading 'FEDERAL EMERGENCY MANAGEMENT AGENCY, Funds Appropriated to the President, Disaster Relief', shall be $301,694,000.

"(17) The amount appropriated under the heading 'FEDERAL EMERGENCY MANAGEMENT AGENCY, Salaries and Expenses', shall be $93,879,000.

"(18) The amount appropriated under the heading 'FEDERAL EMERGENCY MANAGEMENT AGENCY, State and Local Assistance', shall be $121,829,000.

"(19) The amount appropriated under the heading 'FEDERAL EMERGENCY MANAGEMENT AGENCY, Emergency Planning and Assistance', shall be $67,906,000.

"(20) There are appropriated, out of any money in the Treasury not otherwise appropriated, for the repayment of notes dated April 17, 1979, and September 28, 1979, issued by the Director of the Federal Emergency Management Agency to the Secretary of the Treasury pursuant to section 15(e) of the Federal Flood Insurance Act of 1956 (42 U.S.C. 2414(e)), $328,240,000.

"(21) The amount appropriated under the heading 'DEPARTMENT OF HEALTH AND HUMAN SERVICES, Office of Consumer Affairs', shall be $1,760,000.

"(22) The amount appropriated under the heading 'NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, Research and Development', for the Space Shuttle including space flight operations shall not exceed $3,104,900,000: Provided, That the limitations subject to the approval of the Committees on Appropriations contained under this heading shall not be affected by this subsection.

"(23) The amount appropriated under the heading 'NATIONAL SCIENCE FOUNDATION, Research and Related Activities', shall be $1,010,000,000.

"(24) The amount appropriated under the heading 'NATIONAL SCIENCE FOUNDATION, Science Education Activities', shall be $22,000,000.

"(25) The amount appropriated under the heading 'NATIONAL SCIENCE FOUNDATION, Scientific Activities Overseas (Special Foreign Currency Program)', shall be $3,080,000.

"(26) The amount appropriated under the heading 'SELECTIVE SERVICE SYSTEM, Salaries and Expenses', shall be $18,633,000.

"(27) The amount appropriated under the heading 'DEPARTMENT OF THE TREASURY, Office of Revenue Sharing, Salaries and Expenses', shall be $6,148,000.

"(28) The amount appropriated under the heading 'DEPARTMENT OF THE TREASURY, New York City Loan Guarantee Program', shall be $822,000.

"(29) The amount appropriated under the heading 'VETERANS ADMINISTRATION, Compensation and Pensions', shall be $13,824,000,000.

"(30) The amount appropriated under the heading 'VETERANS ADMINISTRATION, Readjustment Benefits', shall be $1,938,800,000.

"(31) The amount appropriated under the heading 'VETERANS ADMINISTRATION, Medical and Prosthetic Research', shall be $128,215,000.

"(32) The amount appropriated under the heading 'VETERANS ADMINISTRATION, Medical Administration and Miscellaneous Expenses', shall be $57,700,000.

"(33) The amount appropriated under the heading 'VETERANS ADMINISTRATION, Construction, Major Projects', shall be $378,338,000.

"(34) The amount appropriated under the heading 'VETERANS ADMINISTRATION, Construction, Minor Projects' shall be $102,942,000, of which not to exceed $30,018,000 shall be available for the Office of Construction.

"(35) The amount appropriated under the heading 'VETERANS ADMINISTRATION, Grants for Construction of State Extended Care Facilities', shall be $15,840,000.

And the Senate agree to the same.

Amendment numbered 23:

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

"(36) The amount appropriated under the heading 'DEPARTMENT OF THE TREASURY, Investment in National Consumer Cooperative Bank', shall be $43,000,000: Provided, That the final Government equity redemption date for the National Consumer Cooperative Bank shall occur on December 31, 1981.

And the Senate agree to the same.

Amendment numbered 25:

That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows:

In lieu of the subsection number named in said amendment insert 37; and the Senate agree to the same.

Amendment numbered 26:

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows:

In lieu of the subsection number named in said amendment insert 38 ; and the Senate agree to the same.

Amendment numbered 28:

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows:

In lieu of the subsection number named in said amendment insert 39 ; and the Senate agree to the same.

Amendment numbered 36:

That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

(k) Such amounts as may be necessary for projects or activities provided for in the Departments of Commerce, Justice, and State, the Judiciary and Related Agencies Appropriations Act, 1982, shall be at the rate provided in H.R. 4169 as reported to the Senate on October 30, 1981, as amended by the Senate through November 16, 1981, and under the authority and conditions provided in the applicable appropriation Act for fiscal year 1981; notwithstanding section 15(a) of the State Department Basic Authorities Act of 1956 and section 701 of the United States Information and Educational Exchange Act of 1948, as amended, subject to any rates provided for in section 101(a) of this joint resolution as follows:

TITLE I

National Oceanic and Atmospheric Administration: "Operations, Research, and Facilities" (by transfer), $10,000,000; "Fish-

ing Vessel and Gear Damage Compensation Fund", $3,500,000; "Fishermen's Contingency Fund", $900,000; "Fishermen's Guaranty Fund", $1,800,000;

Patent and Trademark Office, "Salaries and Expenses", $118,961,000;

Department of Transportation: Maritime Administration: "Operating—Differential Subsidies (Liquidation of Contract Authority)", $417,148,000; "Operations and Training", $74,898,000;

Department of the Treasury: Chrysler Corporation Loan Guarantee Program, "Administrative Expenses", $1,356,000;

Federal Communications Commission, "Salaries and Expenses", $76,900,000;

Federal Maritime Commission, "Salaries and Expenses", $11,225,000;

International Trade Commission, "Salaries and Expenses", $17,200,000;

Office of the United States Trade Representative, "Salaries and Expenses", $9,000,000: Provided, That not to exceed $60,000 shall be available for official reception and representation expenses;

Small Business Administration: "Salaries and Expenses" (by transfer), $19,200,000; "Disaster Loan Fund", $0; "Lease Guarantees Revolving Fund", $3,000,000; "Surety Bond Guarantees Revolving Fund", $19,000,000;

except that for the following items funding shall be at the rate specified herein:

International Trade Administration, "Operations and Administration", $160,700,000: Provided, That during fiscal year 1982 and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed $29,000,000: Provided further, That during fiscal year 1982, total commitments to guarantee loans shall not exceed $38,250,000 of contingent liability for loan principal;

United States Travel and Tourism Administration, "Salaries and Expenses", $7,600,000;

National Oceanic and Atmospheric Administration: "Operations, Research, and Facilities", $820,455,000; "Coastal Zone Management", $7,415,000; "Coastal Energy Impact Fund", $0: Provided, That obligations under the Coastal Energy Impact Fund for payments pursuant to subsections 308(c), (d), and (f) of the Coastal Zone Management Act of 1972, as amended, shall not exceed $9,000,000: Provided further, That unobligated balances previously available for section 308(d)(4) shall be used for administration of the Act of October 27, 1972, as amended; "Foreign Fishing Observer Fund", $4,000,000;

Science and Technical Research, "Scientific and Technical Research and Services", $125,528,000;

National Telecommunications and Information Administration: "Salaries and Expenses", $16,483,000; "Public Telecommunications Facilities, Planning and Construction", $18,000,000;

Securities and Exchange Commission, "Salaries and Expenses", $82,906,000;

Small Business Administration, "Business Loan and Investment Fund", $326,000,000;

TITLE II

United States Parole Commission, "Salaries and Expenses", $6,200,000;

"Salaries and Expenses, Foreign Claims Settlement Commission", $705,000;

"Salaries and Expenses, Antitrust Division", $44,000,000;

"Salaries and Expenses, United States Attorneys and Marshals", $291,950,000;

"Support of United States Prisoners", $24,100,000: Provided, That not to exceed $3,000,000 shall be available for the purpose of renovating and equipping State and local jail facilities which confine Federal prisoners, as may be authorized by law:

"Fees and Expenses of Witnesses", $27,921,000;

"Salaries and Expenses, Community Relations Service", $5,500,000;

Federal Prison System: "National Institute of Corrections", $11,186,000; "Buildings and Facilities", $13,731,000, including $1,920,000 for the plannng, design, acquisition, and preparation of a site for a Federal Correctional Institution to be located in central Arizona and any necessary relocation or replacement of existing site structures or other improvements, as well as the grading and development of utility distribution systems; "Federal Prison Industries, Incorporated: (Limitation on Administrative and Vocational Training Expenses)", $5,066,000;

Commission on Civil Rights, "Salaries and Expenses", $12,318,000; except that for the following items funding shall be at the rate specified herein:

Department of Justice: Legal Activities, "Salaries and Expenses, General Legal Activities", $123,200,000;

Federal Bureau of Investigation, "Salaries and Expenses", $739,609,000;

Immigration and Naturalization Service, "Salaries and Expenses", $428,557,000;

Drug Enforcement Administration, "Salaries and Expenses", $230,849,000;

Federal Prison System, "Salaries and Expenses", $353,000,000;

Office of Justice Assistance, Research, and Statistics, "Law Enforcement Assistance", $95,923,000. Provided, That $70,000,000 of said amount shall be available only for grants and administrative expenses authorized by title II of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended: Provided further, That $2,369,000 of said amount shall be allocated for undercover property recovery programs operated by State and local governments under the supervision of the Department of Justice: Provided further, That $4,000,000 of said amount provided for the program "Treatment Alternatives to Street Crime" shall be allocated solely to implement Part E of the Justice System Improvement Act of 1979;

Equal Employment Opportunity Commission, "Salaries and Expenses", $139,889,000 of which not to exceed $18,500,000 is for payments to State and local enforcement agencies for services to the Commission pursuant to title VII of the Civil Rights Act, as amended and sections 6 and 14 of the Age Discrimination in Employment Act;

TITLE III

All of title III, the Department of State and Related Agencies Appropriation Act, 1982, except that for the following items funding shall be at the rate specified herein:

Department of State: Administration of Foreign Affairs: "Salaries and Expenses", $898,258,000; "Acquisition, Operation, and Maintenance of Buildings Abroad", $185,970,000; "Buying Power Maintenance", $1,500,000;

International Organizations and Conferences, "Contributions to International Organizations", $415,240,000: Provided, That $28,566,865 shall be available only for the Pan American Health Organization for the payment of 1982 assessed contributions and to reimburse the Pan American Health Organization for payments under the tax equalization program for employees who are United States citizens;

International Communication Agency: "Salaries and Expenses", $443,286,000; "Aquisition and Construction of Radio Facilities", $19,000,000;

TITLE IV

All of title IV, the Judiciary Appropriation Act, 1982, except that for the following item funding shall be at the rate specified herein:

Supreme Court of the United States, "Salaries and Expenses", $11,208,000: Provided, That not to exceed $10,000 shall be for official reception and representation expenses.

And the Senate agree to the same.

Amendment numbered 45:

That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 114. Notwithstanding any other provision of law, funds provided under this joint resolution for the special supplemental food program as authorized by section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786), and the commodity supplemental food program as authorized by section 4(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c (note)) shall not be withheld from obligation unless and until a special message specifying a deferral or rescission of budget authority for such programs is officially submitted to the Congress, when the Congress is in session.

And the Senate agree to the same.

Amendment numbered 47:

That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 116. Nothwithstanding any other provision of law or of this joint resolution, the funds provided for section 18 nonurban formula grants and section 5 urban formula grants in this joint resolution shall be apportioned and allocated using data from the 1970 decennial census for one-half of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the 1980 decennial census.

And the Senate agree to the same.

Amendment numbered 50:

That the House recede from its disagreement to the amendment of the Senate numbered 50, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 119. There are appropriated $750,000 to continue the operations of the Office of Adolescent Pregnancy Programs of the Department of Health and Human Services.

And the Senate agree to the same.

Amendment numbered 52:

That the House recede from its disagreement to the amendment of the Senate numbered 52, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 121. Amounts at the level provided in H.R. 4560 as passed by the House are available for general departmental management, Department of Health and Human Services, and the program direction and support services activity, Assistant Secretary for Health.

And the Senate agree to the same.

Amendment numbered 54:

That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 123. Funding for sections 501(a), (b), and (c) of the Refugee Education Assistance Act of 1980 and for the Refugee Act of 1980 shall be at levels and under the terms and conditions of the Labor Health and Human Services Education Act, 1982, as passed by the Senate.

And the Senate agree to the same.

Amendment numbered 60:

That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 129. There is appropriated $69,800,000 for section 611 of the Education of the Handicapped Act which is in addition to amounts appropriated under this joint resolution which would otherwise be made available under H.R. 4560, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982, as reported to the Senate on November 9, 1981, for such section 611.

And the Senate agree to the same.

Amendment numbered 61:

That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 130. for carrying out, to the extent not otherwise provided, the Rehabilitation Act of 1973, as amended, and the International Health Research Act of 1960, $991,845,000, of which $892,865,538 shall be for allotments under section 100(b)(1), $6,134,462 shall be for activities under section 110(b)(3), $650,000 shall be made available to the Navajo Tribal Council for activities under section 130, and $18,000,000 shall be for activities under section 711 of the Rehabilitation Act of 1973.

And the Senate agree to the same.

Amendment numbered 62:

That the House recede from its disagreement to the amendment of the Senate numbered 62, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 131. The Attorney General shall exercise his best efforts to ensure that none of the funds appropriated by this joint resolution may be obligated or expended after March 1, 1982, for the detention of any entrant, any applicant for political asylum or for refugee status, or any other alien which would cause the total number of aliens to exceed five hundred and twenty-five at the facility known as Krome North, located in the State of Florida, or to exceed five hundred and twenty-five at any other facility in the State of Florida for the detention of aliens awaiting exclusion, deportation, or resettlement which is not used for such purpose on the date of enactment of this joint resolution.

And the Senate agree to the same.

Amendment numbered 63:

That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 132. There is appropriated an additional $45,000,000 for the payment of windfall benefits, as provided under section 15(d) of the Railroad Retirement Act of 1974, which, together with the amounts appropriated under this joint resolution which would otherwise be made available under H.R. 4560, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982, for the payment of such benefits, shall be the maximum amount available for payments through September 30, 1982.

And the Senate agree to the same.

Amendment numbered 67:

That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 136. There is appropriated the sum of $362,000,000 for the Maternal and Child Health Care Block Grant Act.

And the Senate agree to the same.

Amendment numbered 68:

That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 137. There are appropriated to the Department of Health and Human Services $61,180,000 for activities under the Developmental Disabilities Assistance and Bill of Rights Act of 1981.

And the Senate agree to the same.

Amendment numbered 69:

That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment, as follows:

In lieu of the matter proposed by said amendment insert:

Sec. 138. There is appropriated $10,000,000 for Part B of Title IV of the Comprehensive Employment and Training Act relating to the Job Corps which is in addition to the amounts appropriated under this joint resolution which would otherwise be made available under H.R. 4560, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982, as reported to the Senate on November 9, 1981, for the Job Corps.

And the Senate agree to the same.

Amendment numbered 71:

That the House recede from its disagreement to the amendment of the Senate numbered 71, and agree to the same with an amendment, as follows:

In lieu of the matter inserted by said amendment, insert the following:

Sec. 140. (a) Notwithstanding any other provision of this joint resolution and in order to execute Congressional responsibilities udner the Constitution to provide specific items of expenditures, appropriations made available by this joint resolution shall be reduced proportionally by 2 percent for programs, projects, or activities for which provisions would be made in the following appropriation Acts:

District of Columbia Appropriation Act, 1982;

Energy and Water Development Appropriation Act, 1982;

Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1982;

Department of the Interior and Related Agencies Appropriation Act, 1982;

Departments of Labor, Health and Human Services, and Education, and Related Agencies, 1982;

Military Construction Appropriation Act, 1982; and

Treasury, Postal Service and General Government Appropriation Act, 1982.

(b) Total appropriation made available in this joint resolution under the Department of Defense Appropriation Act shall be reduced by 2 percent: Provided, That such reductions in total appropriation shall be applied proportionally only to projects and activities in Titles IV and V of such Act: Provided further, That after the conclusion of the 1st Session of the 97th Congress, the level of budget authority for the Department of Defense shall be the level of the conference agreement on the Department of Defense Appropriation Bill for fiscal year 1982. If such agreement has not been reached by the conclusion of the 1st Session of the 97th Congress, the level shall be as set forth by section 101(a)(3) of this joint resolution.

(c) Appropriations made available to the Department of Agriculture in this joint resolution are hereby reduced in the following amounts:

Public Law 480, $80,000,000;

Rural Housing Insurance Fund, reimbursement for losses in prior years, $97,000,000;

Agriculture Credit Insurance Fund, reimbursement for losses in prior years, $56,000,000; and

Rural Development Insurance Fund, reim bursement for losses in prior years $24,000,000.

(d) Appropriations made available for the projects or activities provided for in the Department of Transportation and Related Agencies Appropriation Act, 1982, in this joint resolution are hereby reduced in the following amounts:

Department of Transportation:

Office of the Secretary, salaries and expenses and transportation planning, research, and development, $4,000,000;

Coast Guard, operating expenses, $20,000,000, of which $5,000,000 shall be deducted from the amounts made available for recreational boating safety; acquisition, construction, and improvements, $10,000,000; alteration of bridges, $4,000,000; research, development, test, and evaluation, $2,000,000; offshore oil pollution compensation fund, $3,000,000; and deepwater port liability fund, $3,000,000;

Federal Aviation Administration, operations, $20,000,000; facilities, engineering and development, $5,000,000; facilities and equipment (Airport and Airway Trust Fund), $18,000,000; research, engineering and development (Airport and Airway Trust Fund), $6,000,000; and construction, Metropolitan Washington Airports, $5,000,000;

Federal Highway Administration, highway safety research and development, $2,000,000; highway beautification, $1,000,000; territorial highways, $1,000,000; and interstate transfer grants—highways, $18,000,000;

National Highway Traffic Safety Administration, operations and research, $5,000,000;

Federal Railroad Administration, office of the administrator, $500,000; railroad safety, $1,000,000; railroad research and development, $5,000,000; rail service assistance, $4,000,000, of which at least $2,000,000 shall be deducted from amounts made available for the Minority Business Resource Center; Northeast corridor improvement program; $6,000,000; and redeemable preference shares, $5,000,000;

Urban Mass Transportation Administration, administrative expenses, $1,500,000; research, development, and demonstrations and university research and training, $4,000,000; urban discretionary grants,

$14,750,000; non-urban formula grants, $2,000,000; urban formula grants, $14,250,000; and interstate transfer grants—transit, $12,000,000;

Research and Special Programs Administration, research and special programs, $3,000,000, of which $1,000,000 shall be deducted from the amounts made available for research and development and $300,000 shall be deducted from amounts made available for grants-in-aid as authorized by section 5 of the Natural Gas Pipeline Safety Act of 1968;

Related Agencies:

Interstate Commerce Commission, salaries and expenses, $3,000,000;

Department of the Treasury, Office of the Secretary, investment in fund anticipation notes, ($5,000,000); and

United States Railway Association, administrative expenses, $3,000,000.

(e) Reductions made by this section shall not apply to appropriations for those activities involving new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act of 1974 including revenue sharing under the Payment to State and Local Government Fiscal Assistance Trust Fund, activities supported under the budget account entitled "Social Security Administration, Limitation on Administrative Expenses" or from funds available for the administration of the Medicare program, the food stamp program, and Veterans' medical care.

(f) Reductions made by this section shall not apply to any account, activity, program or project for which funds are provided by a 1982 appropriation Act enacted into law subsequent to the enactment of this joint resolution.

(g) No account, activity, program or project may be terminated as a result of reductions made pursuant to this section.

(h) Notwithstanding any other provision of this joint resolution, this resolution (other than sections 101 (l), 142, and 144) shall expire on July 15, 1982.

And the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 11, 15, 29, 32, 37, 39, 40, 43, 44, 48, 49, 53, 57, 70, 73, 74, and 75.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 357), making further continuing appropriations for the fiscal year 1982 and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

RATE OF OPERATIONS

Amendment No. 1: Restores language proposed by the House which provides funding under Sec. 101(a) of the continuing resolution for the Departments of Commerce, Justice, and State, the Judiciary and Related Agencies Appropriation Act, 1982, amended to provide for only certain items in said Act, as follows:

Title I

Department of Commerce: General Administration, "Salaries and Expenses", $28,407,000;

Bureau of the Census: "Salaries and Expenses", $57,200,000; "Periodic Censuses and Programs", $92,898,000;

Economic and Statistical Analysis, "Salaries and Expenses", $25,490,000;

Economic Development Administration, "Salaries and Expenses", $25,000,000;

Minority Business Development Agency, "Minority Business Development", $56,641,000;

Maritime Administration, "Research and Development", $8,491,000;

Marine Mammal Commission, "Salaries and Expenses", $672,000;

except that for the following items funding shall be at the rate specified herein:

Economic Development Administration, "Economic Development Assistance Programs", $198,500,000;

Federal Trade Commission, "Salaries and Expenses", $68,774,000;

Small Business Administration: "Salaries and Expenses", $207,945,000; "Small Business Development Centers", $14,000,000 which shall be available only for grants for Small Business Development Centers as authorized by section 20(a) of the Small Business Act, as amended;

United States Metric Board, "Salaries and Expenses", $2,000,000;

TITLE II

Department of Justice: General Administration, "Salaries and Expenses", $42,233,000;

Office of Justice Assistance, Research, and Statistics: "Research and Statistics", $35,000,000;

Legal Services Corporation, "Payment to the Legal Services Corporation", $241,000,000;

REPRESENTATION ALLOWANCES

The conferees are agreed that the authorized ceilings for official representation allowances in H.R. 4169 as passed by the House, shall apply unless specified otherwise.

DEPARTMENT OF COMMERCE

ECONOMIC DEVELOPMENT ASSISTANCE PROGRAMS

The conferees are agreed that $198,500,000 shall be available for economic development assistance programs in the following manner:

	Thousands
Public works	$130,000
Planning assistance	25,500
Districts	(15,000)
Indians	(3,000)
States	(2,900)
Urban	(4,600)
Technical assistance	8,000
University centers	(3,000)
Research and evaluation programs	2,000
Economic adjustment	33,000
Total	198,500

The conferees are further agreed that direct loans of $30,000,000 and any payments for loan defaults shall be derived from the Economic Development Revolving Fund.

SMALL BUSINESS ADMINISTRATION

SALARIES AND EXPENSES

The conference agreement provides $207,945,000 in new budget authority for salaries and expenses of the Small Business Administration and an additional $19,200,000 by transfer from the Disaster Loan Fund, as specified in Senate Report 97-265. The conference agreement also provides $14,000,000 for Small Business Development Centers. A total of $18,376,000 is provided under Salaries and Expenses for management assistance programs, including SCORE/ACE, Small Business Institutes, junior college training programs, general contractual assistance, as specified in House Report 97-180, and the Office of International Trade as detailed in Senate Report 97-265. The conferees are agreed that $6,600,000 shall be provided for advocacy programs including $1,000,000 for establishing an indicative data base, as specified in House Report 97-180, and $1,000,000 for development of an external small business economic data base, as specified in Senate Report 97-265. The conferees are agreed that the rate provides $300,000 in additional funds for the Office of the Inspector General and $175,000 in additional funds for technology transfer programs, as specified in Senate Report 97-265.

Amendment No. 2: Deletes House reference to the "District of Columbia Appropriation Act, 1982;" from section 101(a)(1) which provides funding for activities in the D. C. Appropriation Act at the lower of the current rate or the rate provided for in the House-passed version of the Act as proposed by the Senate. See amendment No. 17 for the funding rate agreed to by the Committee of Conference.

Amendment No. 3: House recedes to Senate language including Department of Defense Appropriation Act, 1982, under Sec. 101(a)(1) establishing Defense availability rate at the lower amount passed by the two Houses.

Amendment No. 4: Inserts language proposed by the Senate which provides funding for Military Construction at a rate for projects and activities under the lesser or more restrictive authority of the Senate or House passed bill, with the Senate reported bill considered to have passed.

Amendment No. 5: Includes the word "and" as proposed by the Senate.

Amendment No. 6: Deletes language proposed by the House which would have funded the projects or activities provided for in the Department of Transportation and Related Agencies Appropriation Act, 1982, at the lower of the House passed bill or the current rate.

Amendment Nos. 7, 8, 9, and 10: Provide technical adjustment as proposed by the Senate.

Amendment No. 11: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment amended to read as follows:

In lieu of the matter stricken by said amendment, insert the following: *Provided further, That, in addition to the sums otherwise made available by this paragraph the following additional sums are hereby appropriated:*

for low income home energy assistance program, $140,000,000;

for the foster care program authorized by Title IV of the Social Security Act, $75,000,000: Provided, That the provisions contained in the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriation Act for Fiscal Year 1982 (H.R. 4560), as reported by the Senate Committee on Appropriations on November 9, 1981, related to a limitation on entitlement to payments under parts A and E of title IV of the Social Security Act and transfer of funds under parts B and E of such title (contained in H.R. 4560 as so reported beginning with "provided" on page 39, line 17, and ending on page 40, line 8) shall not be applicable with respect to any sums appropriated pursuant to this joint resolution;

for the family medicine residency training programs authorized by Section 786 of the Public Health Service Act, $10,000,000;

for the Community Services Block Grant, $62,552,000;

for the State Block Grant authorized by Chapter 2 of the Education Consolidation and Improvement Act of 1981, $140,000,000: Provided further, That the College Housing Loan Program shall operate under the terms and conditions as contained in H.R. 4560 as passed the House October 6, 1981 except that the gross commitments for the principal amount of direct loans shall not exceed $75,000,000

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees wish to clarify that the College Housing program is intended to function at a level of $75 million for direct loan commitments. The revolving fund is to be used to first fund the balance of any approved applications of fiscal year 1981 that were not fully funded because of a deficiency in budget authority.

The conferees direct the Secretary of Health and Human Services, through the Office of Community Services, to continue to use his existing authority to make loans and loan guarantees through the rural development loan fund authorized under Section 681 of the Reconciliation Act of 1981. The conferees are agreed that the Secretary shall adhere to the terms and conditions of the House Committee Report on H.R. 4560 in allocating discretionary funds under the community services block grant.

The conferees intend that for the "Bilingual education" appropriation the annual rate of operations under the Continuing Resolution is $143,810,000, the amount contained in both the House and Senate versions of the Labor, Health and Human Services, and Education appropriation bill for 1982. The conferees are agreed that the rate of operations for the activities under the total amount available shall be as follows:

	Thousands
Grants to school districts	$82,523
Training grants	30,038
Support services	19,747
Bilingual desegregation grants	7,662
Bilingual vocational training	3,840

Any Federal agency has statutory authority to restrain spending of funds made available by the Continuing Resolution only after the President has, in accordance with the Impoundment Control Act of 1974, sent to the Congress a report which indicates which deferrals or rescissions are being proposed.

During the period in which this Continuing Resolution is in effect, the conferees expect the General Accounting Office to continue to monitor the deferral and rescission process to assure that the proper notices are sent to the Congress before funds for specific programs are impounded. In addition, the GAO should determine whether violations of the Impoundment Act took place during the period between October 1 and November 20, 1981, when the First Continuing Resolution was in effect, regarding whether illegal withholding of funds to States occurred and assure that funds to which States are now entitled, regardless of whether or not they elected to take any of the block grants, are returned to them within a reasonable period of time.

RATE OF OPERATIONS IN H.R. 4121

Amendment No. 12: Amends language proposed by the Senate to delete reference to the date of November 17, 1981. The conferees are agreed that $1,100,000 of the funds made available to the U.S. Secret Service by this Continuing Resolution are to be used to make necessary and needed improvements at the instinctive range at Beltsville, Maryland. The conferees are further agreed that the Assay Office in New York City should not be closed.

Amendment No. 13: Provides technical adjustment as proposed by the Senate.

Amendment No. 14: Appropriations $25,000,000 for training, job search allowances, and relocation allowances under the Trade Act of 1974, instead of $50,000,000 as proposed by the Senate. The House included no specific funding for this.

Amendment No. 15. Reported in disagreement.

Amendment No. 16: House recedes to Senate deletion of House language which had established Defense availability rate at the lower amount of either the current rate or the budget estimate.

Amendment No. 17: Amends Senate language so that activities in the District of Columbia Appropriation Act, 1982, (H.R. 4522) will be funded at the rate provided for in the Conference Report and amendments in disagreement as agreed to by the House on November 18, 1981, and the Senate on November 19, 1981. The Senate proposal funded these activities at the rate agreed to by the Committee of Conference as reflected in House Report No. 97-327 filed in the House on November 12, 1981. Both bodies subsequently rejected the conference action on amendment no. 42 which dealt with the salary of the City Administrator and the per diem rate for Board members of the D.C. Redevelopment Land Agency.

Amendment No. 18. Provides that the rate of expenditures for the Energy and Water Development Appropriations Act of FY 1982 (H.R. 4144) shall be as provided for in the conference report and joint explanatory statement of the Managers (H. Rept. No. 97-345) as approved by the House of Representatives on November 20, 1981, rather than as filed in the House on November 19, 1981.

The Corps of Engineers is directed to carry out the Lincoln School, Maine, study as proposed on page 24 of Senate Report 97-256. Funds are included for the north branch of the Chicago River, Illinois, and the Cape May Inlet to Lower Township, N.J. project. The Department of Energy is directed to provide $1 million of the funds provided in the Solar Reserve Account for solar international activities as discussed during the floor debate on H.R. 4144 in the House of Representatives on July 23 and 24, 1981.

Amendment No. 19: Deletes language proposed by the House.

Amendment No. 20: Inserts language as proposed by the Senate establishing the rate of operations for the projects or activities provided for in the Department of Transportation and Related Agencies Appropriation Act, 1982, at the conference agreement level.

Amendment No. 21: Includes language providing that agencies carried in the 1982 HUD-Independent Agencies Appropriation Bill (H.R. 4034) be funded at a rate for operations and to the extent and in the manner provided for in the conference report and joint explanatory statement of the Committee of Conference (H. Rept. 97-222) with the addition of a new title V as proposed by the Senate instead of providing for the agencies exclusively as provided for in House Report 97-222 as proposed by the House.

Amendment No. 22: Includes language changing certain amounts and provisions in the conference agreement on the HUD-Independent Agencies Appropriation Act, 1982 as proposed by the Senate and modified by the conference column in the following table. The House resolution contained no comparable provision.

Agency/Account	House	Senate	Conference
Department of Housing and Urban Development:			
1. Annual contributions for assisted housing—Annual contract authority	($916,233,800)	($897,177,848)	($897,177,848)

Limitation on Office of Construction	(30,279,000)	(30,018,000)	(30,018,000)
37. Grants for construction of State extended care facilities	18,000,000	15,840,000	15,840,000

[1] Contains no comparable provision.
[2] Contains the following provision: "of which not to exceed $3,104,900,000 shall be available for the Space Shuttle including space flight operations: Provided, That the limitations subject to the approval of the Committees on Appropriations contained under this heading shall not be affected by this subsection."
[3] Retains Senate provision.

The Administration transmitted to the Congress on November 19, 1981, an amended budget request for the Federal Emergency Management Agency. The budget amendment redistributes resources among Agency accounts. The effect of the latest proposal is to reduce the disaster relief fund by $23,027,000 to cover shortfalls in the Agency's operating accounts. Tariff rates for the civil defense and national security telecommunications systems were recently increased substantially. This requires the realignment of $10,000,000 in 1982. Of that total, $8,990,000 is reflected in the emergency planning and assistance account and $1,010,000 is included under salaries and expenses. The conference agreement provides for the tariff increase.

The budget amendment increases the salary and expenses request by $10,510,000 above the restructured March proposal. The revised total is $93,879,000. The major reason for the increase is to cover a $7,500,000 salary shortfall. The other components of the increase are the tariff adjustment addressed above and $2,000,000 for additional space rental charges. The salary shortfall is the result of an inexcusable error in budget preparation. When the 1982 Congressional budget submission was developed, the Agency never properly accounted for the October 1980 9.1 percent pay raise. The Agency's internal financial controls were so inadequate that the error was not discovered until nearly nine months later. Further evidence of the problems the Agency is experiencing is the fact that the financial records for fiscal year 1980 were not made final with the Treasury until more than 12 months after the end of the year. Because denial of the increase could severely hamper Agency operations for disaster mitigation and responses, the conferees have provided the additional funds requested. However, the Agency is advised that mistakes of this magnitude are unconscionable and will not be condoned. During hearings on the 1983 budget estimate, officials of the Federal Emergency Management Agency will be expected to demonstrate the managerial and procedural improvements which have been instituted to ensure better Agency operations.

The Committee of Conference agrees that within the total provided for emergency planning and assistance, the Agency shall make available $4,000,000 to the National Bureau of Standards for the continued operation of the Center for Fire Research. This is the amount requested in the March budget estimate.

The conferees have provided $57,700,000 for the medical administration and miscellaneous operating expenses account in the Veterans Administration. Included within the total is $4,000,000 above the budget estimate for the nurse scholarship program.

The Conferees have restored funds above the amended September budget estimate in the research and development account of the National Aeronautics and Space Administration for the following program areas:

	Thousands
Space sciences	+$37,000
Space applications	+36,000
Aeronautics	+41,000
Space research and technology	+14,000

In addition, the Conferees agree to add $70,000,000 for application in accordance with the directions set forth in regard to Amendment No. 27 in H. Rept. 97-222, accompanying H.R. 4034. The balance of the increase above the budget estimate may be distributed at the discretion of the agency with notification by December 31, 1981, and approval of the Committees on Appropriations.

Finally, the Conferees direct that these amounts may not be used for purposes other than that enumerated above without the approval of the Committee on Appropriations.

Amendment No. 23: Inserts language proposed by the Senate amended to provide that the amount appropriated for investment in National Consumer Cooperative Bank shall be $43,000,000 instead of $41,360,000, and to establish the equity redemption date as December 31, 1981 and to change the subsection number. The conference agreement deletes language regarding the purchase of stock.

Amendment No. 24: Inserts language proposed by the Senate to provide that the amount appropriated for salaries and expenses shall be $564,776,000, and that $15,640,000 shall be transferred from the unearned fees and charges account.

Amendment No. 25: Inserts language proposed by the Senate that provides $75,960,000 for a temporary mortgage assistance payments program, amended to change the subsection number.

Amendment No. 26: Inserts language proposed by the Senate extending the availability of payments for operation of low-income housing projects—fiscal year 1981 until September 30, 1982, and providing for the obligation of such funds, amended to change the subsection number.

Amendment No. 27: Deletes language proposed by the Senate providing that the amount appropriated under the heading

"payments for operation of low-income housing projects" shall be $1,060,048,000.

Amendment No. 28: Inserts language proposed by the Senate to disapprove $33,800,000 of the proposed deferral D82-140 relating to construction, major projects, amended to change the subsection number.

Amendment No. 29: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

(40) Notwithstanding any other provision of this Act, including any other provision of this title, any agency may before December 31, 1981, transfer to salaries and expenses from other sources made available to it by this Act, such amounts as may be required if the aggregate amount available for salaries and expenses, after such transfer, does not exceed the amount contained for such purposes in this Act before the application of the changes contained in title V: Provided, That such transfers shall be subject to the approval of the Committees on Appropriations: Provided further, That in the Department of Housing and Urban Development not to exceed (1) $34,000,000 shall be available for data processing services, (2) 12 full-time permanent positions and 16 staff years shall be available for the Immediate Office of the Assistant Secretary for Administration, and (3) 26 full-time permanent positions and 27 staff years shall be available for the Office of the Assistant Secretary for Legislation and Congressional Relations: Provided further, That in the National Aeronautics and Space Administration not to exceed (1) 150 full-time permanent positions shall be available for the Office of the Comptroller and (2) 120 full-time permanent positions shall be available for the Office of External Relations: Provided further, That in the Veterans' Administration not to exceed (1) $1,500,000 shall be available for the Office of Planning and Program Evaluation and (2) 649 staff years shall be available for the Supply Service.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendments Nos. 30 and 31. Provides the rate for the Department of the Interior and related agencies Appropriation Act, 1982 shall be as provided for in the Conference report (H. Rept. No. 97-315) as approved by the House on November 12, 1981 rather than as filed in the House on November 5, 1981.

Amendment No. 32. Reported in disagreement.

Amendment Nos. 33 and 34: Changes the paragraph designation and includes language proposed by the Senate related to the operation, transfer or closure of the Public Health Service Hospitals and clinics. The conference agreement accepts all of the terms of the President's proposal contained in his request to the Congress of November 9, 1981 (H. Doc. 97-107). This language will facilitate the orderly closure of most of these facilities during fiscal year 1982 and the transfer of four of the hospitals to community use and control.

Amendment No. 35: Changes subsection designation.

Amendment No. 36: Inserts language which provides funding under Section 101(k) of the continuing resolution only for certain appropriation items in the Departments of Commerce, Justice, and State, the Judiciary and Related Agencies Appropriation Act, 1982, instead of all appropriation items in said Act as proposed by the Senate, as follows:

TITLE I

National Oceanic and Atmospheric Administration: "Operations, Research, and Facilities" (by transfer), $10,000,000; "Fishing Vessel and Gear Damage Compensation Fund", $3,500,000; "Fishermen's Contingency Fund", $900,000; "Fishermen's Guaranty Fund", $1,800,000;

Patent and Trademark Office, "Salaries and Expenses", $118,961,000;

Department of Transportation: Maritime Administration: "Operating—Differential Subsidies (Liquidation of Contract Authority)", $417,148,000; "Operations and Training", $74,898,000;

Department of the Treasury: Chrysler Corporation Loan Guarantee Program, "Administrative Expenses", $1,356,000;

Federal Communications Commission, "Salaries and Expenses", $76,900,000;

Federal Maritime Commission, "Salaries and Expenses", $11,225,000;

International Trade Commission, "Salaries and Expenses", $17,200,000;

Office of the United States Trade Representative, "Salaries and Expenses", $9,000,000: Provided, That not to exceed $60,000 shall be available for official reception and representation expenses;

Small Business Administration: "Salaries and Expenses" (by transfer), $19,200,000; "Disaster Loan Fund", $0; "Lease Guarantees Revolving Fund", $3,000,000; "Surety Bond Guarantees Revolving Fund", $19,000,000;

except that for the following items funding shall be at the rate specified herein:

International Trade Administration, "Operations and Administration", $160,700,000: Provided, That during fiscal year 1982 and within the resources and authority available, gross obligations for the principal amount of direct loans shall not exceed $29,000,000: Provided further, That during fiscal year 1982, total commitments to guarantee loans shall not exceed $38,250,000 of contingent liability for loan principal;

United States Travel and Tourism Administration, "Salaries and Expenses", $7,600,000;

National Oceanic and Atmospheric Administration: "Operations, Research, and Facilities", $820,455,000; "Coastal Zone Management", $7,415,000; "Coastal Energy Impact Fund", $0: Provided, That obligations under the Coastal Energy Impact Fund for payments pursuant to subsections 308(c), (d), and (f) of the Coastal Zone Management Act of 1972, as amended, shall not exceed $9,000,000: Provided further, That unobligated balances previously available for section 308(d)(4) shall be used for administration of the Act of October 27, 1972, as amended; "Foreign Fishing Observer Fund", $4,000,000;

Science and Technical Research, "Scientific and Technical Research and Services", $125,528,000;

National Telecommunications and Information Administration: "Salaries and Expenses", $16,483,000; "Public Telecommunications Facilities, Planning and Construction", $18,000,000;

Securities and Exchange Commission, "Salaries and Expenses", $82,906,000;

Small Business Administration, "Business Loan and Investment Fund", $326,000,000;

TITLE II

United States Parole Commission, "Salaries and Expenses", $6,200,000;

"Salaries and Expenses, Foreign Claims Settlement Commission", $705,000;

"Salaries and Expenses, Antitrust Division", $44,000,000;

"Salaries and Expenses, United States Attorneys and Marshalls", $291,950,000;

"Support of United States Prisoners", $24,100,000: Provided, That not to exceed $3,000,000 shall be available for the purpose of renovating and equipping State and local jail facilities which confine Federal prisoners, as may be authorized by law;

"Fees and Expenses of Witnesses", $27,921,000;

"Salaries and Expenses, Community Relations Service", $5,500,000;

Federal Prison System: "National Institute of Corrections", $11,186,000; "Buildings and Facilities", $13,731,000, including $1,920,000 for the planning, design, acquisition, and preparation of a site for a Federal Correctional Institution to be located in central Arizona and any necessary relocation or replacement of existing site structures or other improvements, as well as the grading and development of utility distribution systems; "Federal Prison Industries, Incorporated: (Limitation on Administrative and Vocational Training Expenses)", $5,066,000;

Commission on Civil Rights, "Salaries and Expenses", $12,318,000; except that for the following items funding shall be at the rate specified herein;

Department of Justice: Legal Activities, "Salaries and Expenses, General Legal Activities", $123,200,000;

Federal Bureau of Investigation, "Salaries and Expenses", $739,609,000;

Immigration and Naturalization Service, "Salaries and Expenses", $428,557,000;

Drug Enforcement Administration, "Salaries and Expenses", $230,849,000;

Federal Prison System, "Salaries and Expenses", $353,000,000;

Office of Justice Assistance, Research, and Statistics, "Law Enforcement Assistance", $95,923,000: Provided, That $70,000,000 of said amount shall be available only for grants and administrative expenses authorized by title II of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended: Provided further, That $2,369,000 of said amount shall be allocated for undercover property recovery programs oeprated by State and local governments under the supervision of the Department of Justice: Provided further, That $4,000,000 of said amount provided for the program "Treatment Alternatives to Street Crime" shall be allocated solely to implement Part E of the Justice System Improvement Act of 1979;

Equal Employment Opportunity Commission, "Salaries and Expenses", $139,889,000 of which not to exceed $18,500,000 is for payments to State and local enforcement agencies for services to the Commission pursuant to title VII of the Civil Rights Act, as amended and sections 6 and 14 of the Age Discrimination in Employment Act;

TITLE III

All of title III, the Department of State and Related Agencies Appropriation Act, 1982, except that for the following items funding shall be at the rate specified herein:

Department of State: Administration of Foreign Affairs: "Salaries and Expenses", $898,258,000; "Acquisition, Operation, and Maintenance of Buildings Abroad", $185,970,000; "Buying Power Maintenance", $1,500,000;

International Organizations and Conferences, "Contributions to International Organizations", $415,240,000: Provided, That $28,566,865 shall be available only for the Pan American Health Organization for the payment of 1982 assessed contributions and

to reimburse the Pan American Health Organization for payments under the tax equalization program for employees who are United States citizens;

International Communication Agency: "Salaries and Expenses", $443,286,000; "Acquisition and Construction of Radio Facilities", $19,000,000;

TITLE IV

All of title IV, the Judiciary Appropriation Act, 1982, except that for the following item funding shall be at the rate specified herein:

Supreme Court of the United States, "Salaries and Expenses", $11,208,000: Provided, That not to exceed $10,000 shall be for official reception and representation expenses.

And the Senate agree to the same.

REPRESENTATION ALLOWANCES

The conferees are agreed that the authorized ceilings for official representation allowances in H.R. 4169 as passed by the House, shall apply unless specified otherwise.

REPROGRAMMING POLICY

The conferees are agreed that Section 508 of H.R. 4169, as reported by the Senate, concerning reprogramming policy shall govern the Departments, agencies, commissions, and administrations funded in the Departments of Commerce, Justice, and State, the Judiciary and Related Agencies Appropriation Act, 1982.

DEPARTMENT OF COMMERCE

INTERNATIONAL TRADE ADMINISTRATION

The conferees are agreed that of the $160,700,000 provided for the International Trade Administration, funding for trade adjustment assistance programs shall be at the rate set forth in Senate Report No. 97-265, and that $1,000,000 shall be used to fund the small business export expansion program in fiscal year 1982. The conferees note that the Department of Commerce did not carry out this program in fiscal year 1981 with the $1,000,000 provided for that purpose, and fully expect the Department to obligate a total of $2,000,000 in FY 1982 for small business export expansion activities.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

The conferees intend that of the $820,455,000 provided herein for "Operations, Research, and Facilities", the rate for those projects and activities listed in Senate Report No. 97-265 shall apply with the following exceptions: Anadromous fishery grants, $3,375,000; Sea Grant, $35,000,000; Commercial Fisheries R&D, $4,000,000; Sand Point (EXAD), $450,000; Climate data activities, $11,100,000; AFOS, $11,730,000; GOES Satellite, $15,870,000; Weather modification (NOAA), $669,000; LANDSAT, $1,100,000; Fur Seals, $-0-; Habitat monitoring, $-0-; North Dakota/Utah weather modification, $300,000. In addition, the conferees are agreed that $926,500 is provided for the 38 weather stations proposed for termination.

NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION

The conferees are agreed that of the total amount provided for the National Telecommunications and Information Administration, "Salaries and Expenses", funds shall be allocated to retain twelve of the nineteen employees scheduled for termination as proposed in the March 10 budget estimates.

FEDERAL COMMUNICATIONS COMMISSION

The conferees are agreed that the Federal Communications Commission shall not move any of its offices in the District of Columbia from their present locations until approval is secured from the Committees on Appropriations of the House and Senate. The conferees are further agreed that the Commission should provide adequate staff and other necessary support for research and other activities for the Temporary Commission on Alternative Financing for Public Telecommunications.

SCIENCE AND TECHNICAL RESEARCH

The conferees are agreed that within the total amount provided for "Scientific and technical research and services", funds shall be allocated as prescribed in House Report No. 97-180. The conferees are further agreed that with regard to the closeout of the Smithsonian Science Information Exchange, the Department of Commerce shall provide to those employees separated from SSIE due to the closeout all rights, benefits, severance pay and other considerations that would be extended and afforded any group of Federal employees under the same conditions.

SECURITIES AND EXCHANGE COMMISSION

The conferees are agreed that of the $82,906,000 provided for the Securities and Exchange Commission, the Commission shall endeavor to achieve the objectives and carry out the activities, within the resources available, detailed in Senate Report No. 97-265. The conferees are further agreed that the SEC shall not move any of its offices in the District of Columbia from their present locations until approval is secured from the Committees on Appropriations of the House and Senate.

SMALL BUSINESS ADMINISTRATION

Business loan and investment fund

The conference agreement provides a rate of $326,000,000 for the Business Loan and Investment Fund of the Small Business Administration. The conferees are agreed that the rate provided shall support a total of $3,300,000,000 in guaranteed loans, as specified in Senate Report 97-265, and a total of $225,000,000 in direct loans as detailed in Senate Report 97-265, except that $120,000,000 will be available for direct business loans. The conferees are agreed that $31,000,000 in unanticipated, unobligated balances shall be used to support the loan levels provided.

DEPARTMENT OF JUSTICE

ADMINISTRATIVELY UNCONTROLLABLE OVERTIME

The conferees are agreed that the rate of funding provided for the Federal Bureau of Investigation, the Immigration and Naturalization Service, and the Drug Enforcement Administration included the full amount requested for Administratively Uncontrollable Overtime (AUO) as set forth in Senate Report 97-265.

UNITED STATES ATTORNEYS AND MARSHALS

The conferees are agreed that the $291,950,000 provided for the United States Attorneys and Marshals include $5,000,000 which shall be available for the United States Bankruptcy Trustees. The conferees are futher agreed that this program is to be financed out of savings realized for the U.S. Attorneys and U.S. Marshals and that in no event are personnel levels for these activities to be reduced in order to fund the U.S. Trustees.

FEDERAL BUREAU OF INVESTIGATION

The conferees are concerned about recent action taken by the Federal Bureau of Investigation which suspended fingerprint identification services provided to states and local authorities, banking and other financial institutions. The conferees expect that the Director will make every effort to restore such service within the current fiscal year.

IMMIGRATION AND NATURALIZATION SERVICE

The conference agreement provides $428,557,000 for the Immigration and Naturalization Service. This amount is $41,421,000 higher than that in H.R. 4169 as passed by the House of Representatives but is $45,000,000 less than the level in H.R. 4169 as amended by the Senate. The conference agreement includes funds for enforcement and detention, but does not provide $35,000,000 added by the Senate for the construction of a permanent new detention facility. The conferees are agreed that the rate of funding provided is sufficient to maintain the number of Border patrol and investigations positions provided in House Report 97-180. In addition, the conferees are agreed that INS provide positions detailed in Senate Report 97-265 for the Charlotte and Atlanta offices.

FEDERAL PRISON SYSTEM

Buildings and facilities

The conference agreement provides that $1,920,000 of the $13,731,000 provided for buildings and facilities for the Federal Prison System shall be used for the acquisition of land, engineering studies, and design of a new correctional facility in Phoenix, Arizona, as provided in Senate Report 97-265.

DEPARTMENT OF STATE

CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS

The conference agreement provides that of the funds provided for contributions to international organizations, not less than $28,566,865 shall be made available to the Pan American Health Organization (PAHO) for calendar year 1982 assessments and tax equalization fund expenditures.

INTERNATIONAL COMMUNICATION AGENCY

The conferees are agreed that of the $443,286,000 provided for Salaries and expenses, $100,000,000 shall be used for educational and cultural exchange activities as defined in the Mutual Educational and Cultural Exchange Act of 1961, as amended. The conference agreement provides $7,465,000 above the March budget estimate for academic exchange programs.

Amendment No. 37: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

(l)(1). It is the purpose of this Act that appropriations to implement the Federal Pay Comparability Act of 1970, the Executive Salary Cost-of-Living Adjustment Act of 1975, and every other related provision of law, which would provide pay for certain federal officials shall be limited to the amounts stipulated below: Provided, That appropriations already made for such purpose shall become effective January 1, 1982 instead of October 1, 1982 as heretofore provided by Public Law 97-51: Provided further, That any funds made available pursuant to this section shall not be used to pay any federal official whose rate of pay is at Level I or Level II of the Executive Schedule under title 5, United States Code, any sum in excess of 4.8 percent increase (rounded to the next highest multiple of $100) in existing

pay and such sum if accepted shall be in lieu of the approximate 23.4 percent which is otherwise due and payable under existing law and in recognition of the limitation on outside income as applied to the Members of the House of Representatives which does not apply to the Members of the Senate: Provided further, That notwithstanding the provisions of section 305 of H.R. 4120 made applicable by subsection (j) of this section, but subject to paragraphs (2), (3), and (4) of this subsection, nothing in this Act shall (or shall be construed to) require that the rate of salary or basic pay, payable to any individual for or on account of services performed after November 20, 1981, be limited or reduced to an amount which is less than 104.8 percent of the rate (or maximum rate, if higher) of the salary or basic pay payable for such office or position for November 20, 1981, (rounded to the next highest multiple of $100) or, if greater—

(A) $59,500, if such individual has an office or position the salary or pay for which corresponds to the rate of basic pay for level III of the Executive Schedule under section 5314 of title 5, United States Code;

(B) $58,500, if such individual has an office or position the salary or pay for which corresponds to the rate of basic pay for level IV of the Executive Schedule under section 5315 of title 5, United States Code; or

(C) $57,500, if such individual has an office or position the salary or pay for which corresponds to the rate of basic pay for level V of the Executive Schedule under section 5316 of title 5, United States Code.

(2)(A) For purposes of paragraph (1), any rate of salary or pay shall be considered to correspond to the basic pay for a level of the Executive Schedule if the rate of salary or pay for that office or position is (i) fixed at a rate which is equal to or greater than the rate of basic pay for that level of the Executive Schedule or (ii) limited to a maximum rate which is equal to or greater than the rate of basic pay for such level (or to a percentage of such a maximum rate) by reason of section 5308 of title 5, United States Code, or any other provision of law (other than the provisions of such section 305 made applicable by subsection (j) of this section) or congressional resolution.

(B) In applying paragraph (1) for any office or position for which the rate of salary or basic pay is limited to a percentage of such a maximum rate, there shall be substituted, in lieu of the amount specified in paragraph (1) for that office or position, an amount equal to such percentage of the specified amount.

(3) If the rate of salary or basic pay, payable on account of services performed for any period by an individual in any office or position, (or maximum rate, if higher) is by reason of the provisions of paragraph (1) of this subsection increased over the rate of salary or basic pay which would have been payable on account of such services if such paragraph (1) had not become law, then, notwithstanding any other provision of law, beginning with the first day of such period the rate of salary or basic pay (or maximum rate, if higher) for such office or position—

(A) shall be the rate (or maximum rate, if higher) payable for such services in such office or position, as increased by reason of the provisions of paragraph (1) of this subsection, and

(B) shall not be subject to any increase (other than the increase brought about by reason of the provisions of paragraph (1) of this subsection) by reason of salary adjustment, which become effective prior to the date this joint resolution became law under the Federal Pay Comparability Act of 1970, the provisions of subchapter 1 of chapter 53 of title 5, United States Code, relating to pay comparability, or any related provision of law.

(4) The preceding provisions of this subsection shall not apply with respect to the office of Senator, President pro tempore of the Senate, or the majority or the minority leader of the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement applies a 4.8 percent limitation in the cost-of-living adjustment for certain officials in lieu of the 23.4 percent increase that otherwise could occur by statute in addition to the limitation adjustment proposed for certain other officials by the Senate. The new rates would become the statutory rates payable, thus eliminating and foregoing all previously accrued adjustments. Members of the Senate are excluded from the adjustments.

Amendment No. 38: Inserts language as proposed by the Senate appropriating $35,790,000 for construction or expansion of two teaching facilities under section 720(a)(1) of the Public Health Service Act. The conference agreement includes $20,790,000 for the construction or expansion of a teaching facility, the Institute for Advanced Biomedical Research at the University of Oregon Health Science Center, School of Medicine, Portland, Oregon, and $15,000,000 for the construction or expansion of a teaching facility, the Health Sciences Education Building, at the Tufts University School of Medicine, Boston, Massachusetts.

UNITED STATES POSTAL SERVICE

Amendment No. 39: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

"Notwithstanding any other provision of this joint resolution, except sec. 140, $869,240,000 is appropriated under this joint resolution for payment to the Postal Service Fund, of which $230,000,000 shall be available for public service costs and $639,240,000 shall be available for revenue forgone on free and reduced rate mail.

"Notwithstanding any other provision of law, the Postal Service shall promptly adjust preferred rates so as to recover the difference between the amount which would have been authorized to be appropriated under section 2401(c) of title 39, United States Code had this provision not been enacted, and the $639,240,000 hereby appropriated. Such adjustments shall be made in accordance with the following subsections:

"(a) As provided in Section 1723 of the Omnibus Budget Reconciliation Act of August 13, 1981, the first $104,000,000 of the difference in appropriations is to be recovered by adjustment of the rates for the class of mail under former sections 4452(b) and 4452(c) of title 39, United States Code.

"(b) $56,760,000 is to be recovered through proportional adjustment based on the remaining phasing appropriation for any class of mail sent at a free or reduced rate under section 3217 or section 3626 of title 39, under the Federal Voting Assistance Act of 1955 or under the Overseas Citizens Voting Rights Act of 1975.

"(c) The adjustments made under subsections (a) and (b) shall be further adjusted so that $20,000,000 is applied to lessen the adjustment under subsection (b) for any class of mail or kind of mailer under former sections 4358, 4554(b), and 4554(c) of title 39, United States Code."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

DEPARTMENT OF THE TREASURY

BUREAU OF ALCOHOL, TOBACCO AND FIREARMS

Amendment No. 40: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

"SEC. 109. No funds made available pursuant to this continuing resolution may be used to accomplish or implement a proposed reorganization of the Bureau of Alcohol, Tobacco and Firearms before March 30, 1982. Such reorganization plan may be implemented after March 30, 1982, unless disapproved by the House and Senate Committees on Appropriations: *Provided further,* That of the funds made available by this Continuing Resolution for the Bureau of Alcohol, Tobacco and Firearms, $15,000,000 shall be available solely for the enforcement of the Federal Alcohol Administration Act during fiscal year 1982."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 41: Provides transfer authority between appropriations within the Treasury Department as proposed by the Senate.

GENERAL SERVICES ADMINISTRATION

Amendment No. 42: Provides that construction of federal building projects included in H.R. 4121 as passed by the House, or in H.R. 4121 as reported by the Senate on September 22, 1981, may be initiated under this continuing resolution as proposed by the Senate.

IRS REVENUE RULING

Amendment No. 43: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the language proposed in (b)(1)(A) by said amendment insert the following: *all of the obligations of which are directly or indirectly guaranteed or secured in whole or in part by—*

And after section (b)(2)(B)(ii)(II) insert the following:

(III) One or more financial institutions which are not related persons (within the meaning of section 103(b)(6)(C) of such Code) to the user of the proceeds of the issue.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No 44. Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate stating that it is the sense of the Senate that the President should not include recommendations for revenue enhancements that would have the effect of reducing Federal tax incentives for energy conservation or the development of renewable energy sources.

Amendment No. 45: Amends language proposed by the Senate regarding the withholding of funds under the supplemental

food programs for women, infants and children program (WIC and SCFP).

The conference agreement requires that the funds provided by this joint resolution be obligated to the extent and manner provided for in House Report 97-313, and that no funds be withheld from obligation unless and until a special message specifying a deferral or rescission for such programs is submitted while the Congress is in session. It should be clear that any withholding during such time as the Congress may be unable to act on a special message will not meet the spirit nor the intent of this conference agreement; however, no withholding is anticipated.

The conferees strongly support these programs and note that during the period which a previous deferral message had been pending before the Congress, based upon the amounts provided in H.J. Res. 325, the administration maintained participation in these programs as had been required in the joint explanatory statement of the committee of conference on that joint resolution. The conferees repeat the direction made in that statement that "any efforts to reduce funding allocations to the States, thereby affecting levels of participation, would be clearly contrary to the provisions of this joint resolution."

Amendment No. 46: Inserts language as proposed by the Senate limiting the railroad branchline abandonments in the State of North Dakota to 350 miles.

The conferees understand that the Illinois Central Gulf Railroad has agreed to cooperate with the State in the continued operation of their railroad lines in North Mississippi.

The conferees reiterate the language appearing on page 28 of the joint explanatory statement of the committee of conference on the Department of Transportation and Related Agencies Appropriation Act, 1982 (H.R. 4209), relating to surcharges, rate increases, and assistance from the Section of Rail Services Planning.

Amendment No. 47: Inserts language reiterating the conference agreement and joint explanatory statement of the committee of conference on the Department of Transportation and Related Agencies Appropriation Act, 1982, concerning the use of census data in apportioning and allocating funds for section 18 non-urban formula grants and section 5 urban formula grants. The conferees direct that the funds made available by this resolution be apportioned and allocated as soon as possible.

Amendment No. 48: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment with an amendment as follows:

Sec. 117. Notwithstanding any other provision of this joint resolution, the funds made available by this joint resolution which would be available under H.R. 4560, entitled "Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982", for school assistance in federally affected areas under title III of such Act shall be available under the authority and conditions set forth in H.R. 4560 as passed the House on October 6, 1981: Provided, That the total amount available for entitlements under section 3(a) of the Act of September 30, 1950, as amended, is amended so as to permit payment to any local educational agency under such section 3(a) not to exceed 90 per centum of the amount of such payment for fiscal year 1981, unless the entitlement for such agency is determined under Section 3(d)(2)(B) of such Act: Provided further, That the provisions of section 3(d)(2)(B) shall be fully funded and not subject to ratable reduction: Provided further, That the provisions of section 5(c) shall not apply.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides that the payments to any local educational agency under section 3(a) shall not exceed 90 percent of such payments for fiscal year 1981, instead of 85 percent as proposed by the House and 95 percent as proposed by the Senate. In determining payments under section 3(b) the Secretary should give priority to local educational agencies in which 20 percent or more of the total number of children in average daily attendance are determined eligible under section 3(b) of Public Law 874. The conferees have provided full funding for section 3(d)(2)(B) of Public Law 874 which gives the Secretary of Education authority to balance the current budgets of qualified, heavily impacted school districts—after regular impact aid payments have been computed.

Amendment No. 49: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment which provides that all Medicaid payments to the States for Indian health service facilities as defined by section 1911 of the Social Security Act shall be paid entirely by Federal funds and that these amounts shall not be included in the computation of the target amount of Federal Medicaid expenditures under section 1903.

Amendment No. 50: Appropriates $750,000 to continue the operations of the Office of Adolescent Pregnancy Programs in the Department of Health and Human Services, instead of $1,000,000 as proposed by the Senate. The House resolution included no funding for this office.

Amendment No. 51: Inserts language as proposed by the Senate prohibiting the Mine Safety and Health Administration from classifying a mine in the potash industry as gassy based upon air samples containing concentrations of methane gas.

Amendment No. 52: Inserts language as proposed by the Senate to provide that amounts at the level provided in H.R. 4560 as passed by the House are available for general departmental management, Department of Health and Human Services, and the program direction and support services activity, Assistant Secretary for Health, but deletes language proposed by the Senate which would have appropriated an additional $3,900,000 for administrative costs of the Health Care Financing Administration.

Amendment No. 53: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment with an amendment as follows:

Sec. 122. Notwithstanding any other provision of this joint resolution, appropriations for salaries and expenses in this joint resolution for the Department of Health and Human Services are hereby reduced by $21,800,000: Provided, That none of this reduction shall be taken from activities supported under the budget account entitled "Social Security Administration, Limitation on Administrative Expenses" or from funds available for the administration of the Medicare program.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 54: Modifies language proposed by the Senate to provide that funding for all refugee, including Cuban and Indochinese, programs shall be at the levels and under the terms and conditions of H.R. 4560 as passed by the Senate.

Amendment No. 55: Inserts new section as proposed by the Senate providing that funds available for student financial assistance shall be subject to the following additional conditions:

(1) The maximum Pell Grant a student may receive in the 1982-1983 academic year is $1,800.

(2) The cost of attendance used for calculating eligibility for and amount of Pell Grants shall be established by the Secretary of Education.

(3) The Secretary may establish or approve separate systems of need analysis for the academic year 1982-83 for the programs authorized under subpart 2 of part A, part C, and part E of title IV of the Higher Education Act.

(4) The family contribution schedule for the 1981-82 academic year shall be the schedule for the 1982-83 academic year, modified by the Secretary to exclude payments under the Social Security Act and title 38, U.S. Code.

(5) No Pell Grant shall exceed the difference between the cost of attendance and the sum of the expected family contribution and amounts paid to, or on account of, a student under the Social Security Act and under title 38, U.S. Code, and if, with respect to any student, it is determined that the amount of the Pell Grant plus the expected family contribution and payments under the Social Security Act and title 38, U.S. Code exceeds the cost of attendance for that year, the amount of the Pell Grant shall be reduced until the combination of expected family contribution, the amount of the Pell Grant, and payments under title 38, U.S. Code does not exceed the cost of attendance.

The Conference agreement requires that the Secretary of Education defer the use of a single need analysis system as authorized by the Education Amendments of 1980. Rather, for academic year 1982-83 the Secretary has the authority to establish or approve separate systems of need analysis for Federal campus-based student aid programs and to continue to use the Family Contribution Schedule for the Pell Grant program. It is the expressed intent of the conferees that the campus-based programs continue to operate under the current system of "sample cases and benchmark figures." The conferees understand that this provision will not require students filing any additional forms or data.

For the purposes of the Pell Grant program, the Conference agreement defers the provisions of the Family Contribution Schedule in section 482 of the Higher Education Act of 1965. In its place the academic year 1981-82 Pell Grant Family Contribution Schedule will be the schedule for academic year 1982-83. However, the conferees make certain exceptions to the schedule. Veterans and Social Security student benefits are to be excluded from treatment as effective family income; rather, they will now be considered as student assistance to preclude Pell Grant overawards. The Secretary is authorized to adjust the schedule to reflect the most recent and relevant data. For example, these adjustments could include updating base year income used to establish Pell Grant eligibility; updating the years used to calculate independent student

status; adjusting the amount of support by a parent which cannot be exceeded in determining independent student status to $750; adjusting for dependent student taxes; and/or adjusting the farm/business asset reserve. The conferees intend that the Secretary set a series of assessment rates applicable to the discretionary income of families of dependent students that seeks to meet the funding level provided in this resolution. For the purposes of section 482(a) of the Higher Education Act of 1965, this modified schedule is to be considered as a resubmission of that schedule and will be subject to Congressional review as a resubmitted schedule. It is the itent of the conferees that the Pell Grant cost of attendance criteria used in academic year 1981-82 be the academic year 1982-83 Pell Grant cost of attendance criteria. This criteria is to be used for all references to Pell Grant program cost of attendance in this resolution.

Amendment No. 56: Deletes language proposed by the Senate authorizing the Attorney General to acquire and exchange information regarding certain deceased individuals and missing children. The conferees are in full support of the objective of this provision which is the establishment of a national computer information network to assist law enforcement agencies in locating and identifying missing children and in identifying deceased persons who are found without enough evidence to establish their next of kin. However, the conferees believe that enactment of this provision into law should be accomplished through the regular authorization process and urge the appropriate committees of the House and Senate to consider this matter expeditiously so that appropriate legislation can be submitted to the full House and Senate as soon as possible. In the meantime, the conferees are agreed that the Attorney General should expand, to the extent possible, the computerized information system of the Federal Bureau of Investigation, which currently includes information submitted on a voluntary basis from 47 States on missing persons within such States' borders.

Amendment No. 57: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate with an amendment which changes only the section number. Inasmuch as this amendment related solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs therein without intervention, the managers on the part of the House will move to recede and concur in the Senate amendment No. 57.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 58: Deletes language proposed by the Senate which would have voided the limitation contained in section 324 (amendment 99) as set forth in the conference report and the joint explanatory statement of the committee of conference on the Department of Transportation and Related Agencies Appropriation Act, 1982 filed in the House of of Representatives on Novembver 13, 1981.

Amendment No. 59: Deletes language proposed by the Senate which would have provided $60,000,000 for the reconstruction, resurfacing, restoration, or rehabilitation of the Woodrow Wilson Bridge.

Amendment No. 60: Appropriates an additional $69,800,000 for education for the handicapped, as proposed by the Senate. The House bill contained no special provision for these activities.

Amendment No. 61: Appropriates $991,845,000 for Rehabilitation Services and Handicapped Research, as proposed by the Senate. The House bill made no special provision for these activities.

Amendment No. 62: Inserts language providing that the Attorney General shall exercise his best efforts to ensure that after March 1, 1982, the number of aliens detained at the Krome North facility in Miami, Florida who are seeking entry into the country shall not exceed 525 and that the number of aliens detained at other facility in the State of Florida who are awaiting exclusion, deportation, or resettlement shall not exceed 525 instead of language mandating these requirements as proposed by the Senate.

The conferees are agreed that the Attorney General must take action to reduce the alien population detained at the Krome North facility and other detention facilities in Florida to no more than 525 persons. This continuing resolution provides funding necessary to finance expenses at Krome North and to activate another detention facility, Fort Drum, in Watertown, New York which will relieve crowding at Florida detention facilities. It is the understanding of the managers that this facility can be activated within two months. Therefore, the conference has provided that the Attorney General shall exercise his best efforts to reduce the population of detainees at Krome North and other Florida detention facilities to 525 persons by March 1, 1981. The Conference directs the Attorney General, in carrying out the provisions of this section, to provide monthly reports to the Appropriations Committees detailing all efforts and progress in carrying out the intent of the managers that this limitation be achieved.

Amendment No. 63: Appropriates an additional $45,000,000 for the payment of windfall benefits under section 15(d) of the Railroad Retirement Act of 1974, instead of $90,000,000 as proposed by the Senate. The House bill contained no similar provision.

Amendment No. 64: Inserts language proposed by the Senate relating to the low-income energy assistance program. The House bill contained no similar provision. This language provides that assistance can only be provided to individuals or families who meet the eligibility requirements established in the law and that payments may only be used for energy needs. This language is not intended to prohibit retroactive cash payments to individuals which legitimately relate to energy costs. The conferees are anxious that this program be closely monitored by the executive branch in order to insure that federal funds are spent responsibly. This oversight should include unannounced spot audits as well as the normal review.

Amendment No. 65: Inserts language proposed by the Senate which makes the provisions of section 210 of the Departments of Labor, Health and Human Services and Education and Related Agencies Appropriation Act, 1982 (H.R. 4560), as passed by the House of Representatives on October 6, 1981 and the provisions of section 209 of such Act as reported by the Senate Committee on Appropriations on November 9, 1981 applicable only during the period ending March 31, 1982.

Amendment No. 66: Adds new section as proposed by the Senate providing that notwithstanding any other provision of law, none of the funds appropriated for the Department of Labor, Mine Safety and Health Administration shall be obligated or expended to prescribe, issue, administer or enforce any standard, rule, regulation or order under the Federal Mine Safety and Health Act of 1977 with respect to any independent construction contractor who is engaged by an operator for the construction, repair or alteration of structures, facilities, utilities or private ways or roads located on (or appurtenant to) the surface areas of any coal or other mine, and whose employees work in a specifically demarcated area, separate from actual mining or extraction activities: Provided, That no funds shall be obligated or expended to prescribe, issue, administer or enforce any standard, rule, regulation or order under the Federal Mine Safety and Health Act of 1977 on any State or political subdivision thereof.

The conferees are agreed that the Continuing Resolution incorporates bill language in the House-passed version of H.R. 4560, which provides that none of the funds appropriated for the Mine Safety and Health Administration shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, or order under the Federal Mine Safety and Health Act of 1977 with respect to any person engaged in the surface mining of stone, clay, colloidal phosphate, sand, or gravel.

Amendment No. 67: Appropriates $362,000,000 for the Maternal and Child Health Block Grant, as proposed by the Senate. The House bill contained no special provision for this program.

Amendment No. 68: Appropriates $61,180,000 for activities under the Developmental Disabilities Act, as proposed by the Senate, and deletes appropriations proposed by the Senate of $1,754,000 for health promotion and disease prevention activities of the Office of the Assistant Secretary for Health. The House bill contained no special provisions for these activities.

Amendment No. 69: Appropriates an additional $10,000,000 for the Job Corps, as proposed by the Senate, providing a total appropriation of $610,000,000 for the Job Corps.

It is the intent of the conferees that Job Corps staff not be reduced by more than 10 percent from the number actually onboard on September 30, 1981.

Amendment No. 70: Reported in disagreement. This amendment is reported in disagreement without prejudice to the merits of the issue.

Amendment No. 71. Amends Senate language to provide specific reductions for each of the covered appropriation bills rather than an across-the-board reduction of 4 percent in total budget authority. The conference agreement provides that reductions shall not apply to entitlement programs as defined by the Congressional Budget Act of 1974, revenue sharing, the social security program, the food stamp program, and veterans' medical care. In addition, no account, activity, program or project may be terminated as a result of reductions made pursuant to this provision.

The conference agreement also provides that the entire continuing resolution terminate on July 15, 1982, instead of March 30, 1982, as proposed by the Senate, or September 30, 1982, as provided for by the House in section 102.

Under the agreement, in order to execute Congressional responsibilities under the Constitution to provide specific items of ex-

penditures, appropriations made available by this joint resolution shall be reduced by 2 per cent for programs, projects, or activities for which provisions would be made in the following appropriation Acts:

District of Columbia Appropriation Act, 1982;

Energy and Water Development Appropriation Act, 1982;

Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1982;

Department of the Interior and Related Agencies Appropriation Act, 1982;

Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1982;

Military Construction Appropriation Act, 1982; and

Treasury, Postal Service and General Government Appropriation Act, 1982.

DEPARTMENT OF AGRICULTURE APPROPRIATIONS

Appropriations made available to the Department of Agriculture are reduced in the following amounts:

Public Law 480, $80,000,000;

Rural Housing Insurance Fund, reimbursement for losses in prior years, $97,000,000;

Agriculture Credit Insurance Fund, reimbursement for losses in prior years, $56,000,000; and

Rural Development Insurance Fund, reimbursement for losses in prior years, $24,000,000.

The conferees wish to stress that the reduction in the reimbursement for losses to the loan funds will have no impact on the loan levels authorized by this joint resolution.

DEPARTMENT OF DEFENSE APPROPRIATIONS

The Conferees agree to reduce the level of spending for the Department of Defense by 2 percent from the level which otherwise would be available under the Resolution, that is $196.7 billion.

This reduction amounting to $3.9 billion, is to be levied only against the Procurement and Research, Development, Test and Evaluation titles.

The conferees further agree that the level of Defense budget authority shall be at this reduced level until the Fiscal Year 1982 Department of Defense Appropriations Bill has been enacted into law or the end of the 1st Session of the 97th Congress. If a conference agreement has been reached but not enacted into law by the end of the 1st Session of the 97th Congress, the level of the budget authority in the conference agreement shall be the operating level of the Department of Defense. If no conference agreement on the Defense Appropriation Bill for 1982 has been reached by the end of the 1st Session of the 97th Congress, the level of budget authority shall be at the House passed level or the Senate passed level, whichever is lower, as set forth in Section 101(a)(3) of the Resolution.

The conferees affirm the commitment of the House and Senate Appropriations Committees to seek and attain an early conference agreement on the fiscal year 1982 Defense Appropriations Bill (H.R. 4995) before adjournment *sine die* of the first session of the 97th Congress.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS

The managers agree that reductions made against the Department of the Interior and Related Agencies Appropriation Act shall be applied evenly to all activities, subactivities, or projects within each appropriation account. In instances where construction or land acquisition projects cannot be carried out at the reduced level, reprogramming procedures should be followed to permit them either to be accomplished or to be eliminated.

MILITARY CONSTRUCTION APPROPRIATIONS

The 2% reduction to the Military Construction Appropriations Act amounting to $127 million is to be applied to the following accounts in the following amounts:

Military Construction, Army:	
Planning and Design	−$8,000,000
Minor Construction	−3,000,000
Military Construction, Navy:	
Minor Construction	−4,000,000
Military Construction, Air Force:	
Air Force Shortfall	−64,000,000
Minor Construction	−3,000,000
North Atlantic Treaty Organization Infrastructure	−45,000,000
Total	−127,000,000

The conferees agree that reductions within each account are to be taken from non-domestic projects.

The conference agreement includes a reduction of $206,000,000 from the amounts which would otherwise be made available by this resolution for the projects or activities provided for in the Department of Transportation and Related Agencies Appropriation Act, 1982. In making this reduction the conferees expect that, to the maximum extent feasible, the earmarkings and directives contained in the conference report and joint explanatory statement of the committee of conference on the Department of Transportation and Related Agencies Appropriation Act, 1982, will be implemented. Any deviation from the language contained in that report should receive the prior approval of the House and Senate Committees on Appropriatons.

Under the reduction contained in this amendment the following amounts would be available for Interstate Transfer Grants.

Location	Highway	Transit
New Jersey	$9,000,000	$25,000,000
Washington, D.C.	9,000,000	290,000,000
Philadelphia	22,000,000	9,000,000
Oregon	60,000,000	45,000,000
Northeast Illinois	125,000,000	25,000,000
Hartford	13,000,000	.....

Total	307,000,000	548,000,000

The conferees direct that none of the reduction proposed by this amendment for Federal Railroad Administration, railroad research and development be allocated to the East St. Louis Metropolitan Gateway Area railroad restructuring project. The reduction of $5,000,000 from the appropriation redeemable preference shares shall be derived from the amount not specifically earmarked for any project in the statement of the managers accompanying the conference report on the Department of Transportation and Related Agencies Appropriation Act, 1982.

The conference agreement includes reductions under this amendment of approximately one percent for the urban discretionary and urban formula grant appropriations. The conferees direct that these reductions be applied equally to each activity and new start project identified in the statement of the managers accompanying the conference report on the Department of Transportation and Related Agencies Appropriation Act, 1982. Any personnel reductions in UMTA required by this amendment shall be taken from the Washington, D.C. headquarters office.

Amendment No. 72: Includes language proposed by the Senate providing that Executive Branch officials shall make commitments on applicable programs to guarantee or insure the full amounts made available for such programs covered by the continuing resolution. Commitments could not be reduced unless there were not sufficient qualified applicants.

Amendment No. 73: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

Sec. 142. (a) Subsection (f) of section 280A of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following paragraph:

"(4) Coordination with section 162(a)(2), etc.—Nothing in this section shall be construed to disallow any deduction allowable under section 162(a)(2) (or any deduction which meets the tests of section 162(a)(2) but is allowable under another provision of this title) by reason of the taxpayer's being away from home in the pursuit of a trade or business (other than the trade or business of renting dwelling units).".

(b) The amendment made by this section shall apply to taxable years beginning after December 31, 1980.

(c) In section 139(b)(3) of Public Law 97-51, strike "1981" and insert "1980".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement incorporates the Senate language which conforms Section 280A of the Internal Revenue Code to Section 162(a)(2) of the Internal Revenue Code regarding certain business tax deductions. The conference agreement stipulates the amendment to 280A shall apply to taxable years beginning after December 31, 1980, instead of December 31, 1981 as proposed by the Senate. In addition, the conference agreement stipulates that the amendment made to Section 162(a) of the Internal Revenue Code by Section 139 of Public Law 97-51, Continuing Appropriations for Fiscal Year 1982, shall apply to tax years beginning after December 31, 1980.

Amendment No. 74: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

Sec. 143(A) Notwithstanding any other provision of law or of this joint resolution, of the fiscal year 1982 Highway Trust Funds available for emergency relief, $17,000,000 shall be made available for damaged highways or for the prevention of damage to highways in the area affected by eruptions of the Mount St. Helens volcano.

Sec. 143(B) Notwithstanding any other provision of title 23, U.S.C., or of this joint resolution, the Secretary shall approve, upon

the request of the State of Indiana, the construction of an interchange to appropriate standards at I-94 and County Line Road at the Porter-La Porte County Line near Michigan City, Indiana, with the Federal share of such construction to be financed out of funds apportioned to the State of Indiana under section 104(b)(5)(A) of title 23, U.S.C.

Sec. 143(C) Notwithstanding any other provision of the law, or of this joint resolution, any proposal for deferral of budget authority under section 1013 of the Impoundment Control Act of 1974 (31 U.S.C. 1403) with respect to budget authority for expenses related to the Northeast Corridor Improvement Project authorized under title VII of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210) shall, upon transmittal to the Congress, be referred to the House and Senate Committees on Appropriations and any amount of budget authority proposed to be deferred therein shall be made available for obligation unless, within a 45-day period which begins on the date of transmittal and which is equivalent to that described in section 1011(3) and (5) of the Impoundment Control Act of 1974 (31 U.S.C. 1401(3) and (5)), the Congress has completed action on a bill approving all or part of the proposed deferral.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 75: Reported in technical disagreement. The managers on the part of the House will move to recede and concur with the amendment of the Senate regarding future salary increases for Federal judges or Supreme Court justices.

SMALL BUSINESS COMMITTEE HEARING IN ATLANTA CANCELED

(Mr. MITCHELL of Maryland asked and was given permission to address the House for 1 minute.)

Mr. MITCHELL of Maryland. Mr. Speaker, a subcommittee of the Small Business Committee had planned a hearing in Atlanta tomorrow. Because of the uncertainty of our timetable a number of Members have canceled out. Therefore, the hearing that was scheduled for Atlanta tomorrow is canceled. We will try to reschedule that in January.

CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 357, FURTHER CONTINUING APPROPRIATIONS, 1982

Mr. WHITTEN. Mr. Speaker, pursuant to the order of the House of November 20, 1982, I call up the conference report on the joint resolution (H.J. Res. 357) making further continuing appropriations for the fiscal year ending September 30, 1982, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of today, November 22, 1981.)

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent to dispense with further reading of the statement.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, this report was apparently worked out late last night. The House, of course, has had very little opportunity to get into the printed material which has just been made available to us. I am wondering if the distinguished chairman, the gentleman from Mississippi, will tell us before we begin the debate on this resolution how he intends to proceed and how many options the House is going to have for separate votes, and so forth, so that we would have some sort of idea of the procedure before we move forward.

If the gentleman would care to respond, I would continue my reservation and yield to the distinguished gentleman from Mississippi.

Mr. CONTE. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Pursuant to clause 6, rule XV, the Chair cannot recognize the gentleman for that point of order at this time.

Mr. CONTE. Mr. Speaker, I move a call of the House.

The SPEAKER. The Chair does not recognize the gentleman for that purpose.

Mr. FRENZEL. Mr. Speaker, I reserve the right to object, and request a response to my query from the distinguished gentleman from Mississippi.

Mr. WHITTEN. May I say in response to the inquiry that I hope the gentleman realizes the problems we have had. We have been up 2 nights to bring this together, and it is natural that he would like to know what is in the conference report and what we have agreed to.

There will be 1 hour of debate divided between the two sides. There will be a vote on the conference report, and there may be votes on amendments reported in disagreement.

Mr. FRENZEL. Further reserving the right to object, could the distinguished Chairman tell me how many amendments were in disagreement?

Mr. WHITTEN. There were 75 Senate amendments to the House joint resolution, and 17 are in disagreement, most of them in technical disagreement. Probably one or two are controversial and the others were agreed to by the conference and are in technical disagreement and should not consume much time.

Mr. FRENZEL. Further reserving the right to object, Mr. Speaker, I yield to the distinguished gentleman from South Carolina (Mr. CAMPBELL).

ADJOURNMENT

Mr. CAMPBELL. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. The question is on the motion.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. CAMPBELL. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 1, nays 370, not voting 62, as follows:

[Roll No. 331]

□ 1315

Messrs. ROBERTS of South Dakota, ROBERT W. DANIEL, JR., SHUSTER, SPENCE, GONZALEZ, and WAXMAN changed their votes from "yea" to "nay."

Mr. FOUNTAIN changed his vote from "present" to "nay."

So the motion was rejected.

The result of the vote was announced as above recorded.

The SPEAKER. Does the gentleman from Minnesota (Mr. FRENZEL) still reserve his right to object?

Mr. FRENZEL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi (Mr. WHITTEN) to dispense with further reading of the statement?

There was no objection.

The SPEAKER. The gentleman from Mississippi (Mr. WHITTEN) will be recognized for 30 minutes, and the gentleman from Massachusetts (Mr. CONTE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me say to my colleagues that I would be remiss if I did not say to the Members that the last 2 days makes me fully appreciate the staff and the employees of the Committee on Appropriations. Throughout the day and the night they have been able to bring together facts and figures to explain and support the position of the House conferees. The staff has done it in such a manner so as to earn respect not only here in the House but on the other side of the Capitol, too.

This has been the most trying year that I think I have ever heard of in the history of the Congress. We have had numerous different budgets, and our Committee on Appropriations has been dealing with them in detail. We have had 33 different actions at different times that have affected our work, and then we are expected to get our appropriation bills finished. Despite all of these changes, we got our appropriations bills to the Senate, and none of them had been signed into law by the Executive.

In the continuing resolution which we passed in the House we wrote a bill that had a different approach for just about every department and agency because we expected to protect the House position and write a bill that was responsible.

I would like to say that I am proud of what we have done, and I am proud of the conferees, because we have retained the right of the legislative branch to determine what the money is for and how much money is appropriated. We have retained the right of the House of Representatives to be the originator of money bills. Money bills are to originate in the House and not as was tried in the Senate where the foreign aid appropriation bill had been passed prior to action on this side.

Not only that, but we have met the requirements of the Office of Management and Budget with regard to the total level of spending. As I said before, we had each subcommittee deal with the requests by item as they saw fit based on their knowledge and understanding.

When our bill went to the Senate, there were 75 amendments put on the bill, they used it as a "Christmas tree." Throughout 2 days it was very evident that their support on these various add-ons was not to be found in facts that were available to them.

We have brought to the Members a bill here that not only meets the same dollar totals as the Senate-passed bill but slightly more than was requested by the President in his final statement.

□ 1330

We accomplished this by assigning the task to the various subcommittees that understand the subject matter.

SPENDING MAINTAINED AT REDUCED LEVELS

I would like to direct the attention of my colleagues to a very critical element of this conference report—the bottom line. Everyone involved in the appropriations process must consider the bottom line, and your conferees stayed under the bottom line. From the very beginning of the conference

it was my intention to stay within the spending limits reflected by the Senate-passed resolution. However, I was also committed to do this in a responsibile way that exercised my duties and responsibilities as a Representative to the Congress—the people's branch of the Government.

One of the Senate amendments was the so-called Baker amendment which was characterized as an across-the-board cut of 4 percent. In addition, this amendment included a very dangerous precedent. It turned over to the executive branch of government a small slice of legislative responsibility. But however small, it could have been another step in what I consider to be a very dangerous trend recently of turning over the power of the purse to the Executive.

I personally could not agree to an amendment that allowed the Office of Management and Budget to determine spending priorities, administer cuts, and potentially overturn the intent of Congress. The compromise we agreed to allows for a broader based reduction, administered equitably and preserving legislative directives.

Overall this conference report is below the Senate-passed funding levels and below the House-passed resolution.

The conferees not only came to compromises on the various items added by the Senate but in addition, they took a 2-percent across-the-board reduction in spending. This reduction is actually more than the Senate reduces with their 4-percent reduction due to the way the House conferees insisted it be applied.

Each of the various subcommittees involved decided on their own whether they wanted an across-the-board reduction of 2 percent or whether they preferred to target their reduction in specific areas. Four of the subcommittees chose the targeted approach: Transportation, Commerce-Justice-State, Defense, and Agriculture. The remaining subcommittees chose the pro rata approach. These choices were made by those most knowledgeable in the programs, the subcommittee members who have spent hundreds and thousands of hours taking testimony on these matters.

DURATION OF THIS RESOLUTION

The conferees agreed to a compromise on the termination date of this continuing resolution of July 15, 1982. The House bill provided a September 30 date and the Senate bill provided a date of March 30, 1982. I cannot say it often enough or strongly enough, but this continuing resolution applies only by default—only if you do not act on the regular bills. Remember that as each of the individual bills are signed into law they drop out from coverage under the resolution. We are merely backing up the individual bills so we can provide for the orderly flow of Government services. Now that we have agreed to an earlier termination date, no one can claim that we are forcing any bill, on anyone, for the full fiscal year. And I repeat again, that when a bill is signed into law it is provided for at the rate specified in that act, rather than under the coverage of this resolution.

RATES OF OPERATION

This resolution provides funding for the following six appropriations bills at the rate of operations provided for in the conference agreement: HUD-Independent Agencies, as amended, Interior, Agriculture, Energy and Water Development, Transportation, and the District of Columbia. The resolution provides that the rate of operation for the following four bills be the lower of either the House or the Senate rate: Treasury-Postal Service, Commerce-Justice-State, Labor-HHS, and Military Construction.

Defense appropriations are provided for at the lower of either the House-passed, or the Senate-reported bill rate, minus 2 percent, whichever is lower, until the sine die adjournment of this session of the 97th Congress. At that time, the 2-percent reduction drops off. I understand from the chairman of the Defense Subcommittee (Mr. ADDABBO) that it is likely the Defense bill will go to conference before Christmas.

FOREIGN AID

Finally, my colleagues should know, that one of the hardest battles of this conference was the question of foreign aid. I have always felt that as a strong Nation we must have a strong presence in the world community; however, I believe with all my heart that we should not do this at the expense of the people at home. The Senate was asking us to increase foreign aid by $1.9 billion, at the same time we were being asked to reduce domestic spending by another 4 percent. In light of this situation the House conferees are going to insist on the lower House numbers.

Until such time as the House has an opportunity to consider the foreign aid bill and work its will in the regular order, I believe we must insist on the House numbers. I understand that the House leadership has stated that they will bring the foreign aid bill before this House in the near future. I hope my colleagues will vote with me to insist on the House level for foreign aid.

PRODUCTIVE INVESTMENT

Mr. Speaker, it is just as essential to maintain investments as it is to eliminate waste. It is just as essential to keep those programs where you get your money's worth for your dollar, as it is to cut out wastes. I say that I think we have now reached the point where what we are doing to the American people is to ask them to pay for nonproductive spending—inflationary spending. When you push back programs on the States and push back programs on the counties, and when you eliminate all these essential programs it just means you are shifting the place where they pay the costs. It is because of this shifting of costs that we have made an exception here for revenue sharing. Most States and local governments have their budget set up, if they have their programs going, they are dependent on this, and it would be most unfair in the middle of the game for us to let that not go forward.

We have prohibited reductions in the mandatory grants made to States because there again they have commitments themselves.

So let me repeat again. We have come up with the amount of dollars that was requested by the President and the Bureau of the Budget. We have retained the right of the legislative body to be the sole judge of what is appropriated and how it will be handled. Furthermore, we have retained the right of the House to originate money bills.

Mr. Speaker, I would like to conclude my remarks today by summarizing what is in this conference report that we bring before you. I introduced this resolution on November 10 with the cosponsorship of Mr. CONTE, the ranking minority member. The full committee approved the resolution on November 12 without amendment. The resolution provides funding through July 15, 1982. When regular appropriation bills are signed into law, the provisions of the continuing resolution automatically disengage, and the regular bill then becomes the funding device. This resolution covers 12 of the 13 regular appropiation bills. Since the legislative branch appropriation bill was provided for in the previous continuing resolution for the full year, it is not provided for in this measure. This resolution carries existing provisions and limitations on abortions, school prayer, and the tax-exempt status of private schools.

During this conference it was our burden as legislators to make government work for the people. In Congress, we are directly responsible to the people and the committee's appropriations bills are responsive to their needs as justified in the hearings. The conferees wisely rejected those aspects of the Baker amendment that would have turned our power of the purse to the executive branch. The Office of Management and Budget does not have to answer to the people and should not be granted blanket impoundment authority over discretionary funds.

CONSTITUTIONAL RESPONSIBILITY

Members of this body have sworn an oath to support and defend the Con-

stitution—the same Constitution which vests the power of the purse in the House of Representatives. If the Members of this body were to relinquish this power, they would be shirking their constitutional responsibility. Remember we have already cooperated with the executive branch far beyond any point in history, and we have cooperated again in this conference agreement.

So I urge my colleagues to go along with us. We have spent 2 full nights at this. Something is going to have to give or we cannot keep Government going.

We did the best we could. But I am proud of the finished product and I hope you will stand behind our conferees. I think they will stand together on the items we have. I hope you will stand by us all the way because we have won the victory, as I see it, for the U.S. House of Representatives. We have saved our place in the orderly process of Government.

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I am happy to yield to the gentleman.

Mr. ADDABBO. I thank the gentleman for yielding. I wish to commend my chairman for the exemplary way that he has handled this conference. In 2 days I think we met with the Senators a total of maybe 5 hours. Most of the time they were off in four different rooms, listening, waiting for Mr. Stockman, or Mr. BUSH, or Mr. Meese, to give them marching orders, and they had four different figures to work with, and we were sitting there for 2 days with the chairman and with the other House conferees, and we waited, and we waited, in many instances.

One point, Mr. Speaker, would the gentleman clarify the fact if this conference report is rejected by the House, will it not be a fact that another continuing resolution would then be in order, that you might bring back another conference report or continuing resolution, but the spending level would have to be at the lower level between the House and the other body, and because the other body has the lower figure that we will actually be spending at $1.5 billion less than what is in the conference report for those programs?

Mr. WHITTEN. The gentleman is correct.

Mr. ADDABBO. I would also point out to my colleagues who have asked me about the defense portion of the bill, in the bill there calls for a 2-percent reduction. There was an amendment we had offered at the beginning of the conference to put some dollars on the line, but it would be only a very temporary reduction. It would have been a cosmetic reduction because it only affected procurement and R. & D., and would come out of the moneys the chairman spoke about, unobligated balance, and which would make no actual cut at all. But it would only be until the House and the other body had adopted a conference, and we would be at that conference by the second week in December. So the cut for defense, the 2 percent, would have been actually cosmetic.

But under the bill we will be spending at the lower level and in the bill the Senate is lower, so we will be spending at the lower level of $196 billion.

Mr. WHITTEN. I thank the gentleman. He is correct. And may I thank him for his work here and in the conference, because he, too, believes that we need to get our dollar's worth from defense, and he has worked in that direction.

Could I finish with one statement? I want my colleagues to listen to this. Unless we get together with the other body, practically all the Government will not be able to go to work tomorrow morning.

Having had some experience with this before, I want to tell my colleagues that I did introduce back in October a second continuing resolution which would just extend the date under the present resolution under which we were operating up to November 20. If this resolution fails we may be forced to bring up the other resolution to enable the Government to just keep going.

We have brought you a good bill. We have met the requirements so far as money is concerned. We have saved all of your rights as best we know how and I hope you back us 100 percent.

Thank you.

Mr. PEYSER. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to my colleague from New York.

Mr. PEYSER. I thank the chairman for yielding.

Mr. Speaker, I merely want to make reference to the fact that I was privileged to spend nearly 9 hours yesterday observing our House conferees, and in all of the conferences I have seen over the years I have never seen a group, and this is on the Republican and Democratic side alike, who were willing to stand up and fight as hard for the House position as this group did. When you look at it objectively, with the Senate, the other body, I can tell you you could be very proud that you are a House Member, and these were our conferees. They were led by the chairman, who did just an outstanding job, and I thank him.

Mr. WHITTEN. I thank my colleague.

Mr. LONG of Maryland. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. I want to compliment the chairman. The chairman took a very strong position and I think a wise position. That was when we are cutting all kinds of domestic programs, including programs that are very dear and important to the American people, it would have been unconscionable to have accepted a 20-percent increase in foreign aid in the continuing resolution. That also in the same step would have given no incentive at all to go for a regular foreign aid bill and continue the whole idea of operating year after year under continuing resolutions. I applaud the gentleman.

Mr. WHITTEN. Mr. Speaker, how much time do I have?

The SPEAKER pro tempore (Mr. RANGEL). The gentleman has 14 minutes remaining.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, your conferees have reached agreements on almost all matters in disagreement on the extension of the continuing resolution for 1982.

There were 75 amendments in disagreement, and many more individual items within those amendments. We met virtually nonstop for 3 days, and we were highly conscious of the imminent shutdown of many Federal activities.

I support the conference agreements, and urge you to do likewise. There are several items in true disagreement, and I will speak to one or two of those items in a moment.

But first, I want to outline the conference agreements on several matters of general interest.

The conferees recommend a 2-percent spending cut, which applies proportionally to all programs, projects, and activities funded by the continuing resolution in seven appropriation bills: District of Columbia; energy and water development; Housing and Urban Development; Interior; Labor, Health and Human Services, and Education; military construction; Treasury; and Postal Service.

Individual reductions were made in three bills—Agriculture, Commerce-Justice-State-Judiciary, and Transportation. These cuts equaled or exceeded the cuts that would have been made under the 2-percent formula.

A 2-percent cut was made in the Defense bill, to be applied to Procurement and Research and Development. After the end of this session of Congress, the rate for the Defense bill will be the conference agreement, if we have one by that time, and if not, the level will be the lower of the House or Senate figure.

We excluded entitlements, general revenue sharing, the food stamp program, and veterans medical care, and we provided that the 2-percent cut could not be used to terminate any project or activity.

The 2-percent cut applies only to funds made available by the continuing resolution, and therefore stops if and when the appropriation bill for fiscal 1982 is enacted into law.

It is important that the House understand that, although the language of the 2-percent cut appears to apply to Defense, and the statement of managers refers to a cut in Defense, $3.9 billion, in fact, the amendment is worded so that the cut could operate, at most, until sine die adjournment, and the actual cut would be insignificant. And to his credit, the chairman's estimates of the 2-percent cut do not include any cut in Defense.

The expiration date of the continuing resolution is July 15, 1982. The chairman and I fought and argued for the House date of September 30, 1982, which would have provided continuing appropriations for the full fiscal year.

We finally had to compromise with the Senate, which had voted overwhelmingly for a termination date of March 30, 1982. Although I was willing to compromise, I am still convinced that an extension for a full year would have been in the best interests of the Congress and the appropriations process.

Members of the other body argued that a continuing resolution for a full year made a mockery of the appropriations process. What nonsense—with only one bill enacted, they were saying in effect that a continuing resolution for 9 months is all right, but that a continuing resolution for an additional 3 months is a "mockery." A continuing resolution for a full year does not in any way preclude the Congress from final action on any of the 1982 appropriation bills.

In fact, by extending the resolution only through July 15, we have guaranteed ourselves the ordeal of another extension, which will interfere with our work on the 1983 budget, and make it more difficult for us to enact appropriation bills for 1983, and require an extensive continuing resolution for 1983.

To put it bluntly, the Members of the other body who fought so hard for a shorter extension, in the name of the appropriations process, have made it more difficult for us to operate that process in a timely and responsible manner next year.

We estimate that budget authority provided by the conference agreement totals $427.9 billion, which is $530 million under the amount that would have been available based on the provisions of the Senate continuing resolution, and $764 million under the President's September budget estimates.

I wish I could tell you that we have cut enough so that the President will sign the bill. However, we can estimate budget authority, but we cannot provide you with reliable outlay estimates for a bill of this magnitude where the conference agreement was reached only hours ago.

I am sure that at this very moment Budget Director Dave Stockman has his staff hard at work estimating outlays from the conference agreement. Dave is rightly concerned about the Federal deficit, and the related problems of cash management and debt financing.

However, I would presume to offer him some advice. This continuing resolution is not the place for a fight to the death over outlay estimates.

We are talking about funding for the entire executive branch and the judiciary.

We are talking about social security, veterans' benefits, medical care, housing, education, and health programs.

We are not talking about the budget margin or growth rate for these programs, but rather whether they will continue to operate at all after the next few days.

I hope the administration will not roll the dice for outlay estimates when the stakes are this high.

We are $764 million under the President's September estimates in budget authority, and while I am sure that some of those cuts will not produce corresponding cuts in outlays, I am also sure that the differences cannot possibly justify a confrontation over the continued operation of virtually the entire Federal Government.

Assuming that the other body sustains the conference agreement, I urge the President to sign this bill.

It is time for the President and the Congress to clear the decks for the 1983 budget, and the inevitable supplementals and rescissions for 1982.

We can proceed with consideration of the remaining bills for 1982 as circumstances permit.

We do not have the same luxury where the day-to-day functions of Government are concerned.

I say to the President, sign this bill, and let us both get on with the business at hand during the next session of Congress and the next fiscal year.

Mr. EDWARDS of Alabama. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to my good friend, the gentleman from Alabama.

Mr. EDWARDS of Alabama. I thank the gentleman for yielding, and I agree with his comments that we have worked long and hard and, I believe, have come up with a conference report that makes sense, everything considered.

I would like to engage the gentleman in a colloquy, just briefly, about Defense, so that there is no question about what we have done.

Just sort of reviewing the bidding, the House number on defense was $197.4 billion, and the Senate number on defense was $208.4 billion. They threw everything in but the kitchen sink.

When the continuing resolution came out of the Senate, it provided that the lesser of the two numbers for Defense would apply in the continuing resolution, and that was done on a program-by-program basis, as opposed to the House number versus the Senate number.

The point here is that when you apply those programs of the House against the programs of the Senate, you come out with $800 million less than the House figure.

Mr. CONTE. That is correct.

Mr. EDWARDS of Alabama. That is not done with mirrors. That is done by our own computing people here in the Appropriations Committee, and I think it is important that Members understand that.

So in the continuing resolution that you have before you today, the Defense number is listed at $196.7 billion, which is in fact $800 million less than the House number which you voted for only this past Wednesday. It is also 2.1 percent below the President's budget figures of $200.8 billion.

Now, if nothing else happens between now and the time this House quits for this session of Congress, that will be the number for Defense, $196.7 billion. If we go to conference, as we expect to do, and if we come out with a conference report in December, as we expect to do, then the conference number would become the Defense number; is that correct?

Mr. CONTE. The gentleman from Alabama, as usual, is absolutely right.

Mr. EDWARDS of Alabama. And so nothing is done here with mirrors. We show a 2-percent cut, although in reaching the bottom-line total, we do not even count the Defense 2-percent cut to reach that total; is that correct?

Mr. CONTE. That is exactly right.

Mr. EDWARDS of Alabama. So I want anybody who has any confusion in their minds, if they do not understand what I am saying, to at least read the record and see that this thing is done in the proper way. I predict that by the middle of December we will have a good Defense bill, one that will be very near the House bill and one that we can all support.

Mr. CONTE. I might add one thing to the gentleman's statement.

The chairman of the Defense Appropriations Committee (Mr. ADDABBO) and the gentleman from Alabama (Mr. EDWARDS) stated in that conference many times that you planned to go to conference on December 9. I imagine we will have a bill that week.

Mr. KEMP. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from New York.

Mr. KEMP. I appreciate my friend yielding.

Mr. Speaker, as ranking minority member of the Foreign Aid Appropriations Committee, I would have appreciated being in on the conference, but recognizing the problems that not all Members could be included, I understand. And, not being privy to what the conference did on foreign security assistance, can the gentleman tell us what happened to the President's budget with regard to providing security assistance to some of our friends and allies in that part of the world that is so precarious today?

Mr. CONTE. First of all, let me say I am sorry that we did not get as many slots as I would like to have had in the conference, because I know the gentleman would have been a very valuable addition, especially in that field where he is the ranking member and serves so well.

Mr. Speaker, I will say to the gentleman that I tried to offer a substitute motion on the foreign aid section which was, in essence, the Kasten proposal over in the Senate. That would have taken care of many of the commitments, not all of them. We only had $500 million where the administration wanted $700 million in that proposal. We lost out, that is unfortunate.

What happened was that the chairman of the committee, the gentleman from Mississippi (Mr. WHITTEN), accepted an amendment offered by Mr. LONG, the chairman of the subcommittee, for $500 million additional over the formula that we had in our continuing resolution, which was the House or the 1981 figure, whichever was lower. Chairman LONG put in an amendment for $500 million; $300 million for military assistance, and $200 million for economic assistance, which I amended and split the $200 million for economic assistance into $100 million for the Economic Support Fund and $100 million for the Export-Import Bank.

So all that we got was the $500 million; $300 million for military assistance, $100 million for the Export-Import Bank, and $100 million for economic assistance.

Mr. KEMP. If the gentleman will yield further, I think the gentleman and I would concur on at least one aspect and that is the figure is too low with regard to not only the President's budget, but it is too low with regard to the vital security needs of our friends in those parts of the world in which there are so many dangers.

Security assistance programs are an integral part of the overall defense efforts of this country. We do not have the resources nor the inclination to act as the world's policeman, yet this Nation has vital interests that extend worldwide. Our security is inextricably linked with the strength and security of key nations which, without U.S. military assistance, would be subject to intimidation or worse by unfriendly foreign powers.

Just as the unprecedented Soviet military buildup has threatened U.S. national defense, so have massive Soviet arms shipments to client states escalated the threat to the security of pro-West governments in many regions of the world. Over the last 10 years, Soviet bloc arms exports have undergone a dramatic increase, as the bloc's share of the total world arms exports has grown from 23 percent to over 40 percent. At the same time, U.S. military assistance has been declining.

These shifts in the pattern of United States and Soviet arms exports have been accompanied by paralled shifts in the number of military advisors and technicians each side deploys in developing countries, and the number of military forces from developing countries trained in the United States and Soviet bloc. The number of foreign personnel trained in the United States has declined by at least two-thirds in the last 10 years, even after adjusting for the conflict in Southeast Asia, while the numbers trained in the Soviet bloc have increased tenfold.

Accordingly, the President has requested Security Assistance and Economic Support Fund appropriations totaling $7.05 billion. But under the continuing resolution, only $5.24 billion would be available for these vital programs—nearly $2 billion less than the President has determined is necessary to support our broad international security interests.

Hardest hit under the continuing resolution funding levels are six strategically important U.S. allies, which are expecting to receive urgent military assistance through the FMS direct credit program. Those countries are: Egypt, $400 million; Turkey, $250 million; Sudan, $100 million; Thailand, $50 million; Kenya, $51 million; and Portugal, $50 million.

Can the gentleman tell us how the low military assistance levels in the continuing resolution will affect our allies so desperately in need of U.S. security assistance?

□ 1400

Mr. CONTE. I have got to be honest with the gentleman, I am not happy. Of course a little bit is better than nothing and we are glad to get that little bit. But it is not going to have an impact.

However, I might say here that repeatedly through that conference the chairman of the committee kept saying that he met with the Speaker of the House yesterday and the Speaker of the House assured him that we will have a foreign aid bill on the floor of the House before we go home in December.

Then, of course, the administration is going to really have to go to work on that bill and we will have to get that bill through the House to take care of some of these areas that we have mentioned.

The gentleman is so right. It is just unfortunate we did not do it last night.

Mr. KEMP. One last question. The gentleman remembers that in the full Appropriations Committee the gentleman from Massachusetts, the gentleman from Texas (Mr. WILSON) and myself offered an amendment to add $300 million to the appropriations bill for that aspect of the President's budget which would have allowed Egypt and Turkey and Sudan and Somalia, Kenya, North Yemen, Portugal, and Thailand the assistance that is so desperately needed. And it seems to me that the proposed level of funding for military aid is one aspect of this conference, which I am going to have to strongly disagree with, particularly because at this vital time subsequent to the assassination of Mr. Sadat, and the threat to Sudan and Turkey it is shortsighted to cut our assistance. We met the other day with President Numeiri of the Sudan and believe me, his life is on the line as he is under attack, if not overtly at least by threats of terrorism from Qadhafi of Libya. Turkey, Egypt, and others deserve our efforts to rectify what I believe to be a big mistake in terms of cutting back on vital military assistance.

It seems to me a terrific mistake if we allow this work of the conference to go forward without restoring those funds so necessary to our allies and friends. I submit, it is in the interest of our Nation's defense interests to restore at least the Kemp-Wilson-Conte amendment to provide a more nearly adequate level of military assistance for these countries.

Mr. LONG of Maryland. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. I thank the gentleman for yielding.

The whole colloquy here seems to be running in terms of, gee, we are not giving enough money for vital security needs of our various allies and friends around the world. But there is no intention of dealing with this as a complete foreign aid bill.

The whole purpose of this continuing resolution is to carry on with the minimum needs of the Government and give the real incentive to get a bill. That is the whole aim.

If the gentleman is discontented with the sums of money provided here for all these requirements of Government, get behind a foreign aid bill. That is what we have been pleading with the gentleman for sometime.

I have written the President, written to Secretary Haig and never got an answer, and I think the whole game

was to get along with a backdoor foreign aid continuing resolution.

Now the burden is on the gentleman's shoulders. Get behind a foreign aid bill and have it taken care of.

Mr. CONTE. I have to get moving here because I have to save time for my leader.

Mr. JOHNSTON. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from North Carolina.

Mr. JOHNSTON. Mr. Speaker, a few questions.

This conference report does contain $241 million for the Legal Services Corporation which was not requested by the administration; is that correct?

Mr. CONTE. That is correct.

Mr. JOHNSTON. It does contain funding for the Consumer Cooperative Bank which was not requested by the administration; is that correct?

Mr. CONTE. Let me tell the gentleman this: That right after this bill I understand that we are going to take up the conference report for HUD and that contains it and the gentleman can make his pitch there.

Mr. JOHNSTON. Under amendment 47, why were the grants allocated on the basis of 1970 census rather than 1980 census?

Mr. CONTE. That is a good question.

Mr. JOHNSTON. Funding for the bilingual education program was against the administration request and was put at $143 million; right?

Mr. CONTE. Yes.

Mr. JOHNSTON. This conference report does contain a pay increase for Members of this House, does it not?

Mr. CONTE. Yes.

Mr. JOHNSTON. I thank the gentleman.

Mr. YOUNG of Florida. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Speaker, I thank the gentleman for yielding.

I would like to go back to the conversation that the gentleman in the well was having with the gentleman from New York and the gentleman from Maryland and say first to the gentleman from New York that his position was very well represented in this conference by the gentleman from Massachusetts and others, and, as usual, the subject of any foreign assistance took more time of the conference than anything else, and that is the way it usually is.

I would say to the gentleman from New York that I agree with the concerns that he has expressed. I think we made one mistake in even talking about these economic security programs as foreign aid programs, because they basically are extensions of our own national security interests.

I would like to have another second if I could to say to my distinguished friend from Maryland (Mr. LONG), that he tended to imply that the reason the foreign aid appropriations bill has not been on this floor for the last 3 years was because of something we have done on this side.

I would like to say to my dear friend, the gentleman from Maryland (Mr. LONG), that for the last 3 years we have been cajoling the gentleman, pleading with the gentleman, to bring that bill out so that the House could work its will. It is not our fault the bill was never brought out. I do not know whose it was. But it certainly was not our fault. We are ready to go to work on it.

Mr. CONTE. Further answering the gentleman, the gentleman mentioned there was a pay raise for the legislative branch of 4.8 percent, the same as the executive branch.

Mr. REGULA. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Ohio.

Mr. REGULA. I have three questions. On the 2-percent cut, will the administration do this on a program-by-program basis across the board?

Mr. CONTE. Proportionately.

Mr. REGULA. On each program?

Mr. CONTE. That is right.

Mr. REGULA. Second, if the conference agreement is reached, such as on military construction, does that become a controlling figure; in other words, does it come out from under the continuing?

Mr. CONTE. It comes out from under the continuing.

Mr. REGULA. The third question: In the event there is not a conference agreement, what happens in the language provisions in any of the bills that have been adopted by the House and/or the Senate? Do these language provisions prevail?

Mr. CONTE. I would say yes.

Mr. REGULA. I thank the gentleman.

Mr. CONTE. Mr. Speaker, looking at the Labor, Health and Human Services and Education chapter of this conference agreement, I am sure all of us here know how difficult it has been to reach agreement on these vital human programs.

This conference agreement provides total budget authority of $85,134,135,000. The key component of that total is $27,850,691,000 in discretionary programs. Funding for mandatory programs totals $57,284,000,000.

When you compare these totals to the House-passed Labor-HHS bill—H.R. 4560, this conference agreement is $2,177 million below the House-passed Labor-HHS bill in discretionary funding.

It is even more astounding to note that this conference agreement is $8.8 billion below the original fiscal 1981 approriations level for these discretionary programs. That is a tremendous reduction. That is absolutely as far as we could go in finding savings in this bill.

As you know we applied the 2-percent reduction to virtually every program in this chapter. That 2-percent reduction produced savings of $572 million.

It is important to note as well that a few programs were appropriately exempted from the 2-percent reduction. Among these were the Social Security Administration limitation on administration expenses and funds for administration of the medicare program.

One other funding item that was excluded from the 2-percent reduction in this chapter was the funds provided for construction or expansion of two teaching facilities under section 720(a)(1) of the Public Health Service Act.

The conferees agreed that of the total of $35,790,000 appropriated, $20,790,000 is for the construction or expansion of the teaching facility, the Institute for Advanced Biomedical Research at the University of Oregon Health Science Center, School of Medicine, Portland, Oreg., and $15,000,000 for the construction or expansion of the teaching facility, the Health Sciences Education Building, at the Tufts University School of Medicine, Boston, Mass.

I would like to take a few moments to touch on a few of the program highlights of the conference agreement for this chapter. As I have already mentioned we achieved savings of $810 million over the House-passed version of the continuing resolution, and nearly $2.2 billion in savings over the level provided by the regular Labor-HHS appropriations bill for fiscal year 1982 as passed the House.

While we achieved those savings, and we think we did a fine job of reaching this conference agreement—it is a good agreement—we also restored some funding to very vital human service and education programs that represent the very heart of our investment in humanity.

For instance:

For the low-income energy assistance program we added $140 million to the Senate level bringing it to an annual rate before the 2-percent reduction of $1,790 million.

For the community services block grant we added $62.6 million.

For the education block grant under chapter 2 of the Consolidation Act we added $140 million to the Senate level.

For handicapped education the conferees agreed to add an additional $69 million to the basic continuing resolution rate in order to fund the program at a level of $1 billion, $85 million less 2 percent.

Two other important ones are:

The maternal and child health block grant which the conferees agreed to

bring up to the level of $362 million, and rehabilitation services which was increased by $44 million.

The agreement also provides an additional $64.3 million for the closure and transfer of the Public Health Service hospitals as provided by the President's revised budget request.

Let me just quickly mention before summing up this chapter that we also agreed to an additional $11 million for the developmental disabilities program, $10 million for Job Corps, $45 million for the railroad retirement benefits, and $25 million for trade adjustment assistance training—all of which are of course subject to the 2-percent provision.

I think you can see that while we have produced tremendous savings totaling more than $2 billion over the level provided in the House-passed Labor-HHS bill on October 6, 1981, we also did not turn our backs on our key investments in humanity.

TRANSPORTATION

As regards the Department of Transportation and related agencies, the resolution provides for a bottom line reduction of 2 percent in spending from the House-Senate Transportation appropriations fiscal year 1982 conference.

The 2-percent reduction of spending from the conference level of $10,673,138,000 is a total of $206,565,000. The reductions represent selective cuts, rather than merely across-the-board reductions.

The total spending level provided Transportation programs under this resolution is now $10,466,573,000.

For the Coast Guard, there is provided a total of $2,132,000,000. The operating expenses account is funded at $1,385,000,000; the acquisition, construction, and improvements program is at $390,000,000; the retired pay account is provided $279,000,000.

The Federal Aviation Administration receives a total of $2,602,000,000 in new appropriations under this continuing resolution. The operations program funding level is $2,180,000,000; the facilities and equipment level, $266,874,000, the airport development and planning program is capped at $450,000,000 under the legislation.

Amtrak is the recipient of a total allocation of $735,000,000; $569,000,000 of which is in new appropriations and $166,000,000 appropriated earlier this year for this necessary National Passenger Transportation System. I am pleased to report that the conferees realized the wisdom of this level of spending. Anything less would have been very difficult for Amtrak to perform its responsibilities.

The Northeast Corridor improvement project is appropriated $170,000,000; redeemable preference shares, $37,500,000.

In terms of Conrail labor, the conference report provides for a transfer of $210 million from an unobligated Conrail account: $100 million for work force reduction, $85 million for labor protection payments to terminated Conrail employees, and $25 million for rail labor assistance payments.

The Federal-aid highway and highway safety construction obligations are limited to $8,000,000,000 for fiscal year 1982. The interstate transfer grants for highways is allocated $307,000,000.

The Urban Mass Transportation Administration is funded at a level of $3,578,500,000. Of the amount, $1,413,250,000 is for the urban discretionary grants program plus an additional $231,000,000 in unused carryover funds and available for the same grant program; urban formula grants, $1,366,750,000; interstate transfer grants for mass transit, $548,000,000, with Boston, Mass., receiving $125,000,000 of the total amount.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Speaker, I appreciate the work that the gentleman has done and I do not want to take much time, but I do want to ask the gentleman a question.

Is this total amount appropriated under this continuing resolution below that amount requested by the President's budget?

Mr. WHITTEN. It is below the President's budget as I understand it. It is considerably below the amount that was approved by the Senate, which I understood was satisfactory to the President. We are about half a billion dollars below the Senate reduction, so we are below what I understood to be the request.

Mr. ALEXANDER. The Congress is trying to do it again. We are adding another year to our record for appropriating less money to run the Government than Presidents wanted to spend. We are managing this even while giving the President the additional $500 million that he wants for foreign aid.

The President sent word that he wanted the $428.5 billion spending level that the Senate-passed appropriations continuing resolution contained, even though the House resolution was already below his last budget. And, he insisted we reach that figure while giving him that additional $2 billion for foreign aid, a request congressional Republicans backed him on at the expense of programs for our people here at home.

This conference report before us now is $500 million below the figure the President told us he wants. It is $7.4 billion below the Senate-approved or recommended $445.4 billion level on regular appropriations bills. It is $6 billion below the House recommended or approved $433.9 billion level on regular appropriations bills.

With the passage of this conference report Congress will have pushed its record for having appropriated less money than Presidents have told us they wanted from 37 years to 38 years since 1943.

Mr. WHITTEN. In answer to the statement, may I say that rumors are all around me, and I am sure the gentleman has heard them, too.

Mr. Speaker, I would like to say to my colleagues that this seems to be a very political year in many, many respects. But in the event that we do not support the actions of this committee, or in the event that the other body does not accept it, or in the event both accept it and it is vetoed, we would be forced to wait until such a veto occurred which would mean a further breakdown in the Government. Then we would have to act to pick up the pieces.

If we are caught in that unfortunate position because of any misunderstandings, the volume of things that could happen are unfortunate.

We brought to the floor a conference report which has the support of the conferees of both houses.

I want to call attention to the fact that if we fail to adopt this conference agreement, and the Senate accepts it, and then if it is vetoed we will have a breakdown in the Government, and we will do our best to pick up the pieces.

We brought to the House a good bill. We are below the President's request. We are below the Senate's cut. We have protected the rights of the legislative branch to determine spending priorities. We have brought out a good bill and we hope the Members will stick with us down the line and not be party to any efforts that might result in a breakdown of the operations of Government.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. In answer to a question a couple of minutes ago, I think some Members might have been a bit misled.

As I understood the question and the answer, it indicated that a department, for example, the executive branch would be able to make 2-percent cuts across the board.

Now as to the Commerce, the part I handle, for example, we made 43 individual cuts to arrive at an equivalent of 2 percent, but they will not be able to make cuts across the board on every program. I believe that is the way it is with 10 of these bills.

Mr. WHITTEN. I think that is true. We wrote into the act that any reduction had to be proportionate so that the executive could not eliminate an activity.

In the past there have been instances where they have claimed that right but where I believe they do not have such authority to make such reductions and ignore the legislative directive. This resolution requires the cuts to be applied proportionately.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Illinois.

Mr. YATES. That is certainly true in the Interior bill as well, which has been approved by the conference report and which has been approved by this House. The conference report that was approved provides for a 2-percent reduction across the board on the items that make up the Interior bill, and we have already in the conference decided where those cuts should be.

The 2 percent will be applied correspondingly to those cuts.

Mr. Speaker, the continuing resolution includes the conference report for the Department of the Interior and related agencies agreed to by the House on November 12, 1981, but does reduce the bill by 2 percent. The decrease of 2 percent reduces the bill by approximately $150 million from the conference report total of $7,541,651,000. The decrease has been applied evenly to all activities, subactivities, or projects within the various appropriation accounts. In instances where construction or land acquisition projects cannot be carried out at the reduced level, it is the intention of the managers that reprograming procedures be followed to permit such projects either to be accomplished or to eliminate them.

The conferees agree that when the Senate takes up the conference report on the Interior and related agencies bill, across-the-board reductions will be made to conform the bill to the level of the continuing resolution. At that time, the reductions and the levels to which they are controlled will be presented in detail.

Mr. WHITTEN. May I call attention to one other fact; our resolution does not change anything that affects the right under the law of a Chief Executive to defer or rescind. So if there are any items in this resolution or in any bill that we pass, that the Executive may differ with he retains the right in law to send up a request for a rescission or for a deferral.

I plead with the Members for their sake and for the sake of the Congress of the United States to stand with the committee.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from California.

Mr. PANETTA. To clarify the figures again, what the House passed initially in the continuing resolution was $430.8 billion; is that correct?

Mr. WHITTEN. That is right.

Mr. PANETTA. What the Senate passed with the Baker amendment reducing the amount there by roughly 4 percent, the figure on the Senate side was $428.4 billion?

Mr. WHITTEN. That is correct.

Mr. PANETTA. What the conference agreement has come to and what the gentleman brings here is $427.9 billion?

Mr. WHITTEN. That is right.

Mr. PANETTA. Which is half a billion dollars less than what the Senate had proposed in terms of reductions?

Mr. WHITTEN. That is right; and it leaves me hard to understand any basis for either recommittal or for failure to sign the bill, unless it is because we have retained in the legislative body the right to exercise our constitutional right to determine what the money goes for.

Mr. PANETTA. I might say it is not only below the Senate target as proposed by Senator BAKER, but it is far below the budget resolution target which was established by the Congress.

Mr. WHITTEN. Yes.

Mr. MITCHELL of Maryland. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. I thank the chairman for yielding.

In this printout that is being distributed, it appears to me at first reading that two areas sustained the burden of the cuts. Labor, Health and Human Services, from this reading is down significantly and also HUD.

It looks like the bulk of the cuts were sustained in two programs, although the gentleman said that there was a 2-percent across the board.

Mr. WHITTEN. No; there is not a 2-percent across-the-board cut, entitlements were exempted. In rough figures we determined what the equivalent of 2 percent would do in discretionary programs. If the gentleman looks at it we applied a 2-percent reduction, but we cut by item.

Mr. MITCHELL of Maryland. Am I right in assuming, if the chairman will continue to yield, that these two programs did sustain the heaviest cuts; is that correct?

Mr. WHITTEN. They did sustain cuts, and as the gentleman knows we were under heavy pressure to make more reductions. To the degree that we could, we protected those agencies, but the total volume that is in those two areas is huge. So the dollar amount would appear large, but percentagewise it was treated as fairly as we could under the conditions we were faced with.

Mr. MITCHELL of Maryland. I thank the gentleman. He does not quite resolve my problem.

Mr. MONTGOMERY. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. I thank the gentleman for yielding and I commend the gentleman on the hard work he and the committee and staff have done.

Mr. Speaker, as chairman of the Veterans' Affairs Committee I take this time to convey to my colleagues a discussion I had a few minutes ago with the distinguished chairman of the Subcommittee on HUD-Independent Agencies (Mr. BOLAND), with respect to the appropriations for Veterans' Administration health-care staffing. Section 5010(a)(4) of title 38, United States Code, requires the Director of the Office of Management and Budget, after the enactment of each law making appropriations for the Veterans' Administration, to provide the agency with authority to employ under the three health-care accounts the number of employees for which funds have been appropriated.

The accounts are the medical care account, the medical and prosthetic research account, and the medical administration and miscellaneous expenses account. I would also note that section 601 of the Veterans' Disability Compensation, Housing, and Memorial Benefits Amendments of 1981, Public Law 97-66, makes clear that the obligation of the Office of Management and Budget Director to provide those employment levels exists with respect to laws, such as continuing resolutions, making appropriations for periods of less than 1 full year.

Since VA appropriations laws do not themselves specify employment levels for that agency, it is important that the legislative history of any law making appropriations for the VA be clear and specific as to the number of employees for which appropriations have been made in these accounts. I asked Mr. BOLAND what employment levels for the three medical accounts are intended to be funded under the conference agreement. He stated that with respect to the medical care account, funding is provided in the pending measure at the same annual level as was provided in the first continuing resolution for fiscal year 1981, Public Law 97-51, and the employment level intended to be funded under that account during the period covered by this resolution is the same, 186,287 full-time equivalent employees (FTEE's). It should be noted, Mr. Speaker, that this figure does not include the so-called common services adjustment FTEE's. Those FTEE's are in addition to the 186,287 according to Mr. BOLAND.

With respect to the other accounts, the medical and prosthetic research account and the medical administration and miscellaneous operating expenses—MAMOE—account, the overall

funding levels are somewhat lower than was provided under the first continuing resolution. The funding level provided in this resolution for personnel under the research account is thus also reduced to some extent as I understand. Specifically, according to Mr. BOLAND, funds appropriated for the research account are intended to be made for 4,113 FTEE's.

However, despite the reduced level of the appropriations being made for the MAMOE account, no reduction is intended to be made in the personnel area. Thus, in this resolution, according to my understanding, funds are being appropriated for the same FTEE level as in the first continuing resolution, that is, 866 FTEE's.

Mr. Speaker, when I inquired of Mr. BOLAND as to whether it is intended that the overall reduction in appropriations accounts provided for in the pending measure is intended to have any effect on the personnel funding levels for the latter two VA health-care accounts, research and MAMOE, he stated that, to the maximum extent practicable, the reduction is intended to have no effect on appropriations for personnel under those accounts. Any funding reduction in the research account or MAMOE account is intended to be made primarily from nonpersonnel budget categories.

Finally, Mr. Speaker, recognizing that the personnel levels that we have discussed up to this point were based on personnel costs prior to the October 1981 Federal civilian pay raise going into effect, I have also discussed with Mr. BOLAND the effect, if any, the pay raise costs would have on the levels of employment intended to be funded under this resolution. According to the distinguished gentleman from Massachusetts (Mr. BOLAND) with regard to personnel costs in this or any other appropriations act, pay raise costs have no effect whatever on the number of FTEE's for which appropriations are being made in the three VA health-care accounts. The intention is that the additional personnel costs for the number of FTEE's that I have previously specified will be met though some combination of deficiency apportionments in anticipation of a supplemental appropriation and the use of nonpersonnel funds.

If I may make two additional comments, Mr. Speaker, as my colleagues are aware, the medical care account is exempted from the scope of the reduction provision contained in the pending measure. In addition, it should be noted that the agreement reached with the other body in the VA appropriations will provide $4 million to fund the scholarship program for nurses in fiscal year 1982.

Mr. Speaker, I regret the very able chairman of the Subcommittee on HUD-Independent Agencies is not on the floor at this time. He is extremely busy with matters other than the Veterans' Administration. But I have had an opportunity to discuss these matters with him on the floor earlier and am most grateful to the gentleman from Massachusetts for the clarifications he has provided. Based on my analysis of VA operations under the three health-care accounts, the personnel levels that he has specified would be adequate for the continued effective functioning of the VA's Department of Medicine and Surgery.

I would also like to point out that the distinguished chairman continues to be most cooperative with us on the Veterans' Affairs Committee and he continues to evidence a deep concern for the well-being of our Nation's veterans. I deeply appreciate his outstanding attention to the needs of all veterans.

Mr. CONTE. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. MICHEL).

□ 1415

Mr. MICHEL. Mr. Speaker, it is only at the end of a session or near adjournment time, I guess, where we would begin by wishing each and every one of you a happy Sunday afternoon. It seems strange that the Government could come to a halt and the Congress reach an impasse over spending issues that do not amount to any more than 1½ percent of the total Federal budget for this fiscal year. It can happen, though, because this conference report is getting to be more a product of symbolism than substance. It represents more a conflict of principles than of programs or their costs. No one seems to agree on the numbers of their impact. They have been imprecise, unpredictable, and unstable; but then we are not accountants around here. We are policymakers and the bottom line here is the reduction of Government spending and, therefore, the reduction in size and scope of Government itself. Therein lies our conflict.

Now, I have been striving all through this process over the weekend to achieve a suitable resolution that the President would sign. I have attended most of the conference meetings in company with my colleagues. Unfortunately, because I am no longer a member of the Appropriations Committee where I served for 20 some years, I did not have a voice. That was rather frustrating, for at times I would like to have spoken up, particularly since here in the House less than a week or so ago we offered a 5-percent across-the-board cut making some meaningful reductions which lost by only 12 or 13 votes. That seemed to say something about the position of this House on making some really substantive cuts.

During the conference my friend, the gentleman from Massachusetts (Mr. CONTE) was preempted by a Member of the other body from offering a 4-percent across-the-board amendment that would also have made substantial reductions in spending.

Then we had the proposal of the gentleman from Mississippi (Mr. WHITTEN) which cut the reduction to only 2 percent across the board. That is what the conference adopted. In my view, that was not sufficient.

One of the main problems is that the continuing resolution shows reductions below the budget which simply will not hold up.

If you take, for example, medicaid alone, in this resolution it is funded at a level of $938 million below the President's budget. The additional funds thus will almost certainly have to be provided in a supplemental.

The guaranteed student loan program is $633 million below the President's budget. It also will have to be made up in a supplemental.

Now, if you take those two, plus military pay and all the rest, you come up to a March supplemental that will be in double digit figures.

We are not kidding anybody with these phony figures around here. We are going to have to face up to the real ones sometime or another or come back and face the music in the spring.

The conference report is over the President's budget in budget authority, in eight domestic appropriation bills. Let me tick them off to you:

Agriculture, $812 million plus.

Commerce, State, Justice, and Judiciary: $383 million plus.

Energy and Water: $375 million plus.

HUD: $1,626,000,000.

Interior: $1,104,000,000.

Labor, Health and Human Services, and Education: $1,041,000,000.

Transportation: $690 million.

Treasury and Post Office: $482 million.

Now, as I said, the President has not had an opportunity at all to express himself on those individual bills, most of which would be vetoed, and I submit sustained by this House of Representatives on the strength of the kind test votes we have had here in this body. I do not believe we should be writing into a continuing resolution levels of spending much higher than what the President would accept if the normal appropriations process ran its course.

Now, I had intended when I came to the floor here to offer a straight motion to recommit, not with any feeling that it would automatically pass or be adopted, but that we could at least give the President the flexibility of getting a sufficient number of votes in support of that motion to recommit to sustain a veto if that was his choice.

That is the way I came to the floor this morning.

Now, in view of the conversation I just had with the President within the last 10 minutes, we may want to take a different course.

I note that the distinguished chairman of the Appropriations Committee made mention in the conference that he had waiting in the wings some form of continuing resolution covering some shorter span of time. Let me advise you that the President told me quite frankly that there is no way he can sign this continuing resolution in its present form. He did indicate and suggest the possibility of a simple 15-day extension of the current continuing resolution, so that we might have that opportunity in the interval period of time to develop something which he might find more acceptable.

The SPEAKER pro tempore. The time of the gentleman from Illinois has expired.

Mr. CONTE. Mr. Speaker, I yield 2 additional minutes to the gentleman from Illinois.

I hope that the chairman will ask for another half hour. We are getting so many requests, we are down to the wire here.

Mr. WHITTEN. We have an agreement about time on this side.

Mr. CONTE. Would you give our leader a couple more minutes? I have given him 2.

Mr. MICHEL. I might make the observation before yielding to the distinguished majority leader that I told the President that it would be a good thing for him to advise the Speaker, and I am sure that in that period of time between when I talked to him that he has, indeed, called the Speaker.

I personally think the President's suggestion is a reasonable one that would keep the Government operating, but I would be happy to yield to the distinguished chairman of the committee at this juncture.

Mr. WHITTEN. Mr. Speaker, I made the statement earlier, and I have the highest respect for the President as an individual and as my President; but may I say, the legislative body is a coequal branch, we will have to wait and see what he does. We cannot be reacting to these things and waiting and delaying to see what the executive branch wants us to do.

I understand that the Budget Director is saying that these figures do not fit and they are not satisfactory; but I would like to repeat to the gentleman in the well, this resolution is $900 million below the budget request. It is $600 million below the Senate request.

What does the gentleman expect us to do? How much below the President's budget are we expected to go?

Mr. MICHEL. Would the gentleman suggest that there would be no request for significant supplementals next spring?

Mr. WHITTEN. We will have to wait and see what happens.

Mr. MICHEL. Yes, that is exactly right, we will have to wait and see and they will be significant numbers. How long do we want to put off the day of judgment?

Mr. WHITTEN. I say for 2 days we have been over there and the other body did not have any numbers at all to work with. They asked Mr. Stockman down, according to the press, but his figures were different each and every time. Our figure have been carefully compiled and were used finally by the Senate when we got together. Our figures clearly show what I am telling the gentleman.

Mr. MICHEL. Well, I understand our problem on appropriations. We deal in budget authority rather than outlays and when you get into that controversy between those two, I am just as frustrated, as I am sure most Members of this body are, over the failure of our being able to have one uniform base line from which all of us are talking the same tune.

Somehow, to make this budget process work correctly, we are going to have to work to achieve a common base.

I would be happy to yield to the majority leader, if he is asking me to yield.

Mr. WRIGHT. Well, I am really very much amazed and I am just deeply troubled by what the gentleman has just said.

Mr. MICHEL. Well, the gentleman knows I was operating from good faith. I had no reading whatsoever, but there was always a good possibility that the President would veto this resolution.

Mr. WRIGHT. Now, the gentleman was present throughout most of yesterday and the day before. The gentleman knows that Senator BAKER, the majority leader in the Senate, was present. We had every indication and every reason to believe that the President was satisfied with every one of these figures, save one. He wanted a billion dollars or a billion and a half dollars lower in foreign aid.

Mr. MICHEL. No; there was never any indication that that was the case.

Mr. WRIGHT. Now, Mr. Stockman was there. There was never any hint that there was anything wrong with the figures that were coming out.

These figures have a great deal more integrity than some of the figures that were offered to this Congress earlier this year by the executive branch.

Mr. MICHEL. Well, I want to say to the gentleman that when I fashioned my 5 percent across the board, I made the point that I had gone to our own Committee on Appropriations to fashion those figures, because personally I felt comfortable with them all through the years which I had to deal with them.

I think we have a highly professional staff on our committee and certainly would want to do nothing but to applaud their efforts over a period of years. But there was still a question of what base was used and what the outlay impact was, and we did not have this information last night. The fact is that the domestic bills are funded at a level in this resolution some $6.5 billion or more than what the President proposed in his budget.

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, for 2 days we have met on this resolution and I have been with my associates, including the minority leader, the gentleman from Illinois (Mr. MICHEL).

As our majority leader said, we have cooperated in every way that we could with the budget bureau, with our President, with our colleagues on the left and our colleagues on the right.

The only thing that I can say is that mention has been made about the 5-percent cut across the board which was voted on in the House. It did not carry. The House turned it down; but I want to repeat that after 2 days and 2 nights we have agreed on a good resolution and we thought that the President would sign the bill. One major proposal was a request made over there that we add $2 billion to foreign aid and then go back and make further cuts in domestic programs. We turned that down.

I thought we were wise not to cut more from the American people. I said so then. I am not going to be a party to increasing foreign aid in a bill that originated on the Senate side at the expense of the American people.

Now at the same time, where the President's problems have arisen resulting from Mr. Sadat's death, I went out of my way to provide an additional $500 million, which I understood was adequate to help our President meet his problems.

So we have brought you a good bill, but we must work together because our Government is like the troika, the three-horse Russian chariot. If we do not pull together, we do not get anywhere.

I want to say here and now that we would have gotten through with our conference, in my opinion, in one-fifth the time if we had not had our colleagues on the other side consulting with Mr. BAKER or Mr. Stockman.

I hope to call the President when I feel I should. I hope he will call me when he feels he should, but if the legislative body ever gets to where it has to call the Executive about what it can do, the horses are not pulling in the same direction.

So whatever he feels that he should do, I feel that he should do it; but we should wait and see what he does and reserve the right to the Congress to

discharge its own functions in its own way, because we are right.

Mr. WATKINS. Mr. Speaker, would my chairman yield?

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Oklahoma.

Mr. WATKINS. Mr. Speaker, I would like to ask the chairman, did I understand correctly that the problem in this conference is that the President is asking more for foreign aid for foreign countries at a time when he is cutting the Farmers Home Administration, the elderly programs, and many other things, did I understand that correctly?

□ 1430

Mr. WHITTEN. The gentleman could have drawn that conclusion. What really happened amounts to that. The majority leader, Senator BAKER, in the Senate, favored adding $2 billion to foreign aid, and in his motion to cut 4 percent, he reduced domestic programs.

Mr. WATKINS. Basically, the conflict is the President wants more foreign aid in this continuing resolution.

Mr. WHITTEN. I cannot put words in his mouth. I am just telling the gentleman that is what happened. They did have that problem on the Senate side. We refused to go along.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Mississippi.

Mr. LOTT. Mr. Speaker, clearly in the conference that went on last night there were a lot of other issues other than foreign aid. In Labor-HHS there were a number of issues in dispute and considered. Would the chairman confirm that?

Mr. WHITTEN. The gentleman is correct. And I made the statement that the foreign aid increase of $2 billion was favored by the majority leader in the Senate. That is as far as I can go.

● Mr. DERWINSKI. Mr. Speaker, the existing ceiling on Federal executive pay is a problem for effective pay administration. Because there is a cap on executive pay and because the salaries of General Schedule employees increase each year, we now have a situation where there are approximately 46,000 employees functioning at eight different levels of responsibility, but they all receive the same salary of $50,112.

Understandably, many middle-managers and executives are reluctant to accept promotions when there is no additional pay, but that is only one part of the problem. It is becoming increasingly more difficult to attract and retain highly qualified personnel, particularly in such technical fields as engineering, science, and medicine.

Since March 1977, our senior officials in the executive branch have received only a 5.5-percent salary increase. In that same period, the Consumer Price Index has increased nearly 57 percent. It also is worth noting that in that same period Federal annuities have increased 42 percent, private sector pay 36 percent, and private sector executive salaries 49 percent. Largely, for those reasons, 67 percent of the career employees at the pay ceiling who were eligible to retire exercised that option.

If we are to arrest the erosion in the quality of our top Federal managers and executives, we have to offer them some incentives. We cannot afford to continue to lose the employees who have major responsibilities for Government administration.

On another subject, I am strongly opposed to any increase in pay for Members of the House and Senate. I supported the move to lift the limit on outside income, but I believe that the drive for legislative economy in Government would be contradicted by any increase in fringe benefits or salary for Members of Congress.●

● Mr. GAYDOS. Mr. Speaker, the administration's first round of budget cuts passed through the House with almost all questions unanswered because the ruling coalition was in no mood to answer, and now we are pressed for deeper cuts across the board.

It is time for questions, and some answers.

Is the second round a problem of economics or of politics?

Well, nobody said we needed to go as far as round 2 goes until Wall Street vetoed the administration's economic package; nobody even mentioned a second round until it became clear that what the administration promised was not going to happen.

So, it has all the trappings of a political problem.

Therefore, round 2 has little to do with industrial production, demand, investment, reinvestment, efficiency, incentive or disincentive. Those are economic problems.

It seems to have a lot to do with stalling for time, setting up strawmen, and avoiding embarrassment. These are political problems.

I do not pretend outrage at this, Mr. Speaker, because all leadership must have the latitude to maneuver toward goals, but I do think that what is going on now should be pointed out clearly.

This is the point at which Congress has an obligation to put aside unthinking enthusiasms and stand up to pressures created by masterful public appeals. It is the point at which we must begin sorting out what works from what does not work so that effective things may be preserved.

Among the things that work must be listed the Occupational Safety and Health Administration (OSHA) and the Mine Safety and Health Administration (MSHA).

I do not contend these agencies have been popular.

I do claim that they have been effective.

MSHA's efforts reduced miner deaths in 1980 to a 10-year low of 236, for example. Mining deaths are down 44 percent from the days before good safety regulation.

Since OSHA's establishment, the death rate among all workers has fallen 28 percent, according to the National Safety Council.

Even though the work force has grown by 22 percent since OSHA was established, we have a reduction in the total number of deaths of 6 percent.

Had the pre-OSHA death rate for all workers held true during 1980, there would have been nearly 17,500 deaths on the job. The Council reported there were 13,000.

MSHA and OSHA met their mandates to reduce death in the workplace; and this, not popularity, is the basis on which they should be judged.

Yet a second round would rip away, without the exercise of any judgment the enforcement and training programs that have brought about these reductions.

And it would sweep them away despite the fact the second round cuts are such a small percent of the $40 to $65 billion deficit that the number cannot be found until you move four places to the right of the decimal point. To my mind that is too far to the right to have any relationship to the problem, even a political one.

Furthermore, even the administration's managers at the Department of Labor acknowledge that these reductions are big ones in relation to the work these agencies will be able to do, and that the cut will be of muscle and bone, not fat.

Secretary of Labor Raymond Donovan has told subcommittees of the Congress what will have to be cut.

For OSHA it includes the elimination of:

Nine million dollars for the new directions grants program that benefits management, labor, and academia, and fosters safety and health training; and another $11 million in contracts, acquisition of technical equipment and grants;

One hundred and sevety-nine jobs in Federal enforcement, about 10 percent of the whole, which in turn means 3,500 fewer inspections and 3,000 fewer chemical samplings;

And about 258 positions overall.

For MSHA it means:

Five hundred fewer employees, which is a scattering of a highly trained and effective work force that will not be easily reassembled;

A shorter work week for those who remain;

A trust-me program for correcting dangerous conditions when inspectors find them; the administration calls it "self-certification of violation abatement."

And a 10-percent reduction in the number of inspectors in mines.

Meanwhile, the real goal of all this budget and tax cutting is supposed to be increased mineral and industrial production.

Success here would mean more miners in mines, particularly coal mines, the most dangerous, and more workers in the factories, foundries, and mills.

Meanwhile, we have reduced, and are asked to reduce further, the provision made for worker safety and health because the people demanded it.

Will these cuts mean we can expect the once-shrinking death rate in our factories and foundries to rise as activity increases and enforcement decreases?

With more miners in the mines, particularly coal mines, the most dangerous, and less attention given to perfected and proved enforcement, what will happen to the truly successful 44-percent reduction in mine deaths? Can we grimly anticipate self-certified disasters and roof falls?

The United Mine Workers are so concerned about the situation that President Sam Church has raised the possibility of a safety strike.

So this too is a problem, although not of the same political nature as the one brought on by an overgenerous tax cut, which caused a bigger than expected deficit, which caused the Wall Street veto.

In the context of the budget and the deficit, some who helped plan the economic program now are talking about "revenue enhancements" because they need more tax income; it is a way of avoiding the mention of their tax cuts and tax increases in the same fiscal year.

What term will their phrasemakers dream up to disguise the increase in the deaths in the mines and factories and foundries?

I agree with those who would call it needless tragedy.

Such an increase would be the effect of a cause we should understand now—an unreasoned attempt to avoid political embarrassment.

OSHA and MSHA work, and this is the point for Congress to step in to see that they continue to work.●

● Mrs. SCHROEDER. Mr. Speaker, as chairwoman of the Subcommittee on Civil Service, I am acutely aware of the problems caused by the continuation of the pay cap. I am also aware of the fact that our employers, the taxpayers, do not think any of us, Member of Congress, Cabinet officials, or career civil servants, deserve a raise. I am also aware of the fact that the conference committee has presented us with another one of their familiar packages, containing both justifiable changes and ridiculous boondoggles. For these reasons, I must oppose the pay raise.

So the record is clear, let me list some of the problems with the pay cap. One, the cap has resulted in compression, which means that four, five, or six levels of agency management are paid the same amount of money. This is deterimental to management. It also makes it hard to convince employees to take promotions and greater responsibilities. Two, since retirement payments are adjusted for the Consumer Price Index and salary is capped, we pay people more to retire. When someone retires, we have to pay him both as a retiree and his replacement as an employee. So, the taxpayer pays twice. Three, the basic concept behind the Civil Service Reform Act of 1978 was that pay was supposed to be based on performance. The Senior Executive Service and merit pay were both established on this idea. The cap, obviously, defeats this purpose and undermines civil service reform. Four, capped pay means the best leave Government and recruitment becomes more difficult.

Yet, the package contains not only the lifting of the cap for career civil servants, but also raises the pay of everyone on the Executive Schedule, including Cabinet Secretaries, and Members of the House—but not of the Senate. Further, it makes the limitless tax deduction for Members of Congress retroactive to January 1. Obviously there is something a little bit hokey about a pay raise for Members of the House, but not Senators. The retroactive application of the tax deduction will make Members of Congress and corporations the two tax-free entities in the country. The whole deal smells funny and my constitutents are not going to buy it.

The taxpayers have not been convinced that any of us deserve a raise. I think they can be convinced, but only one person has the clout to do that. President Reagan not only could sell a pay raise, he also has the organizational responsibility to do so. The executive branch is his. Those under the cap are his employees. If they need a raise, commonsense and decency suggest that the President should ask for one. So far, he has not done so. He has sent representatives to do so. Yet this issue is sufficiently controversial and public for the President to use some of his prestige to argue for a raise.

I do not intend to vote for a pay raise until the mood of taxpayers changes. President Reagan is the one person who can change that mood. It is time for him to stop playing coy and start the selling job that is needed.●

● Mr. JEFFORDS. Mr. Speaker, although I will vote for the conference report on the continuing resolution, I feel that overall it was a reasonable attempt to provide additional cuts; I will vote with serious reservations.

My most serious reservation was in the employment training programs. I have set forth below language a table that illustrates how drastic the cuts are that were made this year. I intend to bring this serious matter to the attention of the next set of conferees, as I expect this conference is not yet over. I would hope that in view of the rising unemployment in America in general, and of our youth in particular, that they will reconsider these horrible cutbacks.

Employment and training, title II-A, B, and C: 1981 level, $2,101 million; 1981 reconciliation, $1,430.8 million; conference report $1,176 million.

CETA, title IV-A: 1981 level, $825 million; 1981 reconciliation, $576.2 million; conference report, $194 million.

Mr. Speaker, I sincerely hope that in the next conference meeting this grave situation will be rectified.●

● Mr. McHUGH. Mr. Speaker, I would like to point out to my colleagues that this conference report maintains the integrity of some important nutrition programs. The conference agreement on the continuing resolution reaffirms our national commitment to supplemental feeding of women, infants, and children through the WIC program and the commodity supplemental food program (CSFP).

The resolution maintains without additional cuts the funding levels for WIC and CSFP provided by the conference agreement on the fiscal year 1982 agricultural appropriations bill (H. Rept. 97-313). The resolution provides $942 million for WIC, which must be combined with fiscal year 1981 carryover funds and fully used during the current fiscal year to bring overall fiscal year 1982 average participation as close to 2.2 million persons as possible. As a result, the Secretary must restore WIC participation to the 2.2-million level promptly and then maintain it at this level. The resolution provides $31 million for CSFP.

The resolution also incorporates the directions in the appropriations conference agreement that one-quarter of the $942 million be allocated to States promptly at the beginning of each fiscal quarter. Since the beginning of the first quarter is behind us, all remaining first quarter funds—about $145 million—would have to be allocated immediately upon enactment.

This immediate allocation is needed to avoid possible closings of many WIC programs shortly after November 20. Any such shutdown of a WIC program or any caseload reductions would clearly be contrary to the joint resolution. Consequently, if apportionment of funds is required before the funds are allocated to States, the apportion-

ment must be done immediately in order that the allocations can be readily dispatched to the States. It is clear that any interruption in WIC funding would not be consistent with the resolution.

I am also pleased that the conferees included a provision regarding a deferral or rescission in the WIC and CSFP programs. The provision specifies that the program must be operated at the funding level and in the manner provided for by the resolution; that is, at a participation level of close to 2.2 million, unless and until such time as a rescission or deferral is officially transmitted. In addition, the provision specifies that a rescission or deferral may only be transmitted at a time when Congress is in session and is able to act on such a request. A deferral or rescission for WIC or CSFP may not be transmitted while Congress is out of session. Similarly, any deferral or rescission transmitted while Congress is in pro forma session or when Congress is in the final days of a session prior to an adjournment sine die will have no effect until such time as Congress reconvenes in a regular session. This assures that no deferral or rescission regarding these programs shall take effect until such time as Congress can expeditiously consider and respond to the matter. As a result, if a deferral or rescission is requested when Congress is out of session for its Christmas recess, or in the final days before a recess begins, the reduced funding levels sought by the administration would not take effect until Congress returned from its adjournment.

In addition, the conference report requires that during any time in which a rescission or deferral is in effect, the Secretary must allocate States enough funds to maintain current participation. The first continuing resolution required the maintenance of participation levels, and while the administration did submit a deferral earlier this month for the WIC program, it did so in such a manner that current participation levels—September 1981 levels—were maintained. The conference report takes note of this fact, and requires that sufficient funds be allocated so that participation levels are maintained during any future deferral or rescission. In other words, only that portion of the funds appropriated which are not required to maintain September 1981 participation levels may be withheld during the period that a deferral or rescission may take effect.

Finally, I am grateful that the conferees have noted that no withholding for these programs is anticipated. These are excellent programs. They have a proven track record. They deserve the strong congressional support that has been exhibited all year long and is demonstrated again in this joint resolution.●

● Mr. FRENZEL. Mr. Speaker, it is not unusual for the House to find itself in the situation that confronts us today. We have done it before, and we shall undoubtedly do it again.

The impasse is not entirely of our making. There are at least two other major players in this game; namely, the Senate and the President. Each has strong feelings about Federal spending for fiscal year 1982.

Our process is designed to delay important decisions until the last minute, and more often than not, it results in at least a temporary stalemate.

On this particular stalemate, there are more sticking points than usual. The disagreement over the various figures used by various parties to the dispute is a good case in point. The administration thinks the resolution is more expensive than the House managers claim. I agree with the administration.

The Appropriations Committee uses budget authority, while the Budget Committee and the administration use outlay numbers. The Appropriations Committee, in addition and as usual, has failed to fund salary increases, principally for military, which it knows will have to be paid. Moreover, it reduced mandatory entitlement funding items like medicaid, which also will have to be paid.

Obviously, the committee, in bringing us this resolution, is not telling us much if anything, about the supplemental appropriation that will be needed next year to cover those wage expenses and those entitlements. I do not know whether it will be $10 billion or more, but I do know it will be huge.

That big, additional appropriation is part of the problem that worries the administration. It worries me, too. Our outlays this year are clearly going to exceed by a substantial amount the figure we approved in the first budget resolution. For that reason, I shall support the threatened veto, if it is in fact, cast.

It is a little difficult to sort out the various figures. Nonetheless, it is clear that our spending is out of control again, and our deficit for this year is likely to be more than twice the $42.5 billion we voted for in the first budget resolution. That means we must make more reductions.

I urge a vote for the motion to recommit so our conferees can make more careful reductions. If that fails, I urge a "no" vote an the continuing resolution.●

● Mr. SMITH of New Jersey. Mr. Speaker, I rise in opposition to the continuing resolution conference report and cite two principal reasons for doing so.

First, I object to the inclusion in the continuing resolution of a substantial congressional pay raise, a raise of almost 5 percent for Members of this body. At a time when we are struggling to reduce Federal expenditures, I believe we are sending precisely the wrong message and signal to the people back home if we adopt this pay hike.

Second, Mr. Speaker, I cannot accept the additional cuts to health and human services and educational programs as the conference report would do. It is my understanding that the conferees agreed to slash an additional $780,730,000 off the House-passed HHS-Education appropriations measure. I believe this action to be ill advised and not in the best interests of those dependent on the myriad of social programs that come under the auspices of these Federal agencies.●

● Mr. HOLLENBECK. Mr. Speaker, I rise to note my concern over circumstances surrounding House Joint Resolution 357, the continuing resolution for fiscal year 1982. A resolution of this type is necessary because the Congress has been unable to complete final action on a number of appropriation bills. I am deeply concerned over the fact that with greater frequency Congress is addressing spending matters through continuing resolutions and, in reality, ducking its responsibility on spending public moneys.

I would like to point out that expeditious passage of a resolution or an extension of the current measure is essential because it becomes technically impossible for the Federal Government to open its doors. In addition, some strain will be placed on Federal workers who are threatened with not receiving paychecks. I, for one, place part of the blame for this unfortunate situation on the vacillating viewpoints emenating from the White House. Over the weekend, original indications were that the conference agreement was acceptable to the President. As a result most Republican conferees from the House and all from the Senate signed the conference report which adopted a continued funding plan. However, yesterday we learned that the President was threatening a veto. That threat has now become a reality, even though the spending figures in the measure are substantially those urged by the President at one time or another.

Mr. Speaker, this is not a very commendable record of performance. I firmly believe that the public will soon tire of the buck passing games the executive branch and Congress are playing. As the first session of the 97th Congress draws to a close we see Government by default, default caused by inconsistency, inaction, and constantly shifting direction. Again, I view this last minute resolution as a prime examply—a resolution necessary because of legislative inaction, largely on the part of the Senate, which until recent-

ly had not even passed one appropriation measure. Mr. Chairman, one might observe after nearly 5 years in the House watching the Budget process that my Senate colleagues sometime overlook their primary responsibility to the people who elect them. And one might also observe that using the tactic of frightening public employees and those in need of Federal assistance is hardly statesmanlike or true leadership.

I supported the continuing resolution extending to December 15, 1981, the temporary spending levels. I did so with reluctance because of my above stated concerns. But I should add that I feel strongly that the December 15 date is far superior from a policy standpoint than that of February 3, 1982, as proposed by the majority. That latter date would push important decisions into a time of involvement with the fiscal year 1983 budget and other issues which could further complicate matters.

I will not, at this juncture, commit myself to a favorable vote on a further continuing resolution except to say that I will only support a resolution which is balanced and fair with regard to all segments of the budget and, most important, the public.●

RECESS

The SPEAKER. Pursuant to the order of the House of November 19, 1981, the Chair declares the House in recess until approximately the hour of 3:30 p.m.

Accordingly (at 2 o'clock and 30 minutes p.m.), the House stood in recess.

□ 1510

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 3 o'clock and 15 minutes p.m.

The SPEAKER. The gentleman from Massachusetts (Mr. CONTE) has 1 minute remaining.

Mr. CONTE. Mr. Speaker, if I could have the attention of the chairman, I wonder is there any possibility of asking unanimous consent to go for another 10 minutes, 5 minutes for the majority and 5 minutes for the minority?

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Texas.

Mr. WRIGHT. Mr. Speaker, I had thought that we might ask unanimous consent for an additional 30 minutes to be equally divided, 15 minutes to the side.

Mr. CONTE. That would be great.

Mr. WRIGHT. I do, Mr. Speaker, if I am recognized for that purpose, ask unanimous consent that there may be an additional 30 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. CAMPBELL. Mr. Speaker, reserving the right to object, I reserve the right to object to inquire first as to whether the length of time of 30 minutes is not unduly long since we are in a procedural problem as to what is going to take place. Could we not accomplish the same thing with a shorter period of time and not prolong?

The SPEAKER. In the opinion of the Chair, we are going to be here for hours. I do not think a half hour makes that much difference.

Mr. CAMPBELL. Would it be all right if I inquired?

The SPEAKER. I would tell the Members of the House that they ought to be prepared for a long session into the same hours of the night and in the morning as we went yesterday, as I read it right now.

Mr. CAMPBELL. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that there may be allowed 20 additional minutes to be equally divided, 10 minutes to the side, on this motion.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. SENSENBRENNER. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. CONTE. Mr. Speaker, I ask unanimous consent that we proceed for 10 additional minutes.

I have so many requests on my side that I would ask for 5 minutes for the majority and 5 for the minority.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER. The Chair recognizes the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Speaker, I am privileged to represent in this Chamber one of the most famous tourist attractions of the world, Disneyland USA. When I came here 3 years ago I was firmly convinced that make-believe was at Anaheim, Disneyland, and this was reality. I can tell you my initial perception was all wrong. My friends, it is just the opposite. This is make-believe.

We are about to consider the adoption of a proposal that will fund the functions of the Central Government for 8 months. If we approve this proposal, what we are doing is abdicating our responsibility as Members of the 97th Congress to establish levels of spending for the programs essential to this country to the level of those spending levels which were adopted by the 90th, 91st, 92d, and all through the 96th Congresses.

□ 1520

Now, as for you, my friends, I am not about to do that. There was an election in November 1980 when the people of this country said they wanted a different direction. And I think we should give them that different direction. And how do we do it? We have a President downtown who has the courage of his convictions to say we must rein in irresponsible spending and the duration of the continuing resolution.

What really is at the bottom of this whole drill we are going through? It is very simple. The barons of the Congress of the United States are determined that this President will not have the ability to lower levels of spending by this Congress.

These barons say, "Who is he to suggest that the levels of spending should be lowered?" Why else would these barons want to remove from the President's consideration the review of appropriation bills which is his responsibility?

A proper duration for this continuing resolution would be 15 to 30 days. Anything beyond this short period is an effort to frustrate the efforts of a determined President to closely review individual appropriation bills and veto them where they exceed reasonable limits.

While the final version of the continuing resolution is economically unacceptable because it fails to make the additional budget cuts necessary for a sustained economic recovery effort, I will leave it to others to discuss the dollars and cents of the resolution. Rather, I speak in opposition not to concentrate on the contents of the resolution, but to discuss the fact that we are considering a continuing resolution and what this means for future economic policy.

Earlier this year it appeared that Congress was reluctantly doing what needed to be done for a long time—check the rate of increase of Federal spending. The perception was created that, albeit reluctantly, Congress could invoke some fiscal discipline with the help of a determined President and a vociferous public. Through the reconciliation process a total of $35 billion was cut from the fiscal year 1982 budget. It looked as though we were finally turning the corner—a process that began with the passage of the Budget and Impoundment Control Act of 1974. The new congressional budget process was supposed to reverse the pattern of bottom-up budgeting whereby the House and Senate considered individual spending decisions in isolation and hence without regard for the impact of the total level of spending on the national economy.

The budget and appropriations processes were supposed to work together. The two budget resolutions were designed to establish upper limits and the appropriations bills were to fit within the ceilings of the budget resolutions. In this manner, rational decisionmaking would produce a final product that took into account the overall economic picture as well as the perspective of narrow interests bent on more Federal spending.

Earlier this year the whole process seemed to come together for perhaps the first time. A first budget resolution was enacted that reflected the need for spending reductions in order to reduce Federal borrowing, and in turn the level of high interest rates. Reconciliation instructions from the first budget resolution produced a package of cuts to bring the budget in line with economic reality.

Since then, however, the process has slipped—and slipped badly. The second concurrent resolution on the budget for fiscal year 1982, the final binding ceiling on the aggregate budget, was supposed to have been passed by September 15, 1981. We are now standing a full 2 months and 6 days later—and no second budget resolution. Despite that fact, the House went ahead and passed all but two of the regular appropriations bills. These bills were considered and adopted as if we had never gone through the process earlier in the year of trying to come to grips with excessive Federal spending. The cart and the horse were reversed. The second budget resolution is now a paper tiger, at best. Rather than the appropriations bills reflecting the aggregate limits of the economic needs of the Nation, the second budget resolution will merely be the sum of the individual decisions already made to date. It will be merely a formality and nothing more than that—unless we seize upon its consideration as an opportunity make a statement about spending in fiscal years 1982, 1983, and 1984.

Now we come to the continuing resolution. For the third time in this calendar year, and for the second time in the short period elapsed to date in the new fiscal year, we are resorting to a mechanism that is supposed to be used sparingly and only as a stop-gap means of funding the Government. Yet we will fund all or most of the Government with this device for the third time in calendar year 1981. The use of continuing resolutions is a shameful exercise in economic brinksmanship. It represents the last ditch attempt of the big spenders in this institution who have yet to appreciate the need for less Federal spending, rather than more. The continuing resolution is a perversion of the legislative process. It makes the consideration of the regular appropriations bills academic. It locks in high rates of spending, if only for a short period of time. No matter, the damage will have been done.

Mr. Speaker, many Members of this institution are fond of falling back on the provisions of article I of the Constitution wherein the House of Representatives is given the "power of the purse." With power, comes responsibility. With responsibility comes the duty to exercise it in a prudent manner consistent with the national interest. Passage of this continuing appropriations resolution for a substantial period of time is a fiscally irresponsible act and a dereliction of duty.

The long-term implication results from the shifting of the process back to the days when spending was not properly restrained. The nature of the process helps to shape the outcome. Failure to pass, and abide by, a restrictive second budget resolution—and now both the content and consideration of this continuing resolution for fiscal year 1982 appropriations—reveals that the 1980 election and its mandate have failed to teach the old dog of Congress any new tricks.

Once again, we have yielded to the temptation to spend other people's money without regard for the consequences of that decision. And, once again, the economy and the Nation will suffer.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, this is an unfortunate pass that we have come to. All of us who participated, even vicariously, in that conference are shocked and disappointed.

I have in my hands the signatures to the conference committee report. Every Senate Member of the conferees signed the conference committee report. All of them had every reason to believe that the President would sign it.

The President called and talked with me yesterday morning. He asked if I would help him to get a little bit more money for some of the critical, crucial needs of foreign operations. I talked with the gentleman from Mississippi (Mr. WHITTEN), to whom the President also had talked. Efforts were made to do what he requested.

In direct response to the President's request $500 million more was provided for the immediate foreign assistance needs that exist today. The House conferees stood ready, at one point, to raise that to $700 million.

Last night I was asked by a representative of the State Department if House conferees could not give a billion and a half more for foreign assistance. I said, "There is no way we could take that much more out of the domestic programs that already have suffered as much as they have. If the President were willing for the total cost of the bill to go up in order to accommodate that much more foreign aid, perhaps we could."

He called me back, after having talked with the White House, and said that would be all right, "You could raise the total if you wanted to put it all in foreign aid." That, apparently, was all right as recently as midnight.

And so today we are told that there is too much money being spent. That claim is as phoney as a $3 bill. It is just not true. There cannot be any honest apprehension on the part of the White House that there is too much money in this bill. The conference report that comes before us now, contains less than the Senate bill which the President reportedly was ready to sign. It is $427,875,510,000: That is $600 or $700 million less than the Senate bill of $428,465,319,000.

So I do not understand, unless the President simply wants the theatrics of bringing the Government to a halt. Well, let us not be parties to that.

If the gentleman from Illinois has a motion to recommit, I think he has the responsibility to place in that motion whatever it is that the President demands so that we can know exactly what he is insisting upon. And, absent that, I implore my colleagues to respect the integrity of this Chamber and of the Congress to the extent that we do not just absolutely surrender our total prerogatives, allowing the White House and David Stockman who, ironically, represents that our figures are not sufficiently believable, to dictate to us exactly what we may and may not do.

Never has that power lain with any President. Never has any President presumed to assert the right to tell Congress how much it may and may not spend on each line item. The Constitution clearly preserves that for the Congress of the United States. The very first article of the first section of the Constitution preserves those rights to the Congress of the United States.

Now, we have fulfilled those rights in good faith. We in the House have passed 12 of the 13 regular appropriations bills and have waited only for the President to give us some indication as to what he wants on the 13th. That one is the foreign assistance bill.

Eight of those appropriations bills that have been passed by this House have been awaiting action in the Senate for more than 3 months—more than 3 months. Three of them have been awaiting action for more than 2 months. How can the President imply, then, that we in the House have been less than responsible?
